

## From the journals. . . .

### Applied artificial intelligence

**Vol. 4 No. 3**

**Articles**

An open system approach to integration of expert systems

*Semir Al-Schamma and Zhengxin Chen*

Topologically traversing the RETE network

*Mark Perlin*

Integrated access to information systems

*Patrice Poyet*

A domain-independent tool for the selection problem

*Jie Yang*

**Applied artificial intelligence calendar**

### Artificial intelligence

**Vol. 45 Nos. 1–2**

**Articles**

Learning in mathematically-based domains: understanding and generalizing obstacle cancellations

*J. W. Shavlik and G. F. DeJong*

Maximizing the predictive value of production rules

*S. M. Weiss, R. S. Galen and P. V. Tadepalli*

Qualitative physics using dimensional analysis

*R. Bhaskar and A. Nigam*

Automated program recognition: a feasibility demonstration

*L. M. Wills*

Explaining and repairing plans that fail

*K. J. Hammond*

Concept learning and heuristic classification in weak-theory domains

*B. W. Porter, R. Bareiss and R. C. Holte*

**Corrigendum**

**Announcements**

**Forthcoming papers**

**Vol. 45 No. 3**

**Articles**

On the parallel complexity of discrete relaxation in constraint satisfaction networks

*S. Kasif*

Model-preference default theories

*B. Selman and H. A. Kautz*

Shape from texture: estimation, isotropy and moments

*A. Blake and C. Marinos*

Using crude probability estimates to guide diagnosis (research note)

*J. de Kleer*

**Books received**

**Announcements**

**Forthcoming papers**

**Author index—Volume 45, 1990**

**Contents—Volume 45, 1990**

## Artificial intelligence in medicine

### Vol. 2 No. 1

#### Articles

#### Editorial

In dubio pro aegro

MKS: an expert system shell for HIS environment

*Q. Dan and J. Dudeck*

Towards computer-assisted maintenance of medical knowledge bases

*D. A. Giuse, N. B. Giuse and R. A. Miller*

Expert system support for the therapeutic management of cerebrovascular disease

*U. Müller-Kolck*

A report on medical expert systems research in Italy

*P. Torasso*

#### Book reviews

#### Software review

#### Calendar

### Vol. 2 No. 2

#### Articles

#### Editorial

Deep models for medical expert systems

Diagnostic efficiency of deep and surface knowledge in KARDIO

*I. Mozetič*

Qualitative models in medical diagnosis

*L. Ironi, M. Stefanelli and G. Lanzola*

Structure and significance of analogical reasoning

*J. A. Campbell and J. Wolstencroft*

#### Book reviews

#### Calendar

#### Forthcoming papers

### Vol. 2 No. 3

#### Articles

Some causal models are deeper than others

*T. Bylander*

Making deepness explicit

*J. Washbrook and E. Keravnou*

Monitoring diseases with empirical and model-generated histories

*E. W. Coiera*

The qualitative criticism of circulatory models via bipartite teleological analysis

*K. Downing*

#### Calendar

#### Forthcoming papers

### Vol. 2 No. 4

#### Articles

Editorial: Medical experttext

*R. Rada*

A hypermedia document collection for primary care: why, what, and how?

*T. Timpka, P. Hedblom and G. Tibblin*

LIMES: A hypertext interface to a cholesterol management expert system

*B. Kane*

Coupling hypertext to an object-oriented environment

*I. de Zegher and P. Jassem*

Medical experttext as regularity in semantic nets

*H. Mili and R. Rada*

#### Book reviews

#### Call for papers

#### Calendar

### Vol. 2 No. 5

#### Articles

A temporal reasoning framework used in the diagnosis of skeletal dysplasias

*E. T. Keravnou and J. Washbrook*

Automating the knowledge acquisition process in the construction of medical expert systems

*A. K. C. Wong and K. C. C. Chan*

#### Conference report

#### Calendar

## Computational intelligence

### Vol. 6 No. 3

#### Articles

APACS: a system for the automatic analysis and classification of conceptual patterns

*Keith C. C. Chan and Andrew K. G. Wong*

Exact and approximate reasoning about temporal relations

*Peter van Beek and Robin Cohen*

Reversible logic grammars for natural language parsing and generation

*Tomek Strzalkowski*

Feature grammars for semantic analysis

*Camilla B. Schwind*

### Taking issue/forum: an inquiry into computer understanding—subsequent commentaries

Taking issue revisited

*Mary McLeish*

Reply to rejoinder

*D. Dubois and H. Prade*

Reply to rejoinder

*L. K. Schubert*

Probability and logic: a reply to Cheeseman

*Fahiem Bacchus*

Let many flowers bloom: a response to *An inquiry into computer understanding*

*Joseph Y. Halpern*

On the importance of evidence: a response to Halpern

*Peter C. Cheeseman*

## Computational linguistics

**Vol. 16 No. 3**

### Articles

Resolving quasi logical forms

*Hiyan Alshawi*

An editor for the explanatory and combinatory dictionary of contemporary French (DECFC)

*Michael Décary and Guy Lapalme*

A computational grammar of discourse-neutral prosodic phrasing in English

*J. Bachenko and E. Fitzpatrick*

### Technical correspondence

Disjunction without tears

*Allan Ramsay*

Workshop on the evaluation of natural language processing systems

*Martha Palmer and Tim Finin*

### Book reviews

Machine translation: how far can it go?

*Makoto Nagao*

*Reviewed by Dominique Estival*

Looking up: an account of the COBUILD project in lexical computing

*John M. Sinclair (ed.)*

*Reviewed by Branimir Boguraev*

Generating natural language under pragmatic constraints

*Eduard H. Hovy*

*Reviewed by Wolfgang Hoepfner*

### Briefly noted

### Books received

### Abstracts of current literature

## Decision support systems

**Vol. 6 No. 3**

### Articles

An evaluation of empirical research in managerial support systems

*I. Benbasat and B. R. Nault*

An approach to dialog management for presentation and manipulation of composite models in decision support systems

*J. Gerlach and F.-Y. Kuo*

A multiple objective linear programming decision support system

*P. Korhonen and J. Wallenius*

On the evaluation of heuristic information systems

*B. G. Lundberg*

An interactive procedure for multiobjective optimization using Nash bargaining principle

*V. Venugopal and T. T. Narendran*

DSS applications development research: leading institutions and most frequent contributors (1971–April 1988)

*H. B. Eom and S. M. Lee*

### Announcements

### Calendar

**Vol. 6 No. 4**

### Articles

Knowledge based discrete control problems: a decision support approach

*H.-J. Sebastian*

Expert systems for inventory control

*D. Ehrenberg*

Decision support by rapid simulation using simulation nets

*A. A. Torn*

Knowledge representation in expert systems for process control

*B. Bohne and R. Wieland*

Unification theory

*J. H. Siekmann*

Task-allocation between DSS and problem owner: the example of Box & Jenkins time-series analysis

*H. G. van Dissel, H. P. Borgman and A. J. M.*

*Beulens*

### Calendar

### Author index to Volume 6

### Subject index to Volume 6

## Expert systems for information management

**Vol. 3 No. 1**

### Articles

Management by exception: an expert systems approach

*Jane Hillston, Alex Edwards and Martin Wilkins*

An intelligent environment for the use and design of reusable models

*Rebeca L. Joos*

Intelligent interfaces to online databases

*A. S. Pollitt*

### Book reviews

Artificial intelligence and cognitive science

*J. Demongeot, T. Hervé, V. Rialle and C. Roche*

*Reviewed by Lone Bendix Nielsen*

Review of artificial intelligence and cognitive sciences

*L. E. Widman, K. A. Loparo and N. R. Nielson*

*Reviewed by Roy Leitch*

Knowledge engineering for expert systems

*M. Greenwell*

*Reviewed by Anne Morris*

Artificial intelligence and expert systems: case studies in the knowledge domain of archaeology

*Jean-Claude Gardin*

*Reviewed by Peter Main*

Object-oriented programming for artificial intelligence: a guide to tools and systems design

*Ernets R. Tello*

*Reviewed by John Weckert*

### Forthcoming conferences

## Expert systems with applications

### Vol. 1 No. 2

#### Articles

Verifying, validating and measuring the performance of expert systems

*Ching Y. Suen, Peter D. Grogono, Raijan Shinghal and François Coallier*

Using knowledge-based systems for teaching and performing knowledge-based systems development

*Robert J. Mockler*

A high-level representation language for the construction and use of large knowledge bases

*Gian Piero Zari*

Expert systems in telecommunications

*Jon R. Wright and Gregg T. Vesonder*

Expert systems in the United Kingdom nuclear industry

*Valerie J. Calderbank*

Quality assurance and expert systems—a framework and conceptual model

*John F. Affisco and Mahesh Chandra*

CYRCE: a pattern of knowledge representation and knowledge acquisition for decision on personal loans

*José Cuena, Ana García-Serrano and Javier Marquez*

SLING: a knowledge-based product selector

*W. D. Potter, T. H. Tidrick, T. M. Hansen, L. W.*

*Hill, D. E. Nute, L. M. Fried and T. W. Leigh*

RADA—a research and development advisor incorporating artificial intelligence techniques and expert system approaches

*T. C. Tan, P. Smith and M. Pegman*

A two-stage inference strategy in real-time expert systems

*Chen You Qi*

Expert configuration systems: a survey and lessons learned

*Jay Liebowitz*

Conference: successful implementation of expert systems in large organizations

*Paul Alpar and Yair M. Babad*

#### NTIS section

#### Software survey section

#### New patents

### Vol. 1 No. 3

#### Articles

**Special issue: verification and validation of knowledge-based systems**

Guest editor's note

*Chris Culbert*

The modeling issues inherent in testing and evaluating knowledge-based systems

*Kirstie L. Bellman*

A report on the expert systems validation associate (EVA)

*C. L. Chang, J. B. Combs and R. A. Stachowitz*

An integrative model of expert system verification and validation

*Robert M. O'Keefe and Sunro Lee*

Testing knowledge-based systems: the state of the practice and suggestions for improvement

*Monica M. Constantine and Jacob W. Ulvila*

Dynamic testing of knowledge bases using the heuristic testing approach

*Lance A. Miller*

A meta-level software development model that supports V&V for AI software

*Theodore A. Linden*

A hypothetical application of the statistical modeling and estimation of reliability functions for software (SMERFS) to knowledge-based systems (KBSS)

*Britt W. Barrett*

Correctness principles for rule-based expert systems

*Christopher Landauer*

Verification of rule-based expert systems

*William T. Wood and Elaine N. Frankowski*

#### NTIS section

#### Software survey section

#### New patents

## IEEE expert

### Vol. 5 No. 5

#### Articles

Seteli: the strategy expert for telecommunication investments

*Ahti Salo and Raimo P. Hämäläinen*

Expert design of local area networks

*Stefano Ceri and Letizia Tanca*

Peirce: a tool for experimenting with abduction

*W. F. Punch III, M. C. Tanner, J. R. Josephson, and J. W. Smith*

An application of explanation-based learning to protocol conformance testing

*C. Geldrez, S. Matwin, J. Marin and R. L. Probert*

Railcar distribution at the French railways

*Pierre Lévine and Jean-Charles Pomerol*

## Pattern analysis and machine intelligence

**Vol. 12 No. 9**

### Articles

#### Computer vision and image analysis

Inferring surface trace and differential structure from 3-D images

*P. T. Sander and S. W. Zucker*

Using dynamic programming for solving variational problems in vision

*A. A. Amini, T. E. Weymouth and R. C. Jain*

Extensions of scale-space filtering to machine-sensing systems

*B. Zuerndorfer and G. H. Wakefield*

#### Semantic networks

ERNEST: a semantic network system for pattern understanding

*H. Niemann, G. F. Sagerer, S. Schröder, and F. Kummert*

### Correspondence

#### Computer vision and image analysis

Generalized multidimensional orthogonal polynomials with applications to shape analysis

*J. Xu and Y.-H. Yang*

Contour tracking and corner detection in a logic programming environment

*B. Bell and L. F. Pau*

#### Speech recognition

Speaker adaptation in a large-vocabulary gaussian HMM recognizer

*P. Kenny, M. Lennig, and P. Mermelstein*

#### Inductive inference

Inference of  $k$ -testable languages in the strict sense and application to syntactic pattern recognition

*P. García and F. Vidal*

**Vol. 12 No. 10**

### Articles

#### Computer vision and image analysis

Image segmentation by unifying region and boundary information

*J. F. Haddon and J. F. Boyce*

Geometric reasoning for recognition of three-dimensional object features

*M. Marefat and R. L. Kashyap*

Separating a color signal into illumination and surface reflectance components: theory and applications

*J. Ho, B. V. Funt, and M. S. Drew*

A system for interpretation of line drawings

*R. Kasturi, S. T. Bow, W. El-Masri, J. Shah, J. R. Gattiker, and U. B. Mokate*

#### Neural networks

Neural network ensembles

*L. K. Hansen and P. Salamon*

### Correspondence

#### Computer vision and image analysis

Matching 3-D line segments with applications to multiple-object motion estimation

*H. H. Chen and T. S. Huang*

A model-fitting approach to cluster validation with application to stochastic model-based image segmentation

*J. Zhang and J. W. Modestino*

The specification of edge penalties for regular and irregular fixed images

*B. W. Silverman, C. Jennison, J. Stander, and T. C. Brown*

## International journal of man-machine studies

### Vol. 33 No. 3

#### Articles

Categories of programming knowledge and their application

*R. Brooks*

More or less following a plan during design: opportunistic deviations in specification

*W. Visser*

Knowledge exploited by experts during software system design

*R. Guindon*

Variability in program design: the interaction of process with knowledge

*R. S. Rist*

An empirically-derived control structure for the process of program understanding

*F. Detienne and E. Soloway*

Common cognitive representations of program code across tasks and languages

*S. P. Robertson, and C.-C. Yu*

### Vol. 33 No. 4

#### Articles

A methodology for validating large knowledge bases

*R. Enand, G. S. Kahn and R. A. Mills*

Developing a tool for knowledge integration: initial results

*K. S. Murray and B. W. Porter*

Semi-automatic acquisition of conceptual structure from technical texts

*S. Szpakowicz*

Semantic strings: a new technique for detecting and correcting user errors

*J. H. Bradford*

Individualized tutoring using an intelligent fuzzy temporal relational database

*L. W. Hawkes, S. J. Derry and E. A. Rundensteiner*

EMCUD: a knowledge acquisition method which captures embedded meanings under uncertainty

*G. J. Hwang and S. S. Tseng*

Direct manipulation as a source of cognitive feedback: a human-computer experiment with a judgement task

*D. Te'eni*

Two perspectives of the Dempster-Shafer theory of belief functions

*P. Lingras and S. K. M. Wong*

### Vol. 33 No. 5

#### Articles

Learning plans for an intelligent assistant by observing user behavior

*K. R. Levi, L. Valerie, V. L. Shalin and D. L.*

*Perschbacher*

The meaning triangle as a tool for the acquisition of abstract, conceptual knowledge

*S. Regoczei and G. Hirst*

Using personal construct techniques for collaborative evaluation

*D. Schuler, P. Russo, J. Boose and J. Bradshaw*

Functional design of a menu-tree interface within structured system development

*P. Shoval*

An intelligent language tutoring system

*C. B. Schwind*

An evaluation of the effectiveness and efficiency of an automobile moving-map navigational display

*J. F. Antin, T. A. Dingus, M. C. Hulse and W. W.*

*Wierwille*

Different notions of uncertainty in quasi-probabilistic models

*L. C. van der Gaag*

## Journal of automated reasoning

### Vol. 6 No. 3

#### Articles

Gröbner bases in exterior algebra

*Timothy Stokes*

Computer proofs in group theory

*Yuan Yu*

Short proofs of the pigeonhole formulas based on the connection method

*W. Bibel*

Interweaving knowledge extracting, organizing and evaluating: a concrete design for preventing logic and structure bugs while interviewing experts

*Joseph S. Di Piazza*

Equivalence of propositional Prolog programs

*Hans Kleine Büning, Ulrich Löwen and Stefan*

*Schmitgen*

#### Basic research problems

The problem of finding a semantic strategy for focusing inference rules

*Larry Wos*

#### Problem corner

Challenge problems in elementary calculus

*W. W. Bledsoe*

## Journal of intelligent and robotic systems

Vol. 3 No. 3

### Articles

#### Special issue on robot modelling and control

*Edited by I. Troch, P. Kopacek and K. Desoyer*

Robot modelling and control

*I. Troch, P. Kopacek and K. Desoyer*

Kinematic control of redundant robot manipulators: a tutorial

*Bruno Siciliano*

Robots positioning control revisited

*R. Gorez and J. O'Shea*

On the invariance of the hybrid position/force control

*A. Abbati-Marescotti, C. Bonivento and*

*C. Melchiorri*

Optimal path planning including forces at the gripper

*F. Pfeiffer and K. Richter*

Robust pole assignment for incomplete nonlinear decoupling applied to robots

*Wolfgang M. Grimm and Paul M. Frank*

Calendar of events

## Journal of logic and computation

Vol. 1 No. 1

### Articles

#### Editorial

Abstract interpretation, logic relations, and kan extensions

*S. Abramsky*

Bilattices and model operators

*M. L. Ginsberg*

Finite and circular path models for branching time logics

*M. Kaminski and M. Tiomkin*

Destructive model resolution

*M. Fitting*

Properties of a pruning operator

*P. M. Hill, J. W. Lloyd, and J. C. Shepherdson*

Conference reports

Reviews

Books received

## Journal of logic programming

Vol. 9 No. 1

### Articles

ABSYS: the first logic programming language—a retrospective and a commentary

*E. W. Elcock*

Minimal consequence in sentential logic

*Mary-Angela Papalaskari and Scott Weinstein*

Completed logic programs and their consistency

*Taisuke Sato*

A fixpoint semantics for disjunctive logic programs

*Jack Minker and Arcot Rajasekar*

Inference rules and proof procedures for inequations

*Chilukuri K. Mohan, Mandayam K. Srivas, and*

*Deepak Kapur*

Representing knowledge with theories about theories

*Edward P. Stabler, Jr.*

## Journal of new generation computer systems

**Vol. 3 No. 2**

### Articles

A survey of functional programming languages

*Ch. Hankin and K. S. Arabadjiyski*

A database machine based on transputers

*D. Grigoras*

TDB/1—tool for building advice giving systems

*L. Popova and D. Goranov*

On the suitability of higher block matrix forms for systolic LU decomposition

*G. M. Megson and D. J. Evans*

Design and optimization of a hierarchical classifier

*W. Hanisch*

### Reports on conferences

### Conference announcements

### Book reviews

### Calendar of events

**Vol. 3. No. 3**

### Articles

Generalizing the entity-relationship model for database modelling

*B. Thalheim*

P.S.: an APES-oriented expert system shell with uncertainty handling

*K. Bothe*

The natural language interface NLI-AIDOS

*H. Helbig, H. Bötter, F. Ficker, P. String and F. Zänker*

Massively parallel computing systems based on the analogy to neural networks

*M. Novak and O. Kufudaki*

Multidimensional Radix-2 FFT without bit reversal

*U. Rutkowska*

*Wilhelm Kämmerer—85 Years*

### Conference announcements and calls for papers

### Report on conference

### Book reviews

### Calendar of events

## Knowledge-based systems

**Vol. 3. No. 3**

### Articles

A knowledge-based approach for checking software information using a non-monotonic reasoning system

*J. J.-P. Tsai and T. Weigert*

Argument comprehension and retrieval for editorial text

*S. J. Alvarado, M. G. Dyer and M. Flowers*

Propa: a papaya management expert system

*S. Y. Itoga, C. L. Chia, R. S. Yost and R. F. L. Mau*

Systems development life-cycle for expert systems

*R. Agarwal and M. Tanniru*

### Books

### Literature

### Calendar

## Kybernetes

**Vol. 19 No. 4**

### Articles

A theory of information for vague concepts: outline of application to approximate reasoning

*Guy Jumarie*

System and time: the function of time in meaning-constituting systems

*John Bednarz Jr.*

A framework model for CAL programs

*Hussein Hadi Owaied and George Stylios*

### Communications

What is a problem and what is an original solution to a problem?

*Brennig James*

Solving indefinable problems with backward Utopian iteration

*R. W. Kaiser and G. J. Plenert*

### News, conferences and technical reports

### Book reviews

### Announcements

### Special announcements

**Vol. 19 No. 5**

### Articles

Artificial intelligence and constituent analysis

*C. Musès*

Knowledge engineering, human experts and intelligent systems

*Gary Buckner and Vivek Shah*

Decision-making systems in human memory modelling

*Simon J. Mrchev*

The defective coin problem: an algorithmic analysis

*Suresh Ankolekar, Arindam Das Gupta and G. Srinivasan*

### Communications

Pentad city proposes a new environment of urban structure

*Wolf Pearlman*
