

From the journals

AI magazine

Vol. 18 No. 2

Articles

Moving up the information food-chain – deploying softbots on the world wide web

O. Etzioni

Savvysearch – a metasearch engine that learns which search engines to query

A. E. Howe, D. Dreilinger

The hidden web

H. Kautz, B. Selman, M. Shah

Life-style finder – intelligent user profiling using large-scale demographic-data

B. Krulwich

Learning probabilistic user profiles – applications for finding interesting web sites, notifying users of relevant changes to web pages, and locating grant opportunities

M. Ackerman, D. Billsus, S. Gaffney, S. Hettich, G. Khoo, D. J. Kim, R. Klefstad, C. Lowe, A. Ludeman, J. Muramatsu, K. Omori, M. J. Pazzani, D. Semler, B. Starr, Y. Yap

Question answering from frequently asked question files – experiences with the faq finder system

B. D. Burke, K. J. Hammond, V. Kulyukin, S. L. Lytinen, N. Tomuro, S. Schoenberg

Refinement planning as a unifying framework for man synthesis

S. Kambhampati

Artificial-intelligence – what works and what doesn't

F. Hayes-Roth

Worldwide perspectives and trends in expert-systems – an analysis based on the 3 world congresses on expert-systems

J. Liebowitz

Applied artificial intelligence

Vol. 11 No. 3

Articles

The behavior-based firm – application of recent AI concepts to company management

E. Prem

Automated extraction of welds from digitized radiographic images based on MLP neural networks

T.-W. Liao, K. Tang

Natural-language plurals in logic programming queries

M. A. Covington

Contextual word sense tuning and disambiguation

R. Basili, M. Dellarocca, M. T. Pazienza

Vol. 11 No. 4

Articles

Perceptive spaces for performance and entertainment – untethered interaction using computer vision and audition

C. R. Wren, F. Sparacino, A. J. Azarbayejani, T. J. Darrell, T. E. Starner, A. Kotani, C. M. Chao, M. Hlavac, K. B. Russell, A. P. Pentland

Intelligent studios – modeling space and action to control TV cameras

C. S. Pinhanez, A. F. Bobick

Vision-based modeling for film and multimedia production

A. Azarbayejani, C. Perry, A. Pentland

Toward the automated editing of theme-oriented video sequences

F. Nack, A. Parkes

Film sequence generation strategies for automatic intelligent video editing

S. Butler, A. Parkes

Vol. 11 No. 5

Articles

Practical applications of intelligent agents and multiagent technology – the best of PAAM96 – introduction to the special issue

N. Jennings, B. Crabtree

Learn Sesame – a learning agent engine

A. Caglayan, M. Snorrason, J. Jacoby, J. Mazzu, R. Jones, K. Kumar

Musag – an agent that learns what you mean

C. V. Goldman, A. Langer, J. S. Rosenschein

Amalthaea – information discovery and filtering using a multiagent evolving ecosystem

A. Moukas

Software agent foundation for dynamic interactive electronic catalogs

R. Schrooten, W. Vandeveld

Applied intelligence

Vol. 7 No. 2

Articles

Action-based causal reasoning

A. Mokhtari

Comparative performance of rule quality measures in an induction system

P. Dean, A. Famili

An intelligent lexicon for contextual word sense discrimination

V. Prince

Concept-formation in WWTP by means of classification techniques – a compared study

M. Sanchez, U. Cortes, J. Bejar, J. Degracia, J. Lafuente, M. Poch

An integrated framework for representing design history

R. Goodwin, P.-W.-H. Chung

Vol. 7 No. 3**Articles**

- An advanced case-knowledge architecture based on fuzzy objects
W. Dubitzky, A. Schuster, J. Hughes, D. Bell
- A neural-network parallel algorithm for meeting schedule problems
K. Tsuchiya, Y. Takefuji

A connectionist approach for solving large constraint satisfaction problems

- A. Likas, G. Papageorgiou, A. Stafylopatis*
- Temporal contexts for discourse representation – an extension of the conceptual graph approach
B. Moulin

Using disruptive selection to maintain diversity in genetic algorithms
T. Kuo, S.-Y. Hwang

Artificial intelligence**Vol. 91 No. 2****Articles**

- Scientific discovery and simplicity of method
H. A. Simon, R. E. Valdes-Perez, D. H. Sleeman
- An interactive system for finding complementary literatures – a stimulus to scientific discovery
D. R. Swanson, N. R. Smalheiser
- Induction and the discovery of the causes of scurvy – a computational reconstruction
V. Corruble, J. G. Ganascia
- The computer revolution in science – steps towards the realization of computer-supported discovery environments
H. Dejong, A. Rip
- Retax – a step in the automation of taxonomic revision
E. Alberdi, D. H. Sleeman
- A computational approach to George Boole's discovery of mathematical logic
L. Deledesma, A. Perez, D. Borrajo, L. M. Laita

Vol. 92 Nos. 1–2**Articles**

- Defeasible inheritance on cyclic networks
G. A. Antonelli
- Clause trees – a tool for understanding and implementing resolution in automated reasoning
J. D. Horton, B. Spencer
- Proving properties of continuous systems – qualitative simulation and temporal logic
B. Shults, B. J. Kuipers
- How to progress a database
F. Z. Lin, R. Reiter
- Map learning with uninterpreted sensors and effectors
D. Pierce, B. J. Kuipers
- The normative representation of quantified beliefs by belief functions
P. Smets
- Non-Horn clause logic programming
X. M. Nie

Nonmonotonic reasoning, conditional objects and possibility theory

- S. Benferhat, D. Dubois, H. Prade*
- Default extensions – dealing with computer information
M. Freund

Higher-order petri-net models based on artificial neural networks

- T. W. S. Chow, J. Y. Li*
- Reasoning about causality between distributed nonatomic events

A. D. Kshemkalyani

The maximum length of prime implicates for instances of 3-sat

- P. E. Dunne, T. J. M. Benchcapon*

Vol. 93 Nos. 1–2**Articles**

- An optimal approximation algorithm for Bayesian-inference
P. Dagum, M. Luby
- Processing disjunctions in temporal constraint networks
E. Schwalb, R. Dechter
- An abstract, argumentation-theoretic approach to default reasoning
A. Bondarenko, P. M. Dung, R. A. Kowalski, F. Toni
- Dynamic reasoning with qualified syllogisms
D. G. Schwartz
- Definability and commonsense reasoning
G. Amati, L. C. Aiello, F. Pirri
- Automated modeling of complex systems to answer prediction questions
J. Rickel, B. Porter
- Reducing belief revision to circumscription (and vice-versa)
P. Liberatore, M. Schaerf
- 21 large tractable subclasses of Allen algebra
T. Drakengren, P. Jonsson
- Constraint satisfaction problem with bilevel constraint – application to interpretation of over-segmented images
A. Deruyver, Y. Hode

Artificial intelligence in engineering**Vol. 11 No. 3****Articles**

- Double special issue – structural-engineering applications of artificial-intelligence
I. Smith
- A causal-modeling framework for the simulation and explanation of the behavior of structures
P. Salvaneschi, M. Cadei, M. Lazzari
- Application of intelligent CAD paradigms to preliminary structural design
M. Hauser, R. J. Scherer
- An agent-based paradigm for building intelligent CAD systems
J. Bento, B. Feijo
- Reconstructive memory in case-based design
B. Kumar, B. Raphael
- Decision support for conceptual bridge design
C. J. Moore, J. C. Miles, D. W. G. Rees

Conceptual modeling of building regulation knowledge
J. Degelder

Evolutionary systems in design
W. Hower, M. Roseman

An exploration into evolutionary models for non routine design
M. A. Rosenman

A genetic algorithm for continuous design space search
K. Rasheed, H. Hirsh, A. Gelsey

Placing computations by adaptive procedures
W. Hower

Coevolution and emergence in design
J. Poon, M. L. Maher

Learning and reusing information in-space layout planning problems using genetic engineering
J. S. Gero, V. A. Kazakov

Working from blueprints – evolutionary learning for design

S. J. Louis

Vol. 11 No. 4

Articles

Special issue – applications of neural networks in-process engineering

A. Bulsari, S. Kallio

Modular modeling of an evaporator for long-range prediction

N. T. Russell, H. H. C. Bakker

Data reconciliation for simulated flotation process

Y. G. Du, J. Thibault, D. Hodouin

Identification and predictive control of a melter unit used in the sugar industry

J. M. Zamarrero, P. Vega

Neural networks for steady-state modeling of an extruder

M. G. Wagner, G. A. Montague, M. T. Tham

Estimation of inaccessible fermentation states with variable inoculum sizes

P. Dacosta, C. Kordich, D. Williams, J. B. Gomm

Modeling pressure drop in water treatment

J. Conlin, C. Peel, G. A. Montague

Modeling of coagulant dosage in a water-treatment plant

C. Gagnon, B. P. A. Grandjean, J. Thibault

A feedforward control strategy for distillation columns

R. Baratti, S. Corti, A. Servida

Extraction of structures from turbulent signals

J. Ferregine, R. Rallo, A. Arenas, F. Giralt

Synthesis of reinforcement learning, neural networks and pi-control applied to a simulated heating coil

C. W. Anderson, D. C. Hittle, A. D. Katz, R. M.

Kretchmar

Neural and adaptive controllers for a nonminimum-phase varying time-delay system

A. Toudefit, P. Gallinari

Artificial intelligence review

Vol. 11 Nos. 1–5

Articles

Lazy learning

D. W. Aha

Locally weighted learning

C. G. Atkeson, A. W. Moore, S. Schaal

Locally weighted learning for control

C. G. Atkeson, A. W. Moore, S. Schaal

Voting over multiple condensed nearest neighbors

E. Alpaydin

Tolerating concept and sampling shift in lazy learning using prediction error context switching

M. Salganicoff

Discretization in lazy learning algorithms

K. M. Ting

Intelligent selection of instances for prediction functions in lazy learning algorithms

J. P. Zhang, Y. S. Yim, J. M. Yang

The racing algorithm – model selection for lazy learners

O. Maron, A. W. Moore

Context-sensitive feature-selection for lazy learners

P. Domingos

Computing optimal attribute weight settings for nearest-neighbor algorithms

C. X. Ling, H. D. Wang

A review and empirical-evaluation of feature weighting methods for a class of lazy learning algorithms

D. Wettschereck, D. W. Aha, T. Mohri

Lazy acquisition of place knowledge

P. Langley, K. Pflieger, M. Sahami

A teaching strategy for memory-based control

J. W. Sheppard, S. L. Salzberg

Lazy incremental learning of control knowledge for efficiently obtaining quality plans

D. Borrajo, M. Veloso

Igtree – using trees for compression and classification in lazy learning algorithms

W. Daelemans, A. Vandenbosch, T. Weijters

Computers and artificial intelligence

Vol. 16 No. 1

Articles

Designing of processor-time optimal hexagonal systolic array for matrix multiplication

E. I. Milovanovic, I. Z. Milentijevic, I. Z. Milovanovic

RT level test scheduling

J. Blatny, Z. Kotasek, J. Hlavicka

An architecture of a parallel grid multiprocessor

V. P. Ilin, Y. I. Fet

Diagnostic Bayesian networks

G. Agre

Contribution to the reliability of wide area computer-networks

M. Krokavec

VegeDog – formalism, vegetarian dogs, and paronomies in transition

E. Nissan, S. E. Shimony

Vol. 16 No. 2

Special issue on parallel and distributed computing

Matrix transpose on meshes – theory and practice

M. Kaufmann, U. Meyer, J. F. Sibeyn

Mesh sorting and selection optimal on the average

B. S. Chlebus

On partitioning grids into equal parts

S. L. Bezrukov, B. Rován

Graph relabeling systems – a general overview

Y. Metivier, E. Sopana

Contextual coordination for the mapping of distributed systems on object-oriented systems

M. Buffo, D. Buchs

Local quartet splits of a binary-tree infer all quartet splits via one dyadic inference rule

P. L. Erdos, M. A. Steel, L. A. Szekely, T. J. Warnow

Engineering applications of artificial intelligence

Vol. 10 No. 2

Articles

Multi-model-based operation support system

P. Dziopa, S. Gentil

Eadocs – conceptual design in 3 phases – an application to fiber-reinforced composite panels

B. D. Netten, R. A. Vingerhoeds

Artificial-neural-network-based fast valving control in a power generation system

Y. D. Han, Z. H. Wang, Q. Chen, S. H. Tan

2-step approach in the training of regulated activation weight neural networks (RAWN).

H. A. B. Tebraake, H. J. L. Vancan, G. Vanstraten, H. B. Verbruggen

Predicting the internal bond strength of particleboard, utilizing a radial basis function neural-network

D. F. Cook, C. C. Chiu

Collision-free motion planning for redundant robots using neural-network processing

D. Han, C. S. Piu

A database approach to hierarchical image storage and recognition

M. Almouhamed, L. Ismail

Evaluation of the number of consistent multiattribute classification rules

A. Bendavid, D. L. Jagerman

Using curvature features in a multiclassifier OCR system

B. Gatos, N. Papamarkos, C. Chamzas

Some communication problems of KB-controlled manufacturing systems

G. L. Kovacs, J. Nacs

Vol. 10 No. 3

Articles

Quality assurance of knowledge-based systems

J. Tepandi

Modeling of manufacturing processes using a petri-net representation

I. J. Rudas, L. Horvath

Detecting anomalies in constraint-based systems

L. M. Flannery, A. J. Gonzalez

Temporal management using relative-time in knowledge-based process-control

B. Knight, J. X. Ma

Distributed intelligent control of street and highway ramp traffic signals

N. V. Findler, S. Surender, Z. Ma, S. Catrava

Genetic-algorithm-based fuzzy control of spacecraft autonomous rendezvous

C. L. Karr, L. M. Freeman

Application of wavelet-based neural networks to the modeling and optimization of an experimental distillation column

A. A. Safavi, J. A. Romagnoli

Online decisions about permitted/protected left-hand turns in distributed traffic signal control

N. V. Findler, S. Surender, S. Catrava

Expert systems with applications

Vol. 12 No. 3

Articles

An expert system in the domain of software technology transfer

P. Fowler, I. G. Martin, N. Juristo, L. Levine, J. L. Morant

Generic predictive systems – an empirical evaluation using the learning-base-system (lbs)

D. R. B. Stockwell

EMS – an examination scheduling and management system

S. L. Chan, Y. M. Zhang

Intelligent agent-assisted decision-support systems – integration of knowledge discovery, knowledge analysis, and group decision support

H. Q. Wang

SACM – semantic agenda control model

F. Alonso, L. Martinez, C. Montes

A hybrid knowledge-based system for chemical incident management

D. J. Finch, P. F. Lees

A model for reengineering legacy expert systems to object-oriented architecture

E. Babiker, D. Simmons, R. Shannon, N. Ellis

Unik-relax – a generator of the Lagrangian problem and its application to the distributed database system

C. Kim, J. K. Lee

A framework for developing and evaluating expert systems for temporal business applications

S. J. Chinn, G. R. Madey

Vol. 12 No. 4

Articles

An expert-system to aid cataloging and searching electronic documents on digital libraries

P. G. Chander, R. Shinghal, B. C. Desai, T. Radhakrishnan

A case-based reasoning approach to the selection of comparable evidence for retail rent determination

B. Oroarty, D. Patterson, S. McGreal, A. Adair

The infusion of expert-systems in banking – an exploratory study

Y. P. Shao

Operator guidance-system for industrial-plant supervision

H. Villanueva, H. Lamba

Development of operation-aided system for chemical processes

K. J. Mo, Y. S. Oh, E. S. Yoon, C. W. Jeong

Disxpert – a rule-based vocational-rehabilitation risk assessment system

J. R. Nolan

Expert-system for testing mechanical properties of aluminum and aluminum alloys

I. Emri, D. Kovacic

A knowledge-based maintenance of legacy systems – Metasoft

B. Y. Lee, J. K. Lee, W. Kim

A hybrid knowledge-based system for strategic purchasing

R. T. McIvor, M. D. Mulvenna, P. K. Humphreys

IEEE transactions on pattern analysis and machine intelligence

Vol. 19 No. 5

Articles

Estimating the viewing parameters of random, noisy projections of asymmetric objects for tomographic reconstruction

P. D. Lauren, N. Nandhakumar

Generalized affine invariant image normalization

D. G. Shen, H. H. S. Ip

Parallel image component labeling with watershed transformation

A. N. Moga, M. Gabbouj

Transitory image sequences, asymptotic properties, and estimation of motion and structure

J. Weng, Y. T. Cui, N. Ahuja

Estimation of generalized multisensor hidden Markov chains and unsupervised image segmentation

N. Giordana, W. Pieczynski

A comparative-analysis of methods for pruning decision trees

F. Esposito, D. Malerba, G. Semeraro

A comparative-analysis of methods for pruning decision trees – comment

J. Kay

Segmentation of random-fields via borrowed strength density estimation

C. E. Priebe, D. J. Marchette, G. W. Rogers

Perform – a fast object recognition method using intersection of projection error regions

B. R. Modayur, L. G. Shapiro

Shape ambiguities in structure-from-motion

R. Szeliski, S. B. Kang

3D surface estimation and model construction from specular motion in image sequences

J. Y. Zheng, Y. Fukagawa, N. Abe

Graduated nonconvexity by functional focusing

M. Nielsen

Improving Gil-Werman algorithm for running min and max filters

D. Z. Gevorkian, J. T. Astola, S. M. Atourian

Local grayvalue invariants for image retrieval

C. Schmid, R. Mohr

Off-line, handwritten numeral recognition by perturbation method

T. M. Ha, H. Bunke

Document image binarization based on texture features

Y. Liu, S. N. Srihari

Vol. 19 No. 6

Articles

Lambda-tau-space representation of images and generalized edge detector

M. Gokmen, A. K. Jain

How easy is matching 2D line models using local search

J. R. Beveridge, E. M. Riseman

In defense of the 8-point algorithm

R. I. Hartley

Physically-based adaptive preconditioning for early vision

S. H. Lai, B. C. Vemuri

The optimum class-selective rejection rule

T. M. Ha

The k1-map reduction for pattern classifications

T. C. Hsu, S. D. Wang

Ligature modeling for online cursive script recognition

B. K. Sin, J. H. Kim

Structural matching by discrete relaxation

R. C. Wilson, E. R. Hancock

Decomposition of gray-scale morphological templates using the rank method

P. Sussner, G. X. Ritter

Techniques for assessing polygonal approximations of curves

P. L. Rosin

Dimensionality, sample-size, and classification error of nonparametric linear classification algorithms

S. Raudys

IEEE transactions on knowledge and data engineering

Vol. 9 No. 3

Articles

Data on air – organization and access

T. Imielinski, S. Viswanathan, B. R. Badrinath

Analysis of the n-dimensional quadtree decomposition for arbitrary hyperrectangles

C. Faloutsos, H. V. Jagadish, Y. Manolopoulos

Optimal-design of multiple hash-tables for concurrency-control

M. S. Chen, P. S. Yu

An efficient multiversion access structure

P. J. Varman, R. M. Verma

Efficient bulk-loading of gridfiles

S. T. Leutenegger, D. M. Nicol

A performance comparison of locking methods with limited wait depth

A. Thomasian

Similarity searching in medical image databases

E. G. M. Petrakis, C. Faloutsos

Default logic as a query language

M. Cadoli, T. Eiter, G. Gottlob

Temporal relational data model

A. U. Tansel

SQL extension for interval data

N. A. Lorentzos, Y. G. Mitsopoulos

On modeling cost-functions for object-oriented databases

E. Bertino, P. Foscoli

An improved algorithm for the incremental recomputation of active relational expressions

T. Griffin, L. Libkin, H. Trickey

International journal of computer vision

Vol. 22 No. 2

Articles

A note on some phase differencing algorithms for disparity estimation

L. D. Cai, J. Mayhew

Lines and points in 3 views and the trifocal tensor

R. I. Hartley

A general motion model and spatiotemporal filters for computing optical-flow

H. C. Liur, T. H. Hong, M. Herman, R. Chellappa

Object pose – the link between weak perspective, paraperspective, and full perspective

R. Horaud, F. Dornaika, B. Lamiroy, S. Christy

Vol. 22 No. 3

Articles

Spline-based image registration

R. Szeliski, J. Coughlan

3d surface reconstruction using occluding contours

E. Boyer, M. O. Berger

Recursive 3-D visual-motion estimation using subspace constraints

S. Soatto, P. Perona

Self-calibration of a moving camera from point correspondences and fundamental matrices

Q. T. Luong, O. D. Faugeras

Vol. 23 No. 1

Articles

Number of solutions for motion and structure from multiple frame correspondence

R. J. Holt, A. N. Netravali

The critical sets of lines for camera displacement estimation – a mixed euclidean-projective and constructive approach

N. Navab, O. D. Faugeras

Susan – a new approach to low-level image-processing

S. M. Smith, J. M. Brady

Topographical properties of generic images

J. H. Rieger

Topological reconstruction of a smooth manifold solid from its occluding contour

L. R. Williams

Vol. 23 No. 2

Articles

Following cusps

R. Cipolla, G. Fletcher, P. Giblin

Efficient pose clustering using a randomized algorithm

C. F. Olson

Computing local surface orientation and shape from texture for curved surfaces

J. Malik, R. Rosenholtz

Computing size functions from edge maps

C. Uras, A. Verri

The quadric reference surface – theory and applications

A. Shashua, S. Toelg

International journal of intelligent systems

Vol. 12 No. 6

Articles

Combining rules and constraints for employee timetabling

A. Meisels, E. Gudes, G. Solotorevsky

Mapcar – a framework to support the elaboration of the conceptual-model of a knowledge-based system

P. Tchounikine

Granularity via nondeterministic computations – what we gain and what we lose

V. Kreinovich, B. Bouchonmeunier

Nonmonotonic fuzzy set operations – a generalization and some applications

K. Hirota, W. Pedrycz

On the use of independence relationships for learning simplified belief networks

L. M. Decampos, J. F. Huete

A mass assignment based ID3 algorithm for decision tree induction

J. F. Baldwin, J. Lawry, T. P. Martin

Journal of intelligent manufacturing

Vol. 8 No. 3

Articles

A practical overview of neural networks

L. Burke, J. P. Ignizio

A new approach for automated parts recognition using time-series analysis and neural networks

Y. H. Lee, S. Moon, H. Lee

New approaches to nesting rectangular patterns

C. H. Dagli, P. Poshyanonda

Recognition of thin, flat microelectromechanical structures for automation of the assembly process

J. Radjenovicmrarca, H. Detter

Feature recognition using ART2 – a self-organizing neural-network

K. Lankalapalli, S. Chatterjee, T. C. Chang

Design of artificial neural networks for tool wear monitoring

K. Venkatesh, M. C. Zhou, R. J. Caudill

Comparison of proportional hazards models and neural networks for reliability estimation

J. T. Luxhoj, H. J. Shyur

Predicting grinding burn using artificial neural networks

H. X. Liu, T. Chen, L. S. Qu

Journal of logic programing

Vol. 31 Nos. 1–3

Special issue – reasoning about action and change

On the relation between situation calculus and event calculus

K. Vanbelleghem, M. Denecker, D. Deschreye

Reconciling the event calculus with the situation calculus

R. Kowalski, F. Sadri

Golog – a logic programming language for dynamic domains

H. J. Levesque, R. Reiter, Y. Lesperance, F. Z. Lin, R. B. Scherl

Reasoning about effects of concurrent actions

C. Baral, M. Gelfond

Explicit and implicit indeterminism – reasoning about uncertain and contradictory specifications of dynamic-systems

S. E. Bornscheuer, M. Thielscher

A simple declarative language for describing narratives with actions

A. Kakas, R. Miller

Representing actions – laws, observations and hypotheses

C. Baral, M. Gelfond, A. Provetti

Representing actions in logic programs and default theories – a situation calculus approach

H. Turner

Rules as actions – a situation calculus semantics for logic programs

F. Z. Lin, R. Reiter

Vol. 32 No. 1

Articles

Applying interval arithmetic to real, integer, and boolean constraints

F. Benhamou, W. J. Older

A simple approach to supporting untagged objects in dynamically typed languages

P. A. Bigot, S. K. Debray

Model generation and state generation for disjunctive logic programs

D. Seipel, J. Minker, C. Ruiz

Algebraic and logical semantics for CLP languages with dynamic scheduling

K. Marriott

Vol. 32 No. 2

Articles

Constructive negation by pruning

F. Fages

A logical semantics for hypothetical rulebases with deletion

A. J. Bonner

Vol. 32 No. 3

Articles

Well-founded ordered search – goal-directed bottom-up evaluation of well-founded models

P. J. Stuckey, S. Sudarshan

Characterizations of the disjunctive stable semantics by partial evaluation

S. Brass, J. Dix

Partial deduction in disjunctive logic programming

C. Sakama, H. Seki

Exploiting goal independence in the analysis of logic programs

M. Codish, M. Bruynooghe, M. G. Delabanda, M. Hermenegildo

Journal of symbolic computation

Vol. 23 No. 4

Articles

Some algorithms for nilpotent permutation-groups

E. M. Luks, F. Rakoczi, C. R. B. Wright

Subresultants under composition

H. Hong

Interactive theorem-proving with temporal logic

A. Felty, L. Thery

Omega-termination is undecidable for totally terminating term rewriting-systems

A. Geser

SP, a package for Schubert polynomials realized with the computer algebra system Maple

S. Veigneau

2 perturbation calculations in fluid-mechanics using large-expression management

R. M. Corless, D. J. Jeffrey, M. B. Monagan, Pratibha

Vol. 23 Nos. 5–6

Articles

Visualizations for mathematics courses based on a computer algebra system

B. Amrhein, O. Gloor, R. E. Maeder

A use of computers to teach group-theory and introduce students to research

N. Boston

Using the Magma computer algebra system in abstract algebra courses

J. Cannon, C. Playoust

Scientific computing – one part of the revolution

R. M. Corless, D. J. Jeffrey

A course in computational nonassociative algebra

D. P. Jacobs

Teaching computational abstract algebra

E. Kaltofen

Applications of the differential algebra package

Diffgrob2 to classical symmetries of differential-equations

E. L. Mansfield, P. A. Clarkson

Worksheets and notebooks – can we teach mathematical algorithms with them?

M. B. Monagan

Computer algebra and interpolation – a lesson plan

N. Robidoux

Trying to do group-theory with undergraduates and computers

G. J. Sherman

Mathematica notebooks for a conventional differential-equations course

W. Y. Sit

Vol. 24 No. 1

Articles

Formal solutions and factorization of differential-operators with power-series coefficients

M. Vanhoeij

A rational approach to the Prellé-Singer algorithm

Y. K. Man, M. A. H. MacCallum

A note on subresultants and the Lazard/Rioboo/Trager formula in rational-function integration

T. Mulders

On the stability of Grobner bases under specializations

M. Kalkbrener

Increasing model-building capabilities by constraint solving on terms with integer exponents

N. Peltier

Numeric deduction in symbolic computation – application to normalizing transformations

I. I. Shevchenko

TI Pspclink – a cooperation between general symbolic and poisson series processors

A. Abad, F. Sanjuan

Kybernetes

Vol. 26 Nos. 2–3

Contemporary systems and cybernetics

B. H. Rudall

Automatic programming of cellular-automata – identification approach

A. Adamatzky

Modeling the growth of american aggregates based on the metalogistic time function

N. D. Diamantides

Bionics – psychocybernetics of human memory (3) modeling of the human short term memory

S. J. Mrchev

The resolution of nonlinear integral equations of the first kind using the decomposition method of adomian

Y. Cherruault, V. Seng

Absolute limit in the development of civilization

J. Brozyna

Medical databases

E. T. Lee, Y. J. Lee

The biocybernetics of BSE and prion disease

B. James

Information from spiritualism, science and its discipline – cybernetics

M. B. S. Char

Contemporary-studies in systems and cybernetics

B. H. Rudall

Internet commentary

A. M. Andrew

The decade of the brain – further thoughts

A. M. Andrew

Quantum coherence and conscious experience

M. W. Ho

Fundamental structure of general systems and its relation to knowability of the physical world

Y. Lin, T. H. Fan

The cry for help – evolution of distress channels and signals at sea

L. Skyttner

A cybernetic strategy for optimal farming – on the growth of caiman *Crocodilus yacare*

A. B. Engel, R. C. Bassanezi

Pansystems optimization, generalized principles of optimality, and fundamental equations of dynamic-programming

B. F. Chen

Homo peccator in public administration

P. R. Masani

Machine learning

Vol. 27 No. 1

Special-issue on the 8th annual conference on computational learning-theory, (COLT-95)

An experimental and theoretical comparison of model selection methods

M. Kearns, Y. Mansour, A. Y. Ng, D. Ron

Predicting nearly as well as the best pruning of a decision tree

D. P. Helmbold, R. E. Schapire

Exactly learning automata of small cover time

D. Ron, R. Rubinfeld

A comparison of new and old algorithms for a mixture estimation problem

D. P. Helmbold, R. E. Schapire, Y. Singer, M. K. Warmuth

Vol. 27 No. 2

Articles

Characteristic sets for polynomial grammatical inference

C. Delahiguera

Pruning algorithms for rule learning

J. Furnkranz

Representing probabilistic rules with networks of gaussian-basis functions

V. Tresp, J. Hollatz, S. Ahmad

New generation computing

Vol. 15 No. 3

Articles

A parametric definition for a family of inheritance reasoners

C. Vogel, F. Popowich

Proving termination of GHC programs

M. R. K. K. Rao, D. Kapur, R. K. Shyamasundar

Relational semantics for locally nondeterministic programs

L. W. Xu, M. Takeichi, H. Iwasaki
