

From the journals. . . .

AI Magazine

Vol. 10 No. 1

Motivating the notion of generic design within information-processing theory: The design problem space

Vinod Goel and Peter Pirolli

Logical and decision-theoretic methods for planning under uncertainty

Curt Langlotz and Edward H. Shortliffe

A computational model of reasoning from the clinical literature

Glenn D. Rennels et al.

Expert systems: How far can they go? Part 1

Randall Davis

Expert systems in government administration

Joseph Weintraub

IJCAI policy on multiple publication of papers

Alan Bundy

The first workshop on blackboard systems

Rajendra Dodhiawala et al.

Second international workshop on nonmonotonic reasoning

Michael Reinfrank

AI and Society

Vol. 2 No. 4

Editorial

Bo Göransson

Articles

The concept of dialogue

Bo Göransson, Magnus Florin and Pehr Sällström

Rule following and tacit knowledge

Kjell S. Johannessen

Seeing and seeing-as

B. R. Tilghman

Engineering as an art

H. H. Rosenbrock

On two AI traditions

Satinder P. Gill

Product creation: An appropriate coupling of human and artificial intelligence

Tim Smithers

Open forum

Book review

News section

Applied artificial intelligence

Vol. 2 Nos. 3–4

Articles

Tolerant planning and negotiation in multi-agent environments

James B. H. Kwa

Representation and control strategies for large knowledge domains: An application to NLP

F. Antonacci, M. Russo, M. T. Pazienza and P. Velardi

Qualitative modeling of cell growth processes

E. Arduzzone, F. Bonadonna, S. Gaglio, C. Nicolini, C. Ruggiero and F. Sorbello

Mine ventilation expert system

Tom Altman, Tom Hughes and Andrzej Wala

Pragmatic attachment devices for conversations with tutors

Rosa Viccari, Helder Coelho and Ernesto Costa

An intelligent decisionmaker for optimal control

Ming Rao, Jeffery J.-P. Tsai and Tsung Shann Jiang

A prolog approach to image segmentation

Aldopao Palareti, Paolo Puliti, Guido Tascini and Primo Zingaretti

News and announcements

Artificial intelligence

Vol. 38 No. 3

Articles

MUSCADET: An automatic theorem proving system using knowledge and metaknowledge in mathematics

D. Pastre

A four-valued semantics for terminological logics

P. F. Patel-Schneider

Tree clustering for constraint networks (research note)

R. Dechter and J. Pearl

Book review

Announcements

Forthcoming papers

Artificial intelligence

Vol. 39 No. 1

Articles

SALT: A knowledge acquisition language for propose-and-revise systems

S. Marcus and J. McDermott

Computational approaches to analogical reasoning: A comparative analysis

R. P. Hall

Book reviews

Announcement

Forthcoming papers

Cognitive science

Vol. 13 No. 1

Cognitive science news

Articles

The logic of plausible reasoning: A core theory

Allan Collins and Ryszard Michalski

Reinterpreting visual patterns in mental imagery

Ronald A. Finke, Steven Pinker and Martha J. Farah

Market-passing over microfeatures: Towards a hybrid symbolic/connectionist model

James A. Hendler

A default-oriented theory of procedural semantics

Robert F. Hadley

Parallelism and Functionalism

William M. Ramsey

Computational intelligence

Vol. 4 No. 4

Special issue: Planning

Special issue on planning: an introduction

David E. Wilkins

Localized event-based reasoning for multiagent domains

Amy L. Lansky

Exploiting temporal coherence in nonlinear plan construction

Mark Drummond and Ken Currie

Plans and resource-bounded practical reasoning

Michael E. Bratman, David J. Israel and Martha E. Pollack

Synthesizing plans that contain actions with context-dependent effects

Edwin P. D. Pednault

Casual reasoning in planning

David E. Wilkins

Hierarchical planning involving deadlines, travel time, and resources

Thomas Dean, R. James Firby and David Miller

Taking issue/Forum: A critique of pure reason

Exhuming the criticism of the logicist

Randy Goebel

FIAT LUX: A reply to McDermott's *A critique of pure reason*

Tim Flannagan

Expert systems for information management

Vol. 1 No. 3

Articles

A practical evaluation of two rule-based automatic abstracting techniques

William J. Black and Frances C. Johnson

Knowledge acquisition for expert systems: a brief review

I. M. Neale and A. Morris

The design of an intelligent shop control systems (SAM)

Peter O'Grady, Henry Nuttle, James Bowen and Matt Terribile

Reviews

Recent literature

Forthcoming meetings

FGCS

Vol. 4 No. 4

Articles

Algorithms for solving numerical linear algebra problems on supacomputers

T. J. Dekker, W. Hoffmann and P. P. M. de Rijk

Synchronous processor arrays integrated in a transputer network

W. Duinker

Parallel branch-and-bound algorithm

J. M. Jansen and F. W. Sijtermans

Some experience in distributed programming using shortest path spanning trees

J. J. Lukkien

Practical aspects of parallel scientific computing

H. A. van der Vorst

Solving the least squares problem using a parallel linear algebra library

J. G. G. van de Vorst

Experiments with coarse-grain parallel graph reduction

W. G. Vree

Targets and results from phase one and two of the fifth generation computer systems study

T. Kurozumi and T. Ichiko

Calendar

Author Index

IEEE expert intelligent systems and their applications

Vol. 4 No. 2

Articles

Viewing knowledge bases as qualitative models

William J. Clancey

Knowledge engineering and university-industry cooperation

Larry R. Medsker and Judith H. Morrel

PIAF: Efficient IC floor planning

Marwan A. Jabri and David J. Skellern

Planning by transformational synthesis

Theodore A. Linden

Globe-trotter: An intelligent flight-itinerary planner

Prasanta K. Bose, Gautam Biswas and Adithya M. Rao Padala

Assisting managers in project definition: Foundations for intelligent software management

Kent D. Bimson and Linda Boehm Burris

Expert news

Expert products

Expert resources

IEEE transactions on pattern analysis and machine intelligence

Vol. 11 No. 3

Special section on computer architectures

Introduction to the special section on computer architectures and parallel algorithms

C. R. Dyer

HBA vision architecture: Built and benchmarked

R. S. Wallace and M. D. Howard

Polymorphic-torus architecture for computer vision

H. Li and M. Maresca

Algorithmic techniques for computer vision on a fine-grained parallel machine

J. J. Little, G. E. Blueloch and T. A. Cass

An EREW PRAM algorithm for image component labeling

R. Cypher, J. L. C. Sanz and L. Snyder

Computing the Hough transform on a scan line array processor

A. L. Fisher and P. T. Highnam

Regular section

Interpretation of image flow: A spatio-temporal approach

M. Subbarao

Recognition and shape synthesis of 3D objects based on attributed hypergraphs

A. K. C. Wong, S. W. Lu and M. Rioux

Three-dimensional ultrasonic vision for robotic applications

A. S. Acampora and J. H. Winters

Dimensionality-reduction using connectionist networks

E. Saund

Hierarchical construction of orientation and velocity selective filters

D. J. Fleet and A. D. Jepson

Line fitting in a noisy image

I. Weiss

3D Euclidean or 2D non-Euclidean: Two approaches to 3D recovery from images

K.-I. Kanatani

Comments on approximating discrete probability distribution with dependence trees

S. K. M. Wong and F. C. S. Poon

IEEE transactions on pattern analysis and machine intelligence

Vol. 11 No. 4

Articles

Behavior of edges in scale space

Y. Lu and R. C. Jain

Unified approach for early-phase image understanding using a general decision criterion

D. S. Jeong and P. M. Lapsa

Model construction and shape recognition from occluding contours

C. H. Chien and J. K. Aggarwal

3-D surface solution using structural light and constraint propagation

G. Hu and G. Stockman

Identification of three-dimensional objects using range information

A. P. Reeves and R. W. Quong

A one-pass two-operation process to detect the skeletal pixels on the 4-distance transform

C. Arcelli and G. Sanniti de Baja

Unsupervised segmentation of textured images by edge detection in multidimensional features

A. Khotanad and J.-Y. Chen

Leave-one-out procedures for nonparametric error estimates

K. Fukunaga and D. M. Hummels

The reduced Parzen classifier

K. Fukunaga and R. R. Hayes

An efficient uniform cost algorithm applied to distance transforms

B. J. H. Verwer, P. W. Verbeek and S. T. Dekker

Recognition of handwritten Chinese characters by modified Hough transform techniques

F.-H. Cheng, W.-H. Hsu and M.-Y. Chen

The binary consistency checking scheme and its applications to seismic horizontal detection

Y.-C. Cheng and S.-Y. Lu

International Journal of man-machine studies

Vol. 30 No. 3

Articles

Underlying dimensions of human problem solving and learning: implications for personnel selection, training, task design and expert system

T. Enkawa and G. Salvendy

Issues in the verification of knowledge in rule-based systems

D. L. Nazareth

Syntactic decision procedures in information systems

A. Wasilewska

Heuristic graph displayer for G-BASE

H. Watanabe

An interface architecture to provide adaptive task-specific context for the user

S. W. Tyler and S. Treu

Concept learning from examples and counter examples

A. L. Ralescu and J. F. Baldwin

International Journal of man-machine studies

Vol. 30 No. 4

Articles

The utility of speech input in user-computer interfaces

G. L. Martin

Building routine planning systems and explaining their behaviour

B. Chandrasekeran, J. Josephson, A. Keuneke and D. Herman

Automatically generating natural language reports

J. Kalita

Towards software metrics for visual programming

E. P. Glinert

Usability of SQL and menus for database query

J. S. Davis

Rough sets and dependency analysis among attributes in computer implementations of expert's inference models

A. Mrózek

International Journal of pattern recognition and artificial intelligence

Vol. 3 No. 1

Introduction

N. G. Zagoruiko

Articles

Expert systems and pattern recognition

N. G. Zagoruiko

Communication with a computer system from the pattern recognition point of view

V. S. Fain and L. I. Rubanov

Expert systems simulating human visual perception

V. V. Alexandrov and N. D. Gorsky

Combining evidence in probabilistic relaxation

J. Kittler and E. R. Hancock

Number of solutions of satisfiability instances—

Applications to knowledge bases

J. C. Simon and O. Dubois

Spatial knowledge representation

S. N. Srihari and Z. Xiang

Rule based expert system shells—new software tools for pattern recognition?

H. Bunke and J. Dvorak

An auto-picking stacking velocity algorithm based on an AI and PR approach

L. Wu, Z. Luo, J. Zhou and H. Wang

The principles of expert recognition systems design

J. N. Pechersky, S. J. Solowiev and G. M. Solowieva

Testing algorithms and programs of multivariate statistical procedures—necessary assumption of building expert systems

E.-M. Tiit

Logical decision rules for automatic discovery of knowledge in expert systems database

G. S. Lbov

Induction methods paradoxicality

E. E. Vityaev and V. F. Novikov

Journal of experimental and theoretical artificial intelligence

Vol. 1 No. 2

Articles

Generating plausible diagnostic hypotheses with self-processing causal networks

Jonathan Wald, Martin Farach, Malle Tagamets and James A. Reggia

Organizing and integrating edge segments for texture discrimination

John A. Barnden

The graph of a boolean function

Frank Harary

The Journal of logic programming

Vol. 6 Nos. 1-2

Articles

Preface to the special issue

Seif Haridi and Robert Keller, Guest Editors

Extending SLD resolution to equational horn clauses using E-unification

Jean H. Gallier and Stan Raatz

Prolog: Subsumption of equality axioms by the homogeneous form

E. W. Elcock

An implementation of narrowing

Alan Josephson and Nachum Dershowitz

A logical analysis of modules in logic programming

Dale Miller

Negation as failure using tight derivations for general logic programs

Alan Van Gelder

Compiling control

Maurice Bruynooghe, Danny De Schreye and Bruno Kerkels

Metainterpreters for expert system construction

Leon Sterling and Randall D. Beer

A high-performance low risc machine for logic programming

J. W. Mills

Journal of new generation computer systems

Vol. 2 No. 1

Articles

Problems of the system technology of computers

V. F. Dorfman and L. V. Ivanov

Systolic block lower-upper (LU) decomposition and triangular system solution

D. J. Evans and K. G. Margaritis

An object-oriented technology for developing distributed program complexes

I. B. Burdonov, V. P. Ivannikov, A. S. Kosachev, and Yu. P. Smirnov

Modelling and visualization of discrete 3-D scenes

W. Kasprzak

Pattern recognition letters

Vol. 9 No. 2

Article

Fuzzy clustering for the estimation of the parameters of the components of mixtures of normal distributions

I. Gath and A. B. Geva

Finding ellipses using the generalised Hough transform

E. R. Davies

Distance transformations on hexagonal grids

G. Borgefors

An algorithm for computing the number of the minimal paths in digital images

P. P. Das

String matching for stereo vision

Z. D. Hua and B. Dubuisson

Matching topographic structures in stereo vision

T.-C. Pong, R. M. Haralick and L. G. Shapiro

Attributed stroke graph matching for seal imprint verification

S. Lee and J. H. Kim

High quality Chinese fonts generation for desktop publishing

Y. S. Moon and W. K. Hui

Forthcoming papers

Pattern recognition letters

Vol. 9 No. 3

Articles

Informational divergence without probability for patterns and forms

G. Jumarie

On automorphisms of fuzzy graphs

K. R. Bhutani

Statistical pattern matching

T. G. Ryall and J. Sandor

Describing and recognizing group-invariant pattern classes with group-sampling

R. Lenz

Pattern recognition with moment invariants on a machine vision system

Z. Mingfa, S. Hasani, S. Bhattarai and H. Singh

Minimising the search space for polygon detection using the generalised Hough transform

E. R. Davies

Compressing quadtrees via common subtree merging

R. E. Webber and M. B. Dillencourt

Erosion and dilation of binary images by arbitrary structuring elements using interval coding

L. Ji. Piper and J.-Y. Tang

Human chromosome classification based on local band descriptors

F. C. A. Groen, T. K. ten Kate, A. W. M. Smeulders and I. T. Young
