AI Magazine

Vol. 20 No. 3

Articles

The importance of importance

D. Waltz

Machine learning, machine vision, and the brain

T. Poggio and C. R. Shelton

When and where will AI meet robotics? Issues in representation

R. Bajscy and E. W. Large

AI in medicine – The spectrum of challenges from managed care to molecular medicine

R. B. Altman

Automated learning and discovery – State of the art and research topics in a rapidly growing field

S. Thrun, C. Faloutsos, T. Mitchell and L. Wasserman

Applied Intelligence

Vol. 10 Nos. 2–3

Articles

From knowledge-level models to applications

J. Mira and A. P. Del Pobil

A knowledge-level model for concurrent design

R. Barker, A. Meehan and I. Tranter

Towards a knowledge-level model of context and context use in diagnostic problems

P. Ozturk

SCHEMA: A knowledge edition interface for obtaining program code from structured descriptions of PSMs: Two case studies

J. C. Herrero and J. Mira

A constraint-based approach to assigning system components to tasks

E. H. Turner and R. M. Turner

Hardware-software partitioning at the knowledge level

M. L. Lopez Vallejo, J. C. Lopez and C. A. Iglesias

Knowledge modeling of program supervision task and its application to knowledge base verification

M. Marcos, S. Moisan and A. P. Del Pobil

Qualitative event-based expert supervision for transient condition monitoring

F. Neves and J. Aguilar Martin

Behavioral interpretation according to multimodeling representation

F. Zouaoui, R. Thetiot and M. Dumas

An adaptable IE system to new domains

J. Turmo, N. Catala and H. Rodriguez

Generating heuristics to control configuration processes

B. Stein

STRPLAN: A distributed planner for object-centred application domains

R. B. Llavori

Vol. 11 No. 1

Articles

Neural networks and structured knowledge: Knowledge representation and reasoning

F. J. Kurfess

Comparing structures using a Hopfield-style neural network

K. Schadler and F. Wysotzki

Massively parallel probabilistic reasoning with Boltzmann machines

P. Myllymaki

Approximating the semantics of logic programs by recurrent neural networks

S. Holldobler, Y. Kalinke and H. P. Storr

The connectionist inductive learning and logic programming system

A. S. A. Garcez and G. Zaverucha

Advances in SHRUTI – A neurally motivated model of relational knowledge representation and rapid inference using temporal synchrony

L. Shastri

A hybrid architecture for situated learning of reactive sequential decision making

R. Sun, T. Peterson and E. Merrill

Vol. 11 No. 3

Articles

Progress in intelligent data analysis

X. H. Liu

Research environment for data analysis tool allocators

J. Wilkinson and R. Levinson

Imputation of missing data in industrial databases

K. Lakshminarayan, S. A. Harp and T. Samad

Efficient GA based techniques for classification

P. K. Sharpe and R. P. Glover

Discretisation of continuous commercial database features for a simulated annealing data mining algorithm

J. C. W. Debusse and V. J. Rayward Smith

Characteristic rule discovery in Aurum-3

D. McSherry and D. Roantree

Applied Artificial Intelligence

Vol. 13 No. 6

Special issue: Artificial intelligence and software multilinguality

Generating bilingual lexical equivalences from parallel texts

S. Boutsis, S. Piperidis and I. Demiros

Multilingual natural language generation for multilingual software: A functional linguistic approach

J. A. Bateman, C. M. I. M. Matthiessen and L. C. Zeng

Vol. 13 No. 7**Articles**

Using EuroWordNet in a concept-based approach to cross-language text retrieval

J. Gonzalo, F. Verdejo and I. Chugur

Supporting multilinguality in library automation systems using AI tools

S. Michos, E. Stamatos and N. Fakotakis

Using a language independent domain model for multilingual information extraction

S. Azzam, K. Humphreys, R. Gaizauskas and Y. Wilks

Artificial Intelligence**Vol. 110 No. 2****Special issue: RoboCup: The First Step**

RoboCup: Today and tomorrow – What we have learned.

M. Asada, H. Kitano, I. Noda and M. Veloso

Building agent teams using an explicit teamwork model and learning

M. Tambe, J. Adibi, Y. Al Onaizan, A. Erdem,

G. A. Kaminka, S. C. Marsella and I. Muslea

Task decomposition, dynamic role assignment, and low-bandwidth communication for real-time strategic teamwork

P. Stone and M. Veloso

Cooperative behavior acquisition for mobile robots in dynamically changing real worlds via vision-based reinforcement learning and development

M. Asada, E. Uchibe and K. Hosoda

Cooperation without deliberation: A minimal behavior-based approach to multi-robot teams

B. B. Weger

Vol. 111 Nos. 1–2**Articles**

Model-based diagnosis of hardware designs

G. Friedrich, M. Stumptner and F. Wotawa

Algorithms for selective enumeration of prime implicants

L. Palopoli, F. Pirri and C. Pizzuti

A commonsense language for reasoning about causation and rational action

C. L. Ortiz

Jumping to explanations versus jumping to conclusions

R. Pino Perez and C. Uzcategui

Reasoning about noisy sensors and effecters in the situation calculus

F. Bacchus, J. Y. Halpern and H. J. Levesque

Coalition structure generation with worst case guarantees

T. Sandholm, K. Larson, M. Andersson, O. Shehory and F. Tohme

Qualitative circuit models in failure analysis reasoning

M. H. Lee

From situation calculus to fluent calculus: State update axioms as a solution to the inferential frame problem

M. Thielscher

Learning to ask relevant questions

J. Straach and K. Truemper

Artificial Intelligence in Engineering**Vol. 13 No. 3****Articles**

A knowledge based database system for engineering correlations

M. A. Moss, K. Jambunathan and E. Lai

Genetic algorithms for designing multihop lightwave network topologies

C. Gazen and C. Ersoy

Function approximations by coupling neural networks and genetic programming trees with oblique decision trees

Y. S. Yeun, K. H. Lee and Y. S. Yang

A knowledge-based dynamic job-scheduling in low-volume/high-variety manufacturing

Y. X. Zhang and H. Chen

Automatic design synthesis with artificial intelligence techniques

F. J. Vico, F. J. Veredas, J. M. Bravo and J. Almaraz

Evaluating machine learning models for engineering problems

Y. Reich and S. V. Barai

Graph theory representations of engineering systems and their embedded knowledge

O. Shai and K. Preiss

Combined analytical and empirical learning framework for branch and bound algorithms: the knapsack problem

M. J. Realff, P. H. Kvam and W. E. Taylor

Fast training algorithm for feedforward neural networks: application to crowd estimation at underground stations

T. W. S. Chow, Y. J. F. Yam and S. Y. Cho

Identification of plant inverse dynamics using neural networks

D. T. Pham and S. J. Oh

Rule-based content verification using a digraph-based modelling approach

G. S. Gursaran, S. Kanungo and A. K. Sinha

Engineering Applications of Artificial Intelligence**Vol. 12 No. 4****Articles**

A combined machine learning and genetic algorithm approach to controller design

B. Filipic, T. Urbancic and V. Krizman

Design of a dedicated parallel processor for the simulation of the photolithography process using a genetic algorithm

I. Karafyllidis

Gesture-based editing system for graphic primitives and alphanumeric characters

B. W. Min, H. S. Yoon, J. Soh, T. Ohashi and T. Ejima

Identification and control of a wheelchair using recurrent neural networks

L. Boquete, R. Barea, R. Garcia, M. Mazo and F. Espinosa

Analysis of neural-network-based congestion control algorithms for ATM networks

C. Douligeris and B. K. Singh

Application of perceptron neural networks to tool-state classification in a metal-turning operation

D. E. Dimla

Self-directed processing of materials

P. H. Garrett, J. J. Jones and S. R. LeClair

Accident identification in nuclear power plants using hidden Markov models

K. C. Kwon and J. H. Kim

Fuzzy-logic-based ranking of steel grades generated by material design KBS

S. S. Shivathaya and X. D. Fang

Fuzzy avoidance control strategy for redundant manipulators

H. Ding and H. X. Li

Fuzzy situational tree-networks for intelligent flight support

I. Y. Burdun and O. M. Parfentyev

Mobile robot path planning: a multicriteria approach

J. A. Fernandez, J. Gonzalez, L. Mandow and

J. L. Perez de la Cruz

Expert Systems With Applications

Vol. 17 No. 2

Articles

Knowledge-based maneuver and fire support planning

R. Pereira, J. L. Sanchez and J. Rives

Customer list segmentation using the combined response model

E. H. Suh, K. C. Noh and C. K. Suh

Does measuring knowledge make "cents"?

J. Liebowitz and K. Wright

Intelligent query agent for structural document databases

M. F. Jiang, S. S. Tseng and C. J. Tsai

Knowledge architecture and system design for intelligent operation support systems

Q. Xia and M. Rao

Design of an expert system for the optimization of steel compositions and process route

P. A. Manohar, S. S. Shivathaya and M. Ferry

International Journal of Computer Vision

Vol. 32 No. 1

Special issue: 1998 Marr Prize winners

Self-calibration and metric reconstruction inspite of varying and unknown intrinsic camera parameters

M. Pollefeys, R. Koch and L. Van Gool

The problem of degeneracy in structure and motion recovery from uncalibrated image sequences

P. H. S. Torr, A. W. Fitzgibbon and

A. Zisserman

Stereo matching with transparency and matting

R. Szeliski and P. Golland

Automatic detection of human nudes

D. A. Forsyth and M. M. Fleck

Vol. 32 No. 2

Articles

Improving depth image acquisition using polarized light

A. M. Wallace, B. Liang, E. Trucco and J. Clark

General object reconstruction based on simplex meshes

H. Delingette

Temporal multi-scale models for flow and acceleration

Y. Yacoob and L. S. Davis

Vol. 32 No. 3

Articles

An autonomous active vision system for complete and accurate 3D scene reconstruction

E. Marchand and F. Chaumette

Geometry of distorted visual space and Cremona transformation

L. F. Cheong and K. O. Ng

Reflectance and shape from images using a collinear light source

J. P. Lu and J. J. Little

Vol. 33 No. 1

Articles

Topographic maps and local contrast changes in natural images

V. Caselles, B. Coll and J. M. Morel

Non uniform multiresolution method for optical flow and phase portrait models: Environmental applications

I. Cohen and I. Herlin

Generalised epipolar constraints

K. Astrom, R. Cipolla and P. Giblin

Calibrating a structured light stripe system: A novel approach

D. Q. Huynh, R. A. Owens and P. E. Hartmann

International Journal of Intelligent Systems

Vol. 14 No. 8

Introduction: Threads in fuzzy Petri nets research

J. F. Peters

Petri net model with fuzzy timing and fuzzy-metric temporal logic

Y. Zhou and T. Murata

Fuzzy time semirings and fuzzy-timing colored Petri nets

F. M. Wu

Enhanced fuzzy temporal rules and their projection onto fuzzy Petri nets

P. Carinena, A. Bugarin, S. Fraga and S. Barro

Approximate real-time decision making: Concepts and rough fuzzy Petri net models

J. F. Peters, A. Skowron, Z. Suraj, W. Pedrycz and

S. Ramanna

On possibilistic timed safe Petri nets

S. Sandri and J. Cardoso

Hierarchical fuzzy Petri nets and alpha-level sets inference

H. Camargo and F. Gomide

A method to make some fuzzy relations T-transitive

L. Garmendia, C. delCampo, S. Cubillo and

A. Salvador

Vol. 14 No. 9

Articles

Averaging operators on the unit interval

M. Gehrke, C. Walker and E. Walker

On the unidimensional fuzzy equivalence relations

D. Boixader

t-operators and uninorms on a finite totally ordered set

M. Mas, G. Mayor and J. Torrens

On hierarchically S-decomposable fuzzy measures

V. Torra

Propositional fuzzy logics: Decidable for some (algebraic) operators; Undecidable for more complicated ones

M. Gehrke, V. Kreinovich and B. Bouchon Meunier

Vol. 14 No. 10

Articles

Using genetic algorithms to determine nonnegative monotone set functions for information fusion in environments with random perturbation

Z. Y. Wang, K. Xu, J. Wang and G. J. Klir

Intelligent content-based document delivery via automatic filtering profile generation

W. Lam

Linguistic hedges and the generalized modus ponens
L. Di Lascio, A. Gisolfi and U. C. Garcia
 Completing open logic programs by constructive induction
E. Erdem and P. Flener

Formal specification of beliefs in multi-agent systems
M. Benerecetti, E. Giunchiglia, L. Serafini and A. Villafiorita
 A mass assignment method for prototype induction
J. F. Baldwin, J. Lawry and T. P. Martin

International Journal of Software Engineering and Knowledge Engineering

Vol. 9 No. 3

Special issue

Software/knowledge sharing and reuse via networks
V. R. Benjamins and D. Fensel
 SOORLS: A software reuse approach on the Web
S. K. Lee and J. E. Urban
 Reusable knowledge-based components for building software applications: A knowledge modelling approach
M. Molina, J. L. Sierra and J. Cuenca

Knowledge and experience reuse through communication among competent (peer) agents

F. J. Martin, E. Plaza and J. L. Arcos
 Advanced conceptual clustering and associated querying facilities in object-oriented databases
C. W. Fung and Q. Li
 A frame model approach for expert and database system integration
J. Fong and S. M. Huang

Journal of Artificial Intelligence Research

Vol. 11

Decision-Theoretic Planning: Structural Assumptions and Computational Leverage
C. Boutilier, T. Dean and S. Hanks
 Semantic Similarity in a Taxonomy: An Information-Based Measure and its Application to Problems of Ambiguity in Natural Language
P. Resnik
 Identifying Mislabeled Training Data
C. E. Brodley and M. A. Friedl
 Popular Ensemble Methods: An Empirical Study
D. Opitz and R. Maclin
 Unifying Class-Based Representation Formalisms
D. Calvanese, M. Lenzerini and D. Nardi
 Evolutionary Algorithms for Reinforcement Learning
D. E. Moriarty, A. C. Schultz and J. J. Grefenstette

Reasoning about Minimal Belief and Negation as Failure
R. Rosati

Decentralized Markets versus Central Control: A Comparative Study

F. Ygge and H. Akkermans
 Committee-Based Sample Selection for Probabilistic Classifiers
S. Argamon-Engelson and I. Dagan
 The Complexity of Reasoning about Spatial Congruence
M. Cristani
 Markov Localization for Mobile Robots in Dynamic Environments
D. Fox, W. Burgard and S. Thrun
 Cox's Theorem Revisited (technical addendum)
J. Y. Halpern

Journal of Intelligent & Robotic Systems

Vol. 25 No. 4

Special issue

Integration of heterogeneity for human-friendly robotic operations
N. Xi and T. J. Tarn
 A safe-control paradigm for human-robot interaction
J. Heinzmann and A. Zelinsky
 A novel scheme for human-friendly and time-delays robust neuropsychic teleoperation
P. A. Prokopiou, S. G. Tzafestas and W. S. Harwin
 A compact/open network-based controller incorporating modular software architecture for a humanoid robot
Y. J. Cho, B. J. You, S. R. Oh and C. W. Lee
 Controlling the execution of a visual servoing task
R. S. Oropeza, M. Devy and V. Cadenat
 Remote interaction between human and humanoid robot
H. Takanobu, H. Tabayashi, S. Narita, A. Takanishi, E. Guglielmelli and P. Dario

Vol. 26 No. 1

Articles

Stabilization of nonholonomic robotic systems using adaptation and homogeneous feedback
R. Colbaugh and K. Glass
 Variable structure control of robot manipulators with perturbation estimator
S. P. Chan
 Robust interaction control of a mobile manipulator – Dynamic model based coordination
J. H. Chung and S. A. Velinsky
 Decentralized fuzzy control of multiple nonholonomic vehicles
B. J. Driessen, J. T. Feddema and K. S. Kwok
 Reducing the complexity of robot's scene for faster collision detection
A. C. Nearchou, N. A. Aspragathos and D. P. Sofotassios
 Stable neuro-adaptive control for robots with the upper bound estimation on the neural approximation errors
F. C. Sun, Z. Q. Sun, Y. Y. Zhu and W. J. Lu

Journal of Logic Programming

Vol. 41 No. 1

Articles

Stable generated models, partial temporal logic and disjunctive defaults
J. Engelfriet and H. Herre
 A declarative semantics for depth-first logic programs
B. Elbl

A pragmatic reconstruction of lambda Prolog

C. Belleanne, P. Brisset and O. Ridoux
 A semantic basis for the termination analysis of logic programs
M. Codish and C. Taboch
 Worst-case groundness analysis using positive Boolean functions
M. Codish

On the Floyd-Warshall algorithm for logic programs

C. Papadimitriou and M. Sideri

Vol. 41 Nos. 2–3

Special issue: synthesis, transformation and analysis of logic programs 2

Inductive synthesis of recursive logic programs: achievements and prospects

P. Flener and S. Yilmaz

Synthesis and transformation of logic programs using unfold/fold proofs

A. Pettorossi and M. Proietti

Conjunctive partial deduction: foundations, control, algorithms, and experiments

D. DeSchreye, R. Gluck, J. Jorgensen, M. Leuschel, B. Martens and M. H. Sorensen

Abstract multiple specialization and its application to program parallelization

G. Puebla and M. Hermenegildo

Journal of Symbolic Computation

Vol. 27 No. 6

Articles

The Pohlig-Hellman method generalized for group structure computation

E. Teske

The generating function for the number of roots of a Coxeter group

R. DeMan

Symbolic asymptotics: Multiseries of inverse functions

B. Salvy and J. Shackell

Complexity of computing the local dimension of a semialgebraic set

N. Vorobjov

Renormalization automated by Hopf algebra

D. J. Broadhurst and D. Kreimer

Vol. 28 Nos. 1–2

Special issue on polynomial elimination

Foreword of the guest editors.

M. Kalkbrener and D. M. Wang

Matrices in elimination theory

I. Z. Emiris and B. Mourrain

On the Bezout construction of the resultant

P. Bikker and A. Y. Uteshev

Simultaneous elimination by using several tools from real algebraic geometry

L. Gonzalez Vega and N. Gonzalez Campos

On the theories of triangular sets

P. Aubry, D. Lazard and M. M. Maza

Triangular sets for solving polynomial systems: a comparative implementation of four methods

P. Aubry and M. M. Maza

Solving degenerate sparse polynomial systems faster

J. M. Rojas

Finding all isolated zeros of polynomial systems in C-n via stable mixed volumes

T. G. Gao, T. Y. Li and X. S. Wang

Weak Wu stratification in R-n

D. Richardson

Recent advances on determining the number of real roots of parametric polynomials

Y. Lu

A modular method to compute the rational univariate representation of zero-dimensional ideals

M. Noro and K. Yokoyama

On the complexity of Grobner bases conversion

M. Kalkbrener

Grobner bases, invariant theory and equivariant dynamics

K. Gatermann and F. Guyard

Polynomial systems from certain differential equations

D. M. Wang

IEEE Transactions on Knowledge and Data Engineering

Vol. 11 No. 4

Special issue on Web technologies

MAGNET: Mobile agents for networked electronic trading

P. Dasgupta, N. Narasimhan, L. E. Moser and

P. M. Melliar Smith

An approach to mobile software robots for the WWW

K. Kato, Y. Someya, K. Matsubara, K. Toumura and H. Abe

Proxy cache algorithms: Design, implementation, and performance

J. Shim, P. Scheuermann and R. Vingralek

Volume leases for consistency in large-scale systems

J. Yin, L. Alvisi, M. Dahlin and C. Lin

WebCompanion: A friendly client-side Web prefetching agent

R. P. Klemm

Enabling concept-based relevance feedback for information retrieval on the WWW

C. H. Chang and C. C. Hsu

Continual queries for Internet scale event-driven information delivery

L. Liu, C. T. Pu and W. Tang

Managing complex documents over the WWW: A case study for XML

P. Ciancarini, F. Vitali and C. Mascolo

JPernLite: Extensible transaction services for the WWW

J. S. Yang and G. E. Kaiser

An alternative paradigm for scalable on-demand applications: Evaluating and deploying the interactive multimedia jukebox

K. C. Almeroth and M. H. Ammar

Workflow and end-user quality of service issues in Web-based education

M. A. Vouk, D. L. Bitzer and R. L. Klevans

Spatial join processing using corner transformation

J. W. Song, K. Y. Whang, Y. K. Lee, M. J. Lee and S. W. Kim

Knowledge-Based Systems

Vol. 12 No. 3

Articles

A conceptual model of knowledge-based time-tabling system

S. C. Kong and L. F. Kwok

On mapping decision trees and neural networks

R. Setiono and W. K. Leow

The efficient estimation of missing information in causal inverted multiway trees

G. R. Garside, P. C. Rhodes and D. E. Holmes

Incorporating rhetorical and plausible reasoning in a system for simulating argumentation

M. H. Saeedi and J. A. A. Sillince

Efficiently planning coherent visual discourse

M. X. Zhou and S. K. Feiner

Vol. 12 No. 4

Articles

Implementing ECA rules in an active database

C. W. Tan and A. Goh

Building a knowledge-efficient sanding advisor

M. Kanj, J. C. Roegiers and M. Zaman

The organisational impact of knowledge-based systems: a knowledge perspective

P. H. Hendriks

Interpolation of plans for time-critical adaptation

N. Chatterjee and J. A. Campbell

ESSE: an expert system for software evaluation

I. Vlahavas, I. Stamelos, I. Refanidis and A. Tsoukias

Vol. 12 Nos. 5–6

Special issue: ES98

Web based CBR system for heating ventilation and air conditioning systems sales support

D. Gardingen and I. Watson

Large scale knowledge based systems for airborne decision support

H. Howells, A. Davies, B. Macauley and R. Zancanato

PCONFIG: a Web-based configuration tool for

Configure-To-Order products

P. J. P. Slater

ACCELERE: a case-based design assistant for closed cell rubber industry

O. Herbeaux and A. Mille

Using statistical models and case-based reasoning in

claims prediction: experience from a real-world problem

J. Daengdej, D. Lukose and R. Murison

Internet-based decision support for evidence-based medicine

J. Simpson, J. Kingston and N. Molony

Design engineering – a need to rethink the solution using knowledge based engineering

C. B. Chapman and M. Pinfold

Strategic induction of decision trees

D. McSherry

Pruning boosted classifiers with a real valued genetic algorithm

S. Thompson

MVC – a preprocessing method to deal with missing values

A. Ragel and B. Cremilleux

CG-SQL: a front-end language for conceptual graph knowledge bases

S. Coulondre

Case-based reasoning is a methodology not a technology

I. Watson

On rule interestingness measures

A. A. Freitas

Knowledge modelling for a generic refinement framework

R. Boswell and S. Craw

Kybernetes

Vol. 28 Nos. 4–5

Cybernetics, the conscience of science – Studies of interactions between physical and sociopolitical feedbacks and the theory behind them

C. Muses

Second order cybernetics – implications in real life

A. Ghosal

Modelling expert resource management systems

S. Kutti, B. Garner and A. Ghosal

Elements for a theory of fractals in dynamic systems involving human factors

G. Jumarie

New results of convergence of Adomian's method

N. Himoun, K. Abbaoui and Y. Cherruault

Control of the first-line human defence system – An autocatalytic model

B. Kochel

Competing transformation models Part I: Methodology

Part II: Empirical results

R. Ostermark and J. Aaltonen

A suggested hemispheric basis for the guided search model

U. Fidelman

Contemporary systems and cybernetics

B. H. Rudall

Internet commentary

A. M. Andrew

From fuzzy information processing to fuzzy communication channels

W. Pedrycz and E. Roventa

Norbert Wiener and new trends in cybernetics development (with emphasis on homeostatics)

V. I. Astafyev, Y. M. Gorsky and L. N. Yolkov

A multiperiod firm model for strategic decision support

R. Ostermark and K. Soderlund

Convergence of Adomian's method applied to integral equations

T. Badredine, K. Abbaoui and Y. Cherruault

A weak method in numerical identification

A. Khefif

On some obstacles in communication and transfer of knowledge

V. P. Masnikosa

On fuzzy systems: part I – Invited communication

C. V. Negoita

The whole picture

B. James

Machine Learning

Vol. 37 No. 1

Articles

A theoretical and empirical study of a noise-tolerant algorithm to learn geometric patterns

S. A. Goldman and S. D. Scott

Minimum generalization via reflection: A fast linear threshold learner

S. Hampson and D. Kibler

Mixed memory Markov models: Decomposing complex stochastic processes as mixtures of simpler ones

L. K. Saul and M. I. Jordan

Efficient read-restricted monotone CNF/DNF dualization by learning with membership queries

C. Domingo, N. Mishra and L. Pitt

IEEE Transactions on Neural Networks

Vol. 10 No. 5

Articles

- Vapnik-Chervonenkis (VC) learning theory and its applications

A computational model of view degeneracy

S. J. Dickinson, D. Wilkes and J. K. Tsotsos

Shape from shading: A survey

R. Zhang, P. S. Tsai, J. E. Cryer and M. Shah

Stratified self-calibration with the modulus constraint

M. Pollefeys and L. Van Gool

How should we represent faces for automatic recognition?

I. Craw, N. Costen, T. Kato and S. Akamatsu

Indexing of technical line drawing databases

T. Syeda Mahmood

An HMM-based approach for off-line unconstrained handwritten word modeling and recognition.

A. El Yacoubi, M. Gilloux, R. Sabourin and C. Y. Suen

Integral ratio: A new class of global thresholding techniques for handwriting images

Y. Solihin and C. G. Leedham

Robust rotation angle estimator

W. Y. Kim and Y. S. Kim

Linear N-point camera pose determination

L. Quan and Z. D. Lan

Making use of contradictory behavior information in qualitative reasoning

A. C. C. Say

Fast decomposition of digital curves into polygons using the Haar transform

T. J. Davis

Multiprimitive segmentation of planar curves – A two-level breakpoint classification and tuning approach

H. T. Sheu and W. C. Hu

A learning-based prediction-and-verification segmentation scheme for hand sign image sequence

Y. T. Cui and J. Y. Weng

Cross-weighted moments and affine invariants for image registration and matching

Z. W. Yang and F. S. Cohen

Vol. 21 No. 9

Articles

Super-resolution reconstruction of image sequences

M. Elad and A. Feuer

Part-based 3D descriptions of complex objects from a single image

M. Zerroug and R. Nevatia

Empirical performance evaluation of graphics recognition systems

I. T. Phillips and A. K. Chhabra

Similarity measures

S. Santini and R. Jain

Parametric hidden Markov models for gesture recognition

A. D. Wilson and A. F. Bobick

Line-based recognition using a multidimensional Hausdorff distance

X. L. Yi and O. I. Camps

Error correcting graph matching: On the influence of the underlying cost function

H. Bunke

A methodology for mapping scores to probabilities

D. Bouchaffra, V. Govindaraju and S. Srihari

Chaincode contour processing for handwritten word recognition

S. Madhvanath, G. Kim and V. Govindaraju

Fast implementation of scale-space by interpolatory subdivision scheme

Y. P. Wang and R. B. Qu

A new interpretation and improvement of the nonlinear anisotropic diffusion for image enhancement

J. Monteil and A. Beghdadi

Unsupervised clustering in hough space for identification of partially occluded objects

O. Yanez Suarez and M. R. Azimi Sadjadi

View-based recognition using an eigenspace approximation to the Hausdorff measure

D. P. Huttenlocher, R. H. Lilien and C. F. Olson

Comments on “Design of supervised classifiers using Boolean neural networks”

G. Smith

Reply to: Comments on “Design of supervised classifiers using Boolean neural networks”
