

From the journals. . .

AI Magazine

Vol. 9 No. 4

Articles

Foundations and grand challenges of artificial intelligence

Raj Reddy

Connectionism and information processing abstractions

B. Chandrasekaran et al.

How evaluation guides AI research

Paul Cohen and Adele Howe

A method for evaluating candidate expert system applications

James Slagle and Michael Wick

A novel approach to expert systems for design of large structures

H. Adeli and K. V. Balasubramanian

High-level connectionist models

Jordan Pollack

Theoretical issues in conceptual information processing

James Hendler et al.

Uncertainty in artificial intelligence

Tod Levitt

New Procuts

AI and Society

Vol. 2 No. 3

Articles

Editorial

Karamjit S. Gill

Visions, illusions and myths about materials data systems

Gustaf Östberg

Channeling knowledge: Expert systems as communications media

Randall Whitaker and Olov Östberg

Knowledge-based systems and issues of integration: A commercial perspective

Karl M. Wiig

Computerised manufacturing and empirical knowledge

Fritz Böhle and Brigitte Milkau

The closed world: Systems discourse, military strategy and post WWII American historical consciousness

Paul N. Edwards

Open Forum

Keep on trucking . . . and back again

David Smith

Computers—Utensils or epaulets? The application perspective revisited

Gro Bjerknes and Tone Bratteteig

The logic of expert judging systems and the rights of the accused

Joseph S. Fulda

Women and AI

Wendy Hall and Gillian Lovegrove

Humpty dumpty, private languages and logic programmers

T. J. M. Bench-Capon

Book Review

News Section

Artificial intelligence

Vol. 38 No. 1

Articles

Shape from texture: General principle

K. Kanatani and T.-C. Chou

An algorithm to compute circumscription

T. C. Przymusiński

On the relationship between circumscription and negation as failure

M. Gelfond, H. Przymusińska and T. Przymusiński

Book reviews and response

Announcement

Forthcoming papers

BS*: An admissible bidirectional staged heuristic search algorithm

J. B. H. Kwa

A generalization of collapsible cases of circumscription

A. Rabinov

Artificial intelligence

Vol. 38 No. 2

Articles

Analogical representations of naive physics

F. Gardin and B. Meltzer

Pattern knowledge and search: The SUPREM architecture

H. Berliner and C. Ebeling

Fixed points in the propositional nonmonotonic logic (research note)

G. F. Shvarts

A computational model for process-grammar (research note)

W.-C. Lin, C.-C. Liang and C.-T. Chen

Miracles in formal theories of action (research note)

V. Lifschitz and A. Rabinov

Book reviews and response

Announcement

Forthcoming papers

Artificial intelligence abstracts

Vol. 2 No. 1/2

Using the Journal

A Expert systems, rule based systems, human-machine interface (in general), computer-aided instruction

B Natural language, database front-ends

C Search (minimax, consistent labelling, alpha-beta, etc.)

D Learning

F Vision, pattern recognition

G Robotics, manufacturing

H Cognitive science

I Planning, problem solving, control of inference

J Logic programming

K Theorem proving, machine logic

L Neural networks, genetic algorithms, etc.

M Decision support, statistical-based reasoning

N Computer-aided design

O Knowledge representation, reasoning about knowledge

P Programming languages for AI, automatic programming parallel processing

List of journals abstracted

Selected major centers of artificial intelligence research

Index

Artificial intelligence review

Vol. 3 No. 1

Editorial

Articles

Connectionism: past, present, and future

J. B. Pollack

Connectionist systems for natural language understanding

B. Selman

Fast connectionist learning: words and case

N. E. Sharkey

Connectionism and the multiplicity of mind

A. Clark

Book reviews

Cognitive science

Vol. 12 No. 4

Articles

Cognitive science news

Combining prototypes: A selective modification model

Edward E. Smith, Daniel N. Osherson, Lance J. Rips and Margaret Keane

Comprehending complex concepts

Gregory L. Murphy

Observed methods for generating analogies in scientific problem solving

John Clement

Observational learning from internal feedback: A simulation of an adaptive learning method

Dorrit Billman and Evan Heit

Book review

Author Index to Volume 12, 1988

Contents Index to Volume 12, 1988

Guest Reviewers

Computers and artificial intelligence

Vol. 8 No. 1

Articles

A computational model of belief

Y. T. Jiang

Measuring cognitive resources use; a grammatical approach

J. Kelemen

The measures of nondeterminism for pushdown automata

I. R. Nasyrov

BC-tree systolic automata: Characterization and properties

E. Fachini, R. Francese, M. Napoli and D. Parente

A contribution to the increase of efficiency of on-the-fly garbage collection

L. Ehn

Image analysis in a vision system for adaptive

A. A. Petrov

Book reviews

Announcement

Computational linguistics

Vol. 14 No. 4

LFP: A logic for linguistic descriptions and an analysis of its complexity

William C. Rounds

Natural language querying of historical data bases

James Clifford

The Berkeley UMX consultant project

Robert Wilensky, David N. Chin, Marc Luria, James

Martin, James Mayfield and Dekai Wu

Book reviews

Briefly noted

Books received

Abstracts of current literature

Computational intelligence

Vol. 4 No. 3

Articles

Reasoning about knowledge and belief: a survey

Gregory L. McArthur

Representation and combination of uncertainty with belief functions and possibility measures

Didier Dubois and Henri Prade

Multivalued logics: a uniform approach in reasoning artificial intelligence

Matthew L. Ginsberg

Data and knowledge engineering

Vol. 3 No. 4

Articles

A persistent complex object database language

S. Khoshafian

Inconsistency of production systems

H. Kleine Büning, U. Löwen and S. Schmitgen

A knowledge-based approach to multiple query processing

J. T. Park, T. J. Teorey and S. Lafortune

Query optimization in object-oriented knowledge bases

P. C. Sheu, R. L. Kashyap and S. Yoo

Some aspects of a physical database design and reorganisation tool (PDRT)

P. M. Stewart, D. A. Bell and F. J. McErlean

Parallel algorithms for solving the satisfaction problem of functional and multivalued data dependencies

C.-C. Yand and W. Shen

Preliminary call for papers

Calendar

Author Index to Volume 3

Expert systems

Vol. 6 No. 1

Articles

Applications of a novel fuzzy expert system shell

K. S. Leung, W. S. Felix Wong and W. Lam

Case studies of expert systems development using microcomputer software packages

Tim Bodkin and Ian Graham

Expertise, domain-structure and expert system design: a case study in development control

Michael Leary and Agustin Rodriguez-Bachiller

Thinking back on ThinkBack

Mark Keane

PC-based expert system shells: some desirable and less desirable characteristics

Richard G. Vedder

Conference Report

News

Diary

FGCS

Vol. 4 No. 3

The fifth generation computer systems project

H. Aiso

Optical computing in Japan

T. Yatagai

Optical link in the Delft/parallel processor—an example of MOMI-connection in MIMD-supercomputers

L. Dekker, E. E. E. Frietman, W. Smit and

J. C. Zuidervaart

Current status of JUNET

J. Murai and A. Kato

Study of mechanisms that support the implementation

of nonlogical components of Prolog in WAM-based systems

Z. Chenxi and T. Yungui

A reduction architecture for the optimal scheduling of binary trees

K. Ravikanth, P. S. Sastry, K. R. Ramakrishnan and Y. V. Venkatesh

A recursively scalable network VLSI implementation

G. Della Veechia and C. Sanges

A VLSI implementation of an architecture for application programming

J. T. O'Donnell, T. Bridges and S. W. Kitchel

IEEE expert intelligent systems and their applications

Vol. 4 No. 1

Articles

Guest editor's introduction

Jude Franklin and Kamai Karna

Explaining control strategies in problem solving

B. Chandrasekaran, Michael C. Tanner and John R. Josephson

An explanation facility for today's expert systems

Michael R. Wick and James R. Slagle

Expert system benchmarks

Larry Press

Learning in an introductory expert systems course

David Warman and Kenneth L. Modesitt

Conceptual data modeling of expert systems

James P. Held and John V. Carlis

Using expert systems to construct formal specifications

Mark R. Blackburn

Expert products

Expert news: conferences

Expert drawing

Expert resources

IEEE transactions on pattern analysis and machine intelligence

Vol. 11 No. 1

Editor's notice

S. L. Tanimoto

Articles

Comparison of the efficiency of deterministic and stochastic algorithms for visual reconstruction

A. Blake

On a constant equation for the estimation of displacement rates in image sequences

H.-H. Nagel

Threshold decomposition of gray-scale morphology into binary morphology

F. Y.-C. Shih and O. R. Mitchell

Authenticating edges produced by zero-crossing algorithms

J. J. Clark

Texture boundary detection based on the long correlation model

R. L. Kashyap and K.-B. Eom

Off-line cursive script word recognition

R. M. Bozinovic and S. N. Srihari

Correspondence

IEEE Copyright Information

IEEE transactions on pattern analysis and machine intelligence

Vol. 11 No. 2

Articles

Stereo error detection, correction, and evaluation

R. Mohan, G. Medioni and R. Nevatia

Surfaces from stereo: Integrating feature matching, disparity estimation, and contour detection

W. Hoff and N. Ahuja

Generating octrees from object silhouettes in orthographic views

N. Ahuja and J. Veenstra

Hierarchy in picture segmentation: A stepwise optimization approach

J.-M. Beaulieu and M. Goldberg

A renormalization group approach to image processing problems

B. Gidas

A bibliography on digital and computational convexity (1961-1988)

C. Ronse

Correspondence

International Journal of man-machine studies

Vol. 30 No. 1

Articles

Learning iteration and recursion from examples

S. Wiedenbeck

Toward a theory of computer program bugs: an empirical test

I. Vessey

Strategies in controlling a continuous process with long response latencies: needs for computer support to diagnosis

J.-M. Hoc

Combining stochastic uncertainty and linguistic inexactness: theory and experimental evaluation of four fuzzy probability models

R. Zwick and T. S. Wallsten

Patterns of inductive reasoning in a parallel expert system

W. Silver and D. Tucker

Vol. 30 No. 2

Articles

Interactive communication of sentential structure and content: an alternative approach to man-machine communication

R. Chandrasekar and S. Ramani

DYNABOARD: User animated display of deductive proofs in mathematics

M. Kaltenbach and C. Frasson

Cognitive issues in the process of software development: review and reappraisal

R. J. Koubek, G. Salvendy, H. E. Dunsmore and W. K. LeBold

Study of combination of belief intervals in lattice-structured networks

L. W. Chang and R. L. Kashyap

The structure of command languages: an experiment on task-action grammar

S. J. Payne and T. R. G. Green

International Journal of pattern recognition and artificial intelligence

Vol. 2 No. 4

Articles

Off-line preprocessing and verification of signatures

M. Ammar, Y. Yoshida and T. Fukumura

Multifont character recognition for typeset documents

S. Shlien

A comparative study of decision making algorithms in images modeled by Gaussian Markov random fields

G. Palubinskas

High level document analysis guided by geometric aspects

A. Dengel and G. Barth

Vision applications in the fishing and fish product industries

H. Arnason, K. Bengoetxea and L. F. Pau

An approach for recognizing and locating overlapping industrial parts

E. H. Bouyahf

Correspondences

Knowledge-based systems

Vol. 2 No. 1

Articles

Special issue: Knowledge-based systems in Australasia
Guest Editor: Professor John S. Gero

Editorial

Towards knowledge-based identification of mineral mixtures from reflectance spectra

K. Ali, C. Horsfall and R. Lister

Data dictionary approach to the maintenance of expert systems: The knowledge Dictionary

B. Jansen and P. Compton

Running rule-based expert systems on parallel processors

T. Li, L. Fang and W. H. Wilson

Spatial reasoning with a qualitative representation
A. Blackwell

Generating legal arguments

A. L. Tyree, G. Greenleaf and A. Mobray

Inductive knowledge acquisition and induction methodologies

W. Buntine

Requirements of a reasoning system that supports creative and innovative design activity

S. MacLaughlin and J. S. Gero

Knowledge-based system design using Prolog: the PIAF experience

M. A. Jabri

Calendar

Journal of Japanese Society for artificial intelligence

Vol. 3 No. 5

Articles

Extended Prolog with restrictive logical expression
Kiyoshi Akama

Production of constructive procedure from explanatory statements of construction

Norihiro Abe, Tomohiro Ishikawa and Saburo Tsuji

Constitution and incarnation of a modelling method for knowledge structures

Higashi Ohuchi, Masahito Kurihara and Ikuo Kaji

A method for abstracting information of sentence structure and contexts in analysis of articles in Japanese newspapers

Hitoshi Isahara and Shun Ishizaki

A method for constructing a diagnosis system on the basis of qualitative simulation

Hayato Ohwada, Fumio Mizoguchi and Katsuaki Kitazawa

An analysis of sentences that contain unknown words by use of a generating mechanism of hypotheses

Taro Kamioka and Youichiro Anzai

Vol. 3 No. 6

A foreword

Review

Information science, particularly intelligence science from natural science

Shuji Doumoto

Special topics

On "New development of techniques for learning and acquiring of knowledge"

Hiroshi Motoda

Inductive learning of concepts

Kazuhisa Niki and Jun Ishizaki

Learning based on explanation—an approach by use of area-specific knowledge

Masayuki Numao

Acquisition of knowledge in development of large scale expert system

Yasuhiro Kobayashi

Knowledge-base editor for practical tools

Masao Kumagaya

Computer aided system for knowledge acquisition

Riichiro Mizokami and Osamu Kadokoro

A new stream of knowledge acquisition and learning research

Susumu Kunifuji

Articles

An experiment on abstracting emotional information in music

Haruhiro Katayori, Masakazu Imai and Masashi Iguchi

An expert system for transferring programming knowhow from skilled to unskilled programmers

Hiroshi Tsuji and Hajime Hashimoto

Decomposition of problems suitable for parallel processing

Seisaburo Niizuma

Deductive system of learning by use of subjective probability of analytic rules of sentence structure in natural language

Seiichi Nakagawa and Kazuaki Wakahara

Generalization based on a possibility of direct solution: DSBG—Definition of operational SOLVABLE concept

Seiji Yamada, Saburo Tsuji and Norihiro Abe

Pattern recognition letters

Vol. 8 No. 4

Articles

Sequential pattern recognition procedures derived from
multiple Fourier series *L. Rutkowski*
Optimal and suboptimal separable expansions for 3D-
signal processing
M. Schmutz
Statistical pattern recognition of low resolution
pictures
T. Szirányi
Simulation of constant size multi-resolution
representation on image pyramids
P. Meer

Binary contour coding using Bézier approximation
S. N. Biswas, S. K. Pal and D. Dutta Majumder
Adaptive Gaussian weighted filtering for image
segmentation
M. Spann and A. Nieminen
A note on grey level-intensity transformation: effect on
HVS thresholding
M. K. Kundu and S. K. Pal
Line thinning by line following
O. Baruch
Quick recognition of circular objects in a black-white
picture
Z. M. Wojcik

Pattern recognition letters

Vol. 8 No. 5

Articles

A fast approximation to a convex hull

Z. Hussain

A fast algorithm to calculate the Euler number for binary images

M.-H. Chen and P.-F. Yan

Symbolic pixel labeling for curvilinear feature detection

J. Canning, J. J. Kim, N. Netanyahu and

A. Rosenfeld

Corner characterization by differential geometry techniques

A. Guiducci

Properties of fractal intensity surfaces

J. Gårding

Determination of optic flow field in the presence of occlusion

T. L. Huntsberger and S. N. Jayaramamurthy

A new digital image registration algorithm based on the double spatial intensity gradients using pyramids

Z. Jiang, W. Lu and D. Hu

Estimation of 3-D translational motion parameters via Hadamard transform

S.-H. Lai and S. Chang

A new technique for visual motion alarm

I. Dinstein

Vectorial tracking and directed contour finder for vascular network in digital subtraction angiography

R. Collorec and J. L. Coatrieux
