AI MAGAZINE

Vol. 8 No. 2

Articles

Viewing the history of science as compiled hindsight

Lindley Darden

Knowledge acquisition in expert system development

David S. Prerau

The problem of extracting the knowledge of experts

Robert R. Hoffman

Knowledge base verification

*Tin A. Nguyen, Walton A. Perkins, Thomas J. Laffey,
and Deanne Pecora*

Artificial intelligence research in Australia—a profile

Elizabeth Smith and John Whitelaw

Coupling symbolic and numeric computing in KB systems

C. T. Kitzmiller and J. S. Kowalik

The 1985 workshop on distributed artificial intelligence

Les Gasser

Knowledge representation and inference in Sanskrit

Rick Briggs

IEEE EXPERT

Vol. 2 No. 3

Articles

Guest Editor's introduction

Chidanand Apté and John Kastner

Syntel: using a functional language for financial risk assessment

Richard O. Duda, Peter E. Hart, René Reboh, John Reiter, and Tore Risch

FSA: applying AI techniques to the familiarization phase of financial decision making

Chunka Mui and William E. McCarthy

Constraint logic programming and option trading

Catherine Lassez, Ken McAloon, and Roland Yap

Planpower: A comprehensive financial planner

James L. Stansfield and Norton R. Greenfeld

Organizing knowledge in a complex financial domain

Eric Mays, Chidanand Apté, James Griesmer, and John Kastner

Assessing credit card applications using machine learning

Chris Carter and Jason Catlett

Articles

Guest Editor's introduction

Charles R. Weisbin

Autonomous navigation, exploration, and recognition using the Hermies-IIB robot

B. L. Burks, G. de Saussure, C. R. Weisbin, J. P. Jones, and W. R. Hamel

Coordination of action and perception in a surveillance robot

James L. Crowley

Mobile robot navigation: the CMU system

Yoshimasa Goto and Anthony Stentz

Mobile robots: real-time intelligent control

Louis S. McTamany

AALPS: A knowledge-based system for aircraft loading

Debra Anderson and Charles Ortiz

Validating expert system performance

Robert M. O'Keefe, Osman Balci, and Eric P. Smith

JOURNAL OF AUTOMATED REASONING

Vol. 3 No. 3

Articles

Adding equality to semantic tableaux

S. V. Reeves

Unification in Abelian Semigroups

Alexander Herold and Jörg H. Siekmann

A Comparison of the variable-abstraction and constant-abstraction methods for associative-commutative unification

Mark E. Stickel

A method for the mechanical derivation of formulas in elementary geometry

Shang-Ching Chou

Explicit representation of terms defined by counter examples

J.-L. Lassez and K. Marriott

Basic research problems

The problem of extending the set of support strategy

Larry Wos

Problem Corner

Proving self-utterances

Michael Miller and Donald Perlis

COGNITIVE SCIENCE

Vol. 11 No. 3

Articles

Cognitive science news

Defending literal meaning

Marcelo Dascal

Response to Hanks and McDermott: Temporal evolution of beliefs and beliefs about temporal evolution

Ronald P. Loui

Constraints and preferences in inductive learning: An experimental study of human and machine performance

Douglas L. Medin, William D. Wattenmaker, and

Ryszard S. Michalski

The referential structure of the affective lexicon

Andrew Ortony, Gerald L. Clore, and Mark A. Foss

Interactional reconstruction in real-time language processing

Barbara A. Fox

Book reviews

Talking minds: The study of language in the cognitive sciences

Reviewed by Alan Garnham

Vascular aphasia

Reviewed by Randi C. Martin

THE JOURNAL OF LOGIC PROGRAMMING

Vol. 4 No. 3

Articles

Error diagnosis in logic programming, an adaptation of E. Y. Shapiro's method

Gérard Ferrand

Extended unification algorithms for the integration of functional programming into logic programming

Mehmet Dincbas and Pascal van Hentenryck

Intelligent query answering in rule based systems

Tomasz Imielinski

A generalization of the differential approach to recursive query evaluation

I. Balbin and K. Ramamohanarao

Vol. 4 No. 4

Call for papers

Articles

Logic programming with equations

Maarten H. van Emden and Keitaro Yukawa

Negation in logic programming

Kenneth Kunen

Operational and denotational semantics or prolog

Bijan Arbab and Daniel M. Berry

Integrity constraint checking in stratified databases

J. W. Lloyd, E. A. Sonenberg, and R. W. Topor

Compiling associativity into logic programs

D. R. Brough and C. J. Hogger

IEEE TRANSACTIONS

Vol. 9 No. 4

Articles

Computer vision and image analysis

Localizing overlapping parts by searching the interpretation tree

W. E. L. Grimson and T. Lozano-Pérez

Using polygons to recognize and locate partially occluded objects

M. W. Koch and R. L. Kashyap

Multiple resolution skeletons

A. R. Dill, M. D. Levine, and P. B. Noble

Hierarchical shape description via the multiresolution symmetric axis transforms

S. M. Pizer, W. R. Oliver, and S. H. Bloomberg

Frequency domain analysis and synthesis of image pyramid generating kernels

P. Meer, E. S. Baugher, and A. Rosenfeld

A new sense for depth of field

A. P. Pentland

Image analysis using mathematical morphology

R. M. Haralick, S. R. Sternberg, and X. Zhuang

Classification techniques

Sparse decompositions for exploratory pattern analysis

R. L. Hoffman and A. K. Jain

Artificial intelligence

Extension of conditional probability and measures of belief and disbelief in a hypothesis based on uncertain evidence

J. Ihara

Correspondence

Image analysis

A new algorithm for image edge extraction using a statistical classifier approach

A. Kundu and S. K. Mitra

Dynamic imagery modeling and motion estimation using weak formulations

R. J. Schalkoff

Fast convolution with Laplacian-of-Gaussian masks

J. S. Chen, A. Huertas, and G. Medioni

Parallel 2-D convolution on a mesh connected array processor

S.-Y. Lee and J. K. Aggarwal

IEEE computer society membership information

Vol. 9 No. 5

Articles

Computer vision and image analysis

The entry-exit method of shadow boundary segmentation

L. N. Hambrick, M. H. Loew, and R. L. Carroll, Jr.

Segmentation and classification of range images

R. Hoffman and A. K. Jain

Characteristics of natural scenes related to the fractal dimension

J. M. Keller, R. M. Crownover, and R. Y. Chen

Classification techniques

Bootstrap techniques for error estimation

A. K. Jain, R. C. Dubes, and C.-C. Chen

Bayes error estimation using parzen and *k*-NN procedures

K. Fukunaga and D. M. Hummels

Decision-directed multivariate empirical Bayes classification with nonstationary priors

W. C. Stirling and A. L. Swindlehurst

Convergence and consistency of fuzzy *c*-means/ISODATA algorithms

M. J. Sabin

Artificial intelligence

Modeling and isomorphisms of positional board games

S. Antoy

Text processing

Recognition of noisy subsequences using constrained edit distances

B. J. Oommen

Correspondence

Computer vision and image analysis

Classification of partial 2-D shapes using Fourier descriptors

C. C. Lin and R. Chellappa

The adaptive Hough transform

J. Illingworth and J. Kittler

Least-squares fitting of two 3-D point sets

K. S. Arun, T. S. Huang, and S. D. Blostein

Image processing

Registration of translated and rotated images using finite Fourier transforms

E. De Castro and C. Morandi

Multispectral texture synthesis using fractal concepts

N. Dodd

Vol. 9 No. 6**Editor's notice***S. L. Tanimoto***Articles****Computer vision and image analysis**

Edge focusing

F. Bergholm

An iterative thresholding algorithm for image segmentation

A. Pérez, and R. C. Gonzalez

Error analysis in stereo determination of 3-D point positions

*S. D. Blostein and T. S. Huang***Robotics**

Physically based simulation model for acoustic sensor robot navigation

R. Kuc and M. W. Siegel

Feature-based tactile object recognition

*R. A. Browse***Signal processing**

Finite prolate spheroidal sequences and their applications

I: Generation and properties

*R. Wilson***Classification techniques**

Synthesizing statistical knowledge from incomplete mixed-mode data

*A. K. C. Wong and D. K. Y. Chiu***Text processing**

A high speed string correction method using a hierarchical file

*E. Tanaka and Y. Kojima***Computer architecture**

A parallel architecture for discrete relaxation

*J. Gu, W. Wang, and T. C. Henderson***Correspondence****Computer vision and image analysis**

Analysis of a sampling technique applied to biological images

C. Katsinis and A. D. Poularikas

Parallel algorithms for image template matching on hypercube SIMD computers

*Z. Fang, X. Li, and L. M. Ni***Learning**

Local languages, the successor method, and a step towards a general methodology for the inference of regular grammars

*P. Garcia, E. Vidal, and F. Casacuberta***1987 Index****Vol. 10 No. 1**

Introduction to the special PAMI issues on industrial machine vision and computer vision technology

*J. L. C. Sanz***Articles**

An automatic wafer inspection system using pipelined image processing techniques

H. Yoda, Y. Ohuchi, Y. Taniguchi, and M. Ejiri

Measuring photolithographic overlay accuracy and critical dimensions by correlating binarized Laplacian of Gaussian convolutions

H. K. Nishihara and P. A. Crossley

Automatic solder joint inspection

*S. L. Bartlett, P. J. Besl, C. L. Cole, R. Jain,**D. Mukherjee, and K. D. Skifstad*

Structured highlight inspection of specular surfaces

A. C. Sanderson, L. E. Weiss, and S. K. Nayar

A rule based approach for visual pattern inspection

A. M. Darwish and A. K. Jain

A system for PCB automated inspection using fluorescent light

Y. Hara, H. Doi, K. Karasaki, and T. Iida

Automated X-ray inspection of aluminum castings

H. Boerner and H. Strecker

Texture measures for carpet wear assessment

*L. H. Siew, R. M. Hodgson, and E. J. Wood***Correspondence**

A monolithic Hough transform processor based on restructurable VLSI

*F. M. Rhodes, J. J. Dituri, G. H. Chapman, B. E.**Emerson, A. M. Soares, and J. I. Raffel*

A pipelined image analysis system using custom integrated circuits

E. Persoon

A line extraction method for automated SEM inspection of VLSI resist

D. B. Shu, C. C. Li, J. F. Mancuso, and Y. N. Sun

A real-time processor for the Hough transform

*K. Hanahara, T. Maruyama, and T. Uchiyama***IEEE copyright information****Information for authors**
