

INDEX TO VOLUME 2

- d'Agapeyeff, A. and Hawkins, C. J. B.** Expert systems in UK business: a critical assessment, 185–201
- Balban, M. S.** *See* Lan, Panos and Balban
- Barnes, D. P.** *See* Robinson, Hardy, Barnes, Price and Lee
- Bloomfield, B. P.** More comments on rule induction: A reply to Bratko and Michie, 69–70
- Bloomfield, B. P.** Capturing expertise by rule induction, 55–63
- Bratko, I. and Michie, D.** Some comments on rule induction, 65–67
- Cohen, P. R.** The control of reasoning under uncertainty: A discussion of some programs, 5–25
- Connell, N. A. D.** The current impact of expert systems on the accounting profession and some reasons for hesitancy in the adoption of such systems, 207–211
- Drummond, M., Macintosh, A. and Tate, A.** A framework for technology transfer within the Artificial Intelligence Applications Institute, 159–168
- Fox, J.** Editorial: Cognitive Science and Knowledge Engineering, 1–3
- Fox, J.** Editorial: Model papers for the Knowledge Engineering Review, 223–225
- Fox, J.** Editorial: Technology transfer and the evolution of Knowledge Engineering, 145–146
- Fox, J.** Editorial: The evolution of knowledge systems: ideological confusion or healthy pragmatism?, 73
- Fox, J.** *See* Walker and Fox
- Gale, W.** Statistical application of artificial intelligence and knowledge engineering, 227–247
- Häggglund, S.** The Linköping approach to technology transfer in knowledge engineering, 153–158
- Hardy, N. W.** *See* Robinson, Hardy, Barnes, Price and Lee
- Hawkins, C. J. B.** *See* d'Agapeyeff and Hawkins
- Lan, M. S., Panos, R. M. and Balban, M. S.** Experience using S.I: an expert system for newspaper printing press configuration, 277–285
- Laufmann, S. C.** A strategy for near-term success using knowledge-based systems, 179–183
- Laurent, J-P.** Types of control structure in expert systems, 123–135
- Lee, M. H.** *See* Robinson, Hardy, Barnes, Price and Lee
- Macintosh, A.** *See* Drummond, Macintosh and Tate
- Michie, D.** *See* Bratko and Michie
- Mori, F.** Expert systems in business: a Japanese experience, 203–206
- Niwa, K.** Knowledge transfer: a key to successful application of knowledge-based systems, 147–151
- Panos, R. M.** *See* Lan, Panos and Balban
- Price, C. J.** *See* Robinson, Hardy, Barnes, Price and Lee
- Rault, J-C.,** A survey of French developments in knowledge-based systems, 287–295
- Robinson, V., Hardy N. W., Barnes, D. P., Price, C. J. and Lee, M. H.** Experiences with a knowledge engineering toolkit: an assessment in industrial robotics, 43–54
- Saffiotti, A.** An AI view of the treatment of uncertainty, 75–97
- Slatter, P. E.** Cognitive emulation in expert system design, 27–41
- Sleeman, D.** *See* Ward and Sleeman
- Stenton, S. P.** Dialogue management for co-operative knowledge based systems, 99–122
- Susskind, R. E.** Critical note-artificial intelligence and legal reasoning, 213–218
- Tate, A.** *See* Drummond, Macintosh and Tate
- Teschler, L.** Trends in the marketing of expert system technology, 175–177
- Walker, N. and Fox, J.** Knowledge based interpretation of images: a biomedical perspective, 249–264
- Ward, R. D. and Sleeman, D.** Learning to use the S.I knowledge engineering tool, 265–276
- Wess, B. P.** Commentary on the commercialization of knowledge engineering: enterprise and product development, 169–173
