

From the journals....

Ai magazine

Vol. 17 No. 4

Articles

AAAI-96—national AI conference continues the tradition of excellence

S. Hedberg

The innovative applications of artificial intelligence conference—past and future

H. Shrobe

Diagnosing delivery problems in the White House information distribution system

M. Nahabedian and H. Shrobe

Intelligent retail logistics scheduling

J. Rowe, K. Jewers, J. Sivayogan, A. Codd and A. Alcock

Using artificial neural networks to predict the quality and performance of oil-field cements

P. V. Coveney, P. Fletcher and T. L. Hughes

Comet—an application of model-based reasoning to accounting systems

R. Nado, M. Chams, J. Delisio and W. Hamscher

Developing and deploying knowledge on a global scale

J. Borron, D. Morales and P. Klahr

Science and engineering in knowledge representation and reasoning

L. A. Stein

Integration of knowledge and neural heuristics

L. M. Fu

The National Science Foundation workshop on reinforcement learning

S. Mahadevan and L. P. Kaelbling

On the other hand

K. Ford, P. Hayes and N. Agnew

Applied artificial intelligence

Vol. 10 No. 6

Articles

Artificial-intelligence applications on wall—introduction to the special issue

S. Slade

Assessing alternative technologies for the cost effective computation of derivatives

R. S. Freedman and R. Digiorgio

Designing financial swaps with clp(r)

E. Tick

Embedding technical analysis into neural network based trading systems

T. Chenoweth, Z. Obradovic and S. S. Lee

Financial forecasting using genetic algorithms

S. Mahfoud and G. Mani

Forecasting foreign exchange rates using recurrent neural networks

P. Tenti

Time-series analysis and prediction using gated experts with application to energy demand forecasts

A. S. Weigend

ALCOD-IDSS—assisting the Australian stock-market surveillance teams review process

P. Brown and P. Goldschmidt

Vol. 11 No. 1

Interface agents that learn—an investigation of learning issues in a mail agent interface

T. R. Payne and P. Edwards

Image-coding by a neural-net classification process

W. Chang and H. S. Soliman

A look at CLP—theory and application

J. Csonto and J. Paralic

Discovering causal rules in relational databases

F. Esposito, D. Malerba, V. Ripa and G. Semeraro

Applied intelligence

Vol. 6 No. 4

Articles

Selecting the right-size model for prediction

S. M. Weiss and N. Indurkha

Efficient inferencing for sigmoid Bayesian networks by reducing sampling space

Y. S. Han, Y. C. Park and K. S. Choi

Possibility theory in constraint satisfaction problems—handling priority, preference and uncertainty

D. Dubois, H. Fargier and H. Prade

Managing tasks using an interval-based temporal logic

S. K. Das and P. Hammond

Formal verification of some potential contradictions in knowledge-base using a high-level net approach

N. K. Liu

A genetic algorithm for vehicle routing with backhauling

J. Y. Potvin, C. Duhamel and F. Guertin

Artificial intelligence

Vol. 87 Nos. 1–2

Articles

Local conditioning in Bayesian networks

F. J. Diez

Deriving consensus in multiagent systems

E. Ephrati and J. S. Rosenschein

From statistical knowledge bases to degrees of belief

F. Bacchus, A. J. Grove, J. Y. Halpern and D. Koller

Planning from 2nd principles

J. Koehler

Reasoning with models

R. Khardon and D. Roth

Improving accuracy by combining rule-based and case-based reasoning

A. R. Golding and P. S. Rosenbloom

Best-first fixed depth minimax algorithms

A. Plaat, J. Schaeffer, W. Pijls and A. Debruin

A probabilistic framework for cooperative multiagent distributed interpretation and optimization of communication

Y. Xiang

Combining qualitative and quantitative constraints in temporal reasoning

I. Meiri

Temporal reasoning based on semi-intervals (vol 54, pg 199, 1992)

C. Freksa

Vol. 88 Nos. 1–2

Using hidden nodes in Bayesian networks

C. K. Kwok and D. F. Gillies

Calculating criticalities

A. Bundy, F. Giunchiglia, R. Sebastiani and T. Walsh

Probabilistic conflicts in a search algorithm for estimating posterior probabilities in Bayesian networks

D. Poole

A statistical approach to adaptive problem solving

J. Gratch and G. Dejong

Propagating imprecise probabilities in Bayesian networks

G. D. Kleiter

Possibilistic reasoning—a mini-survey and uniform semantics

C. J. Liao and B. I. P. Lin

Cardinality restrictions on concepts

F. Baader, M. Buchheit and B. Hollunder

Is intractability of nonmonotonic reasoning a real drawback

M. Cadoli, F. M. Donini and M. Schaerf

Failure driven dynamic search control for partial order planners—an explanation based approach

S. Kambhampati, S. Katukam and Y. Qu

Using action-based hierarchies for real-time diagnosis

D. Ash and B. Hayesroth

The TSP phase transition

I. P. Gent and T. Walsh

Irrelevance and parameter learning in Bayesian networks

N. L. W. Zhang

Engineering applications of artificial intelligence

Vol. 9 No. 5

Articles

Real-time self-reaction of a mobile robot in unstructured environments using fuzzy reasoning

W. L. Xu and S. K. Tso

Harmony theory yields robust machine fault diagnostic systems based on learning vector quantization classifiers

P. Tse, D. D. Wang and D. Atherton

Object-oriented CAD for practical hydraulic system design

P. K. Wong, T. P. Leung and C. W. Chuen

A comparative study of the max and sum machine learning algorithms using virtual fuzzy sets

K. C. Chan

Adaptive simulated annealing genetic algorithm for system identification

I. K. Jeong and J. J. Lee

A fixture design system using case-based reasoning

S. H. Sun and J. H. L. Chen

Occupancy array-based kinematic reasoning

P. Olivier, A. Ormsby and K. Nakata

Incorporating fuzzy logic with neural networks for document-retrieval

S. C. Hui and A. Goh

Logic programming and database schema in reverse engineering—analysis and documentation for existing code in a multilanguage environment

M. R. A. Eltantawi and P. Maresca

Vol. 9 No. 6

Special section on machine learning in engineering

B. Julien

An environmental evaluation learning apprentice system (reprinted from proceedings of the International Joint Conference on Artificial Intelligence)

B. Julien and S. J. Fenves

Model-based design indexing and index learning in engineering design (reprinted from proceedings of the International Joint Conference on Artificial Intelligence)

S. R. Bhatta and A. K. Goel

The shared expertise model for teaching interactive design assistants (reprinted from proceedings of the International Joint Conference on Artificial Intelligence)

T. Dybala, G. Tecuci and H. Rezazad

Empirical performance comparison of selective and constructive induction (reprinted from proceedings of the International Joint Conference on Artificial Intelligence)

W. Szczepanik, T. Arciszewski and J. Wnek

Classifying sensor data with calchas (reprinted from proceedings of the International Joint Conference on Artificial Intelligence)

S. Manganaris

Discovering rules for water demand prediction—an enhanced rough-set approach (reprinted from Proceedings of the International Joint Conference on Artificial Intelligence)

A. J. An, N. Shan, C. Chan, N. Cercone and W. Ziarko

Pattern-classification of solder joint images using a correlation neural-network

J. H. Kim, H. S. Cho and S. Kim

Characteristics recognition for the supervision of knowledge-based control systems

M. Y. Chen and D. A. Linkens

Optimizing a production process by a neural network genetic algorithm approach

S. Sette, L. Boullart and L. Vanlangenhove

A graphical user interface for knowledge discovery in databases

X. Wu and N. Cercone

Expert systems with applications

Vol. 11 No. 4

Articles

The Third World Congress on Expert Systems—Preface

J. K. Lee

Neural networks and genetic algorithms for bankruptcy predictions

B. Back, T. Laitinen and K. Sere

Integration of case-based forecasting, neural network, and discriminant analysis for bankruptcy prediction

H. Jo and I. Han

Comparison of alternative knowledge model for the diagnosis of asthma

Y. M. Chae, S. H. Ho, C. S. Hong and C. W. Kim

Customized purchase supporting expert-system—UNIK-SES

S. K. Lee, J. K. Lee and K. J. Lee

- Arachne—planning the telephone network at Nynex
C. Alesi, T. Barnea, E. Lee, J. Martin, R. Pope, D. Benanav and J. Peterson
- Perfex—a cellular performance support expert
M. Tan and C. V. Lafond
- Strategy and impacts of expert systems for bank lending
A. A. Baldwinmorgan and A. Sangster
- Logistics information system auditing using expert system technology
I. Comynwattiau and J. Akoka
- Ex-w-pert system—a web-based distributed expert system for groupware design
B. H. Far and Z. Koono
- Multiaгент cooperation for particle accelerator control
P. Skarek and L. Z. Varga
- A comparison of 3 information gathering strategies in DAI systems under noisy conditions
H. R. Rao, J. C. Moore, K. Nam, T. S. Raghu and A. Whinston
- Knowledge acquisition from questionnaire data using simulated breeding and inductive learning-methods
T. Terano and Y. Ishino
- Towards a framework to verify knowledge sharing technology
A. Gomezperez
- An intelligent snake growing algorithm for fuzzy shape detection
R. Irrgang and H. Irrgang
- Multicenter validation of an intelligent system for managing labor
R. D. F. Keith, S. Beckley, J. M. Garibaldi, J. A. Westgate, E. Ifeakor and K. R. Greene
- A customer service process innovation using the integration of data-base and case base
J. S. Lee and Y. X. Xon
- A structure for expert systems maintenance
J. K. Debenham
- A cooperative information system to support multiexpert systems development
C. Hanachi
- An investigation of the k-tree search algorithm for efficient case representation and retrieval
S. Ku and Y. H. Suh
- Vol. 12 No. 1**
 Intelligent systems in industry and business—Preface
R. Soto and J. M. Sanchez
- Decentralized problem solving using the double auction market institution
V. Rajan, J. R. Slagle, J. Dickhaut and A. Mukherji
- Learning symbolic descriptions of shape for object recognition in X-ray images
M. A. Maloof and R. S. Michalski
- Intelligent electronic mock-up for concurrent design
K. Bechkoum
- Fault-diagnosis through history reconstruction—an application to power transmission networks
P. Baroni, U. Canzi and G. Guida
- Comparing case-based and backtrack search in a database application
Y. Huang, S. Battle, R. McClatchey and R. Miles
- Binary character/graphic image extraction using fuzzy inference and logical level methods
B. H. Kang and Y. L. J. Bae
- A case-study of a real-time problem solving strategy in an air-traffic control problem
Y. Kuwata and H. Oohama
- Intelligent reasoning assistant for incorporating manufacturability issues into the design process
J. M. Sanchez, J. W. Priest and R. Soto
- A method of similarity metrics for structured representations
Y. Wang and N. Ishii
- Optimal design of reinforced concrete beams using genetic algorithms
C. C. Coello, F. S. Hernandez and F. A. Farrera
- Routine decision-making using generic tasks
R. Fox, G. Ochoa and M. Paredes
- An application of non-clausal deduction in diagnosis
A. Ramesh and N. V. Murray
- A genetic algorithm for RKRO minimization
R. Drechsler, B. Becker and N. Gockel
- A spatiotemporal logic for 2D multiagent problem domains
D. Gagne, W. L. Pang and A. Trudel
- Evaluation, existence and optimization of reactive strategies in motion planning with uncertainty
C. Rodriguezlucatero

IEEE transactions on knowledge and data engineering

- Vol. 8 No. 5**
Articles
- Curriculum knowledge representation and manipulation in knowledge-based tutoring systems
G. Zhou, J. T. L. Wang and P. A. Ng
- Using compiled knowledge to guide and focus abductive diagnosis
L. Console, L. Portinale and D. T. Dupre
- An evidential reasoning approach to attribute value conflict-resolution in database integration
E. P. Lim, J. Srivastava and S. Shekhar
- A logic programming framework for modeling temporal objects
F. N. Kesim and M. Sergot
- Computation of stable models and its integration with logical query processing
W. D. Chen and D. X. Warren
- Decomposition of knowledge for concurrent processing
G. Babin and C. Hsu
- Hybrid knowledge bases
J. J. Lu, A. Nerode and V. S. Subrahmanian
- Using reconfiguration for efficient management of replicated data.
D. Agrawal and A. Elabbadi
- Performance analysis of long lived transaction processing system with rollbacks and aborts
D. Liang and S. K. Tripathi
- Global committability in multidatabase systems
A. K. Elmagarmid, J. Jing, W. Kim, I. Bukhres and A. D. Zhang
- A framework for product data
A. McKay, M. S. Bloor and A. Depennington
- Alternative correctness criteria for concurrent execution of transactions in multilevel secure databases
V. Atluri, S. Jajodia and E. Bertino
- Storage allocation policies for time dependent multimedia data
H. J. Chen and T. D. C. Little
- Vol. 8 No. 6**
 Data mining—an overview from a database perspective
M. S. Chen, J. W. Han and P. S. Yu
- Finding aggregate proximity relationships and commonalities in spatial data mining
E. M. Knorr and R. T. Ng
- A metapattern-based automated discovery loop for integrated data mining—unsupervised learning of relational patterns
W. M. Shen and B. Leng

Efficient mining of association rules in distributed databases

D. W. Cheung, V. T. Ng, A. W. Fu and Y. J. Fu

Visualization techniques for mining large databases—a comparison

D. A. Keim and H. P. Kriegel

Extraction and applications of statistical relationships in relational databases

W. C. Hou

An efficient inductive learning method for object-oriented database using attribute entropy

Y. M. Huang and S. H. Lin

Knowledge discovery in deductive databases with large deduction results—the first step

C. L. Goh, M. Tsukamoto and S. Nishio

Effective data mining using neural networks

H. J. Lu, R. Setiono and H. Liu

Parallel mining of association rules

R. Agrawal and J. C. Shafer

What makes patterns interesting in knowledge discovery systems

A. Silberschatz and A. Tuzhilin

Concurrency control in B-trees with batch updates

K. Pollarimalmi, E. Soisalonsoinen and T. Ylonen

Performance analysis of dynamic finite versioning schemes—storage cost vs obsolescence

A. Merchant, K. L. Wu, P. S. Yu and M. S. Chen

Description and identification of distributed fragments of recursive relations

S. Pramanik and S. Jung
