Artificial intelligence

Vol. 74 No. 2

Articles

Efficient algorithms for qualitative reasoning about time

A. Gerevini and L. Schubert

Tractable reasoning via approximation

M. Schaerf and M. Cadoli

Naming and identity in epistemic logic 2: A first-order logic for naming

A. J. Grove

Nested abnormality theories

V. Lifschitz

The computational-complexity of querying bounds on differences constraints

V. Brusoni, L. Console and P. Terenziani

Levesques axiomatization of only knowing is incomplete

J. Y. Halpern and G. Lakemeyer

Sloans view of godels sentence

D. Bojadziev

Vol. 75 No. 1

Articles

AI research in Japan—preface

K. Shirai

Qualitative-analysis of behavior of systems of piecewise-linear differential-equations with 2 state variables

T. Nishida and S. Doshita

Mbt2—a method for combining fragments of examples in example-based translation

S. Sato

Learning of modular structured networks

M. Ishikawa

Clip—concept-learning from inference patterns

K. Yoshida and H. Motoda

Geometric theorem-proving by integrated logical and algebraic reasoning

T. Matsuyama and T. Nitta

Equilibrium-analysis of the distribution of information in human-society

S. Goto and H. Nojima

Vol. 75 No. 2

Articles

Behaviorist intelligence and the scaling problem

J. K. Tsotsos

A typed resolution principle for deduction with conditional typing theory

T. C. Wang

Controlling cooperative problem solving in industrial multi-agent systems using joint intentions

N. R. Jennings

Robust reasoning: integrating rule-based and similarity-based reasoning

R. Sun

Multiagent negotiation under time constraints

S. Kraus, J. Wilkenfeld and G. Zlotkin

BIDA*: an improved perimeter search algorithm (Research note)

G. Manzini

The effect of bounding the number of primitive propositions and the depth of nesting on the complexity of modal logic (Research note)

J. Y. Halpern

Artificial intelligence review

Vol. 8 Nos. 5, 6

Special issue: integration of natural language and vision processing: *more computational models and systems*

Computational models for integrating linguistic and visual information: a survey

Rohini K. Srihari

Grounding language in perception

Jeffrey Mark Siskind

Connectionist visualisation of tonal structure

Niall Griffith

Use of captions and other collateral text in understanding photographs

Rohini K. Srihari

The DenK-architecture: A fundamental approach to user-interfaces

R. M. C. Ahn, R. J. Beun, T. Borghuis, H. C. Bunt and C. W. A. M. Van Overveld

AI meets authoring: user models for intelligent and multimedia

Andrew Csinger, Kellogg S. Booth and David Poole

Vol. 9 No. 1

Articles

Superstitious learning and induction

A. P. White and W. Z. Liu

Explanation-based learning—a knowledge level analysis

E. Armengol and E. Plaza

Interpreting a dynamic and uncertain world—high-level vision

R. Howarth

Applied artificial intelligence

Vol. 9 No. 2

Articles

Unified approach to learning for complex real-world domains

F. Schmalhofer, T. Reinartz and B. Tschaischian

Reasoning about changing structure—a modeling concept for ecological systems

A. M. Uhrmacher

Conditional causal-modeling

D. S. Bree, H. Hogeveen, M. H. W. Schakenraad,

J. F. Schreinemakers and D. M. Tepp

Comparison of artificial-intelligence methods for modeling pharmaceutical qsars

R. D. King, J. D. Hirst and M. J. E. Sternberg

Determining the path search graph and finding a collision-free path by the modified a-asterisk algorithm for a 5-link closed chain

Q. Xue and Y. P. Chien

Vol. 9 No. 3

Articles

Automatic-generation of technical documentation

E. Reiter, C. Mellish and J. Levine

Statlog—comparison of classification algorithms on large real-world problems

R. D. King, C. Feng and A. Sutherland

Hybrid models of uncertainty in protein topology prediction

S. Parsons

Computational linguistics

Vol. 21 No. 2

Articles

Automatic stochastic tagging of natural language texts

Evangelos Dermatas and George Kokkinakis

An efficient probabilistic context-free parsing algorithm that computes prefix probabilities

Andreas Stolcke

Centering: A framework for modeling the local coherence of discourse

Barbara J. Grosz, Aravind K. Joshi and Scott Weinstein

Deterministic part-of-speech tagging with finite-state transducers

Emmanuel Roche and Yves Schabes

Squibs and discussions

Efficient parsing for Korean and English: a parameterized message-passing approach

Bonnie J. Dorr, Dekang Lin, Jye-hoon Lee and Sungki Suh

Computers and artificial intelligence

Vol. 14 No. 1

Articles

An operational semantics approach to disciplined exceptions in logic programming

T. K. Shih and F. Y. Lin

Load balancing and scheduling in a neighborhood-based multiprocessor

G. S. H. Tan and W. N. Chin

Managing parallelism in parallel systems

Y. M. Teo

A synthesis of suboptimal decision diagrams

V. Dvorak and J. Sustr

Data & knowledge engineering

Vol. 15 No. 3

Articles

A temporal blackboard for a multi-agent environment

V. Botti, F. Barber, A. Crespo, E. Onaindia, A.

Garcia-Fornes, I. Ripoll, D. Gallardo and L.

Hernández

A survey of database design transformations based on the entity—relationship model

C. Fahrner and G. Vossen

Subtyping and polymorphism in object-role modelling

T. A. Halpin and H. A. Proper

Vol. 16 No. 1

Articles

Architectures and monitoring techniques for active databases: an evaluation

S. Chakravarthy

Dependable reactive event-oriented planning

J. Dorn

An integrated data structure with multiple access paths for database systems and its performance

V. Kumar and J. Mullins

Conditional deontic logic augmented with defeasible reasoning

Y. U. Ryu

Engineering applications of artificial intelligence

Vol. 8 No. 2

Articles

An intelligent design environment for conceptual process design

Q. Wang, J. Y. Zhu, Y. Q. Shu, M. Rao and K. T. Chuang

A neural-network-based computational scheme for generating optimized robotic assembly sequences

D. S. Hong and H. S. Cho

Heuristic scheduling of the DRS communication-system

M. Adinolfi and A. Cesta

A method of automatic state acquisition for conflict detection of telecommunication service descriptions

Y. Harada, T. Ohta and N. Terashima

Concurrent system to resolve real-time conflicts in multirobot systems

G. Cohen

Least median squares curve-fitting using a genetic algorithm

C. L. Karr, B. Weck, D. L. Massart and P. Vankeerberghen

Automatic recognition of fast and slow phases in nystagmic eye-movements using a neural-network

B. Petrus and A. Eljaroudi

Decentralized fuzzy control of multivariable systems by direct decomposition

A. E. Gegov

Performance of the generalized delta-rule in structural damage detection

S. V. Barai and P. C. Pandey

A global optimum clustering-algorithm

B. Yu and B. Z. Yuan

Expert systems with applications

Vol. 8 No. 4

Articles

Explanation—the way forward—guest editors' preface

D. C. Berry

Using ethnography in the design of an explanation system

D. E. Forsythe

What do patients want to know—an empirical-approach to explanation generation and validation

D. C. Berry, T. Gillie and S. Banbury

Mediating between hearers and speakers views in the generation of adaptive explanations

F. Derosis, F. Grasso, D. C. Berry and T. Gillie

Cooperative problem-solving and explanation

L. Karsenty and P. J. Brezillon

Reconstructive explanation—a case-study in integral calculus

M. R. Wick, P. Dutta, T. Wineinger and J. Conner

Explaining quantitative systems to uninitiated users

S. A. Slotnick and J. D. Moore

Generating explanations in context—the system perspective

V. O. Mitta and C. L. Paris

Task-based explanations

M. C. Tanner

Using similarity metrics to determine content for explanation generation

M. T. Maybury

Developing an explanation component for a knowledge-based system—discussion

A. Cawsey

Vol. 9 No. 1

Articles

Research frontier in the far-east

J. K. Lee and R. Mizoguchi

Es-asterisk—an expert-systems development planner using a constraint and rule-based approach

J. K. Lee and S. B. Kwon

Task-analysis interview based on task ontology

R. Mizoguchi, Y. Tijerino and M. Ikeda

Automated knowledge acquisition by reasoning failures

Y. T. Park

Knowledge acquisition from multiple experts—problems and issues

L. Medsker, M. Tan and E. Turban

A framework for hypothesis generation in model-based diagnosis

Y. W. Purna and T. Yamaguchi

A framework for an online diagnostic expert-system for intelligent manufacturing

K. J. Kim

A bond rating expert-system for industrial companies

B. O. Kim and S. M. Lee

From natural-language to shell script—a case-based reasoning system for automatic unix programming

W. I. Lee and G. B. Lee

Fuzzy expert-system for continuous speech recognition

H. J. Yu, Y. H. Oh, Y. Yamashita and R. Mizoguchi

Human-computer interaction

Vol. 10 Nos. 2 & 3

Articles

Design strategies and knowledge in object-oriented programming: effects of experience

Françoise Déttienne

Cognitive activities and levels of abstraction in procedural and object-oriented design

Nancy Pennington, Adrienne Y. Lee and Bob Rehder

Are objects that important? Effects of expertise and familiarity on classification of object-oriented code

Simon P. Davis, David J. Gilmore and Thomas R. G. Green

Object-oriented analysis and design in software project teams

James D. Herbsleb, Helen Klein, Gary M. Olson, Hans Brunner, Judith S. Olson and Joe Harding

Object-oriented system development in a banking project: methodology, experience and conclusions

Ute Bürkle, Guido Gryczan and Heinz Züllighoven

IEEE transactions on pattern analysis and machine intelligence

Vol. 17 No. 5

Articles

The application of semantic classification trees to natural-language understanding

R. Kuhn and R. Demori

Combining image compression and classification using vector quantization

K. L. Oehler and R. M. Gray

Cooperative robust estimation using layers of support

T. Darrell and A. P. Pentland

Deformable kernels for early vision

P. Perona

Reciprocal-wedge transform for space-variant sensing

F. Tong and Z. N. Li

Linear and incremental acquisition of invariant shape models from image sequences

D. Weinshall and C. Tomasi

Probabilistic indexing for object recognition

C. F. Olson

Color constant color indexing

B. V. Funt and G. D. Finlayson

Linear-time euclidean distance transform algorithms

H. Breau, J. Gil, D. Kirkpatrick and M. Werman

A new efficient and direct solution for pose estimation using quadrangular targets—algorithm and evaluation

M. A. Abidi and T. Chandra

Silhouette-based isolated object recognition through curvature scale-space

F. Mokhtarian

Pose estimation by fusing noisy data of different dimensions (vol. 17, pg 195, 1995)

Y. Helor and M. Werman

Parts of visual form—computational aspects (vol. 17, pg 239, 1995)

K. Siddiqi and B. B. Kimia

Vol. 19 No. 6

Articles

Modal matching for correspondence and recognition

S. Sclaroff and A. P. Pentland

Recursive estimation of motion, structure, and focal length

A. Azarbayejani and A. P. Pentland

On discontinuity-adaptive smoothness priors in computer vision

S. Z. Li

Digitized circular arcs—characterization and parameter-estimation

M. Worring and A. W. M. Smeulders

Best-case results for nearest-neighbor learning

S. Salzberg, A. L. Delcher, D. Heath and S. Kasif

Moving-target search—a real-time search for changing goals

T. Ishida and R. E. Korf

Image relaxation—restoration and feature-extraction

W. Snyder, Y. S. Han, G. Bilbro, R. Whitaker and S. Pizer

Discontinuity-preserving and viewpoint invariant reconstruction of visible surfaces using a first-order regularization

J. H. Yi and D. M. Chelberg

Subpixel edge location in binary images using dithering

X. D. Liu and R. W. Ehrich

Finding shortest paths on surfaces using level sets propagation

R. Kimmel, A. Amir and A. M. Bruckstein

Evaluation of binarization methods for document images (vol. 17, pg 312, 1995)

O. D. Trier and T. Taxt

Vol. 17 No. 7

Articles

Class-dependent discretization for inductive learning from continuous and mixed-mode data

J. W. Ching, A. K. C. Wong and K. C. C. Chan

On the efficient allocation of resources for hypothesis evaluation—a statistical approach

S. Chien, J. Gratch and M. Burl

Bounds on shape-recognition performance

M. Lindenbaum

A spherical representation for recognition of free-form surfaces

M. Hebert, K. Ikeuchi and H. Delingette

An extended class of scale-invariant and recursive scale-space filters

E. J. Pauwels, L. J. Vangool, P. Fiddelaers and T. Moons

A fuzzy-syntactic approach to allograph modeling for cursive script recognition

M. Parizeau and R. Plamondon

Adaptive scale filtering—a general-method for obtaining shape from texture

J. V. Stone and S. D. Isard

Stereo matching in the presence of narrow occluding objects using dynamic disparity search

U. R. Dhond and J. K. Aggarwal

Direct extraction of topographic features for gray-scale character-recognition

S. W. Lee and Y. J. Kim

Efficient color histogram indexing for quadratic form distance functions

J. Hafner, H. S. Sawhney, W. Equitz, M. Flickner and W. Niblack

International journal of computer vision

Vol. 15 Nos. 1–2

Special issue: image understanding research at the University of Maryland

Qualitative egomotion

C. Fermuller and Y. Aloimonos

Automatic feature point extraction and tracking in image sequences for arbitrary camera motion

Q. F. Zheng and R. Chellappa

Experiments on estimating egomotion and structure parameters using long monocular image sequences

T. H. Wu, R. Chellappa and Q. F. Zheng

Egomotion analysis based on the frenet-serret motion model

Z. Duric, A. Rosenfeld and L. S. Davis

Model-based object pose in 25 lines of code

D. F. Dementhon and L. S. Davis

Recovery of temporal information from static images of handwriting

D. S. Doermann and A. Rosenfeld

IEEE expert

Vol. 10 No. 2

Articles

Intelligent robotic systems

Guest editor's introduction: intelligent robotic systems
Ronald C. Arkin

Distributed control representation for manipulation tasks

Roderic A. Grupen, Manfred Huber, Jefferson A. Coelho Jr. and Kamal Souccar

The USC AFV-I: a behavior-based entry in the 1994 international aerial robotics competition

James F. Montgomery, Andrew H. Fagg and George A. Bekey

Using a blackboard to integrate multiple activities and achieve strategic reasoning for mobile-robot navigation

Ramiro Liscano, Reda E. Fayek, Allan Manz, Elizabeth R. Stuck and Jean-Yves Tigli

Using machine learning techniques in real-world mobile robots

Michael Kaiser, Volker Klingspor, José del R. Millán, Marco Accame, Frank Wallner and Rüdiger Dillmann

KDD vs. privacy minisymposium

Guest editor's introduction

Gregory Piatetsky-Shapiro

Some privacy issues in knowledge discovery: OECD personal privacy guidelines

Daniel E. O'Leary

Responses to O'Leary

Steven Bonorris

Willi Kloesgen

Yew-Tuan Khaw and Hing-Yan Lee

Wojciech Ziarko

Vol. 10 No. 3

Articles

Evolutionary processing

Guest editor's introduction: evolution revolution
Peter J. Angeline

The GA-P: a genetic algorithm and genetic programming hybrid

Les M. Howard and Donna J. D'Angelo

Alternative neural network training methods

Vincent W. Porti, David B. Fogel and Lawrence J. Fogel

Evolving neural control systems

N. Saravanan and David B. Fogel

Mining the genetic program

Walter Alden Tackett

Cooperative systems

Guest editors' introduction: cooperative systems for workgroups

Georg Klinker, Marc Linster and Gregg Yost

From office automation to intelligent workflow systems

Dirk E. Mahling, Noel Craven and W. Bruce Croft

An open framework for cooperative problem solving

Mauro Gaspari, Enrico Motta and Arthur Stutt

A blackboard-based cooperative system for scheme integration

Sudha Ram and Venkataraman Ramesh

International journal of human-computer studies

Vol. 42 No. 1

Articles

Measuring the value of knowledge

Y. Reich

The PROCOPE semantic network: an alternative to action grammars

S. Poitrenaud

Tragic loss or good riddance? The impending demise of traditional scholarly journals

A. M. Odlyzko

Vol. 42 No. 2

Articles

SHAPE: a machine learning system from examples

F. Botana and A. Bahamonde

Fuzzy cognitive maps considering time relationships

K. S. Park and S. H. Kim

Comparing telephone—computer interface designs: Are software simulations as good as hardware prototypes?

N. P. Archer and Y. Yuan

Error-information in tutorial documentation:

Supporting users's errors to facilitate initial skill learning

A. W. Lazonder and H. van der Meij

SOL: a shared object toolkit for cooperative interfaces

G. Smith and T. Rodden

Vol. 22 No. 3

Articles

A guessing measure of program comprehension

J. S. Davis

Agent systems that negotiate and learn

S. R. Bocionek

Speech versus keying in command and control applications

R. I. Damper and S. D. Wood

Reflection and goal management in exploratory learning

C.-I. Trudel and S. J. Payne

International journal of intelligent systems

Vol. 10 No. 6

Articles

Knowledge acquisition for fuzzy expert-systems

G. J. Hwang

On proof-based and model-based techniques for reasoning with uncertainty

F. S. C. Dasilva

Issues on representational capabilities of artificial neural networks and their implementation

M. Bahrami

A new approach toward modeling causality in commonsense reasoning

R. Sun

Journal of intelligent manufacturing

Vol. 6 No. 2

Articles

Production planning and scheduling

A. Artiba

Hierarchical production management applied to an iron and steel-industry

M. C. Portmann and D. Rohr

Modeling a tool switching problem on a single NC-machine

C. Privault and G. Finke

Scheduling independent jobs on uniform parallel machines to minimize tardiness criteria

A. Guinet

Flow-shop scheduling with multiple operations and time lags

J. Riezebos, G. J. C. Gaalman and J. N. D. Gupta

An aggregation procedure for the deterministic job-shop problem

B. Penz and L. Dupont

A Lagrangian-relaxation technique for the general-assembly line balancing problem

E. H. Aghezzaf and A. Artiba

Modeling and managing disjunctions in scheduling problems

P. Esquirol, M. J. Huguet and P. Lopez

Heuristics for the minimum project duration problem with minimal and maximal time lags under fixed resource constraints

K. Neumann and J. Zhan

Journal of intelligent & robotic systems

Vol. 12 No. 3

Articles

A learning fuzzy algorithm for motion planning of mobile robots

C.-J. Wu

Optimal and suboptimal motion planning for collision-avoidance of mobile robots in nonstationary environments

K. J. Kyriakopoulos and G. N. Saridis

Study of a distributed control architecture for a quadruped robot

C. Villard, P. Gorce and J. G. Fontaine

Hierarchical control approach to a composite inventory-marketing problem

G. Kapsiotis and S. Tzafestas

Vol. 17 No. 1

Articles

Visual servoing in the task-function framework—a contour following task

E. Costemaniere, P. Couvignou and P. K. Khosla

A 3-dimensional machine-vision approach for automatic robot programming

D. M. Tsai

An intelligent assembly robotic system based on relative pose measurements

F. Janabisharifi and W. J. Wilson

Robot reachability problem—a nonlinear optimization approach

Z.-Y. Ying and S. S. Iyengar

Journal of logic programming

Vol. 23 No. 2

Articles

Special section—10 years of logic programming—introduction

M. Bruynooghe, S. Debray, M. Hermenegildo and M. Maher

The deevolution of concurrent logic programming-languages

E. Tick

A survey of deductive database-systems

R. Ramakrishnan and J. D. Ullman

Automata-driven indexing of prolog clauses

R. Ramesh, I. V. Ramakrishnan and D. S. Warren

Vol. 23 No. 3

Articles

On decompositions of chain datalog programs into $p(\text{left}(\text{---}))$ linear 1-rule components

G. Z. Dong and S. Ginsburg

Evaluation of the domain prop

P. Vanhentenryck, A. Cortesi and B. Lecharlier

Kybernetes

Vol. 23 No. 9

Articles

Pauling, Linus, c. (1901–1994)—obituary

R. Vallee

Contemporary systems and cybernetics

B. H. Rudall

Using neural nets in modeling vector time-series

R. Ostermark

Towards inherently useful theory—a management example

C. C. Walker and J. G. Motwani

An evolutionary and entropic interpretation of information

A. V. Jdanko

Improved decision-support systems help to build better artificial-intelligence systems

G. Plenert

Reservations about fuzzy-logic

B. James

Simulation in the UK

D. M. Hutton

Vol. 24 No. 1

Articles

Contemporary systems and cybernetics

B. H. Rudall

The direct and inverse problem of the matching of fuzzy-sets depending on fuzziness

J. Gasos and A. Ralescu

Possibility, probability and relative information—a unified approach via geometric-programming

G. Jumarie

Robotic self-appraisal and reproduction

S. Parham

On the use of divergence statistics to make inferences about 3 habitats

M. D. Esteban, J. A. Pardo, M. C. Pardo and M. L. Vicente

Management cybernetics—total quality management

G. Plenert

Vol. 24 No. 2

Articles

Managerial cybernetics, multifunctional PCs, systems security, innovations and current developments, cybernetics and the environment

Generalized Jensen difference divergence measures and Fisher measure of information

L. Pardo, D. Morales and I. J. Taneja

An algorithm which learns multiple covers via integer linear programming. Part I: the CLILP2 algorithm

K. J. Cios and N. Liu

A pansystems clustering approach and hierarchical analysis of complex systems

Z. Tingquan and W. Xuemou

Cybernetics of the development process: SPECT system approach

S. Madan

Problems of excavating cybernetics and systems

News, conferences and technical reports

Book reviews

Announcements

Special announcements

Vol. 24 No. 3

Article

Fast learning artificial neural networks for continuous input applications

D. J. Evans and L. P. Tay

An algorithm which learns multiple covers via integer linear programming. Part II: experimental results and conclusions

Krzysztof J. Cios and Ning Liu

Rule interpreters in ELEKTRA

Iain D. Craig

Short papers

Representations of logic functions

Edward T. Lee

Cybernetic theory of the stochastic process

Sudhir Madan

Vol. 24 No. 4

Current topics in systems and cybernetics

The challenge of sociocybernetics

Felix Geyer

EXORcist Boolean algebra and interactions between binary strings

C. Musès

The computer subconscious

H. John Caulfield

Perturbed living organisms: a cybernetic approach to oscillatory luminescence

Bonawentura Kochel

Irrelevance and relevance of Gödel's theorems to artificial intelligence

Sang Mun Kim

Principal peculiarities of cybernetic systems: a negentropic and evolutionary approach

Alexis V. Jdanko

The Cartesian composition of fuzzy finite state machines

D. S. Malik, J. N. Mordeson and M. K. Sen

On the continuity of fuzzy entropies

Rodney C. Bassanezi and Heriberto E. Román-Flores

Lecture notes in artificial intelligence

Vol. 698

Articles

Entailment and disentanglement of order-sorted feature constraints

H. Aitkaci and A. Podelski

Computing extensions of default logic—preliminary-report

G. Antoniou, E. Langetepe and V. Sperschneider

Prolog with arrays and bounded quantifications

J. Barklund and J. Bevenmyr

Linear 0-1-inequalities and extended clauses

P. Barth

Search space pruning by checking dynamic term growth

S. Bruning

A proof search system for a modal substructural logic-based on labeled deductive systems

H. F. Chau

Consistency checking of automata functional specifications

A. N. Chebotarev and M. K. Morokhovets

Yet another application for toupie—verification of mutual exclusion algorithms

M. M. Corsini, A. Griffault and A. Rauzy

Parsing with DCG-terms

A. Davison

A first-order resolution calculus with symmetries

U. Egly

Ordered paramodulation and resolution as decision procedure

C. Fermüller and G. Salzer

Static analysis of prolog with cut

G. File and S. Rossi

A new-type theory for representing logics

P. Gardner

Verification of switch-level designs with many-valued logic

R. Hahnle and W. Kernig

Deciding in hfs-theory via linear integer programming

M. Hibti, H. Lo, bardi and B. Legeard

The completion of typed logic programs and sldnf-resolution

P. M. Hill

Increasing the versatility of heuristic based theorem provers

A. Manning, A. Ireland and A. Bundy

Sequentialization of parallel logic programs with mode analysis

B. C. Massey and E. Tick

Refinements and extensions of model elimination

K. Mayr

Executable specifications based on dynamic algebras

A. M. Kappel

Generic resolution in propositional modal systems

H. Denivelle

Optimized translation of multi modal logic into predicate logic
H. J. Ohlbach
 Default reasoning with a constraint resolution principle
S. E. Panitz
 Non-clausal deductive techniques for computing prime implicants and prime implicates
A. Ramesh and N. V. Murray
 Unification under one-sided distributivity with a multiplicative unit
M. Schmidtshaus
 Unification in order-sorted logic with term declarations
R. Socherambrosius
 Extracting inheritance hierarchies from prolog programs—a system based on the inference of type relations
C. Solnon and M. Rueher
 A comparison of mechanisms for avoiding repetition of subdeductions in chain format linear deduction systems
G. Sutcliffe

Neutralization and preemption in extended logic programs
G. Wagner
 Multilog—a system for axiomatizing many-valued logics
M. Baaz
 Skill—a system for programming with proofs
D. Galmiche and O. Hermann
 Reasoning about the reals—the marriage of hol and maple
J. Harrison and L. Thery
 System description of lambdaalg—a higher-order algebraic specification language
Y. X. Gui and M. Okada
 Mixing metafor
B. Onuallain
 A complete axiom system for isomorphism of types
 IAA closed categories
S. Soloviev
 Reasoning, modeling and component-based technology
P. Wegner

Machine learning

Vol. 15 No. 3

Articles

Trading accuracy for simplicity in decision trees
M. Bohanec and I. Bratko
 Toward an ideal trainer
S. L. Epstein
 Associative reinforcement learning—functions in k-dnf
L. P. Kaelbling
 Associative reinforcement learning—a generate and test algorithm
L. P. Kaelbling
 Bias in information-based measures in decision tree induction
A. P. White and W. Z. Liu

Vol. 16 Nos. 1–2

Special issue on computational models of human learning

Acquisition of childrens' addition strategies—a model of impasse-free, knowledge-level learning
R. M. Jones and K. Vanlehn
 Case-based learning—predictive features in indexing
C. M. Seifert, K. J. Hammond, H. M. Johnson, T. M. Converse, T. F. McDougal and S. W. Vanderstoep
 Modeling cognitive-development on balance scale phenomena
T. R. Shultz, D. Mareschal and W. C. Schmidt
 Simulating the child's acquisition of the lexicon and syntax experiences with babel
R. Kazman
 Acquiring and combining overlapping concepts
J. D. Martin and D. O. Billman

Vol. 16 No. 3

Articles

Learning nonoverlapping perceptron networks from examples and membership queries
T. R. Hancock, M. Golea and M. Marchand
 Asynchronous stochastic-approximation and q-learning
J. N. Tsitsiklis
 Complexity-based induction
D. Conklin and I. H. Witten
 An upper bound on the loss from approximate optimal-value functions
S. P. Singh and R. C. Yee
 Contemporary systems and contemporary cybernetics—automated recognition systems
B. H. Rudall

Vol. 17 Nos. 2–3

Articles

Special issue on computational learning-theory, COLT 92—introduction
L. Hellerstein
 Toward efficient agnostic learning
M. J. Kearns, R. E. Schapire and L. M. Sellie
 A theory for memory-based learning
J. H. Lin and J. S. Vitter
 The learnability of description logics with equality constraints
W. W. Cohen and H. Hirsh
 Online learning of rectangles and unions of rectangles
Z. X. Chen and W. Maass

New generation computing

A Small Matter of Programming—Perspectives on End User Computing

*B. A. Nardi**Reviewed by U. Malinowski***Instructions for authors****Vol. 4 No. 2****Special issue on User modeling shell systems**

The user modeling shell system BGP-MS

Alfred Kobsa and Wolfgang Pohl

Heterogeneous learning in the Doppelgänger user modeling system

Jon Orwant

ABIS-94: GI Workshop on adaptivity and user modeling in interactive software systems

*Christoph G. Thomas***Robotica****Vol. 10 No. 2****Articles**

Computer-assisted visual perception in teleoperated robotics

M. Mallen, F. Chavand and E. Cole

New methods in artificial vision by using entropies of deterministic functions

G. Jumarie

Automatic robot program synthesis for assembly

H. A. ElMaraghy and J. M. Rondeau

Multivalued coding: Application to autonomous robots

A. Pruski

Experimental dual-mode control of a flexible robotic arm

W. Yim, J. Zhuang and S. Singh

SYM-program environment for manipulator modeling, control and simulation

*A. Timčenko, N. Kirčanski, D. Urošević and**M. Vukobratović*

An intelligent part sorting robot in unstructured manufacturing environments

M. Mehdian and H. Rahnejat

Derivation of optimal walking motions for a bipedal walking robot

P. H. Channon, S. H. Hopkins and D. T. Pham

An algebraic approach to collision-avoidance trajectory planning for dual robot systems: Formulation and optimization

S. H. Suh and M. S. Kim

Compliant robotic devices, and electroadhesion

*G. J. Monkman***Special announcement****Vol. 10 No. 3****Reports and surveys***B. H. Rudall*

Trajectory planning of redundant robots by maximizing the moving acceleration radius

K. K. K. and Y. S. Yoon

Continuous path planning via a non-inverting parallel algorithm

S. D. Voliotis and M. A. Christodoulou

A real-time algorithm for obstacle avoidance of autonomous middle robots

H. P. Huang and P. C. Lee

CAD of devices for gripping prismatic components

D. T. Pham and E. Tacgin

Tactile image computation using a feature extraction algorithm

M. Mehdian

Kinematic control of planar redundant manipulators by extended motion distribution scheme

*W. J. Chung, W. K. Chung and Y. Youm*Kinematics of a n -bay triangle—triangle variable geometry truss manipulator*L. Beiner*

Computing a manipulator regressor without acceleration feedback

J. Yuan and Y. Stepanenko

Book reviews

Announcements

Vol. 10 No. 4

Articles

A vibratory sensor for locating parts

D. T. Pham and M. W. M. G. Dissanyake

Semi-automatic calibration procedure for the vision-robot interface applied to scale model decoration

L. G. Trabasso and C. Zielinski

Real-time determination of a mobile robot's position by linear scanning of a landmark

J. H. Kim and H. S. Cho

A geometric approach to manipulator path planning in 3D space in the presence of obstacles

M. Kiréanski and O. Timčenko

Conceptual graph-based system for assembly program synthesis

O. Maimon and A. Kapitanovsky

Real-time path planning procedure for a whole-sensitive robot arm manipulator

E. Cheung and V. Lumelsky

A new wheel control system for the omnidirectional HERMES-III robot

D. B. Reister

Design of robots driven by linear servo systems

P. Minotti and P. Pracht

Harmonic drive transmissions: the effects of their elasticity, clearance and irregularity on the dynamic behaviour of an actual SCARA robot

G. Legnani and R. Faglia

Algorithms for simple object reconstruction using the largest possible object approach

E. T. Lee and F. Y. Wu

Congress announcement

Vol. 10 No. 5

Reports and surveys

B. H. Rudall

Articles

3D shape and surface colour sensor fusion for robot vision

R. A. Jarvis

Application of redundant robots to constrained-motion tasks

V. Potkonjak

Learning task strategies in robotic assembly systems

D. S. Ahn, H. S. Cho, K. Ide, F. Miyazaki and

S. Arimoto

Optimizing motion trajectories of dextrous fingers by dynamic programming technique

A. Meghdari and H. Sayyaadi

Efficient computation of force distributions for walking machines on rough terrain

J. F. Gardner

An inverse kinematics algorithm for robot manipulators using incremental unit computation method

S. W. Park and J. H. Oh

Generalized predictive control of a robotic manipulator with hydraulic actuators

A. Kotzev, D. B. Cherchas, P. D. Lawrence and

N. Sepehri

Virtual reality and telepresence

R. Stone

Announcements

Vol. 10 No. 6

Reports and Surveys

B. H. Rudall

Articles

Dynamic characteristics of balanced robotic manipulators with joint flexibility

S. B. Lee and H. S. Cho

Haptic perception with an articulated, sensate robot hand

S. A. Stansfield

A distributed-processing approach for robot dynamics tuning

A. Y. Zomaya and A. S. Morris

Efficient sliding mode control for robot manipulator with prescribed tracking performance

J. J. Lee, J. M. Lee and J. S. Lee

A graph-searching approach to trajectory planning robots

W. Jacak, I. Dulęba and P. Rogalinski

Explicit path tracking by autonomous vehicles

D. H. Shin, S. Singh and J. J. Lee

Fuzzy qualitative model of a robot sensor for locating three-dimensional objects

D. T. Pham and K. Hafeez

Fuzzy logic-based techniques for motion planning of a robot manipulator amongst unknown moving obstacles

A. Bagchi and H. Hatwal
