

From the journals. . . .

Acta cybernetica

Vol. 9 No. 2

Articles

On the worst-case performance of the NkF bin-packing heuristic

J. Csirik and B. Imreh

On the performance of on-line algorithms for partition problems

Ulrich Faigle, Walter Kern and György Turán

Determination of the structure of the class $\mathcal{A}(R, S)$ of $(0, 1)$ -matrices

A. Kuba

Parallel programming structures and attribute grammars

R. Alvarez Gil and Á. Makay

Further remarks on fully initial grammars

Alexandru Mateescu and Gheorghe Păun

On fully initial grammars with regulated rewriting

T. Bălănescu, M. Gheorghe and Gh. Păun

On star-products of automata

F. Gécseg and B. Imreh

On characteristic semigroups of Mealy automata

G. Tanaka

AI communications

Vol. 2 No. 3

Articles

Letters to the Editor

ARIADNA: A knowledge elicitation support system

Vladimir K. Morgoev

On the use of object-oriented paradism in a distributed problem solver

Juha Hynynen, Ora Lassila

Artificial intelligence in Finland at the end of the 1980s

Seppo Linnainmaa

Conference reports

The third annual ACAI

Erik Vinkhuyzen

The first European workshop on modelling autonomous agents in a multi-agent world

Nigel Steel

Book Reviews

"Out of sight, out of mind" → "Blind idiot"

A review of Connectionism in the courtroom

Peter J. Brasspenning

Calendar

Colophon

Applied artificial intelligence

Vol. 3 No. 4

Articles

Toward a common structural level for software, database, and knowledge-based systems

R. Motschnig-Pitrik

Two-stage strategy for motion parameter estimation in dynamic images

Hua Li

Combining opinions from several experts

Xianoning Ling and W. G. Rudd

Solving the jigsaw puzzle problem in linear time

Tom Altman

A knowledge-based system for course scheduling

Udaya Gunasena, Soundar R. T. Kumara and

Allen L. Soyster

Author Index to Volume 3

Artificial intelligence

Vol. 41 No. 3

Articles

Functional transformations in AI discovery systems

W. Shen

Enhancement schemes for constraint processing backjumping, learning, and cuset decomposition

R. Dechter

Automatic qualitative analysis of dynamic systems using piecewise linear approximations

E. Sacks

The logic of nonmonotonicity (research note)

J. Bell

Contents—Volume 41, 1989/90

Artificial intelligence

Special issue on artificial intelligence and learning environments

Vol. 42 No. 1

Articles

Artificial intelligence and learning environments: preface

W. J. Clancey and E. Soloway

Cognitive modelling and intelligent tutoring

J. R. Anderson, C. F. Boyle, A. T. Corbett and

M. W. Lewis

Understanding and debugging novice programs

W. L. Johnson

Causal model progression as a foundation for intelligent learning environments

B. Y. White and J. R. Frederiksen

Artificial intelligence review

Vol. 4 No. 1

Editorial

Formal systems in artificial intelligence an illustration using semigroup, automata and language theory

P. T. Hadingham

Artificial intelligence research at the National University of Singapore

K. Ranai, C. L. Tan and S. C. Chan

Report on AI research in progress in New Zealand universities

W. P. Yeap and R. Mugridge

Viewpoint

Artificial intelligence: A Far East perspective

Y. S. Moon

Singapore's great leap: information technology in context

G. Sussman

Book reviews

Artificial intelligence and education

D. Gilmore, G. Cumming and S. Ross

Artificial intelligence programming languages

J. Rosbottom, E. Keravnou, T. Dodd and M. Merabti

Computational linguistics

G. Byron, L. Bolc and I. Crookston

Cognitive science

Vol. 13 No. 4

Articles

Cognitive science news

Skill acquisition and the LISP tutor

John R. Anderson, Frederick G. Conrad and

Albert T. Corbett

The MEDIATOR: Analysis of an early case-based problem

Janet L. Kolodner and Robert L. Simpson

Studies of diagnosis and remediation with high school algebra students

D. Sleeman, A. E. Kelly, R. Martinak, R. D. Ward and J. L. Moore

Marker passing as a weak method for text inferencing

Peter Norvig

Pattern analysis and machine intelligence

Vol. 11 No. 12

Articles

Computer vision and image analysis

Shape from texture: Integrating texture-element extraction and surface estimation

D. Blostein and N. Ahuja

The geometry of differential operators with application to image processing

W. M. Krueger and K. Phillips

Determination of the attitude of 3-D objects from a single perspective view

M. Dhome, M. Richetin, J.-T. Lapresté and G. Rives

Supervised textured image segmentation using feature smoothing and probabilistic relaxation techniques

J. Y. Hsiao and A. A. Sawchuk

Subpixel measurements using a moment-based edge operator

E. P. Lyvers, O. R. Mitchell, M. L. Akay and

A. P. Reeves

Correspondence

1989 index

Pattern analysis and machine intelligence

Vol. 12 No. 1

Articles

Computer vision and image analysis

Segmentation of textured images and gestalt organization using spatial/spatial-frequency representations

T. R. Reed and H. Wechsler

Active tracking strategy for monocular depth inference over multiple frames

G. Sandini and M. Tistarelli

Determination of camera location from 2-D to 3-D line and point correspondences

Y. Liu, T. S. Huang and O. D. Faugeras

Morphological shape decomposition

I. Pitas and A. N. Venetsanopoulos

Scaling theorems for zero-crossings

L. Wu and Z. Xie

Multichannel texture analysis using localized spatial filters

A. C. Bovik, M. Clark and W. S. Geisler

Articles

Special section: AI '89 Conference, Prague

Guest Editor: *Vladimir Mařík*

Editorial

V. Mařík

A survey of methods used in probabilistic expert systems for knowledge integration

R. Jiroušek

Failing of Dempster's combining rule of interval-given probabilities

Z. Perez

Knowledge-base reconstruction

P. Vysoký

Model-preserving transformations of databases for rule-based expert systems with Boolean-valued weights

I. Kramosil

Hermeneutics in expert systems

D. Pospelov

Nonmonotonic reasoning and logic programming

P. Jirků

Knowledge represented by mathematical models for fault diagnosis in chemical processing units

J. Lutcha and J. Zejda

Computer-aided creativity in the arts

Music composition as hypothesis formation: a black-board concept of musical creativity

O. E. Laske

Computers, choreography and creativity

P. Brightman

Mapping rule-based systems into neural architecture

L. M. Fu and L. C. Fu

Books

Literature

Pattern recognition letters

Vol. 10 No. 5

Articles

Two classes linear discrimination. A min-max approach

P. Castagliola and B. Dubuisson

Experiments with an adaptive Bayesian restoration method

V. Di Gesù, M. C. Maccarone and D. Tegolo

Matching polygon fragments

M. W. Koch and R. L. Kashyap

Relaxation algorithm for shape matching of two-dimensional objects

H. Lee and R.-H. Park

Ray representation for k -trees

V. Akman and W. R. Franklin

Polyhedral objects identification through the orthographic projection views generation

C. L. Huang

A binary Hough transform and its efficient implementation in a systolic array architecture

L. Da Fontoura Costa and M. B. Sandler

A note on genetic algorithms for large-scale feature selection

W. Siedlecki and J. Sklansky
