AI applications

Vol. 10 No. 3

Articles

Asimov's psychohistory – vision of the future or present reality

A. J. Thompson

Applying neural-network technology to human-caused wildfire occurrence prediction

C. Vegagarcia, B. S. Lee, P. M. Woodard and S. J. Titus

Detection of cracks in eggs using color computer vision and artificial neural networks

V. C. Patel, R. W. McClendon and J. W. Goodrum

Fuzzy Artmap – a new tool for lithofacies recognition

P. M. Wong, T. D. Gedeon and I. J. Taggart

Characterizing strategic patterns of farms with knowledge-based temporal abstraction – the case of suckler sheep farms

N. Girard

Landscape management and biodiversity – automating the design of forest ecosystem networks

A. J. Thomson, D. G. Goodenough, B. Adams,

R. Archibald, D. Morgan, D. Hawkins and D. Say

AI magazine

Vol. 18 No. 1

Articles

Strong AI is simply silly

S. Bringsjord

Hayes and Ford reply to Bringsjord

P. Hayes and K. Ford

A retrospective of the AAAI robot competitions

P. Bonasso and T. Dean

The 1996 AAAI mobile robot competition and exhibition

D. Kortenkamp, I. Nourbakhsh and D. Hinkle

Kansas State's Slick-Willie robot software

D. A. Gustafson

Yoda – the young observant discovery agent

W. M. Shen, J. Adibi, B. C. Cho, G. Kaminka, J. H. Kim,

B. Salemi and S. Tejada

To know or not to know – on the utility of models in mobile robotics

S. Thrun

Many robots make short work

D. Guzzoni, A. Cheyer, L. Julia and K. Konolige

Dynamic object capture using fast vision tracking

R. Sargent, B. Bailey, C. Witty and A. Wright

Robocup – a challenge problem for AI

H. Kitano, M. Asada, Y. Kuniyoshi, I. Noda, E. Osawa

and H. Matsubara

Strategic directions in Artificial Intelligence

J. Doyle and T. Dean

Making an impact – Artificial Intelligence at the jet

propulsion laboratory

S. Chien, D. Decoste, R. Doyle and P. Stolorz

Gaps and bridges – new directions in planning and natural language generation

K. Jokinen, M. Maybury, M. Zock and I. Zukerman

Applied intelligence

Vol. 7 No. 1

Articles

Symcon – a hybrid symbolic connectionist system for word sense disambiguation

X. Y. Wu, M. McTear and P. Ojha

Counter-propagation neural networks for molecular sequence classification – supervised LVQ and dynamic node allocation

C. Wu, H. L. Chen and S. C. Chen

Overcoming the myopia of inductive learning algorithms with Relief

I. Kononenko, E. Simec and M. Robniksikonja

Combining case-based and model-based reasoning for the diagnosis of complex devices

M. P. Feret and J. I. Glasgow

A case-based model that integrates specific and general knowledge in reasoning

E. B. Reategui, J. A. Campbell and B. F. Leao

Knowledge discovery in international conflict databases

J. Furnkranz, J. Petrak and R. Trappl

Adaptive classification in autonomous agents

C. Scheier and D. Lambrinos

Knowledge acquisition for knowledge-based decision systems

J. K. Kim

Genetic algorithms and the analysis of spatially referenced data

R. E. Cooley, M. H. W. Hobbs and A. D. Pack

Artificial intelligence

Vol. 89 Nos 1/2

Articles

On the logic of iterated belief revision

A. Darwiche and J. Pearl

Solving the multiple instance problem with axis-parallel rectangles

T. G. Dietterich, R. H. Lathrop and T. Lozanoperez

A cognitive architecture for artificial vision

A. Chella, M. Frixione and S. Gaglio

Sound and efficient closed-world reasoning for planning

O. Etzioni, K. Golden and D. S. Weld

Abductive consequence relations

J. Lobo and C. Uzcategui

- Permissive planning – extending classical planning to uncertain task domains
G. F. Dejong and S. W. Bennett
- Abstraction and approximate decision-theoretic planning
R. Dearden and C. Boutilier
- Automatically selecting and using primary effects in planning – theory and experiments
E. Fink and Q. N. Yang
- Ramification and causality
M. Thielscher
- A theoretical evaluation of selected backtracking algorithms
G. Kondrak and P. Vanbeek

Vol. 90 Nos 1/2**Articles**

- Fundamental properties of neighborhood substitution in constraint satisfaction problems
M. C. Cooper
- Continuous case-based reasoning
A. Ram and J. C. Santamaria
- A framework for knowledge-based temporal abstraction
Y. Shahar
- Computing answers with model elimination
P. Baumgartner, U. Furbach and F. Stolzenburg
- Semantics and complexity of abduction from default theories
T. Eiter, G. Gottlob and N. Leone
- Abstract argumentation systems
G. A. W. Vreeswijk
- Fast planning through planning graph analysis
A. L. Blum and M. L. Furst
- Compiling specificity into approaches to nonmonotonic reasoning
J. P. Delgrande and T. H. Schaub

Vol. 91 No. 1**Articles**

- Special issue – Artificial Intelligence research in Japan – Preface
Y. Shirai
- Grammatical description of behaviors of ordinary differential-equations in 2-dimensional phase-space
T. Nishida
- Causality as a key to the frame problem
H. Nakashima, H. Matsubara and I. Osawa
- Constraint-based design for 3d shapes
S. Shimizu and M. Numao
- Computer-aided thinking by mapping text-objects into metric-spaces
Y. Sumi, K. Hori and S. Ohsuga
- Error repair and knowledge acquisition via case-based reasoning
T. Kohno, S. Hamada, D. Araki, S. Kojima and T. Tanaka
- A new approach to quantitative and credible diagnosis for multiple faults of components and sensors
T. Washio, M. Sakuma and M. Kitamura
- Networked bubble propagation – a polynomial-time hypothetical reasoning method for computing near-optimal solutions
Y. Ohsawa and M. Ishizuka
- K-certainty exploration method – an action selector to identify the environment in reinforcement learning
K. Miyazaki, M. Yamamura and S. Kobayashi

Artificial intelligence in engineering
Vol. 11 No. 2**Articles**

- Text analysis for constructing design representations
A. Dong and A. M. Agogino
- Libra – a high-fidelity knowledge-based system for recommending scheduling programs
C. K. Soh, A. K. Soh and K. Y. Lai
- A distributed constraint-based scheduler
E. Lamma, P. Mello and M. Milano
- A case-based approach to planar linkage design
A. Bose, M. Gini and D. Riley
- A belief framework for order-of-magnitude reasoning and other qualitative relations
M. L. Mavrouniotis
- Using art2 networks to deduce flow velocities
K. Jambunathan, V. N. Fontama, S. L. Hartle and S. Ashforthfrost
- Quantitative knowledge-based approach for preliminary design of tall buildings
A. R. Sabouni and O. M. Almourad
- Neural-network design based on evolutionary programming
J. Fang and Y. G. Xi
- An IDSS development environment based on consistent language
Q. Chen and R. Z. Yu
- Applying case-based reasoning to engine oil design
Z. Z. Shi, H. Zhou and J. Wang
- Symbolic propagation and sensitivity analysis in Gaussian Bayesian networks with application to damage assessment
E. Castillo, J. M. Gutierrez, A. S. Hadi and C. Solares
- Rule inferencing and object-orientation for boundary elements mesh design
N. K. Salgado, M. N. Aliabadi and R. E. Callan
- An expert system to generate associativity data for layout design
K. M. Chao, M. Guenov, B. Hills, P. Smith, I. Buxton and C. F. Tsai

Computers and artificial intelligence
Vol. 15 No. 6**Articles**

- 3 valued logic and nonmonotonic reasoning
N. Obeid
- Multilanguage interoperability
G. Attardi and M. Gaspari
- A refinement of communicating processes
S. Damy and G. R. Perrin
- Prime-field-complete functions and factoring polynomials over finite-fields
L. Ronyai and A. Szanto
- A parallel algorithm to compute the supremum of max-min powers
F. Suraweera and P. Bhattacharya
- Artificial intelligence – current conceptual status and applications
I. V. Ezhkova
-

Engineering applications of artificial intelligence

Vol. 10 No. 1

Articles

Preface – special section from the 1995 IFAC workshop on artificial-intelligence in real-time control
R. A. Vingerhoeds

New developments using AI in fault-diagnosis
P. M. Frank and B. Koppenseliger

Generation of diagnostic trees by means of simplified process models and machine learning
D. Juricic, A. Znidarsic and D. Fussel

A medical image understanding system
T. Zrimec and C. Sammut

Integration of multiple reasoning systems for process-control
M. Gams, N. Karba and M. Drobnic

Fuzzy cellular systems for a new computational paradigm

S. Baglio, L. Fortuna, G. Giudice and G. Manganaro

Real-time fuzzy adaptive control

I. Skrjanc, K. Kavsekbiasizzo and D. Matko

Transfer of control skill by machine learning

I. Bratko and T. Urbancic

An empirical approach to optimal self-control

I. Grabec, J. Gradisek and P. Potocnik

Neural-network-based 3D force/torque sensor calibration for robot applications

T. F. Lu, G. C. I. Lin and J. R. He

Asa – a conceptual design-support system

A. Giretti and L. Spalazzi

Expert systems with applications

Vol. 12 No. 2

Articles

Learnnoop – an active agent-based educational-system
H. Q. Wang

Cadosa – a fuzzy expert system for differential-diagnosis of obstructive sleep-apnea and related conditions
J. E. Daniels, R. M. Clayton, M. J. Chappell and T. Tjahjadi

A simple coupler to link expert-systems with database-systems
H. L. Yang

A fault-detection and diagnosis module for oil production plants in offshore platforms
E. Kaszkurewicz, A. Bhaya and N. F. F. Ebecken

Modeling a class of decision-problems using artificial neural networks

J. K. Kim and K. S. Park

Expider – a channel routing expert for VLSI design

D. L. Shen, C. H. Wu and S. J. Lee

Knowledge-based support for used adapted interaction design

D. Akoumianakis and C. Stephanidis

Knowledge acquisition and representation for expert-systems in the field of financial analysis

N. F. Matsatsinis, M. Doumpos and C. Zopounidis

The methodology for knowledge-base compression and robust diagnosis – application to a steam boiler plant

G. Lee, K. J. Mo and E. S. Yoon

International journal of intelligent systems

Vol. 12 No. 3

Articles

Task structures as a basis for modeling knowledge-based systems
J. Lee

Visibility inference based on spatial knowledge representation from observers perspective
P. W. Huang and P. L. Lin

Magic sets and stratified databases
Y. J. Chen

A note on a fuzzy measure of typicality
R. R. Yager

Vol. 12. No. 4

Articles

Applications of chaotic systems – an emerging field
H. N. Teodorescu and T. Yamakawa

System-identification for chaotic integrate-and-fire dynamics
T. Sauer

A digital application of chaotic oscillation modes in Josephson circuit
M. Morisue, M. Yamadaya, H. Noguchi and A. Kanasugi

A nonlinear prediction technique for parametrized families of chaotic dynamics
R. Tokunaga and T. Matsumoto

Chaotic processes in taste recognition
K. Toko, T. Matsuno and K. Yamafuji

Experimental study on arranging music by chaotic neural-network
T. Nagashima and J. Kawashima

Effect of noise on chaotic behavior in Roessler-type nonlinear system

T. Kawata, T. Horita, S. Terachi, H. Fujii and S. Ogata

Vol. 12 No. 5

Articles

Neuro-expert approach to characteristics recognition for process monitoring and performance evaluation

M. Y. Chen and D. A. Linkens

Intelligent agents for World Wide Web advertising decisions

R. R. Yager

Approximate reasoning applied to unsupervised database mining

L. J. Mazlack

Fuzzy-logy explains the golden proportion

M. Koshelev

Formal requirements and design specifications – the Clepsydra methodology

P. Ciaccia, P. Ciancarini and W. Penzo

Vol. 7 No. 1

Articles

Data-flow analysis of system – specifications in LOTOS
H. Vanderschoot and H. Ural

Writing and analyzing system specifications by integrated linguistic tools

A. F. Abate, C. Dapolito, G. Nota and G. Pacini

Specifying active database systems in an object-oriented framework

J. Campin, N. Paton and M. H. Williams

Integration object-oriented software testing and metrics

C. M. Chung, T. K. Shih, C. C. Wang and M. C. Lee

Transforming an HCI model to a software design model

A. M. Olson

Journal of artificial intelligence research

Vol. 6

Articles

Improved heterogeneous distance functions

D. R. Wilson and T. R. Martinez

SCREEN: learning a flat syntactic and semantic spoken language analysis

S. Wermter and V. Weber

A uniform framework for concept definitions in description logics

G. De Giacomo and M. Lenzerini

Lifeworld analysis

P. Agre and I. Horswill

Query DAGs: a practical paradigm for implementing belief-network inference

A. Darwiche and G. Provan

Connectionist theory refinement: genetically searching the space of networks

D. W. Optiz and J. W. Shavlik

Journal of logic programming

Vol. 30 No. 3

Articles

Incremental algorithms for optimizing model computation based on partial instantiation

R. T. Ng and X. M. Tian

On integrating objects and relations using multimethods

C. P. Higgins

Magic sets with full sharing

P. J. Azevedo

The relationship between logic programs and specifications – the subset example revisited

K. K. Lau and M. Ornaghi

Journal of symbolic computation

Vol. 22 No. 4

Articles

Hilbert-functions and the Buchberger algorithm

C. Traverso

Computing $x(m) \bmod p(x)$ and an application to splitting a polynomial into factors over a fixed disc

V. Y. Pan

Efficient simulation of forward-branching systems with constructor systems

B. Salinier and R. Strandh

Modular higher-order equational preunification

Z. Y. Qian and K. Wang

On the resolution of index form equations in sextic fields with an imaginary quadratic subfield

I. Gaal and M. Pohst

Rigorous error analysis of numerical algorithms via symbolic computations

M. Mrozek

Symbolic solutions for a class of partial differential equations

B. Dejager and B. Vanasch

Vol. 22 Nos 5/6

Articles

Editorial – executable temporal logics

M. Fisher, S. Kono and M. A. Orgun

Timed default concurrent constraint programming

V. Saraswat, R. Jagadeesan and V. Gupta

Deriving liveness goals from temporal logic specifications

C. Caleiro, G. Saake and A. Sernadas

Temporal annotated constraint logic programming

T. Fruhwirth

Dense time logic programming

M. Ahmed and G. Venkatesh

Executable temporal logic for nonmonotonic reasoning

J. Engelfriet and J. Treur

Temporal semantics for concurrent METATEM

M. Fisher

A nonstandard temporal deductive database system

J. R. Gagne and J. Plaipe

Naturetime – temporal granularity in simulation of ecosystems

E. Mota, D. Robertson and A. Smail

Dealing with multiple granularity of time in temporal logic programming

C. C. Liu and M. A. Orgun

The chronolog family of languages

M. A. Orgun and A. A. Faustini

F-limette fuzzy-logic programming integrating metric temporal extensions

K. Schafer and C. Brzoska

The concurrent METATEM system

M. Fisher and A. Kellett

The programming language Tempura

B. Moszkowski

The Tokio system

S. Kono and M. Fujita

Vol. 23 No. 1

Articles

Paramodulation with built-in AC-theories and symbolic constraints

R. Nieuwenhuis and A. Rubio

Oriented equational logic programming is complete

C. Lynch

Automated theorem-proving by test set induction

A. Bouhoula

Solving a unification problem under constrained substitutions using tree automata

Y. Kaji, T. Fujiwara and T. Kasami

A new algorithm, for computing the asymptotic solutions of a class of linear-differential systems

B. M. Brown, M. S. P. Eastham and D. K. R.

McCormack

Vol. 23 Nos 2/3

Articles

Special issue on parametric algebraic-curves and applications – foreword

C. M. Hoffmann, J. R. Sendra and F. Winkler

Implicitization of parametric curves and surfaces by using multidimensional newton formulas

L. Gonzalezvega

Implicitizing rational curves by the method of moving algebraic-curves

T. Sederberg, R. Goldman and H. Du

Implicitization of nested circular curves

H. Hong

Parametrization of algebraic-curves over optimal field extensions

J. R. Sendra and F. Winkler

Rational parametrizations of algebraic-curves using a canonical divisor

M. Vanhoveij

An algebraic approach to computing adjoint curves

M. Mnuk

Real reparametrizations of real curves

T. Recio and J. R. Sendra

Computing rational parametrizations of canal surfaces

M. Peternell and H. Pottmann

Parametric generalized offsets to hypersurfaces

E. Arrondo, J. Sendra and J. R. Sendra

Symbolic constraints in constructive geometric constraint solving

C. M. Hoffmann and R. Joanarinyo

Conic approximation of conic offsets

R. T. Farouki

Spline approximations of real algebraic surfaces

C. L. Bajaj and G. L. Xu

IEEE transactions on knowledge and data engineering

Vol. 9 No. 1

Articles

Capture, integration, and analysis of digital system requirements with conceptual graphs

W. R. Cyre

Rule-based system validation through automatic identification of equivalence classes

G. W. Rosenwald and C. C. Liu

Semantics, consistency, and query-processing of empirical deductive databases

R. T. Ng

The role of polymorphic reuse mechanisms in schema evolution in an object-oriented database

L. Liu, R. Zicari, W. Hursch and K. J. Lieberherr

Indexing for multiversion locking – alternatives and performance evaluation

P. M. Bober and M. J. Carey

An extended authorization model for relational databases

E. Bertino, P. Samarati and S. Jajodia

CCAM – a connectivity-clustered access method for networks and network computations

S. Shekhar and D. R. Liu

The expressive power of temporal relational query languages

A. U. Tansel and E. K. Tin

Object-based semantic real-time concurrency-control with bounded imprecision

L. C. Dipippo and V. F. Wolfe

Optimal bucket allocation design of k-ary MKH files for partial match retrieval

C. Y. Chen, C. C. Chang and R. C. T. Lee

Toward the notion of a knowledge repository for financial risk management

M. Benaroch

Learning to predict – INC2.5

M. Hadzikadic and B. F. Bohren

Ordering and selecting production rules for constraint maintenance – complexity and heuristic solution

P. Fraternali and S. Paraboschi

Alternating hashing for expandable files

Y. I. Chang and C. I. Lee

Database-management with sequence trees and tokens

R. C. Goldstein and C. Wagner

Vol. 9 No. 2

Articles

Sharing metainformation to guide cooperative search among heterogeneous reusable agents

S. E. Lander and V. R. Lesser

Knowledge conceptualization tool

H. Fujihara, D. B. Simmons, N. C. Ellis and R. E. Shannon

Using directed hypergraphs to verify rule-based expert-systems

M. Ramaswamy, S. Sarkar and Y. S. Chen

A form-based natural-language front-end to a CIM database

N. R. Adam and A. Gangopadhyay

Incremental computation of set difference views

L. Baekgaard and L. Mark

Divergence control algorithms for epsilon-serializability

K. L. Wu, P. S. Yu and C. Pu

A data/knowledge paradigm for the modeling and design of operations support systems

V. K. Vaishnavi, G. C. Buchanan and W. L. Kuechler

A semantic framework of the multilevel secure relational model

X. L. Qian and T. F. Lunt

Text compression for dynamic document databases

A. Moffat, J. Zobel and N. Sharman

Block-oriented compression techniques for large statistical databases

W. K. Ng and C. V. Ravishanker

Experience with rule induction and k-nearest neighbor methods for interface agents that learn

T. R. Payne, P. Edwards and C. L. Green

A generalized version space learning algorithm for noisy and uncertain data

T. P. Hong and S. S. Tseng

Reusing analogous components

B. H. C. Cheng and J. J. Jeng

Dismountable media management in tertiary storage-systems

D. A. Ford

IEEE transactions on pattern analysis and machine intelligence

Vol. 19 No. 2

Articles

On view likelihood and stability

D. Weinshall and M. Werman

Probabilistic multiscale image segmentation

K. L. Vincken, A. S. E. Koster and M. A. Viergever

Visual image retrieval by elastic matching of user sketches

A. Delbimbo and P. Pala

Kruppas equations derived from the fundamental matrix

R. I. Hartley

Moment-based image normalization with high noise-tolerance

M. Gruber and K. Y. Hsu

Rigid-body segmentation and shape-description from dense optical-flow under weak perspective

J. Weber and J. Malik

Division-based analysis of symmetry and its application

S. Fukushima

Texture classification using windowed Fourier filters

R. Azencott, J. P. Wang and L. Younes

Feature-selection – evaluation, application, and small sample performance

A. Jain and D. Zongker

A viewpoint planning strategy for determining true angles on polyhedral objects by camera alignment

C. B. Madsen and H. I. Christensen

3d symmetry detection using the extended Gaussian image

C. M. Sun and J. Sherrah

Shape representation using a generalized potential-field model

N. Ahuja and J. H. Chuang

Automatic script identification from document images using cluster-based templates

J. Hochberg, P. Kelly, T. Thomas and L. Kerns

Skew angle detection of digitized Indian script documents

B. B. Chaudhuri and U. Pal

Linear discriminant-analysis for 2 classes via removal of classification structure

M. Aladjem

Pairwise data clustering by deterministic annealing (vol 19, pg 1, 1997)

T. Hofmann and J. M. Buhmann

Vol. 19 No. 3

Articles

Autonomous exploration – driven by uncertainty

P. Whaite and F. P. Ferrie

A paraperspective factorization method for shape and motion recovery

C. J. Poelman and T. Kanade

The active recovery of 3D motion trajectories and their use in prediction

K. J. Bradshaw, I. D. Reid and D. W. Murray

Determination of the script and language content of document images

A. L. Spitz

Symmetry as a continuous feature – comment

K. Kanatani

Patch-based stereo in a general binocular viewing geometry

B. J. Super and W. N. Klarquist

Acquiring 3d models of nonrigid moving-objects from time and viewpoint varying image sequences – a step toward left-ventricle recovery

Y. Sato, M. Moriyama, M. Hanayama, H. Naito and S. Tamura

The role of model-based segmentation in the recovery of volumetric parts from range data

S. J. Dickinson, D. Metaxas and A. Pentland

Recovery of ego-motion using region alignment

M. Irani, B. Rousso and S. Peleg

A fast algorithm for bottom-up document layout analysis

A. Simon, J. C. Pret and A. P. Johnson

A fast algorithm for the nearest-neighbor classifier

A. Djouadi and E. Bouktache

An adaptive stochastic approximation algorithm for simultaneous diagonalization of matrix sequences with applications

C. Chatterjee and V. P. Roychowdhury

Vol. 19 No. 4

Articles

The effect of gaussian error in object recognition

K. B. Sarachik

Online fingerprint verification

A. Jain, L. Hong and R. Bolle

Finite resolution aspect graphs of polyhedral objects

I. Shimshoni and J. Ponce

An edge-detection technique using the facet model and parameterized relaxation labeling

I. Matalas, R. Benjamin and R. Kitney

Learning an integral equation approximation to nonlinear anisotropic diffusion in image-processing

B. Fischl and E. L. Schwartz

Parametric shape from shading by radial basis functions

G. Q. Wei and G. Hirzinger

A lexicon driven approach to handwritten word recognition for real-time applications

G. Kim and V. Govindaraju

Inducing features of random-fields

S. Dellapietra, V. Dellapietra and J. Lafferty

Minimal surfaces based object segmentation

V. Caselles, R. Kimmel and G. Sapiro

Recognition of digits in hydrographic maps – binary versus topographic analysis

O. D. Trier, T. Taxt and A. K. Jain

Combination of multiple classifiers using local accuracy estimates

K. Woods, W. P. Kegelmeyer and K. Bowyer

Model-based image enhancement of far-infrared images

R. Highnam and M. Brady

Knowledge-based systems

Vol. 9 No. 6

Articles

Creativity and cognition 1996 – Preface

L. Candy

Participatory theater – interacting with autonomous tools for creative applications

J. Ambach and A. Repenning

The creative process of animating human movement

A. Bruderlin

A system to visualize different viewpoints for supporting researchers' creativity

M. Sugimoto, K. Hori and S. Ohsuga

Toward an outsider agent for supporting a brainstorming session – an information-retrieval method from a different viewpoint

K. Nishimoto, Y. Sumi and K. Mase

Making AI systems more creative – the IPC-model

K. Schmid

Vol. 9 No. 7

Articles

Armchair missions to Mars – using case-based reasoning and fuzzy-logic to simulate a time-series model of astronaut crews

G. Stahl

Integrating multiple and diverse abstract knowledge types in real-time embedded systems

A. Harrison and P. G. Thomas

Creativity, emergence and evolution in design

J. S. Gero

A bibliographical survey of constraint-based approaches to CAD, graphics, layout, visualization, and related topics

W. Hower and W. H. Graf

A model and its different applications to case-based reasoning

M. M. G. Lorenzo and R. E. B. Perez
