

# The knowledge engineering review

VOLUME 24 NUMBER 1 MARCH 2009

## Contents

|                                                                                                                                                                              |    |
|------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|----|
| Guest editorial preface: Software and system engineering:<br>an ontological perspective<br>DANIELA MICUCCI, FABIO SARTORI and MARZIA ADORNI                                  | 1  |
| The concepts of model in information systems engineering: a proposal<br>for an ontology of models<br>DIANA M. SÁNCHEZ, JOSÉ MARÍA CAVERO and ESPERANZA MARCOS                | 5  |
| Effective use of ontologies in software measurement<br>FÉLIX GARCÍA, FRANCISCO RUIZ, CORAL CALERO, MANUEL F. BERTOIA,<br>ANTONIO VALLECILLO, BEATRIZ MORA and MARIO PIATTINI | 23 |
| An ontologically-based evaluation of software design methods<br>UDO KANNENGIESSER and LIMING ZHU                                                                             | 41 |
| A semantic web environment for components<br>HAI H. WANG and JING SUN                                                                                                        | 59 |
| Engineering spatial concepts<br>DANIELA MICUCCI, FRANCESCO TISATO and MARZIA ADORNI                                                                                          | 77 |
| Book Review                                                                                                                                                                  | 95 |
| From the journals...                                                                                                                                                         | 97 |

# The knowledge engineering review

## Notes for Contributors

### Editorial policy

The Knowledge Engineering Review has been established to provide a general source of information and analysis in all areas relevant to research and development in knowledge based systems and applied artificial intelligence. The editors wish to encourage careful preparation of original papers analysing developments in the field. In particular we wish to see tutorial and survey articles, and commentary, criticism and debate. Primary research papers on specialised technical topics are unlikely to be appropriate but research papers on broad topics such as development methodology or general evaluations of tools and techniques, are of interest. Descriptions of specific projects or particular computer systems will be considered if their presentation draws out general issues in the design, implementation or impact of knowledge based systems.

### Submission of manuscripts

Contributions for publication should be addressed to Dr Simon Parsons, Department of Computer and Information Science, Brooklyn College, City University of New York, 2900 Bedford Avenue, Brooklyn, NY 11210, USA; or Dr Peter McBurney, Department of Computer Science, Ashton Building, University of Liverpool, Liverpool L69 3BX, UK; or may be submitted through a member of the Editorial Board (addresses inside front cover). Submission implies that the manuscript has not been published previously, nor currently submitted for publication elsewhere. Upon acceptance of a manuscript, the author will be asked to transfer copyright to the publisher.

All contributions, whether articles, correspondence or reviews, must be sent in triplicate and typed on one side of the paper, with wide margins and double-line spacing throughout. Any minor corrections should be made neatly in the typescript, leaving the margins clear. Authors are encouraged to provide the final version of the contribution on disk (PC or Mac format, 'Word', 'Wordperfect' or Tex files) in addition to the paper copies. Please note that a style file for Tex files can be downloaded from our website at [www.journals.cambridge.org](http://www.journals.cambridge.org). Contributions should follow the general style of papers in recent issues of The Knowledge Engineering Review. The author is invited to nominate up to five possible referees, who will not necessarily be used.

Articles must be accompanied by a brief, informative rather than indicative, abstract. Headings should be set out clearly but not underlined. Primary headings should be in lower case, at margin, with arabic numeral; subheadings should be numbered 2.a., 2.b., etc., and tertiary headings, 2.a.1., 2.a.2. No cross-references should be given by page number, but 'above' and 'below' should be used with the section specified, e.g. Section 2.a.2. The SI system of units should be used. The author should mark in the margin of the manuscript where figures and tables may be inserted. References to points in larger works should, where possible, quote the page reference, e.g. Ager, 1981, p. 102.

Tables should be typed with double-line spacing on sheets separate from the running text. Each table must have a caption that will make the data in the table intelligible without reference to the text.

Illustrations should be drafted for reproduction as full page (148 mm) width. Originals should normally be drawn at twice final area and must be sent in a flat package; larger drawings may delay publication. Lettering should be of a size so that when reduced the smallest lower-case letters will not be less than about 1mm. Avoid gross disparities in lettering size on a drawing. Duplicates of illustrations should be sent, and may be prints or, preferably, photocopies reduced to final size. Illustrations in the text, both line drawings and photographs for halftone reproductions, will be referred to as figures (Fig. 2, 2a, etc.). Folding plates will not be accepted. Figures composed of photographs should be glossy prints presented at publication scale. Figure captions must be typed with doubleline spacing on sheets separate from the running text.

The preferred graphics package is Freehand 5 but files from many others can be accepted. Please indicate clearly the file format (e.g. TIFF, EPS, DCS, Freehand etc), computer operating system and graphics software used for originating the artwork files. The typefaces used in electronic artwork supplied should be restricted to the Monotype, Adobe and Bitstream font libraries. Illustrations should be scanned at a minimum of 320 dpi and supplied as EPS or TIFF files and never as Postscript files, or as the native format files from the graphics package used. They should be accompanied by laser proofs with the name and version number of the graphics package used, and also the names of the fonts used.

References. The accuracy of references is the responsibility of authors. References must be double-spaced and spelt out in full, e.g. Gale, W A, ed 1986. *Artificial Intelligence and Statistics*, Reading, Massachusetts: Addison-Wesley. Pearl, J 1984. *Heuristics. Intelligent search strategies for problem solving*, Reading, Massachusetts: Addison-Wesley. Tie-Cheng Wang and Bledsoe, W W, 1987. "Hierarchical deduction" *Journal of Automated Reasoning* 3 (1) pp 1-34. Pau, L F, 1986. "Survey of expert systems for fault detection, test generation and maintenance" *Expert Systems*, 3 (2) pp 100-111.

Unpublished work should normally be referred to in the text parentheses as, for example, 'private communication' or 'unpub. Ph.D. thesis, Univ. London, 1988', and not included in the reference list unless in the press.

### Proof Reading:

Typographical or factual errors only may be changed at proof stage. The publisher reserves the right to charge authors for correction of non-typographical errors. No page charge is made.

### Offprints:

Twenty-five offprints of each paper will be provided free of charge. Additional offprints may be purchased according to a set scale of charges if ordered when the proofs are returned.

## Exciting Titles from CAMBRIDGE!

NEW!

**Multiagent Systems**  
Algorithmic, Game-Theoretic, and  
Logical Foundations  
Yoav Shoham and  
Kevin Leyton-Brown

\$60.00: Hb: 978-0-521-89943-7; 496 pp.

**Introduction to  
Information Retrieval**  
Christopher D. Manning,  
Prabhakar Raghavan, and  
Hinrich Schütze

\$60.00: Hb: 978-0-521-86571-5; 496 pp.

New in  
Paperback!

**Finding Out About**  
A Cognitive Perspective on  
Search Engine Technology and the WWW  
Richard K. Belew

\$45.00: Pb: 978-0-521-73446-2; 384 pp.

**Cognition and  
Multi-Agent Interaction**  
From Cognitive Modeling  
to Social Simulation  
Edited by Ron Sun

\$34.99: Pb: 978-0-521-72895-9; 448 pp.

Prices subject to change.

# The Logical Choice

## Algorithms on Strings

Maxime Crochemore *Université de Rouen*

Christophe Hancart *Université de Rouen*

Thierry Lecroq *Université de Rouen*

- Ready-to-use algorithms with correctness proofs and complexity analysis

GBP 40.00 | HB | 9780521848992 | 2007

## Pattern Recognition and Neural Networks

Brian D. Ripley *University of Oxford*

'... an excellent text on the statistics of pattern classifiers and the application of neural network techniques ... accessible format and engaging style.' *Nature*

GBP 23.99 | PB | 9780521717700 | 2008

## The Description Logic Handbook: Theory, Implementation and Applications 2nd Edition

Franz Baader *Technische Universität, Dresden*

Diego Calvanese *Freie Universität Bozen, Bolzano*

Deborah L. McGuinness *Rensselaer Polytechnic Institute, New York*

Daniele Nardi *Università degli Studi di Roma 'La Sapienza'*

Peter F. Patel-Schneider *AT&T Bell Laboratories, New Jersey*

- The definitive reference and study guide for researchers in the field of knowledge representation.

GBP 80.00 | HB | 9780521876254 | 2007

## Matrix Methods in Data Mining and Pattern Recognition

Lars Eldén, *Linköping University*

- Application-oriented, with examples of how to apply algebraic methods; some MATLAB code included

GBP 38.00 | PB | 9780898716269 | 2007
