

From the journals. . . .

Artificial intelligence review

Vol. 6 No. 3

Articles

Explanation-based learning: a survey

Judith Wusteman

Expert systems for database design: a comparative review

Michael Lloyd-Williams and Paul Beynon-Davies

Thinking in parallel: four steps to Parlog

Tom Conlon

Engineering applications of artificial intelligence

Vol. 5 No. 4

Articles

Towards a knowledge-based design assistant

John E. Hunt and Mark H. Lee

On the nature of fault space classification structure developed by neural networks

R. Vaidyanathan and V. Venkatasubramanian

A parallel image-clustering algorithm on the "HERMES" multi-processor structure

Fotis Barlos and Nikolaos Bourbakis

A probabilistic associative memory and its application to signal processing in electrical power systems

A. P. Alves da Silva, V. H. Quintana and G. K. H. Pang

The development of an expert system for operational use in the selection of industrial adhesives

L. G. Moseley and M. Cartwright

Using pictures in expert systems

Philip Barker

Threshold conditions of expert-system implementations to control simulated multiple flexible assembly cells

Gideon Cohen

Brief papers

An inexact inference model used in earthquake prediction

Zhuang Kun-yuan, Wang Wei, Huang Bing-shu and Xia Shi-hua

An expert system for the design of gravity-type vertical seawalls

K. W. Chau

Book reviews

Designing autonomous agents: theory and practice from biology to engineering and back

A. Kandel

Artificial intelligence from A to Z

M. J. Pratt

Artificial vision for mobile robots: stereo vision and multisensory perception

Yuan Bao-Zong

Conference calendar

Expert systems with applications

Vol. 5 No. 3/4

Articles

Chairman's Conference Report: The World Congress on Expert Systems

Jay Liebowitz

The Feigenbaum Medal

Jay Liebowitz

A personal view of expert systems: looking back and looking ahead

Edward A. Feigenbaum

Nontechnical problems in knowledge engineering: implications for project management

Diana E. Forsythe and Bruce G. Buchanan

Implementing expert systems into ongoing data analyses

John M. Long, James R. Slagle, John P. Mads, Jaideep Srivastava and The POSCH Group

A shell for signal interpretation expert systems

Kazuhiro Arai, Yoichi Yamashita and Riichiro Muzoguchi

Expert systems designed for maintenance

John Debenham

Daily output planning: integrating operations research, artificial intelligence, and real-time decision support with APL2

Kenneth Fordyce, Dale Dalton, Barry Gerard, Richard (Rick) Jesse, Richard Sell and Gerald (Gary) Sullivan

CASA: A knowledge-based tool for management consultants

Hermann Krallmann, Michael Müller-Wünsch and Ansgar Woltering

Maintenance tools for knowledge-based systems: The MAKE project

Trevor Bench-Capon, Frans Coenen

An Expertext system for collaborative authoring

Roy Rada, Weigang Wang and Alex Birchall

An expert system for selection of robot grippers

D. T. Pham and E. Tacgin

Scheduling and managing crew in the Portuguese railways

Ernesto M. Morgado and João P. Martins

Intelligent instruments and computers

Vol. 9 No. 4

Articles

Computer aided electrochemistry using ASYST.

1—Corrosion rate measurements and surface potential mapping

W. N. C. Garrard

Quality control of statistical measurements: The utility of skew and kurtosis

Wes Kolar and Ron Williams

New advances in computer modeling of chemical and biochemical data

James F. Rusling and Thomas F. Kumosinski

Multielement arrays for sensing volatile chemicals

Krishna C. Persaud and Paul Travers

New products

Calendar and courses

International journal of computer vision

Vol. 8 No. 2

Articles

Feature extraction from faces using deformable templates

Alan L. Yuille, Peter W. Hallinan and David S. Cohen

Robust model-based motion tracking through the integration of search

David G. Lowe

A theory of self-calibration of a moving camera

Stephen J. Maybank and Olivier D. Faugeras

Computation of discontinuous optical flow by domain decomposition and shape optimization

C. Schnörr

International journal of man-machine studies

Vol. 37 No. 2

Articles

Communicative acts for explanation generation

M. T. Maybury

Individual differences in the performance and use of an expert system

R. P. Will

The role of planning in learning a new programming language

J. Scholtz and S. Wiedenbeck

Communication knowledge for knowledge communication

Y. Waern, S. Hägglund, J. Löwgren, I. Rankin, T. Sokolnicki and A. Steinemann

A user enquiry model for DSS requirements analysis: a framework and case study

B. Arinze

Vol. 37 No. 3

Articles

A catalog of errors

J. M. Fraser, P. J. Smith and J. W. Smith Jr.

Empirical verification of effectiveness for a knowledge-based system

A. S. Vinze

Explanation and artificial neural networks

J. Diederich

Using temporal logic to support the specification and prototyping of interactive control systems

C. W. Johnson and M. D. Harrison

European Association for Cognitive Ergonomics

Journal of intelligent and robotic systems

Vol. 6 No. 1

Special Issue on Control of robots and manufacturing systems

Guest Editorial

J. J. Mills, O. R. Mitchell and F. L. Lewis

Articles

Robustness of adaptive control of robots

Fathi Ghorbel and Mark W. Spong

Motion control of mechanical manipulators

Kennon Guglielmo and Nader Sadegh

Robust control techniques for general dynamic systems

K. Liu and F. L. Lewis

Real-time feedback scheduling of flexible manufacturing systems

Y. H. Chen

Performance analysis using Petri nets

Alan A. Desrochers

Sensory robotic assembly of apparel at Hull University

P. M. Taylor and G. E. Taylor

Redundancy and coordination of multiple robots

J. Y. S. Luh

On the robust control of two manipulators holding a rigid object

Xiaoming Gao, Darren Dawson and Zhihua Qu

Contact control for advanced applications of light weight arms

Wayne J. Book and Dong-Soo Kwon

Calendar of events

Journal of logic and computation

Vol. 2 No. 3

Editorial

Articles

Model theorem proving: an equational viewpoint

Y. Auffray and P. Enjalbert

Logic programming and focusing proofs in linear logic

J.-M. Andreoli

The pure logic of necessitation

M. C. Fitting, V. W. Marek and M. Truszczyński

The arithmetical hierarchy over the reals

F. Cucker

Complexity results for nonmonotonic logics

G. Gottlob

Reviews

Books received

Forthcoming papers

Knowledge acquisition

Vol. 4 No. 3

Articles

Comparing repertory grids to integrate knowledge from multiple statisticians

G. M. Van den Berg, W. J. Heiser and J. J. F. Commandeur

A comparison of sorting techniques in knowledge acquisition

G. Rugg, C. Corbridge, N. P. Major, A. M. Burton and N. R. Shadbolt

A connectionist model for commonsense reasoning incorporating rules and similarities

R. Sun

KASE project toward effective diagnosis system development

D. Araki, S. Kojima and T. Kohno

Towards an analysis and classification of approaches to knowledge acquisition from examination of textual metaphor

M. A. Meyer and R. A. Paton

User modeling and user-adapted interaction

Vol. 2 No. 3

Articles

Generating tailored definitions using a multifaceted user model

Margaret H. Sarner and Sandra Carberry

Generating help for users of application software

C. Tattersall

Modeling user action planning: a comprehension based approach

Stephanie M. Doane, Suzanne M. Mannes, Walter Kintsch and Peter G. Polson
