AI communications

Vol. 3 No. 2

Articles

A review of ESPRIT I

Coping with complexity in physical system modelling

R. R. Leitch, M. E. Wiegand and H. C. Quek

Knowledge based systems validation: a state of the art

Beatriz Lopez, Pedro Meseguer and Enric Plaza

Achievements and results of the knowledge

engineering area in ESPRIT I

Brice Lepape

Conference reports

META '90: a workshop on meta-programming in
logic-programming

Frank van Harmelen

Book reviews

Truth and modality for knowledge representation

Frank van Harmelen

Analogy and induction as inference

Maarten van Someren

Applied artificial intelligence: An International Journal

Vol. 4 No. 2

Articles

ASCETA: An expert system for passive network
synthesis

*Michele Marchesi, Francesco Piazza and Gianni
Orlandi*

An intelligent tuning control technique

Hong Yao Xu, C. R. Baird and D. Riordan

Structured representation of FMS integrating SI-nets
and high level Petri nets

Antonio Camurri and Marcello Frixione

NICBES-2, a nickel-cadmium battery expert system

Alex Bykat

Applied artificial intelligence calendar

Artificial intelligence

Vol. 44 Nos. 1–2

Articles

The geometry of view space of opaque objects
bounded by smooth surfaces

J. H. Rieger

Representing stereo data with the Delaunay
triangulation

*O. D. Faugeras, E. Le Bras-Mehlman and J. D.
Boissonat*

Qualitative kinematics in mechanisms

B. Faltings

The combinatorics of object recognition in cluttered
environments using constrained search

W. E. L. Grimson

Nonmonotonic reasoning, preferential models and
cumulative logics

S. Kraus, D. Lehmann and M. Magidor

Learning problem solving strategies using refinement
and macro generation

H. Altay Güvenir and G. W. Ernst

Dempster's rule of combination is #P-complete
(research note)

P. Orponen

Forthcoming papers

Vol. 44 No. 3

Articles

Fundamental concepts of qualitative probabilistic
networks

M. P. Wellman

Qualitative navigation for mobile robots

T. S. Levitt and D. T. Lawton

Book review of *Models of Musical Communication and
Cognition* (M. Leman, ed.)

S. W. Smoliar

On *Models of Musical Communication and Cognition*,
a response to the review by S. W. Smoliar

M. Leman

A note on "Creativity and learning in a case-based
explainer"

D. Gentner and K. Forbus

Announcements

Forthcoming papers

Author Index—Volume 44, 1990

Contents—Volume 44, 1990

Artificial intelligence review

Vol. 4 No. 2

Articles

Nonmonotonic reasoning, nonmonotonic logics and reasoning about change

J. Bell

Numerical and symbolic approaches to uncertainty management in AI

D. A. Clark

Viewpoint

The strange story of the Preceptor

R. S. Forsyth

Vol. 4 No. 3

Articles

Qualitative application languages for knowledge acquisition

Stuart H. Rubin

A viewpoint on Singapore

C. K. Yuen

A reply to C. K. Yuen

G. Sussman

A second reply to C. K. Yuen

Colin Beardon

Nonmonotonic reasoning

F. M. Donini, M. Lenzerini, D. Nardi, F. Pirri and M. Schaerf

Issues of non-determinism in PROLOG and the committed choice non-deterministic logic languages

R. Trehan and P. F. Wilk

Book reviews

Artificial Intelligence and its Applications H. Weston Rooms, D. West, T. Gillie and J. MacDonald

Robotics and Vision J. Billingsley

Artificial Intelligence Programming Languages T. Dodd and D. Long

Theoretical Artificial Intelligence A. Ramsay

Cognitive science

Vol. 14 No. 2

Articles

Cognitive science news

Finding structure in time

Jeffrey L. Elman

Nonmonotonic reasoning and causation

Yoav Shoham

Detection of cognitive structure with protocol data: predicting performance on physics transfer problems

William C. Robertson

Laboratory replication of scientific discovery processes

Yulin Qin and Herbert A. Simon

Computational linguistics

Vol. 16 No. 1

Articles

Categorial semantics and scoping

Fernando C. N. Pereira

An interpretation of negation in feature structure descriptions

Anuj Dawar and K. Vijay-Shanker

Word association norms, mutual information, and lexicography

Kenneth Ward Church and Patrick Hanks

Semantic-head-driven generation

Stuart M. Sheiber, Gertjan van Noord, Fernando

C. N. Pereira and Robert C. Moore

Letter to the Editor

Michael B. Kac

Book reviews

David M. Carter, *Interpreting anaphors in natural language texts*

Deborah Dahl

Kenneth W. Church, *Phonological parsing in speech recognition*

Kimmo Koskenniemi

Alex Waibel, *Prosody and speech recognition*

Joan Bachenko

Erich Steiner, Paul Schmidt and Cornelia Zelinsky-Wibbelt (eds.), *From syntax to semantics: insights from machine translation*

Harold Somers

Martin Gellerstam (ed.), *Studies in computer-aided lexicology*

Martha Evens

Ralph Grishman, *Computational linguistics: an introduction*

John Roach

Willem J. M. Levelt, *Speaking: from intention to articulation*

M. Martin Taylor and Insup Taylor

Briefly noted

Books received

Abstracts of current literature

Vol. 16 No. 2

Articles

Wide-range restructuring of intermediate representations in machine translation

Taijiro Tsutsumi

A statistical approach to machine translation

Peter Brown, John Cocke, Stephen Della Pietra, Vincent J. Della Pietra, Fredrick Jelinek, John D.

Lafferty, Robert L. Mercer and Paul S. Roossin

An implementable semantics for comparative constructions

Manny Rayner and Amelie Banks

Book reviews

Bran Boguraev and Ted Briscoe (eds.), *Computational lexicography for natural language processing*

Geoffrey Sampson

Gerald Gazdar and Chris Mellish, *Natural language processing in LISP: an introduction to computational linguistics*; *Natural language processing in POP-11: an introduction to computational linguistics*; and *Natural language processing in PROLOG: an introduction to computational linguistics*

Kwee Tjoe Liong

Jacques Moeschler, *Modelisation du dialogue: représentation de l'inference argumentative*

Klaus Schubert

István S. Bátori, Winfried Lenders and Wolfgang Putschke (eds.), *Computational linguistics: an international handbook on computer oriented language research and applications/computerlinguistik: ein internationales handbuch zur computergestützten sprachforschung und ihrer anwendungen*

Graeme Hirst

Briefly noted

Books received

Abstracts of current literature

Computational intelligence/ intelligence informatique

Vol. 6 No. 1

Articles

Empirical results with conspiracy numbers

Norbert Klingbeil and Jonathan Schaeffer

Formalizing planning knowledge for hierarchical planning

Qiang Yang

A predictive approach for the generation of rhetorical devices

Ingrid Zukerman

A basic agent

Steven Vere and Timothy Bickmore

Vol. 6 No. 2

Articles

A logic programming approach to cartographic map overlay

Peter Y. F. Wu and W. Randolph Franklin

DISLOG: programming in logic with discontinuities

Patrick Saint-Dizier

Intelligent computer-aided-design systems: a synergical approach of artificial intelligence and engineering

Pearl Pu

Building geometric world models with graph synthesis for sensor fusion in mobile robots

Sherman Y. T. Lang and Andrew K. C. Wong

Time revisited

Stephanie A. Miller and Lenhart K. Schubert

Expert systems

Vol. 7 No. 3

Articles

A fuzzy logic inference model for a rule-based system in medical diagnosis

Elisabetta Binaghi

Troubleshooting expert systems for industrial maintenance: pre-development guidelines

Michel Bouche, Vincent Plauchu and Didier Retour

Expert systems in industrial practice: advantages and drawbacks

Michel Dubas

Acquiring and representing strategic knowledge in the diagnosis domain

Silvano Mussi and Rosamaria Morpurgo

Interview

Laurie Burrow

Kenneth Owen

Conference reports

Stanford AI in Medicine Workshop

Avignon 90

Product communication

POPLOG-Neural—a neural network development toolkit

Julian Clinton

Conferences, Seminars, Courses

Expert systems with applications

Vol. 1 No. 1

Articles

Editorial

The maturing process of expert systems

Jay Liebowitz

Decision-theoretic approach to a knowledge-based clinical system

Jae Kyeong Kim, Boo Sik Kang and Soung Hie Kim

Business expert systems: the competitive edge

Daniel Schutzer

Intelligent decision support: strategies for integrating decision support, database management, and expert system technologies

Dave King

UNIK-FCST: knowledge-assisted adjustment of statistical forecasts

Jae Kyu Lee, Sang Bong Oh and Jung Cheol Shin

EXPERTEXT: from semantic nets to logic Petri nets

Roy Rada, Paul E. S. Dunne and Judith Barlow

Toward structured expert systems development

Paul Alpar

Expert systems at the Navy Center for Applied

Research in Artificial Intelligence

Randall Shumaker and Laura C. Davis

The knowledge engineering basis of expert systems

David Bendel Hertz

NTIS section

Software survey section

New patents

Human-computer interaction

Vol. 4 No. 4

Article

Out of Scandinavia: alternative approaches to software design and system development

Christiane Floyd, Wolf-Michael Mehl, Fanny-Michaela Reisin, Gerhard Schmidt and Gregor Wolf

Acknowledgment to reviewers

Author Index for Volume 4, 1989

Vol. 5 No. 1

Articles

The acquisition and performance of text-editing skill: a cognitive complexity analysis

Susan Bovair, David E. Kieras and Peter G. Polson

Specific versus general procedures in instructions

Richard Catrambone

Inferring user expertise for adaptive interfaces

Kent P. Vaubel and Charles F. Gettys

IEEE expert

Vol. 5 No. 3

SPACE: pushing the envelope

Articles

Planning for space telerobotics: the remote mission specialist

Mark Rokey and Sven Grenander

Representation selection for constraint satisfaction: a case study using *n*-queens

Bernard A. Nadel

Expert system development: a retrospective view of five systems

Adam Irgon, Jean Zolnowski, Karen J. Murray and Marvin Gersho

Capturing knowledge through top-down induction of decision trees

N. A. B. Gray

Validating expert systems

Timothy J. O'Leary, Michael Goul, Kathleen E. Moffitt and A. Essam Radwan

Expert system security

Daniel E. O'Leary

Maintainability techniques in developing large expert systems

David S. Prerau, Alan S. Gunderson, Robert E. Reinke and Mark R. Adler

Vol. 5 No. 4

Expert systems in Japan

Articles

The current status of expert system development and related technologies in Japan

Hiroshi Motoda

Expert systems in the UK

Roy Rada

Screening financial innovations: an expert system approach

Sudha and Sundaresan Ram

Knowledge specification of an expert system

James R. Slagle, David A. Gardiner and Kyungsook Han

A blackboard approach for diagnosis in pilot's associate

Bruce Pomeroy and Russell Irving

Blondie-III

Gidi van Liempd, Hugo Velthuisen and Adriana Florescu

The architecture of ALADIN: a knowledge-based approach to alloy design

Ingemar Hulthage, Mark S. Fox, Michael D. Rychener and Martha L. Farinacci

IEEE transactions on pattern analysis and machine intelligence

Vol. 12 No. 6

Articles

Computer vision and image analysis

Fast surface interpolation using hierarchical basis functions

R. Szeliski

A multiresolution hierarchical approach to image segmentation based on intensity extrema

L. M. Lifshitz and S. M. Pizer

Analysis of thinning algorithms using mathematical morphology

B. K. Jang and R. T. Chin

Text and document processing

Reading chess

H. S. Baird and K. Thompson

Acoustic pattern analysis

Differentiating sonar reflections from corners and planes by employing an intelligent sensor

B. Barshan and R. Kuc

A cache-based natural language model for speech recognition

R. Kuhn and R. De Mori

Correspondence

Computer vision and image analysis

Surface orientation from projective foreshortening of isotropic texture autocorrelation

L. G. Brown and H. Shvaytser

Image seaming for segmentation on parallel architecture

M.-H. Chen and T. Pavlidis

Modified matched filter for cloud clutter suppression

W. A. C. Schmidt

Character scaling by contour method

A. Namane and M. A. Sid-Ahmed

Call for papers

Vol. 12 No. 7

Articles

Computer vision and image analysis

Boundary detection by constrained optimization

D. Geman, S. Geman, C. Graffigne and P. Dong

Scale-space and edge detection using anisotropic diffusion

P. Perona and J. Malik

Application of affine-invariant Fourier descriptors to recognition of 3-D objects

K. Arbter, W. E. Snyder, H. Burkhardt and G. Hirzinger

Waveform analysis

Syntactic pattern recognition of the ECG

P. Trahanias and E. Skordalakis

Correspondence

Computer vision and image analysis

Displacement estimates through adaptive affinities

P. Werkhoven, A. Toet and J. J. Koenderink

A unified approach to the linear camera calibration problem

W. I. Grosky and L. A. Tamburino

Splitting-shooting methods for nonlinear transformations of digitized patterns

Z. C. Li, T. D. Bui, C. Y. Suen and Y. Y. Tang

A new region expansion for quadrees

C.-H. Ang, H. Samet and C. A. Shaffer

Acoustic pattern analysis

A spatial sampling criterion for sonar obstacle detection

R. Kuc

Some relations among stochastic finite state networks used in automatic speech recognition

F. Casacuberta

Text processing

A Mandarin dictation machine based upon a hierarchical recognition approach and Chinese natural language analysis

L.-s. Lee, C.-y. Tseng, K. J. Chen, J. Huang, C.-h. Hwang, P.-Y. Ting, L.-j. Lin and C. C. Chen

On-line recognition of handwritten Arabic characters

S. Al-Emami and M. Usher

A comparative analysis of regional correlation, dynamic time warping, and skeletal tree matching for signature verification

M. Parizeau and R. Plamondon

International Journal of man-machine studies

Vol. 33 No. 1

Articles

Listening typewriter simulation studies

A. F. Newell, J. L. Arnott, K. Carter and G. Cruickshank

Supervised learning in N -tuple neural networks

J. R. Doyle

Font recognition by a neural network

M.-C. Lee and J. B. Oldham

An algorithm for segmenting handwritten postal codes

M. Cesar and R. Shinghal

The impact of Pascal education on debugging skill

D. N. Stone, E. W. Jordan and M. K. Wright

Individual differences and effective learning procedures: the case of statistical computing

A. J. K. Green and K. J. Gilhooly

Vol. 33 No. 2

Articles

An introduction to hypermedia issues, systems and application areas

J. A. Begoray

A database interface based on Montague's approach to the interpretation of natural language

R. A. Frost and W. S. Saba

Validation of intent inferencing by a model-based operator's associate

P. M. Jones, C. M. Mitchell and K. S. Rubin

Utilizing a process model during the acquisition of redesign knowledge

E. Simoudis

A comparison of formal knowledge representation schemes as communication tools: predicate logic vs semantic network

J. T. Nosek and I. Roth

Journal of automated reasoning

Vol. 6 No. 2

Articles

Editorial announcement

Structure sharing for quantified terms: fundamentals

John Staples and Peter J. Robinson

Protected completions of first-order general logic programs

James J. Lu and V. S. Subrahmanian

The automation of syllogistic. II. Optimization and complexity issues

D. Cantone, E. G. Omodeo and A. Policriti

Decision procedures for elementary sublanguages of set theory. XV. Multilevel syllogistic extended by the predicate finite and the operators singleton and pred_<

D. Cantone and V. Cutello

A procedure to prove statements in differential geometry

Giuseppa Carra Ferro and Giovanni Gallo

Basic research problems

The problem of finding a mapping between clause representation and natural-deduction representation

Larry Wos

Problem corner

Meeting the challenge of fifty years of logic

Larry Wos

Journal of experimental and theoretical artificial intelligence

Vol. 2 No. 2

Articles

Representational issues in genetic optimization

Gunar-E. Liepins and Michael D Vose

Information synthesis based on hierarchical maximum entropy discretization

David K. Y. Chiu, Benny Cheung and Andrew K. C. Wong

Accelerating search in function induction

Thong H. Phan and Ian H. Witten

A modular translation from defeasible nets to defeasible logics

David Billington, Koen de Coster and Donald Nute

Holland's schema theorem disproved?

James R. Levenick

Searle's extension of the Chinese room to connectionist machines

Lawrence D. Roberts

Journal of intelligent and robotic systems

Vol. 3 No. 2

Articles

A two-layer fuzzy pattern matching procedure for the evaluation of conditions involving vague quantifiers

Henri Prade

Fault diagnosis of a mixing process using deep qualitative knowledge representation of physical behaviour

J. Zhang, P. D. Roberts and J. E. Ellis

Integrating learning and decision-making in intelligent manufacturing systems

A. Famili

Integration strategy for distributed intelligent systems

Ming Rao, Tsung-Shann Jiang and Jeffrey J.-P. Tsai

Object-oriented software modeling of a flexible manufacturing system

Sadashiv Adiga and Milind Gadre

Extraction and representation of facts from legal briefs

M. G. Venkateshmurthy, T. V. Geetha and R. K. Subramanian

Hierarchical scheduling in an intelligent environmental control system

Tag Gon Kim

Book review

M. W. Spong and M. Vidyasagar, *Robot Dynamics and Control*

Kimion P. Valavanis

Calendar of events

The journal of logic programming

Vol. 9 No. 1

Articles

ABSYS: the first logic programming language—a retrospective and a commentary

E. W. Elcock

Minimal consequence in sentential logic

Mary-Angela Papalaskari and Scott Weinstein

Completed logic programs and their consistency

Taisuke Sato

A fixpoint semantics for disjunctive logic programs

Jack Minker and Arcot Rajasekar

Inference rules and proof procedures for inequations

Chilukuri K. Mohan, Mandayam K. Srivas and Deepak Kapur

Representing knowledge with theories about theories

Edward P. Stabler, Jr

Journal of object-oriented programming

Vol. 3 No. 2

Articles
