ARTIFICIAL INTELLIGENCE

Vol. 35 No. 1
Articles
Man–machine theorem proving in graph theory
D. Cvetković and I. Pevac
A model for belief revision
J. P. Martins and S. C. Shapiro
Learning by understanding analogies
R. Greiner
A comparison of two evidential reasoning schemes (research note)
C.-H. Lee
Book Review Section
On book reviews: policy and progress
M. J. Stefik
Forthcoming Papers

Vol. 35 No. 2
Articles
Interpreting image curve from multiframes
C.-H. Lee
Reasoning about action I: a possible worlds approach
M. L. Ginsberg and D. E. Smith
Automatic knowledge base refinement for classification systems
A. Ginsberg, S. M. Weiss and P. Politakis
Defining operationality for explanation-based learning
R. M. Keller
Default reasoning and possibility theory (research note)
D. Dubois and H. Prade
Embracing causality in default reasoning (research note)
J. Pearl
Book Review
Announcements
Forthcoming Papers

Vol. 35 No. 3
Articles
Conspiracy numbers for min-max search
D. A. McAllester
Reasoning about action II: the qualification problem
M. L. Ginsberg and D. E. Smith
On the relation between default and autoepistemic logic
K. Konolige
The anomalous extension problem in default reasoning
P. H. Morris
Constraint satisfaction from a deductive viewpoint (research note)
W. Bibel

Forthcoming Papers
Author Index
Volume 35, 1988
Contents
Volume 35, 1988

Vol. 36 No. 1
Articles
A pattern classification approach to evaluation function learning
K.-F. Lee and S. Mahajan
A logical framework for default reasoning
D. Poole
Problems in formal temporal reasoning
Y. Shoham and D. McDermott
An approach to default reasoning based on a first-order conditional logic: revised report
J. P. Delgrande
Constraints on deformable models: recovering 3D shape and nonrigid motion
D. Terzopoulos, A. Witkin and M. Kass
Comments on Mohr and Henderson's path consistency algorithm (research note)
C.-C. Han and C.-H. lee
Book Review
Announcements
Forthcoming Papers

THE JOURNAL OF LOGIC PROGRAMMING

Vol. 5 No. 2
Articles
Clausal Intuitionistic logic II. Tableau proof procedures
L. Thorne McCarty
Efficient unification of quantified terms
John Staples and Peter J. Robinson
Toward a declarative semantics for infinite objects in logic programming
William G. Golson
A data-dependency-based intelligent backtracking scheme for prolog
Vipin Kumar and Yow-Jian Lin

INTERNATIONAL JOURNAL OF MAN-MACHINE STUDIES

Vol. 27 Nos. 5 and 6
Introduction
Cognitive tools: Instruments or prostheses?
Cognitive aids in process environments: prostheses or tools?
J. Reason
How can computer-based visual displays aid operators?
V. De Keyser
Human interaction with an "intelligent" machine
E. M. Roth, K. B. Bennett and D. D. Woods
Trust between humans and machines, and the design of decision aids
B. M. Muir
Operator assistant systems
G. A. Boy
Human error detection processes
A. Rizzo, S. Bagnara and M. Visciola
Commentary: Cognitive engineering in complex dynamic worlds
D. D. Woods
Models of decision makers in accident conditions
Accidents at sea: Multiple causes and impossible consequences
W. A. Wagenaar and J. Groeneweg
Modelling operators in accident conditions: advances and perspectives on a cognitive model
A. Amendola, U. Bersini, P. C. Cacciabue and G. Mancini
Human supervisor modelling: Some new developments
H. G. Stassen
Intelligent aids, mental models, and the theory of machines
N. Moray
Commentary: Models of the decision maker in unforseen accidents
G. Mancini
Reasoning and intelligence
Integrating shallow and deep knowledge in the design of an on-line process monitoring system
M. Gallanti, L. Gilardoni, G. Guida, A. Stefanini and L. Tomada

Information and reasoning in intelligent decision support systems
E. Hollnagel
The MGR algorithm and its application to the generation of explanations for novel events
M. J. Coombs and R. T. Hartley
A comparison of some rules for probabilistic reasoning
P. Garbolino
A tentative comparison of numerical approximate reasoning methodologies
D. Dubois and H. Prade
Bayesian theory and artificial intelligence: The quarrelsome marriage
P. Garbolino
Commentary: Issues in knowledge-based decision support
E. Hollnagel
Editorial announcement

INTERNATIONAL JOURNAL OF MAN-MACHINE STUDIES

Vol. 28 No. 1
Articles
Reading from screen versus paper: there is no difference
D. J. Oborne and D. Holton
Prompting, feedback and error correction in the design of a scenario machine
J. M. Carroll and D. S. Kay
Robust dictionary lookup using associative networks
O. Ekeberg
Conditional statements, looping constructs, and program comprehension: an experimental study
E. R. Iselin
Verifying identity via keystroke characteristics
J. Leggett and G. Williams
Analysis of competition-based spreading activation in connectionist models
P. Y. Wang, S. B. Seidman and J. A. Reggia
Editorial Announcement

IEEE TRANSACTIONS ON PATTERN ANALYSIS AND MACHINE INTELLIGENCE

Vol. 10 No. 3
Special issue on industrial machine vision and computer vision technology—Part II
Introduction to the PAMI special issue on industrial machine vision and computer vision technology—Part II
J. L. C. Sanz
Articles
Three-dimensional vision structure for robot applications
D. Nitzan
The CLIP7A image processor
T. J. Fountain, K. N. Matthews and M. J. B. Duff
The AIS-500 parallel processor
L. a. schmitt and S. S. Wilson
An automatic circuit diagram reader with loop-structure-based symbol recognition
A. Okazaki, T. Kondo, K. Mori, S. Tsunekawa and E. Kawamoto
VITS—a vision system for autonomous land vehicle navigation
M. A. Turk, D. G. Morgenthaler, K. D. Gremban and M. Marra
Vision and navigation for the Carnegie-Mellon Navlab
C. Thorpe, M. H. Hebert, T. Kanada and S. A. Shafer
Real-time part position setting
S. J. Gordon and W. P. Seering
Correspondence
A tiered-color illumination approach for machine inspection of solder joints
D. W. Capson and S.-K. Eng
A flexible vision-based algorithm for a book sorting system
T. Gotoh, T. Toriu, S. Sasaki and M. Yoshida
VISTA: visual interpretation system for technical applications—architecture and use
D. Paul, W. Hättich, W. Nill, S. Tatari and G. Winkler
Automatic sensor placement from vision task requirements
C. K. Cowan and P. D. Kovesi

Vol. 10 No. 4
Articles
Computer vision and image analysis
The computation of visible-surface representations
D. Terzopoulos
A method for enforcing integrability in shape from shading algorithms
R. T. Frankot and R. Chellappa
The generalized gabor scheme of image representation in biological and machine vision
M. Porat and Y. Y. Zeevi
Integrated analysis of thermal and visual images for scene interpretation
N. Nandhakumar and J. K. Aggarwal
Bayesian clustering for unsupervised estimation of surface and texture models
J. F. Silverman and D. B. Cooper
On image analysis by the methods of moments
C.-H. Teh and R. T. Chin
Line-drawing interpretation: straight lines and conic sections
V. S. Nalwa
Classification techniques
Automatic pattern recognition: a study of the probability of error
L. Devroye
Measuring consensus effectiveness by a generalized entropy criterion
H. E. Stephanou and S.-Y. Lu
Learning
Automated concept acquisition in noisy environments
F. Bergadano, A. Giordana and L. Saitta
Correspondence
Computer vision and image analysis
Efficient component labelling of images of arbitrary dimension represented by linear bintrees
H. Samet and M. Tamminen
A multilevel parallel processing approach to scene labeling problems
H.-H. Liu, T. Y. Young and A. Das
Two-dimensional convolution on a pyramid computer
J. H. Chang, O. H. Ibarra, T.-C. Pong and S. M. Sohn
Using constancy of distance to estimate position and displacement in space
A. Mitiche, S. Seida and J. K. Aggarwal
Classification techniques
A classifier for feature vectors whose prototypes are a function of multiple continuous parameters
J. E. McFee and Y. Das
IEEE computer society membership information

JOURNAL OF JAPANESE SOCIETY FOR ARTIFICIAL INTELLIGENCE

Vol. 3 No. 2
Articles
A planning system utilizing meta knowledge
T. Nagata and Y. Teramoto
Optimization and performance evaluation of inexact consistent labeling algorithms using merge method
S. Nishihara, Y. Matsuo and K. Ikeda
PiL: a system to learn strategy in problem-solving (a case study in an equation and inequality of the first degree)
S. Yamada, N. Abe and S. Tsuji
Temporal representation and default reasoning
H. Hara, H. Kitakami and J. Nakajima
Meta knowledge representation for knowledge base maintenance and its application
H. Tsuji and C. Yasunobu

Natural hierarchical knowledge
H. Nakagawa, M. Kayashimi and T. Mori
Prolog-based attached procedures in the frame-based knowledge representation system ZERO
H. Ito and H. Ueno
Knowledge representation and inference based on first-order modal logic
K. Iwanuma and M. Harao
Nonrecursive extension and its properties in default reasoning
K. Murakami, T. Aibara and H. Shitanda
A solution diagnosing system for detecting errors in solutions of circuit analyses
S. Watanabe, Y. Kuwata and T. Mizuta

FGCS
Vol. 3 No. 3
Articles
N-expression implementations for integrated symbolic and numeric processing
A. N. Refenes
Developing and running expert systems with PESYS
G. I. Doukidis and E. A. Whitley
Efficient processing of integrity constraints in deductive databases
P. C. Sheu and W. S. Lee
Book Reviews
Calendar
Announcement

JOURNAL OF AUTOMATED REASONING
Vol. 4 No. 2
Articles
The addition of bounded quantification and partial functions to a computational logic and its theorem prover
Robert S. Boyer and J. Strother Moore
Mechanical procedure for proof construction via closed terms in typed λ calculus
Marek Zaionc
First-order modal tableux
Melvin Fitting
Basic Research Problems
The problem of explaining the disparate performance of hyperresolution and paramodulation
Larry Wos
Problem Corner
Automated proofs of Löb's theorem and Gödel's two incompleteness theorems
Art Quaife
Book Review
Errata

COGNITIVE SCIENCE
Vol. 12 No. 2
Cognitive Science News
The processes of scientific discovery: the strategy of experimentation
Deepak Kulkarni and Herbet A. Simon
Critical decisions under uncertainty: representation and structure
Benjamin Kuipers, Alan J. Moskowitz and Jerome P. Kassirer
Why and how to learn why: analysis-based generalization of procedures
Clayton Lewis
Cognitive load during problem solving: effects on learning
John Sweller
Estimating human cognitive capacities: a response to Landauer
Lawrence Hunter
An estimate of how much people remember, not of underlying cognitive capacities
Thomas K. Landauer

DECISION SUPPORT SYSTEMS
Vol. 4 No. 2
Articles
Schedule generation in a flexible manufacturing system: a knowledge-based approach
Sheldon Shen and Yih-Long Chang
A procedure for negotiating efficient and non-efficient compromises
Gregory E. Kersten
On monotone chaining procedures of the CF type
Robert G. Jeroslow
Computation-oriented reductions of predicate to propositional logic
Robert G. Jeroslow
Decision support in time series modeling by pattern recognition
Kun Chang Lee and Sung Joo Park
A relational view of activities for systems analysis and design
Ari P. J. Vepsalainen
An entity–relationship approach to decision support and expert systems
Ye-Sho Chen
An expert decision support system for production control
Gautam Biswas, Michael Oliff and Arun Sen
Resource-constrained project scheduling: an international exercise in DSS development
J. M. Anthonisse, K. M. van Hee and J. K. Lenstra
