IEEE EXPERT

Vol. 3 No. 1

Articles

Editor-in-Chief's introduction

David Pessel

A knowledge-based planning system for mechanical assembly using robots

William G. Wee and Kai-Hsiung Chang

A software engineering tool for expert system design

Joan M. Francioni and Abraham Kandel

Rule-based inferencing functions for APL applications

Yonathan Bard

Knowledge-based decision support in business: Issues and a solution

Vasant Dhar and Albert Croker

Knowledge representation and control in computer vision systems

A. Ravishankar Rao and Ramesh Jain

COMPUTER AND ARTIFICIAL INTELLIGENCE

Vol. 5 No. 1

Articles

Conceptual knowledge operations

J. Demetrovics, L. Hannák and E. Knuth

Growing semantic networks in adaptive problem-solving systems

V. P. Gladun

Towards meta-expert systems

I. Kalaš

Two notes concerning the society theory of thinking

J. Kelemen

Syntactic-semantic analysis of natural language by new word-class controlled functional analysis (WCFA)

H. Helbig

A fast digital image processor

J. Viitanen and O. Pulkkinen

Nonlinear lower bound on synchronous combinational complexity of binary addition

M. Fláček and J. Klein

How to assemble trellis machines

J. Mertan

Vol. 5 No. 2

Articles

Contradictions in the control of large systems

V. I. Astafiev et al.

An approach to building technical diagnostic expert systems

V. Sgurev et al.

The complexity of finding compact well-separated clusters

M. Křivánek

The growth functions of stochastic TOL languages

J. Hromkovič and J. Mertan

Determination of computer system sensitivity to the change of parameters by means of linear regression

M. Jiřina

Threshold and histogram algorithms for parallel associative computer

Giang Vu Thang and M. Vajteršić

An information-control technical vision system for the adjustment and check of the measuring needle instruments

S. M. Sokolov

GENERA—An advanced control system for industrial robots

A. Moangá et al

Announcements

Vol. 5 No. 3

Articles

Asymptotical densities in generalized pascal triangles

I. Korec

Systolic systems for the longest common subsequence problem

G. Andrejková

Mixed testing/proving techniques for program correctness

J. Hořejš

Representation of Meta-knowledge in expert systems

P. Mikulecký, I. Kalaš and J. Kelemen

Decrease of contradictions in an active knowledge system

A. N. Averkin and S. K. Dulin

An expert system recommending suitable mathematical decision method

J. Ivánek

The ALLL environment—using object-oriented concepts in LISP

O. Erling, P. P. Pirinen and O. Lassila

Free casting for chains

V. Medek and J. Zámožik

The SFDL/SCL simulation system

J. Blatný and J. Zendulka

Announcements

Book review

Vol. 5 No. 4

Articles

A wave language for parallel processing of semantic networks

P. S. Sapaty

On the minimization of random boolean functions

M. Škoviera

Expected number of comparisons in the hwang-lin merging algorithm

L. Kollár

The efficiency of the depth first algorithms

D. Olejár

A new texture recognition method

M. Šonka

Cluster analysis in knowledge identification

Z. Bohuslav et al.

The optimum placement based on a method of limited cuts

J. Schwarz

Vol. 5 No. 5

Articles

Some methods of information evaluation of scientific results

L. Tondl

Semantic manipulations in expert systems

C. V. Negoita

Belief structures, possibility theory and decomposable confidence measures on finite sets

D. Dubois

Heuristic search with global and local heuristics

L. Molnár et al

Automatic program synthesis using heuristics and interaction

V. Vojtek et al

An efficient synthesis of image matching algorithms

I. Kočíš et al

The computation of the convex hull of a simple polygon in linear time

G. Werner

Wire routing on a parallel computer

M. Benetin and I. Kočíš

Vol. 5 No. 6**Articles**

Logic on finite structures and logic programming

M. de Rougemont

Representation of sub-definiteness, over-definiteness and absurdity in knowledge bases (some formal aspects)

A. S. Narin'yan

Open problems in automata theory related to complexity theory

M. Chrobak and J. Hromkovič

On the minimization of random boolean functions, part 2

M. Škoviera

Keys and superkeys for relation schemes

J. Demetrovics and Ho Thuan

NUT—an object-oriented language

E. Tuygu et al

An alternative approach to the conceptual database design using fragments of natural language

F. Krejčí and J. Zlatuška

On the robot end-effector orientation generation

K. Dobrovodský

Book reviews**New journals****Announcements****KNOWLEDGE-BASED SYSTEMS****Vol. 1 No. 1****Articles****Editorial**

Adaptation, response and knowledge

RETWALL: An expert system for the selection and preliminary design of earth retaining structures

P. J. Hutchinson, M. A. Rosenman and J. S. Gero

Integration of knowledge-based systems with data processing

T. Nomura and S. Lunn

Intelligent handling of data by integration of commonsense reasoning

E. T. Keravnou and L. Johnson

Toward an expert system for chromosome analysis

Q. Wu, P. Suetens and A. Oosterlinck

R and D review**Market forecast****Products****Books****Literature****Calendar****JOURNAL OF AUTOMATED REASONING****Vol. 3 No. 4****Articles**

How to clear a block: a theory of plans

Zohar Manna and Richard Waldinger

A note on a canonical theory with undecidable unification and matching problem

Alexander Bockmayr

Obvious inferences

Piotr Rudnicki

Choosing directions for rules

Richard Treitel and Michael R. Genesereth

Basic Research Problems:

The problem of definition expansion and contraction

Larry Wos

Problem Corner:

Case studies of Z-module reasoning: proving benchmark theorems from ring theory

Tie-Cheng Wang

Author index to volume 3**Subject index to volume 3****ARTIFICIAL INTELLIGENCE REVIEW****Vol. 2 No. 1****Articles****In this issue****Response time****European AI**

Y. Kodratoff

Implementations of PROLOG

J. A. Campbell

Knowledge representations for database metadata

P. M. D. Gray, G. E. Storrs and J. B. H. du Boulay

Knowledge elicitation with multiple experts:

considerations and techniques

K. L. McGraw and M. R. Seale

Book reviews**Viewpoint**

The trouble with AI

R. Forsyth

COGNITIVE SCIENCE**Vol. 11 No. 4****Articles****Cognitive science news**

Interpretation of scientific or mathematical concepts:

Cognitive issues and instructional implications

Frederick Reif

A taxonomy of part-whole relations

Morton E. Winston, Roger Chaffin, and Douglas

Herrmann

Approximate semantic transference: A computational theory of metaphors and analogies

Bipin Indurkha

Defeasible reasoning

John L. Pollock

Book Reviews**Author index to volume 11, 1987****Contents index to volume 11, 1987****Guest Reviewers****DATA & KNOWLEDGE ENGINEERING****Vol. 2 No. 3****Articles**

Specification of information systems operations in INFOMOD

D. A. Jardine and J. J. van Griethuysen

A logic programming perspective on decision table theory and practice

K. D. Reilly, A. Salah and C.-C. Yang

Constraint modelling using a conceptual prototyping language

F. Dignum, T. Kemme, W. Kreuzen, H. Weigand and

R. P. van de Riet

Calendar**Vol. 2 No. 2****Articles**

Graphical query formulation for an entity-relationship model

D. M. Campbell, D. W. Embley and B. Czejdo

ADDS: A system for automatic database schema design based on the binary-relationship model

P. Shoval and M. Even-Chaime

Integrity constraint checking in deductive databases using the prolog not-predicate

T.-W. Ling

Announcement**Calendar****Vol. 2 No. 1****Articles**

An intermediate database language and its rule-based transformation to different database languages

G. Piatetsky-Shapiro and G. Jakobson

Enterprise modeling for database specification and design
A. Sen and L. Kerschberg
 A logic-based information modelling language
D. A. Jardine and J. J. van Griethuysen
Call for papers
Calendar

SYSTEMS RESEARCH AND INFORMATION SCIENCE

Vol. 2 No. 1

Articles

Editorial

Theory of signs

F. H. George

Technological revolution, social power, and welfare

T. R. Burns

Design considerations for computer based advice

B. A. Murphy

Competent expert systems

E. T. Keravnou and L. Johnson

Automatic knowledge-base construction for expert systems

L. Bottaci

Book reviews

Correspondence

Calendar

Vol. 2 No. 2

Articles

Editorial

Linear and integer programming applied to the propositional calculus

H. P. Williams

The role of "explanation" in knowledge elicitation—the use of a conceptual model

T. R. Addis

A review of the intersection of expert systems and database systems: Expert/database systems

S. T. Murdoch

The mind-body problem once more

F. H. George

Book reviews

Calendar

Vol. 2 No. 3

Articles

Editorial

Self-organizing systems and artificial intelligence

A. M. Andrew

A knowledge elicitation method for expert systems design

L. Johnson and N. E. Johnson

Building a skeleton distributed expert system in kee

S. T. Murdoch and L. Johnson

Information management: The next generation

M. R. Nayak

A note on empirical logic

F. H. George

Book reviews

Calendar

Correspondence

APPLIED ARTIFICIAL INTELLIGENCE

Vol. 1 No. 1

Articles

Editorial

About the editors

Cooperative agents for knowledge-based information systems: Dialogue about the archeology of Rome

S. A. Cerri, P. Landini and M. Leoncini

Negative and positive explanations in expert systems

Marie-Christine Rousset and Brigitte Safar

Synthesis of hybrid languages

Christian Holzbaaur and Bernard Pfahringer

Toward a language-independent generator of sentences

Giovanni Adorni and Lina Massone

AI for special needs—an "intelligent" communication aid for bliss users

Julia Rose Galliers

Knowledge representation from Newton to Minsky and beyond

Bernard P. Zeigler

The AI people's way of looking at man and machine

Massimo Negrotti

Vol. 1 No. 2

Articles

About the editors

Choice of words in the generation process of a natural language interface

Helmut Horacek

Expert systems connectivity

Bernard R. Bachmann

Contextual information retrieval using a graph model of a sentence and rough sets

Zbigniew M. Wójcik

Requirements for a classification expert system shell and their realization in med2

Frank Puppe

Knowledge and experience

Ingela Josefson

Datenbank—dialog: A German language interface for relational databases

Harald Trost, Ernst Buchberger, Wolfgang Heinz, Christian Hörtnagl and Johannes Matiassek

Vol. 1 No. 3

Articles

About the editors

A strategy for reasoning in natural language

D. Kayser, P. Fosse, M. Karoubi, B. Levrat and L. Nicaud

Communicating knowledge systems: Part I—big talk among small systems

Christina Sernadas, Helder Coelho and Graça Gaspar

Expert scheduling systems: Survey and preliminary design concepts

Jay Leibowitz and Patricia Lightfoot

Announcement

COMPUTATIONAL INTELLIGENCE

Vol. 3 No. 1

Articles

Automatic program debugging for intelligent tutoring systems

William R. Murray

An architecture for a self-improving instructional planner for intelligent tutoring systems

Stuart A. Macmillan and Derek H. Sleeman

LIY: Learn-it-yourself software interfaces

F. A. Martin

Meaning representation in Montague grammar and situation semantics

Robin Cooper

Representing complex knowledge in an intelligent machine tutor

Beverly P. Woolf

Vol. 3 No. 2

Articles

Gödel, Lucas, and mechanical models of the mind

Robert F. Hadley

A hybrid, decidable, logic-based knowledge representation system

Peter F. Patel-Schneider

Expressiveness and tractability in knowledge representation and reasoning

Hector J. Levesque and Ronald J. Brachman

Domain circumscription: a reevaluation

David W. Etherington and Robert E. Mercer

Defeat among arguments: a system of defeasible inference

R. P. Loui

Patterns of interaction in rule-based expert system programming

Stan Raatz and George Drastal

FGCS

Vol. 3 No. 1

Articles

The scope and limitations of first generation expert systems

D. Partridge

Problems with expert systems?

R. P. van de Riet

Results of survey on trends in expert systems in Japan

Japan Information Processing Development Center

(JIPDEC)

The state of the art of knowledge engineering at five Japanese research institutes—A travel report

R. P. van de Riet

Book reviews

Conference report

ESPRIT '86—results and achievements

Calendar

Vol. 3 No. 2

Articles

POPE—a parallel-operating prolog engine

J. Beer and W. K. Giloi

Knowledge processing: Beware of stalemate

V. Chvalosky

Why evolutionary development of expert systems appears to work

M. S. H. Heng

Should robots have nuclear arms? AI technology and SDI software

I. Pohl

FY 1986 research projects sponsored by the national science foundation

N.S.F.

An impression of the research activities of MCC in the area of data- and knowledge base systems—A travel report

R. P. van de Riet

Book reviews

Letter to the editor

Calendar

JOURNAL OF JAPANESE SOCIETY FOR ARTIFICIAL INTELLIGENCE

Vol. 2 No. 1

Articles

Best first search algorithm for logic programs with uncertainties

K. Akama

Story-understanding system which make use of belief revision mechanism

Y. Kuno

Learning mechanism in the arithmetic problem solver

S. Sakurai and M. Shimura

Short Note

A medical knowledge-base system with medical record management utility

T. Koyama

Program transformation on the multiple world mechanism

H. Nakagawa and E. Itoh

Vol. 2 No. 2

Articles

Deductive network database systems

M. Takizawa

A representation language based on object-oriented concepts, logic oriented and organized knowledge system: LOOKS

Y. Katayama and F. Mizoguchi

A Japanese dialog system applicable to multiple-discourse domains

T. Watanabe, I. Ohsawa and A. Yonezawa

Identification of homonyms in Japanese verb phrases using syntactic and semantic attributes of verbs

M. Hirai and T. Kitahashi

Some properties of prolog

T. Akutsu and S. Ohsuga

Vol. 2 No. 3

Articles

The integration of event-driven and expectation-driven text understandings within parsing

K. Uehara, T. Kakiuchi and J. Toyoda

Basic design of knowledge compiler based on deep knowledge

T. Yamaguchi, R. Mizoguchi, N. Taoka, H. Kodaka, Y. Nomura and O. Kakusho

Learning of translation by the inductive learning system LS/I

K. Akama

Function model generation and evaluation in an intelligent CAD

G. Han and S. Ohsuga

Decision procedure for propositional autoepistemic logic

N. Babaguchi, K. Murakami and T. Aibara

Commonsense reasoning with the multiple world mechanism

H. Nakashima

Short Note

Algebraic approach to program verification

H. Kita, T. Sakabe and Y. Inagaki

INTERNATIONAL JOURNAL OF PATTERN RECOGNITION AND ARTIFICIAL INTELLIGENCE

Vol. 1 No. 1

Articles

Editorial

H. Bunke and P. Wang

In memoriam of Professor King-sun Fu

P. Wang

Pattern Recognition

Computer recognition of totally unconstrained handwritten ZIP codes

P. Ahmed and C. Y. Suen

An application of a graph distance measure to the classification of muscle tissue patterns

A. Sanfeliu, K. S. Fu and J. M. S. Prewitt

Statistical pattern recognition—early development and recent progress

C. H. Chen

A parallel nonlinear mapping algorithm

C. W. Shen, R. C. T. Lee and Y. H. Chin

Computer vision and image analysis

Recognizing unexpected objects: A proposed approach

A. Rosenfeld

3-D object inspection from multiple 2-D camera views

K.-C. Chang and W.-H. Tsai

Icon semantics—A formal approach to icon system design

S.-K. Chang

Artificial Intelligence

On the problem of placing names in a geographic map

H. Freeman and J. Ahn

An approximate linear time propagate and divide theorem prover for propositional logic

R. M. Haralick and S.-H. Wu

An algorithm for logically deducing horn clauses and processing logic queries

C.-C. Yang

Artificial intelligence techniques for the distribution of critical information

L. F. Pau

INTERNATIONAL JOURNAL OF INTELLIGENT SYSTEMS

Vol. 1 No. 1

Articles

Constructs and phenomena common to the semantically-rich domains

Beth Adelson

An intelligent computer vision system

Su-shing Chen

Hierarchical representation of problem-solving knowledge in a frame-based process planning system

Dana S. Nau and Tien-Chien Chang

Toward general theory of reasoning with uncertainty. I: Nonspecificity and fuzziness

Ronald R. Yager

Review of *HEURISTICS—intelligent search strategies for computer problem solving* by Judea Pearl

Henri Farreny and Henri Prade

ARTIFICIAL INTELLIGENCE IN ENGINEERING

Vol. 1 No. 1

Articles

From the editors

Knowledge based standards processing

S. J. Fenves and J. H. Garrett, Jr

On a mechanical reasoning about causal relations

A. Fusaoka and K. Takahashi

Dominic: A domain-independent program for mechanical engineering design

A. E. Howe, P. R. Cohen, J. R. Dixon and M. K. Simmons

Implementation of a knowledge based seismic risk evaluation system on microcomputers

G. H. Miyasato, W. Dong, R. E. Levitt and A. C. Boissonnade

EDISON: An engineering design invention system operating naively

M. G. Dyer, M. Flowers and J. Hodges

Process planning formalization in an AI framework

S. Joshi, T. C. Chang and C. R. Liu

Machine intelligence in machine design: Workshop summary

J. H. Cole, H. W. Stoll and V. Van Dyke Parunak
