APPLIED ARTIFICIAL INTELLIGENCE

Vol. 2 No. 1

Articles

Evaluation of the expert system tools KEE and ART: a case study

E. Grégoire

Management of constraints in VLSI data bases

Jacek Maitan

A decision support system for village health workers in developing countries

G. Porenta, B. Pfahringer, M. Hoberstorfer and R. Trappl

Sigmund Freud on artificial intelligence (an artificial interview)

Anthony F. Badalamenti

News and announcements

ARTIFICIAL INTELLIGENCE REVIEW

Vol. 2 No. 4

Articles

In this issue

Analogical mechanisms

Mark Keane

Book reviews

Viewpoint

The debt of artificial intelligence to John von Neumann

N. V. Findler

ARTIFICIAL INTELLIGENCE

Vol. 37 Nos. 1-3

Special volume on geometric reasoning

Articles

Geometric reasoning and artificial intelligence: introduction to the special volume

D. Kapur and J. L. Mundy

Automated geometric reasoning and geometric representation

Wu's method and its application to perspective viewing

D. Kapur and J. L. Mundy

Geometric reasoning with logic and algebra

D. S. Arnon

A refutational approach to geometry theorem proving

D. Kapur

Geometry theorem proving by decomposition of quasi-algebraic sets: an application of the Ritt-Wu principle

H.-P. Ko

Modular algebraic specification of some basic geometrical constructions

J. A. Goguen

Robotics and motion planning

A survey of motion planning and related geometric algorithms

J. T. Schwartz and M. Sharir

An algorithmic approach to some problems in terrain navigation

J. S. B. Mitchell

Constructing roadmaps of semi-algebraic sets I: completeness

J. Canny

A geometric approach to error detection and recovery for robot motion planning with uncertainty

B. R. Donald

Machine vision

Geometric reasoning for constructing 3D scene descriptions from images

E. L. Walker and M. Herman

A multi-level geometric reasoning system for vision

M. Barry, D. Cyrluk, D. Kapur, J. Mundy and V.-D. Nguyen

On the geometric interpretation of image contours

R. Horaud and M. Brady

Solid modeling

The geometry of projective blending surfaces

C. Hoffman and J. Hopcroft

Verifiable implementations of geometric algorithms using finite precision arithmetic

V. J. Milenkovic

Geometric relationships between toleranced features

A. Fleming

COGNITIVE SCIENCE

Vol. 12 No. 3

Cognitive science news

Articles

Comparison between Kanerva's SDM and Hopfield-type neural networks

James D. Keeler

A connectionist approach to knowledge representation and limited inference

Lokendra Shastri

Adaptive planning

Richard Alterman

A distributed connectionist production system

David S. Touretzky and Geoffrey E. Hinton

Book Reviews

COMPUTATIONAL INTELLIGENCE

Vol. 4 No. 2

Special issue: AI In France

A glance at artificial intelligence in France: editorial

Patrick Saint-Dizier

OBADE: cognitive modelling with objects

Nelly Darcel and Marie-CI. Escarabajal

What kind of thing is a concept?

Daniel Kayser

On the consistency of knowledge bases: the COVADIS system

Marie-Christine Rousset

On fuzzy syllogisms

Didier Dubois and Henri Prade

Towards an analyzer (parser) in a machine translation system based on ideas from expert systems

Yusoff Zaharin

A question-answering system for the French Yellow Pages

P. Herman, G. Sabah and A. Vilnat

Processing of unknown words in a natural language question-answering system

J. P. Fournier, P. Herman, G. Sabah and A. Vilnat

Machine learning research at the Laboratoire de Recherche en Informatique at Orsay, France

Antoine P. Cornuejols

COMPUTERS AND ARTIFICIAL INTELLIGENCE

Vol. 7 No. 5

Articles

On the relation of the probability theory and the fuzzy sets theory foundations

B. Y. Kovalevčuk, D. I. Shapiro

Some complexity aspects of VLSI computations. Part 3. On the power of input bit permutation in tree and trellis automata

J. Hromkovič, D. Pardubska

The theory of a nonsubjective expert system based on causal analysis, New interpretation of fuzzy description and pattern recognition

M. Valášek, R. Bek

Wavefront arrays for symmetric 2-D convolution operator: a data flow approach to design and specification

E. Trišina

Tree-structured multiprocessors and multicomputers: a survey

M. J. Livesey, J. Owczarczyk

The S-machine: design and applications

D. Tomescu, C. Băleanu

Book reviews

Announcements

Vol. 7 No. 6

Articles

Some complexity aspects of VLSI computations. Part 4.

VLSI circuits with programs

J. Hromkovič, and D. Pardubska

Production-based program synthesis

A. Sakharov

The binary semantic net formalism for the specification of database design and constraints, and its implementation

R. Meersman, and P. Verlinden

Algebraic approach to the problem of addressation

G. G. Ananashvili

Uncertainty management in a distributed knowledge based system

N. A. Khan and R. Jain

Book reviews

Announcements

DATA & KNOWLEDGE ENGINEERING

Vol. 3 No. 3

Articles

Formal properties of net-based knowledge representation schemes

P. Atzeni and D. S. Parker, Jr

Information systems dynamics representation in production environments

A. Dileva and P. Giolito

Database project UNIS (a UNified database development support System)

M. Duži, F. Krejči and Z. Staniček

A knowledge-based approach to relational database design

D. Obretenov, Zh. Angelov, J. Mihaylov, P. Dishlieva and N. Kirova

Relational theory of queries

J. Steiner

Incomplete information in a deductive database

M. H. Williams and Q. Kong

Calendar

DECISION SUPPORT SYSTEMS

Vol. 4 No. 3

Articles

A survey of knowledge acquisition techniques and their relevance to managerial problem domains

Jungduck Kim and James F. Courtney

Applying machine learning to model management in decision support systems

Michael J. Shaw, Pei-Lei Tu and Prabuddha De

Some problems on uncertain knowledge acquisition for rule based systems

S. Gaglio, P. P. Puliato, M. Paolucci and P. P. Perotto

An interactive multi-user decision support system for consensus reaching processes using fuzzy logic with linguistic quantifiers

Mario Fedrizzi, Janusz Kacprzyk and Slawomir Zadrozny

SAGE: A decision support system for the sequencing of operations within a robotic workcell

P. Freedman and A. Malowany

Decision support system concepts in expert systems: an empirical study

Georgios I. Doukidis

Decision support systems: a summary, problems, and future trends

M. C. Er

An integrated framework for decision support in corporate planning

R. Ramesh and G. Chandra Sekar

Announcements

Calendar of events

EXPERT SYSTEMS

Vol. 5 No. 4

Guest editorial

Expert tutoring systems

Masoud Yazdani

Articles

Education, training and knowledge base design

C. P. Tompsett

The trainee teacher support system: an expert system for advising trainee teachers on their classroom practice

Sharon Wood

Towards an intelligent tutor for a complex mathematical domain

Hyacinth Nwana and Peter Coxhead

The intelligent authoring of computer assisted learning software

R. I. Nicolson, P. J. Scott and P. H. Gardner

Control models in computer-assisted learning

F. A. Martin

Tutoring systems: the state-of-the-art in Great Britain

Lindsey Ford and Masoud Yazdani

Conference report

Software review

Feature

News

Index to volume 5

IEEE EXPERT

Vol. 3 No. 3

Articles

Object-oriented systems

G. V. Ramamoorthy and Phillip C. Sheu

Knowledge-based systems for financial applications

David Leinweber

A case study: acquiring strategic knowledge for expert system development

Duane Sharman and E. I. M. Kendall

LDL—A technology for the realization of tightly coupled expert systems

Shalom-Tsur

Guest editor's introduction

James R. Miller

Argo: a system for design by analogy

Michael N. Huhns and Ramon D. Acosta

A case-based approach to modeling legal expertise

Kevin D. Ashley and Edwina L. Rissland

IEEE TRANSACTIONS ON PATTERN ANALYSIS AND MACHINE INTELLIGENCE

Vol. 10 No. 5

Editor's notice *S. L. Tanimoto*

Articles

Toward a symbolic representation of intensity changes in images

A. F. Korn

Orientation of 3-D structures in medical images

T. L. Faber and E. M. Stokely

Post determination of a three-dimensional object using triangle pairs

S. Linnainmaa, D. Harwood and L. S. Davis

Autonomous robotic vehicle road following

D. Kuan, G. Phipps and A.-C. Hsueh

Spatial classification using fuzzy membership models

J. T. Kent and K. V. Mardia

A planning model with problem analysis and operator hierarchy

K.-H. Chang and W. G. Wee

A methodology for solving problems: problem modeling and heuristic generation

K. B. Irani and S. I. Yoo

Unsynchronized iteratively deepening parallel alpha-beta search

M. Newborn

An eigendecomposition approach to weighted graph matching problems

S. Umeyama

Correspondence

Vol. 10 No. 6

Articles

Construction of the octree approximating three-dimensional objects by using multiple views

H. Noborio, S. Fukuda and S. Arimoto

Evidence-based recognition of 3-D objects

A. K. Jain and R. Hoffman

A three-module strategy for edge detection

V. Lacroix

2-D invariant object recognition using distributed associative memory

H. Wechsler and G. L. Zimmerman

One-dimensional regularization with discontinuities

D. Lee and T. Pavlidis

Machine vision algorithms for automated inspection of thin-film disk heads

J. L. C. Sanz and D. Petković

Hierarchical chamfer matching: a parametric edge matching algorithm

G. Borgefors

Knowledge structuring and constraint satisfaction: the mapsee approach

J. A. Mulder, A. K. Mackworth and W. S. Havens

On the number of digital straight line segments

C. A. Berenstein and D. Lavine

A method for attribute selection in inductive learning systems

P. W. Baim

Learning based on conceptual distance

Y. Kodratoff and G. Tecuci

A robust algorithm for text string separation from mixed text/graphics images

L. A. Fletcher and R. Kasturi

INTERNATIONAL JOURNAL OF MAN-MACHINE STUDIES

Vol. 29 No. 1

Articles

A model of fault diagnosis performance of expert marine engineers

A model of fault diagnosis performance of expert marine engineers

T. Govindaraj and Y.-L. Su

An application of computerized fuzzy graphic rating scale to the psychological measurement of individual differences

T. Hesketh, R. Pryor and B. Hesketh

The effect of different conceptual models using reasoning in a database query writing task

C. Katzeff

Question asking when learning a text-editing system

C. M. Allwood and M. Eliasson

Rough sets: probabilistic versus deterministic approach

Z. Pawlak, S. K. M. Wong and W. Ziarko

Vol. 29 No. 2

Articles

An expert system for solving retrograde-analysis chess problems

B. E. P. Alden and M. A. Bramer

Fuzzy sets and *t*-norms in the light of fuzzy logic

V. Novák and W. Pedrycz

Managing uncertainty in a fuzzy expert system

J. J. Buckley

The evaluation of verbal models

R. Zwick

Using explanations for knowledge-base acquisition

K. Silvestro

Using concept learning for knowledge acquisition

I. H. Witten and B. A. MacDonald

A knowledge acquisition environment for scene analysis

D. Tranowski

Knowledge acquisition as knowledge assimilation

L. S. Lefkowitz and V. R. Lesser

Vol. 29 No. 3

Articles

Intelligent computer-assisted instruction: a theoretical framework

F. Bumbaca

Knowledge-based approach to computer-aided learning

G. I. Webb

Uses of repertory grid-centred knowledge acquisition tools for knowledge-based systems

J. H. Boose

ASTEK: A multi-paradigm knowledge acquisition tool for complex structured knowledge

C. Jacobson and M. J. Freiling

Validation in a knowledge support system: construing and consistency with multiple experts

M. L. G. Shaw and J. B. Woodward

Vol. 29 No. 4

Articles

An expert system for conceptual schema design: a machine learning approach

R. Yasdi and W. Ziarko

A structured knowledge elicitation methodology for building expert systems

C. Garg-Janardan and G. Salvendy

Effects of computer programming experience on network representations of abstract programming concepts

N. J. Cooke and R. W. Schvaneveldt

A formal analysis of machine learning systems for knowledge acquisition

V. L. Shalin, E. J. Wisniewski, K. R. Levi and P. D. Scott

Refining problem-solving knowledge in repertory grids using a consultation mechanism

D. B. Shema and J. H. Boose

Design goals for sloppy modeling systems

S. Wrobel

Vol. 29 No. 5

Articles

A survey of formal tools and models for developing user interfaces

M. U. Farooq and W. D. Dominick

Accuracy and savings in depth-limited capture search

P. Bettadapur and T. A. Marsland

Human performance in relational algebra, tuple calculus, and domain calculus

G. W. Hansen and J. V. Hansen

Non-monotonic compatibility relations in the theory of evidence

R. R. Yager

User-adaptive computer graphics

M. Holynski

Protos: an exemplar-based learning apprentice

E. R. Bareiss, B. W. Porter and C. C. Wier

MOLE: a knowledge acquisition tool that buries certainty factors

L. Eshelman

Acquiring strategic knowledge from experts

T. R. Gruber

Toward automating recognition of differing problem-solving demands

J. Stout, G. Caplain, S. Marcus and J. McDermott

Errata

Vol. 29 No. 6

Articles

Experimentation in computer science: an empirical view

J. Mitchell and C. Welty

Knowledge-based successive linear programming for linearly constrained optimization

S. Wang and Y. Lu

On the representation and the impact of reliability on expert system weights

D. E. O'Leary

Accommodating individual differences in searching a hierarchical file system

K. J. Vincente and R. C. Williges

The mental rotation and perceived realism of computer-generated three-dimensional images

W. Barfield, J. Sandford and J. Foley

A mathematical programming approach to inference with the capability of implementing default rules

R. R. Yager

Knowledge acquisition for evaluation systems

G. Klinker, S. Genet and J. McDermott

Cognitive primitives

A. T. Rappaport

JOURNAL OF INTELLIGENT SYSTEMS

Vol. 1 No. 1

Articles

Structure and texture in shape representation

S. Gaglio, A. Grattarola, L. Massone and P. Morasso

Superior accuracy of decrementing over incrementing associate networks when operating in initially random connectivities

V. G. Dobson

Dynamically expanding context

T. Kohonen

INTERNATIONAL JOURNAL OF PATTERN RECOGNITION AND ARTIFICIAL INTELLIGENCE

Vol. 2 No. 3

Articles

Introduction

J.-P. Haton

Progress in high compression image coding

M. Kunt

Array architectures for iconic and symbolic image processing

T. J. Fountain

Parallel split-level relaxation

A. Samal and T. Henderson

Early orientation selection—inferring trace, tangent, and curvature fields

S. W. Zucker

Image sequences—ten (octal) years—from phenomenology towards a theoretical foundation

H.-H. Nagel

Motion and structure from motion in a piecewise planar environment

O. D. Faugeras and F. Lustman

Semantic interpretation of 3-D stereo data: finding the main structures

M. Thonnat

Pattern recognition by graph matching—combinatorial versus continuous optimization

P. Kuner and B. Ueberreiter

GSS—a fast, model-based vision system for workpiece recognition

P. Rummel and P. Köllensperger

Control strategies in a hierarchical knowledge structure

H. Niemann, G. Sagerer and W. Eichhorn

A multilingual approach to task-oriented man-machine dialogue by voice

P. Morin, J.-P. Hatton, J.-M. Pierrel, G. Ruske and W. Wiegel

JOURNAL OF AUTOMATED REASONING

Vol. 4 No. 4

Articles

A prolog technology theorem prover: implementation by an extended prolog compiler

Mark E. Stickel

Unification in boolean rings

Ursula Martin and Tobias Nipkow

Inferring negative information from disjunctive databases

Kenneth A. Ross and Rodney W. Topor

A new reduction rule for the connection graph proof procedure

Klaus Heje Munch

Inference rules using local contexts

Leonard G. Monk

Basic research problems

The problems of self-analytically choosing the weights

Larry Wos

Problem corner

Opening the AC-unification race

Hans-Jürgen Bürckert, Alexander Herold, Deepak Kapur, Jörg H. Siekmann, Mark E. Stickel, Michael Tepp, and Hantao Zhang

Authors index to volume 4**Subject index to volume 4****KNOWLEDGE-BASED SYSTEMS****Vol. 1 No. 5****Articles**

Parallel architectures for AI semantic network processing

J. G. Delgado-Frias and W. R. Moore

General purpose inference engine for canonical graph models

B. J. Garner and E. Tsui

Knowledge-based system for supporting statistical database management

A. Gabor and G. Barna

Concept classifier for knowledge acquisition in frame-based systems

J. R. Kent, R. C. Thomas and I. S. Torsun

Semi-automatic analysis of two-dimensional electrophoretic gels

A. A. van Hoff, T. Niblett, D. G. Rowlands, A. Flook, P. I. Payne and S. McKee

Integrated graphical approach to knowledge representation and acquisition

*L. Esfahani and J. Kellett***Books****R and D review****Products****Literature****Calendar****Index to volume 1 (1987-88)****PATTERN RECOGNITION LETTERS****Vol. 8 No. 1****Articles**

Cramer-Rao bounds for the estimation of means in a clustering problem

L. I. Perlovsky

A statistical technique for comparing the accuracies of several classifiers

S. W. Looney

Training sets and a priori probabilities with the nearest neighbour method of pattern recognition

E. R. Davies

Random field identification from a sample: Experimental results

S. M. Dunn, R. L. Keizer and A. Rosenfeld

On the description of the relative position of fuzzy patterns

L. T. Koczy

An algebraic environment to process fuzzy images

P. Bhattacharya

A note on Rutovitz' method for parallel thinning

U. Eckhardt

An artificial intelligence approach to speech recognition and understanding

L. Stringa

Parallel algorithm for corner finding on digital curves

F.-H. Cheng and W.-H. Hsu

Scale-rotation invariant pattern recognition applied to image data compression

J. L. de Bougrenet de la Tocnaye and F. Ghorbel

Convexity is necessary—A correction

*R. A. Meller***Announcement****Vol. 8 No. 2****Articles**

Introduction to the special issue on expert systems in medical imaging

H. Niemann

Extension of IBIS for 3D organ recognition in NMR multi-slices

S. Delleprane, C. Regazzoni, S. B. Serpico and G. Vernazza

Computer vision on magnetic resonance images

W. Menhardt and K.-H. Schmidt

Automatic interpretation of medical image sequences

G. Sagerer

Modelling uncertainty in ESATS by classification inference

E. Backer, J. J. Gerbrands, J. H. C. Reiber, A. E. M. Reijs, W. Krifgsman and H. J. van den Herik

A knowledge-based system for the delineation of blood vessels on subtraction angiograms

C. Smets, G. Verbeek, P. Suetens and A. Oosterlinck

An artificial intelligence approach for medical picture analysis

J. Y. Catros and D. Mischler

ARCHI: An expert system for biological objects recognition

*O. Lebel***Vol. 8 No. 3****Articles****Editorial***E. S. Gelsema*

A fast computational method for minimum square error transform

S. Lee and J. H. Kim

A flexible statistical pattern recognition approach in transient stability studies

J. L. Souflis, A. V. Machias and B. C. Papadias

SDDD: a new dissimilarity index for the comparison of speech spectra

B. Harmengnies

Automatic optically-based recognition of speech

K. E. Finn and A. A. Montgomery

Correction of background in very low statistics images

G. A. De Biase and R. Nesci

Multi-coloured quadrees for GIS: exploiting bit-parallelism for rapid boolean overlay

S. Menon, P. Gao and T. Smith

Computation of stereo disparity using regularization

R. March

Moving object detection, inspection, and counting using image stripe analysis

W.-N. Lie and Y.-C. Chen

The Delaunay triangulation and the shape hull as tools in muscle fibre analysis

F. Pernuš

Individual hip prosthesis design from CT images

*B. Chalmond***Erratum****Announcements****SYSTEMS RESEARCH AND INFORMATION SCIENCE****Vol. 2 No. 4****Articles****Editorial**
