AI communications

Vol. 5 No. 3

Articles

Towards a conceptual framework for expert system validation

Pedro Meseguer

Theme: an environment for building formal KADS-II models of expertise

John Balder and Hans Akkermans

Interviews on AI and education: Beverley Woolf and Roger Shank

Jacobijn Sandberg and Yvonne Barnard

Conference reports

Realize concrete applications of fuzzy logic in industry (April 16–17 1992, Paris)

Wolfgang Slany

Fifth generation computer systems '92 (June 1–5, 1992, Tokyo)

Alain Michard

Applied artificial intelligence

Vol. 6 No. 3

Special issue: Artificial Intelligence in Manufacturing

Articles

Concurrent design

Susan Finger, Mark S. Fox, Friedrich B. Prinz and James R. Rinderle

Redesigning for manufacturability using ReinRed

Mehmet Adalier and Costas Tsatsoulis

An artificial intelligence-based design tool for thin film composite materials

Jon Sticklen, Ahmed Kamel, Martin Hawley and John Delong

A case-based reasoning approach to automated weld-process design

L. J. O'Connor, M. S. Lan, D. R. Partridge and J. M. F. Lee

TOPS: an intelligent associate for turning operation planning

Stephen C.-Y. Lu, Allen E. Herman and Karl F. Arnold

Generating fault hypotheses with a functional model in machine-fault diagnosis

Scott Bublin and R. L. Kashyap

Artificial intelligence

Vol. 58 Nos. 1-3

Special volume: Constraint-based reasoning

Articles

Introduction to the special volume on constraint-based reasoning

E. C. Freuder and A. K. Mackworth

The logic of constraint satisfaction

A. K. Mackworth

Partial constraint satisfaction

E. C. Freuder and R. J. Wallace

Constraint reasoning based on interval arithmetic: the tolerance propagation approach

E. Hyvönen

Constraint satisfaction using constraint logic programming [ARTINT 951]

P. Van Hentenryck, H. Simonis and M. Dincbas

Minimizing conflicts: a heuristic repair method for constraint satisfaction and scheduling problems

S. Minton, M. D. Johnston, A. B. Philips and P. Laird

Arc consistency: parallelism and domain dependence

P. R. Cooper and M. J. Swain

Structure identification in relational data

R. Dechter and J. Pearl

Learning to improve constraint-based scheduling

M. Zweben, E. Davis, B. Daun, E. Drascher, M. Deale and M. Eskey

Reasoning about qualitative temporal information

P. van Beek

A geometric constraint engine

G. A. Kramer

A theory of conflict resolution in planning

Q. Yang

Forthcoming papers

Briefly noted

Data & knowledge engineering

Vol. 8 No. 4

Articles

Reducing the search space for conceptual schema transformation

P. van Bommel and Th. P. van der Weide

Addition and removal of information for a knowledge base with incomplete information

F. Dignum and R. P. van de Riet

A pictorial index mechanism for model-based matching

W. I. Grosky, P. Neo and R. Mehrotra

The knowledge base partitioning problem: mathematical formulation and heuristic clustering

T. Raz and N. A. Botten

Interval-based approach to lexicographic representation and compression of numeric data

N. Rishe

Author index of volume 8

Subject index of volume 8

Events

Vol. 9 No. 1

Articles

Combining paradigms in knowledge engineering

B. R. Gaines, A. T. Rappaport and M. L. G. Shaw

On the completeness of visual operations for a semantic data model

T. Miura and K. Moriya

The representation of rules in the ER model

D. E. Monarchi and J. R. Smith

Joining distributed complex objects: definition and performance

W. B. Teeuw and H. M. Blanken

On mapping natural language constructs into relational algebra through E-R representation

F. S. C. Tseng, A. L. P. Chen and W.-P. Yang

Events

Decision support systems

Vol. 8 No. 5

Special issue on information systems and economics

Articles

Recent applications of economic theory in information technology research

J. Y. Bakos and Ch. F. Kemerer

The demand for information technology capital: an empirical analysis

V. Gurbaxani

Some new results in testing for economies of scale in computing: 1985 and 1988 data

T. Barron

An economic analysis of interorganizational information technology

E. K. Clemons and P. Kleindorfer

A model of competing interorganizational systems and its application to airline reservation systems

W. G. Chismar and J. Meier

Contract theory and information technology outsourcing

W. Richmond, A. Seidman and A. Whinston

Calendar

Forthcoming papers

Vol. 8 No. 6

Articles

A structured methodology for developing production systems

R. Agarwal and M. Tanniru

A knowledge based decision support system for computer performance management

B. Arinze, M. Igbaria and L. F. Young

Analysis of the behavior of logic based computation for deductive databases and default reasoning

C. E. Bell and D. Y. Lee

User responsibility and exception handling in decision support systems

Z. Chen

A group decision tool for combining subjective estimates based on an optimisation approach

M. G. Singh, J. C. Bannavil and Z. J. Chen

Engineering applications of artificial intelligence

Vol. 5 No. 5

Articles

Artificial intelligence in real-time control

M. G. Rodd, H. B. Verbruggen and A. J. Krijgsman

Fuzzy simulation by an artificial neural network

Abhay Bulsari, Henrik Saxén and Andrzej Kraslawski

RELCOMP: a reliability computation tool based on Boolean and pattern matching techniques

Fadi N. Sibai

An approach to embed knowledge in database systems

Chee-Kiong Soh, Ai-Kah Soh and Kum-Yew Lai

A knowledge-based expert system for unsteady open channel flow

K. W. Chau and Wen-Wu Yang

Qualitative model-based intelligent control of a distillation column

K. M. Hangos, ZS. Csáki and S. Bay Jørgensen

A predictive man-machine environment for training and evaluating control operators

Nicholas V. Findler, Congyun Luo and Min-Hui Kuo

Neural networks for classified vector quantization of images

Cheng-Chang Lu and Yong Ho Shin

A dynamic selection algorithm for globally optimal subsets

Bin Yu and Baozong Yuan

Book reviews

3D model recognition from stereoscopic cues

Baozong Yuan

Z user workshop, Oxford 1990: proceedings of the fifth annual Z user meeting

Rein Paluoja

Innovative applications of artificial intelligence 3: proceedings of the EAAI-91 Conference

S. Parthasarathy

Conference calendar

Vol. 5 No. 6

Intelligent process control

Preface: Frontiers and challenges of intelligent process control

Ming Rao

Articles

Process modelling for intelligent control

S. Feraf-Beaumont, R. Corea, M. T. Tham and A. J. Morris

Intelligent process-control system design

Grantham K. H. Pang

Integrated distributed intelligent system for process-control system design

Ming Rao, Yiqun Ying and Qun Wang

An intelligent composite system for statistical process control

Alice E. Smith and Hulya Yazici

Application of neural networks to temperature control in thermal power plants

Xianzhong Cui and Kang G. Shin

A CMAC neural-network-based algorithm for the kinematic control of a walking machine

Yi Lin and Shin-Min Song

Qualitative, semiquantitative and interval algebras, and their application to engineering problems

Simon Parsons and Mirko Dohnal

Book review

Hybrid architectures for intelligent systems

Yan Chao

Conference calendar

Expert systems for information management

Vol. 4 No. 2

Articles

Machine learning for library monograph selection

Mark Johnston and John Weckert

Using knowledge based systems in auditing

Greg Stephens, Ian Caddy and Rodger Jamieson

Expert systems in management accounting: barriers to development

Alan Sangster

Book reviews

Modeling legal argument: reasoning with cases and hypotheticals

Heuristics

Vol. 5 No. 2

Special issue: artificial neural networks in engineering

Articles

An emergent construction of adaptive neural architectures

Jari Vaario and Setsuo Ohsuga

An approach to the traveling salesman problem by a bionic model

Hiroshii Yokoi and Yukinori Kakazu

Opening template learning in morphological neural nets

J. L. Davidson and K. Sun

CMAC-based adaptive critic learning and memory

H. Kim and C. S. Lin

Neural network approaches to estimating directional cost information and path planning in analog values obstacle fields

James K. Peterson

Fuzzy classification using set membership functions in the back propagation algorithm

B. R. Hunt, Y. Qi and D. DeKruiger

Study and generalization of cluster learning algorithm

R. Athinayanan and M. R. Sayeh

Human-computer interaction

Vol. 7 No. 2

Articles

The prevention of mode errors through sensory feedback

Abigail J. Sellen, Gordon P. Kurtenbach and

William A. S. Buxton

Human-computer collaboration

Barry G. Silverman

An assessment of written/interactive dialogue for information retrieval applications

Hans Brunner, Greg Whittemore, Kathleen Ferrara and Jiamiene Hsu

Vol. 7 No. 3

Special issue on computer-supported cooperative work

Gary M. Olson, Judith S. Olson and Robert E.

Kraut

Articles

An assessment of the experimental literature on electronic support of group work: results of a meta-analysis

Poppy Lauretta McLeod

Supporting indirect collaborative design with integrated knowledge-based design environments

Gerhard Fischer, Jonathan Grudin, Andreas Lemke,

Raymond McCall, Jonathan Ostwald, Brent Reeves

and Frank Shipman

Media space and communicative asymmetries: preliminary observations of video-mediated interaction

Christian Heath and Paul Luff

IEEE expert

Vol. 7 No. 4

Articles

Women in AI

Dale Sirok

Automatic rebuilding of qualitative models for diagnosis

Jonathan M. Vinson, Stephen D. Grantham and Lyle H. Ungar

Semantic networks and associative databases: two approaches to knowledge representation and reasoning

Ee-Peng Lim and Vladimir Cherkassky

CRACK: qualitative reasoning about fatigue and fracture in steel bridges

W. M. Kim Roddis and Jeffrey L. Martin

The ignatius environment: supporting the design and development of expert-system user interfaces

Jonas Löwgren

A decision-theoretic approach to planning, perception, and control

Kenneth Basye, Thomas Dean, Jak Kirman and Moises Lejter

Bayesian classification of protein structure

Lawrence Hunter and David J. States

IEEE Transactions on knowledge and data engineering

Vol. 4 No. 4

Articles

A planning aid – an intelligent modeling system for planning problems based on constraint satisfaction

S. Raghunathan

A source-to-source transformation for increasing rule-based system parallelism

A. J. Pasik

Complex – an object-oriented logic programming system

S. Greco, N. Leone and P. Rullo

Decomposing heterogeneous inter-entity relationship updates

J. R. Horowitz and A. F. Cardenas

Efficient management of materialized generalized transitive closure in centralized and parallel environments

K. C. Guh and C. Yu

Set operations in object-based data models

E. A. Rundensteiner and L. Bic

Extensions to sql for historical databases – comment

R. G. Johnson and N. A. Lorentzos

Extensions to sql for historical databases – reply

N. L. Sarda

Sustainable development – a holistic approach to natural-resource management

Y. Y. Haimes

IEEE Transactions on systems, man and cybernetics

Vol. 22 No. 3

Articles

Methods of combining multiple classifiers and their applications to handwriting recognition

L. Xu, A. Krzyzak and C. Y. Suen

Noise injection into inputs in backpropagation learning

K. Matsuoka

Process capability of automated visual inspection systems

P. M. Griffin and J. R. Villalobos

Optimal biorthonormal approximation of signals

T. Genossar and M. Porat

An incremental approach to logic-controller design with petri nets

L. Ferrari

Visual-perception and sequences of eye-movement fixations – a stochastic modeling approach

S. S. Hacisalihzade, L. W. Stark and J. S. Allen

A normative descriptive approach to hierarchical team resource-allocation

X. Y. Miao, P. B. Luh and D. L. Kleinman

Design for change – knowledge-based system support for information-centers

A. S. Vinze, M. M. Heltne, M. D. Chen, B. R. Konsynski and J. F. Nunamaker

Simon – an object-oriented information-system for coordinating strategies and operations

D. B. Paradice

Object-oriented qualitative simulation of human mental models of complex-systems

J. C. Schryver

Online approximate cartesian path trajectory planning for robotic manipulators

Y. H. Chang, T. T. Lee and C. H. Liu

Functional implications of component commonality in operational systems

L. D. Thomas

Matrix tests for period-1 and period-2 limit-cycles in discrete threshold networks

D. P. Brown

Transformation relationships for 2 commonly utilized euler angle representations

C. X. Chen and M. M. Trivedi

Competitive learning based approaches to tool-wear identification

L. I. Burke

A note on a fractal architecture for modeling and controlling flexible manufacturing systems

T. M. Tirpak, S. M. Daniel, J. D. Lalonde and W. J. Davis

Dynamic control of multiple coordinated redundant robots

Y. R. Hu and A. A. Goldenberg

Using statistical-data feedback by-products of expert systems

M. G. Sobol, R. G. Vedder and G. Klein

Obtaining the recovery function from the interval histogram and the poststimulus time histogram

Q. Bi

Information and decision technologies

Vol. 18 No. 5

Articles

Lessons learned in developing human-machine system design tools

William B. Rouse, William J. Cody and Paul R. Frey

A knowledge-based assignment methodology for personal identification in mass disaster

Samuel Guthrie and S. Manivannan

A model for facility selection and siting in pre-investment decision analysis

Adeyemi Aderoba

Decentralized stabilization of interconnected systems. Structural conditions

Runyi Yu and M. Erol Sezer

Knowledge-based decision support systems for manufacturing decision-making. The Pirelli experience

Marco Guida, Paola Marchesi and Giorgio-Basaglia

Dynamic simulation of demographic-economic systems in developing countries

Shan Feng, Li D. Xu, Han Z. Zhou and Ling X. Li

Announcements

Intelligent instruments and computers

Vol. 9 No. 5

Articles

Computer management of thermometric titrations

John A. Lynch, Wei Wang and Eric T. Lane

Development of expert system and neural networks in analytical chemistry

J. B. Morris, R. A. Pesce-Rodriguez, R. A. Fifer, S.

A. Liebman, S. M. Lurcott, E. J. Levy, B.

Skiffington and A. Sanders

Announcement

International journal of computer vision

Vol. 8 No. 3

Special issue: VLSI for computer vision

Guest editor introduction

James J. Clark

A VLSI pyramid chip for multiresolution image analysis

Gooitzen S. van der Wal and Peter J. Burt

Analog VLSI circuits for stimulus localization and centroid computation

Stephen P. DeWeerth

Computing motion using analog VLSI vision chips: an experimental comparison among different approaches

Timothy Horiuchi, Wyeth Bair, Brooks

Bishofberger, John Lazzaro, Andrew Moore and

Christof Koch

Analog VLSI systems for image acquisition and fast early vision processing

John L. Wyatt, Jr., Craig Keast, Mark Seidel, David

Standley, Berthold Horn, Tom Knight, Charles

Sodini, Hae-Seung Lee and Tomaso Poggio

Dynamic wires: an analog VLSI model for object-based processing

Shih-Chii Liu and John Harris

Vol. 9 No. 1

Special issue: machine vision research at Osaka

University

Guest editor introduction

Minoru Asada and Saburo Tsuji

Computer vision based on a hypothesization and verification scheme by parallel relaxation

Koh Kakusho, Seiichiro Dan and Tadahiro

Kitahashi

Dynamic integration of height maps into a 3D world representation from range image sequences

Minoru Asada, Masahiro Kimura, Yasuhiro

Taniguchi and Yoshiaki Shirai

Panoramic representation for route recognition by a mobile robot

Jiang Yu Zheng and Saburo Tsuji

International journal of man-machine studies

Vol. 37 No. 4

Articles

Introduction. Structure-based editors and environments

L. Neal and G. Szwillus

Interacting with structure-oriented editors

S. Minor

Conceptual issues in language-based editor design

J. Welsh and M. Toleman

Coherent user interfaces for language-based editing systems

M. L. Van De Vanter, S. L. Graham and R. A. Ballance

Design and structure of a semantics-based programming environment

R. Bahlke and G. Snelting

Digram editors = graphs + attributes + graph grammars

H. Götter

Re-structuring the programmer's task

R. K. E. Bellamy and J. M. Carroll

Automated customization of structure editors

B. S. Lerner

Vol. 37 No. 5

Articles

Interface structures: conceptual, logical and physical patterns applicable to human-computer interaction

S. Treu

Stabilizing student knowledge in open structured CAI

Y. Yano, A. Kashihara and W. McMichael

A protocol-based coding scheme for the analysis of medical reasoning

F. Hassebrock and M. J. Prietula

Effects of semantic similarity, omission probability and number of alternatives in computer menu search

B. J. Pierce, S. R. Parkinson and N. Sisson

Menu search and selection processes: a quantitative performance model

B. J. Pierce, N. Sisson and S. R. Parkinson

Volume 37 No. 6

Articles

Feedback requirements for automatic speech recognition in the process control room

C. Baber, D. M. Usher, R. B. Stammers and R. G. Taylor

Eliciting semantic relations for empirically derived networks

N. J. Cooke

MCC—multiple correlation clustering

J. R. Doyle

A comparison of the effects of icons and descriptors in videotex menu retrieval

J. N. MacGregor

Menu organization through block clustering

M. S. Shurtlef

A decision theoretic framework for approximating concepts

Y. Y. Yao and S. K. M. Wong

European Association for Cognitive Ergonomics

Journal of experimental & theoretical artificial intelligence

Vol. 4 No. 4

Articles

Human reasoning about artificial intelligence

P. J. Hayes, K. M. Ford and J. R. Adams-Webber

A probabilistic perceptron learning algorithm

T.-P. Hong and S.-S. Tseng

Strong separation of learning classes

J. Case, K.-J. Chen and S. Jain

Connectionism and artificial intelligence: history and philosophical interpretation

K. Aizawa

Adaptive-predictive game-playing programs

R. Levinson, B. Beach, R. Snyder, T. Dayan and K. Sohn

Kybernetes

Vol. 21 No. 4

Articles

The illusion that man constructs reality – a retrograde trend in the cybernetical movement

P. R. Masani

Fixed points and interacting subjects

Robert Vallée

Making alphabet soup: blending VSM, STS and TQM

Allenna Leonard

More thoughts on continuity and logic

Alex M. Andrew

Agonistic antagonistic systematics: an introduction to bilateral – and paradoxically unilateral – strategies

E. Bernard-Weil

Fuzzy identification of systems: a new cybernetic method

Gh. M. Negoita and V. V. Canciu

Informational observation theory: an extension to two continuous sets of events

Colette Padet

Vol. 21 No. 5

Articles

From information to autonomy: analogies between biology and the language sciences

John Stewart and Evelyne Andreewsky

From entropy of fuzzy sets to fuzzy set of entropies: a critical review and new results

Guy Jumarie

On rule-based artificial neural networks

Reuven R. Levary

Pattern recognition letters

Vol. 13 No. 9

Articles

Errors in digitized area measurements: circles and rectangles

D. Rosen

Discrete Euclidean metrics

F. Rhodes

A parallel method for locating and representing 2D contours

X. Pan and D. M. Lane

Application of binary mathematical morphology to separate overlapped objects

B. Chanda

Edge linking by using causal neighborhood window

M. Xie

Surface reconstruction (of rough terrain) in range image shadows

B. Kamgar-Parsi, P. J. Narayanan and L. S. Davis

A multiresolution algorithm for rotation-invariant matching of planar shapes

D. Chetverikov and A. Lerch

Contiguity-constrained clustering for image analysis

F. Murtagh

Vol. 13 No. 10

Articles

Variability and bias in experimentally measured classifier error rates

J. Piper

Equal-average hyperplane partitioning method for vector quantization of image data

L. Guan and M. Kamel

On a decomposition of 2-D circular convolution

G. Lohar, D. P. Mukherjee and D. Dutta Majumder

A model-based approach to representation and matching of object shape patterns

Y.-L. Chang and J.-J. Leou

A new one-pass parallel thinning algorithm for binary images

R.-Y. Wu and W.-H. Tsai

A 3D object recognition system using voxel representation

K. Qian, X. Lu and P. Bhattacharya

Stereo matching technique based on the theory of possibility

D. H. Kim, W. Y. Choi and R.-H. Park

False stroke detection and elimination for character recognition

S. W. Lu and H. Xu

Vol. 13 No. 11

Articles

Distribution-free performance bounds with the resubstitution error estimate

O. Gascuel and G. Caraux

Counting minimal paths in 3D digital geometry

S.-C. Goh and C.-N. Lee

Path entropies of brightness functions and fractional Brownian motions

G. Jumarie

Linear octree by volume intersection using perspective silhouettes

V. B. Nitya, N. Sridevi and A. K. Pujari

Decomposition of digital clumps into convex parts by contour tracing and labelling

S. H. Ong, Jayasooriah, H. H. Yeow and R. Sinniah

Compilation and sufficient representation of object models for visual recognition

E. Thirion and A. Wallace

Surface gridding with intrinsic parameters

B. C. Vemuri and R. Malladi

Optimal discretization for stereo reconstruction

A. Basu

A word shape analysis approach to lexicon based word recognition

T. K. Ho, J. J. Hull and S. N. Srihari
