

## From the journals. . . .

### International Journal of man-machine studies

#### Vol. 32 No. 2

##### Articles

Decision analysis techniques for knowledge acquisition: combining information and preferences using *Aquinas* and *Axotl*

*J. M. Bradshaw and J. H. Boose*

Fuzzy windows and classification systems

*J. C. Santamarina and J. L. Chameau*

An investigation of the applicability of expert systems to job shop scheduling

*S. U. Randhawa and E. D. McDowell*

Foundations of declarative debugging in arbitrary logic programming

*S. Y. Yan*

A computerized clinical test of forgetting based on the ACT model of memory retrieval

*D. G. Andrewes and D. Maude*

#### Vol. 32 No. 3

##### Articles

Effect of CAD on the jobs of drafters and engineers: a quantitative case study

*A. Majchrzak*

Role of the present in temporal representation in artificial intelligence

*E. Hajnicz*

Automatic rule generation by the transformation of Expert's Diagram: LIFT

*J. K. Lee, I. K. Lee, R. Choi and S. M. Ahn*

Soliciting weights or probabilities from experts for rule-based expert systems

*D. E. O'Leary*

No IFS, ANDs, or ORs: A study of database querying

*S. L. Greene, S. J. Devlin, P. E. Cannata and L. M. Gomez*

An examination of gender differences in the determinants of computer anxiety and attitudes toward microcomputers among managers

*S. Parasuraman and M. Igbaria*

Using a natural language interface with casual users

*R. A. Capindale and R. G. Crawford*

#### Vol. 32 No. 4

##### Articles

Towards a consultative on-line help system

*G. M. Gwei and E. Foxley*

Do they know what they're doing? An evaluation of word-processor users' implicit and explicit task-relevant knowledge, and its role in self-directed learning

*P. Briggs*

On the training of EDP novices on the personal computer

*J. Pilgrim*

Modes in non-computer devices

*J. Johnson*

Effect of modularity on maintainability of rule-based systems

*J. S. Davis*

Experimental investigation of the utility of data structure and E-R diagrams in database query

*J. S. Davis*

The nature and development of programming plans

*S. P. Davis*

#### Vol. 32 No. 5

##### Articles

System demands on mental models for a fulltext database

*C. Katzeff*

User models: theory, method, and practice

*R. B. Allen*

Source models for natural language text

*I. H. Witten and T. C. Bell*

Clarifying the distinction between lexical and gestural commands

*P. Morrel-Samuels*

Discourse theory and interface design: The case of pointing with the mouse

*E. MacAogain and R. Reilly*

#### Vol. 32 No. 6

##### Articles

The child as naive user: a study of database use with young children

*J. Spavold*

Computer-mediated communication system network data: theoretical concerns and empirical examples

*R. E. Rice*

An evaluation of look-ahead help fields on various types of menu hierarchies

*R. J. Kreigh, J. F. Pesot and C. G. Halcomb*

Partitioned frame networks for multi-level, menu based interaction

*J. D. Arthur*

User misconceptions of information retrieval systems

*H. Chen and V. Dhar*

Sensitivity analysis of rough classification

*K. Slowinski and R. Slowinski*

Structure and mnemonics in computer and command languages

*M. Cramer*

Call for papers

## Journal of automated reasoning

**Vol. 6 No. 1**

### Articles

Strategies for modal resolution: Results and problems  
*Yves Auffray, Patrice Enjalbert and Jean-Jacques Hebrard*

On the recursive decomposition ordering with lexicographical status and other related orderings  
*Pierre Lescanne*

Replacing unification by constraint satisfaction to improve logic program expressiveness

*J. W. Roach, R. Sundararajan and L. T. Watson*

### Basic research problems

The problem of choosing between logic programming and general-purpose automated reasoning  
*Larry Wos*

### Problem corner

Automated proofs of the Moufang identities in alternative rings

*Siva Anantharaman and Jieh Hsiang*

### Addresses of Editorial Board

## Journal of experimental and theoretical artificial intelligence

**Vol. 2 No. 1**

### Articles

Cooperation of syntax and semantics in flexive languages

*Emil Páles*

Knowledge representation issues in default reasoning

*J. Terry Nutter*

An analysis of expected-outcome

*Bruce Abramson*

Reasoning situated in time I: basic concepts

*Jennifer J. Elgot-Drapkin and Donald Perlis*

### Conference announcement

## Journal of intelligent and robotic systems

**Vol. 3 No. 1**

### Articles

**Special issue: Intelligence in robotics and manufacturing**

*Mo Jamshidi* ed.

Editorial: intelligence in robotics and manufacturing  
*Mo Jamshidi*

Knowledge-based process planning for electronic assembly

*Vilma M. Irizarry-Gaskins and Tien-Chien Chang*

Learning control system analysis and design based on 2-D system theory

*Zheng Geng and Mo Jamshidi*

Manufacturing systems: A knowledge- and optimization-based approach

*Andrew Kusiak*

Neural networks in robotics: A survey

*Bill Horne, M. Jamshidi and Nader Vadiee*

A hybrid actor and blackboard approach to manufacturing cell control

*Peter O'Grady and Kwan H. Lee*

Toward the intelligent control of robots

*Farzad Pourboghra*

### Book reviews

*WESTEX-87: Proceedings of IEEE Conference on Expert Systems (2-4 June 1987, Anaheim, California)*  
reviewed by Spyros Tzafestas

*Scientific fundamentals of robotics*, reviewed by Spyros Tzafestas

*Artificial Intelligence and Intelligent Systems—The Implications*, David Anderson, reviewed by Spyros Tzafestas and Aristides Elianos

*The Logic of Induction*, H. Mortimer, reviewed by Spyros Tzafestas and C. Botsaris

### Calendar of events

## The Journal of logic programming

**Vol. 8 Nos. 1-2**

### Articles

Guest editor's introduction

*Leon Sterling*

Aunt: A universal netlist translator

*Peter B. Reintjes*

PYTHON: An expert squeezer

*Leon Sterling and Yossi Nygate*

Modeling simultaneous events with default reasoning and tight derivations

*Allen Van Gelder*

Logic-based configuration with a semantic network

*David B. Searls and Lewis M. Norton*

Solving large combinatorial problems in logic programming

*Mehmet Dincbas, Helmut Simonis and Pascal Van Hentenryck*

MOCKINGBIRD: A logical methodology for testing

*Michael M. Gorlick, Carl F. Kesselman, Daniel A. Marotta and D. Stott Parker*

Logic programming for real-time control of telecommunication switching systems

*Nabiel A. Elshiewy*

An expert system for harmonizing chorales in the style of J. S. Bach

*Kemal Ebcioglu*

**Vol. 8 No. 3**

### Articles

Equivalent logic programs

*Chan Kwok Hung*

A transformational approach to negation in logic programming

*Roberto Barbuti, Paolo Mancarella, Dino Pedreschi and Franco Turini*

Annotations on the consistency of the closed world assumption

*Gerhard Jäger*

An abstract machine to implement or-and parallel prolog efficiently

*J. Chassin de Kergommeaux and P. Robert*

A note on Dowling and Gallier's top-down algorithm for propositional Horn satisfiability

*Maria Grazia Scutellà*

**Title index to volume 8**

**Author index to volume 8**

**Volume contents**

## Journal of new generation computer systems

**Vol. 3 No. 1**

### Articles

Signal-processor-based multiprocessor system with partial shared memory

*B. Berlin, A. Graf, W. Wilhelmi and W.-D. Witt*

Design and installation of the IRRAD system of image reconstruction

*W. L. Nowiński*

FORTH for knowledge systems

*A. Sakharov*

A new method for software quality evaluation

*A. Eskenasi and V. Angelova*

Integration of computer, communication and information technology

*I. Laska and M. Novák*

A multiprocessor system for high-speed simulation of neural networks

*T. Boseniuk, M. van der Meer and T. Pöschel*

**Conference announcement**

**Book reviews**

**Calendar of events**

## Knowledge acquisition

**Vol. 2 No. 1**

### Articles

Decision tree design using information theory

*R. M. Goodman and P. Smyth*

Knowledge acquisition as a process of model refinement

*E. Motta, T. Rajan and M. Eisenstadt*

Integrated knowledge base building environments

*A. T. Rappaport and B. R. Gaines*

Knowledge acquisition at the front end: defining the domain

*B. Woodward*

## Knowledge-based systems

### Vol. 3 No. 2

#### Articles

Using errors to direct design

*P. A. Booth*

Knowledge acquisition mechanisms for a logical knowledge base including hypotheses

*M. Ishizuka and T. Matsuda*

Argument representation for editorial text

*S. J. Alvarado, M. G. Dyer and M. Flowers*

Designing deontic knowledge bases from regulation texts

*B. Moulin and D. Rousseau*

#### Market forecasts

Market research publications

#### Books

Recent publications reviewed

#### Literature

Recent papers on the research, development and application of KBS

#### Calendar

Conferences—courses—exhibitions—events

## Künstliche intelligence

### Vol. 1 No. 1

#### Articles

Die Verbundvorhaben im Bereich Wissensbasierte Systeme und Mustererkennung

*Thomas Christaller*

Dokumentanalyse

*Jürgen Schürmann*

LERNER: Wissensakquisition und Maschinelles Lernen

*Werner Mellis*

TEX-K: Expertensystemkern für Planungs- und Konfigurierungsaufgaben

*Helmut Strecker*

TEX-B: Modellbasierte Expertensysteme

*Hans-Werner Fruchtenicht*

TEX-I: Expertensysteme für Prozeßführung und Diagnose

*Michael Kerndlmaier*

WEREX: Werkzeugsystem für Konstruktion und Betrieb von Expertensystemen

*Thomas Christaller*

WISBER: Wissensbasierter Beratungsdialo

*Heinz Marburger*

WISDOM: Wissensbasierte Systeme zur

IROS '89—International Workshop on Intelligent Robots and Systems

*Klaus-Dieter Kuhnert*

Bericht über die International Joint Conference on Neural Networks '89

*Patrick Thomas*

Eindrücke von einer Vortragsreise in die DDR

*Gudula Retz-Schmidt*

#### Pro und Kontra

Interdisziplinarität und KI: Anspruch ohne Wirklichkeit?

*Barbara Becker*

Probleme und Aufgaben einer angewandten

Computerlinguistik

*Gerhard Heyer*

#### Anwendungen, Erfahrungen

Reverse Software-Engineering

*Jürgen Bergmann*

## Kybernetes: The International Journal of systems and cybernetics

### Vol. 19 No. 1

#### Articles

#### Abstracts and keywords

#### Contemporary systems and cybernetics

Self-monitoring and self-steering in social interaction:

Theoretical comments and an empirical investigation

*Eric Rosseel and Gert van der Linden*

Induction processes and a broad concept of evolution

*Naoki Kuroda*

On average turnaround time

*Edward T. Lee*

#### Communications

On using network to enhance success in business

*Leslie J. Dickey and Brian H. Kleiner*

On a proposal to celebrate the centenary of the birth

of Dr Norbert Wiener

#### News, conferences and technical reports

#### Book reviews

#### Announcements

#### Special announcements

### Vol. 19 No. 2

#### Articles

#### Abstracts and keywords

#### Contemporary systems and cybernetics

#### Editorial advisory board

Political alienation and environmental complexity

reduction

*Felix Geyer*

Louis de Broglie and cybernetics

*Robert Vallée*

The biology of mathematical knowledge

*Uri Fidelman*

The architecture of hierarchy: A quantitative approach

*W. Czuchra*

#### Communications

The cybernetic manifesto (part I)

*Valentin Turchin and Cliff Joslyn*

#### News, conferences and technical reports

#### Book reviews

#### Announcements

#### Special announcements

### Vol. 19 No. 3

#### Articles

#### Abstracts and keywords

#### Contemporary systems and cybernetics

A new method for global optimisation (alienor)

*Y. Cherruault*

Theories of computational complexity—discussion and review

*Douglas S. Bridges*

Plato's Cave revisited

*Robert Vallée*

The essence of AI: A new unifying concept and its programming

*C. Musès*

The concept of fuzzy systems

*Yi Lin*

#### Communications

The cybernetic manifesto (part II)

*Valentin Turchin and Cliff Joslyn*

#### News, conferences and technical reports

#### Book review
