AI magazine

Vol. 19 No. 2

Articles

Introduction to special issue – the many faces of agents

K. P. Sycara

Autonomous agents as synthetic characters

C. Elliott and J. Brzezinski

Mobile digital assistants for community support

Y. Nishibe, H. Waki, I. Morihara, F. Hattori, T. Ishida,

T. Nishimura, H. Yamaki, T. Komura, N. Itoh, T. Gotoh,

T. Nishida, H. Takeda, A. Sawada, H. Maeda,

M. Kajihara and H. Adachi

Constraints and agents – confronting ignorance

P. S. Eaton, E. C. Freuder and R. J. Wallace

Designing for human–agent interaction

M. Lewis

Multiagent systems

K. P. Sycara

Computer bridge – a big win for AI planning

S. J. J. Smith, D. Nau and T. Throop

Computational cognitive modeling, the source of power, and other related issues

R. Sun and C. X. Ling

Lull, Ramon and the infidels

C. Glymour, K. M. Ford and P. J. Hayes

Applied artificial intelligence

Vol. 12 No. 4

Articles

Similarity measures for retrieval in case-based reasoning systems

T. W. Liao, Z. M. Zhang and C. R. Mount

Model-based software diagnosis

J. Hunt

Extracting generalized descriptions from a binary feedforward network

T. Sedbrook

Assessment of boolean minimization in symbolic empirical learning

V. S. Moustakis, M. Blazadonakis, M. Marazakis and G. Potamias

Vol. 12 No. 5

Articles

Guest editorial – first-order knowledge discovery in databases

J. Furnkranz and B. Pfahringer

Diterpene structure elucidation from c-13 NMR-spectra with inductive logic programming

S. Dzeroski, S. Schulzekermer, K. R. Heidtke, K. Siems,

D. Wettschereck and H. Blockeel

ISIDD – an interactive system for inductive database design

H. Blockeel and L. Deraedt

Efficient induction and effective use of first-order knowledge

U. Pompe and I. Kononenko

Relational knowledge discovery in a chinese character database

J. D. Zucker, J. G. Ganascia and I. Bournaud

Applied intelligence

Vol. 8 No. 3

Articles

Flying together – modeling air mission teams

G. Tidhar, C. Heinze and M. Selvestrel

Neural navigation approach for Intelligent Autonomous Vehicles (IAV) in partially structured environments

A. Chohra, C. Benmehrez and A. Farah

An intelligent man–machine dialogue system based on AI planning

B. Kuijpers and K. Dockx

Geamas – a generic architecture for agent-oriented simulations of complex processes

P. Marcenac and S. Giroux

Handwritten Chinese character-recognition based on primitive and fuzzy features via the seart neural-net model

H. M. Lee, C. C. Sheu and J. M. Chen

Vol. 9 No. 1

Articles

Special issue on intelligent adaptive agents – introduction

I. F. Imam

Multiple adaptive agents for tactical driving

R. Sukthankar, S. Baluja and J. Hancock

Printed-circuit board design via organizational-learning agents

K. Takadama, S. Nakasuka and T. Terano

A reluctance-based cost distribution strategy for multiagent planning

J. N. Suarez, G. Winstanley and R. N. Griffiths

Agent-based design-model of adaptive distributed systems

S. Fujita, H. Hara, K. Sugawara, T. Kinoshita and

N. Shiratori

Learning communication strategies in multiagent systems

M. Kinney and C. Tsatsoulis

Artificial intelligence

Vol. 100 Nos. 1–2

Articles

Editorial

D. G. Bobrow and M. Brady

Interpreting a dynamic and uncertain world – task-based control

R. J. Howarth

Search in games with incomplete information – a case-study using bridge card play

I. Frank and D. Basin

State-variable planning under structural restrictions – algorithms and complexity

P. Jonsson and C. Backstrom

Model-based average reward reinforcement learning

P. Tadepalli and D. Ok

An epistemic operator for description logics

F. M. Donini, M. Lenzerini, D. Nardi, W. Nutt and

A. Schaerf

Pragmatic navigation – reactivity, heuristics, and search

S. L. Epstein

Vol. 101 Nos. 1–2

Articles

On the relation between default and modal nonmonotonic reasoning

A. Bochman

Using modeling knowledge to guide design space search

A. Gelsey, M. Schwabacher and D. Smith

Inductive learning of search control rules for planning

C. Leckie and I. Zukerman

Planning and acting in partially observable stochastic domains

L. P. Kaelbling, M. L. Littman and A. R. Cassandra

A belief network approach to optimization and parameter-estimation – application to resource and environmental-management

O. Varis

Methods for task allocation via agent coalition-formation

O. Shehory and S. Kraus

What robots can do – robot programs and effective achievability

F. Z. Lin and H. J. Levesque

Verification of knowledge bases based on containment checking

A. Y. Levy and M. C. Rousset

Constraints, consistency and closure

P. Jeavons, D. Cohen and M. C. Cooper

Utility-based online exploration for repeated navigation in an embedded graph

S. Argamonengelsson, S. Kraus and S. Sina

Top-down induction of first-order logical decision trees

H. Blockeel and L. Deraedt

Arbib, Michael, A., The Metaphorical Brain 2 – Neural networks and beyond

J. A. Barnden

Arbib, Michael, The Metaphorical Brain 2 – The sequel

S. J. Hanson

Arbib's metaphorical brain 2

K. H. Pribram

Response – the metaphorical brains

M. Arbib

Commentary – schema-based learning

F. J. Corbacho

Commentary – structure-based modeling of schemas

P. Erdi

Vol. 102 No. 1

Articles

On stable social laws and qualitative equilibria

M. Tennenholtz

Approximating maps for belief networks is NP-hard and other theorems

A. M. Abdelbar and S. M. Hedetniemi

A spectrum of definitions for temporal model-based diagnosis

V. Brusoni, L. Console, P. Terenziani and D. T. Dupre

Probabilistic semantics for Delgrande's conditional logic and a counterexample to his default logic

G. Schurz

The value of the 4 values

O. Arieli and A. Avron

A unifying approach to temporal constraint reasoning

P. Jonsson and C. Backstrom

Artificial intelligence in engineering

Vol. 12 No. 3

Articles

The intelligent approach to register-transfer level synthesis

Z. F. Yan, M. Y. Liu and H. T. Song

Space layout planning using an evolutionary approach

J. H. Jo and J. S. Gero

Evolving design genes in space layout planning problems

J. S. Gero and V. A. Kazakov

Principled negotiation between intelligent agents – a model for air-traffic management

J. P. Wangermann and R. F. Stengel

Democracy in pattern classifications – combinations of votes from various pattern classifiers

G. S. Ng and H. Singh

Intelligent tutoring systems for training of operators for thermal power-plants

J. Gutierrez, J. A. Elopriaga, I. Fernandezcastro, J. A. Vadillo and A. Diazillaraza

A real-time recurrent learning network structure for data reconciliation

K. Meert

A predictor based on adaptive resonance theory

D. T. Pham and M. F. Sukkar

Intelligent tool wear estimation system through artificial neural networks and fuzzy modeling

R. J. Kuo and P. H. Cohen

Robust estimation of discrete hidden Markov model parameters using the entropy-based feature-parameter weighting and source-quantization modeling

H. J. Choi, S. J. Yun and Y. H. Oh

Fuzzy-logic in a blackboard system for controlling plasma deposition processes

A. A. Hopgood, H. J. Phillips, P. D. Picton and N. S. Braithwaite

Operator guidance-system for coal washing

H. Villanueva and H. Lamba

Intelligent control of waste-water treatment plants

S. A. Manesis, D. J. Sapidis and R. E. King

A case-study on the use of model-based systems for electronic fault-diagnosis

P. Cunningham

Solution reuse for model generation in numerical-simulation

D. P. Finn and P. Cunningham

A knowledge-based guidance-system for multiattribute decision-making.

K. L. Poh

Vol. 12 No. 4

Articles

Reasoning about function and its applications to engineering

L. Chittaro and A. N. Kumar

More than just shape – a representation for functionality
L. Bogoni
 Introducing deviations and multiple abstraction levels in the functional diagnosis of fluid transfer systems
L. Chittaro, R. Ranon and A. Soldati
 Failure modes and effects analysis of complex engineering systems using functional models
P. G. Hawkins and D. J. Woollons

Component-ontological representation of function for reasoning about devices
A. N. Kumar and S. J. Upadhyaya
 Functional-modeling for enabling adaptive design of devices for new environments
S. Prabhakar and A. K. Goel
 Function-directed electrical design analysis
C. J. Price

Artificial intelligence review

Vol. 12 Nos. 1–3

Articles

Artificial intelligence for biology and agriculture – preface
S. Panigrahi and K. C. Ting
 End-effectors for tomato harvesting robot
M. Monta, N. Kondo and K. C. Ting
 A computer vision method for determining length of cheese shreds
H. Ni and S. Gunasekaran
 Automated modeling of physiological processes during postharvest distribution of agricultural products
M. Sloof
 A neuro-fuzzy approach to identify lettuce growth and greenhouse climate
B. T. Tien and G. Vanstraten
 Artificial keys for botanical identification using a multilayer perceptron neural-network
J. Y. Clark and K. Warwick
 Video grading of oranges in real-time
M. Recce, A. Plebe, J. Taylor and G. Tropiano
 Cell-migration analysis after in-vitro wounding injury with a multiagent approach
A. Boucher, A. Doisy, X. Ronot and C. Garbay

Color computer vision and artificial neural networks for the detection of defects in poultry eggs
V. C. Patel, R. W. McClendon and J. W. Goodrum
 Automatic plankton image recognition
X. O. Tang, W. K. Stewart, L. Vincent, H. Huang, M. Marra, S. M. Gallager and C. S. Davis
 Identification and measurement of convolutions in cotton fiber using image-analysis
Y. J. Han, Y. J. Cho, W. E. Lambert and C. K. Bragg
 Fuzzy logic for biological and agricultural systems
B. Center and B. P. Verma
 Robotics for plant-production
N. Kondo and K. C. Ting
 3-dimensional image-reconstruction procedure for food microstructure evaluation
K. Ding and S. Gunasekaran

Vol. 12 No. 4

Articles

Tackling real-coded genetic algorithms – operators and tools for behavioral-analysis
F. Herrera, M. Lozano and J. L. Verdegay
 Spatial reasoning using the quad tesseral representation
F. P. Coenen, B. Beattie, M. J. R. Shave, T. J. M. Benchcapon and B. M. Diaz

Computers and artificial intelligence

Vol. 17 Nos. 2–3

Articles

Special issue on intelligent technologies for nuclear and electric-power systems
E. Nissan, A. Galperin, B. Knight, S. Hashem and A. J. Soper
 Fuelgen – effective evolutionary design of refuellings for pressurized-water reactors
J. Zhao, B. Knight, E. Nissan and A. Soper
 Fuzzy logic control applications to the Belgian Reactor 1 (BR1)
D. Ruan and X. Z. Li
 Sensor data validation for nuclear-power-plants through Bayesian conditioning and Dempster's rule of combination
A. F. Dragoni and P. Giorgini

Neurofuzzy approaches and their application to nuclear-power systems
R. E. Uhrig and L. H. Tsoukalas
 Gaussian mixture densities for classification of nuclear-power-plant data
Y. Bengio, F. Gingras, B. Goulard, J. M. Lina and K. Scott
 Optimizing neural-network models – motivation and case-studies
S. A. Harp and T. Samad
 A hybrid neuro-genetic approach to flow calculation based on the representation of an electrical-power system by critical switches
D. Arjona

Engineering applications of artificial intelligence

Vol. 10 No. 6

Articles

Special section on heuristic methods in image and signal-processing
N. G. Bourbakis and L. Tsoukalas
 Function optimization using an adaptive crossover operator based on locality
M. S. Ko, T. W. Kang and C. S. Hwang
 Optimum tradeoff between class-selective rejection error and average number of classes
T. M. Ha
 Solving constraint-satisfaction problems by a genetic algorithm adopting viral infection
H. Kanoh, M. Matsumoto, K. Hasegawa, N. Kato and S. Nishihara

Acquisition of state transitions and concept-formation in neural networks
N. Ishii, C. Kondo, A. Furukawa and K. Yamauchi
 A neurofuzzy methodology for impedance-based multiphase flow identification
L. H. Tsoukalas, M. Ishii and Y. Mi
 A fast directional filter set for pyramidal image-based robotic systems
W. D. Toczyski and N. P. Papanikolopoulos
 An efficient technique for implementing an image-compression neural algorithm on concurrent multiprocessor
F. Ancona, S. Rovetta and R. Zunino

Data-compression and encryption using cellular-automata transforms

O. Lafe

A simplified model for the simulation and transformation of speech

B. H. Story, I. R. Titze and D. Wong

An intelligent baggage-tracking system for airport security

E. A. Yfantis

Recursive parser optimization by rewriting context-free grammars

A. Giannone, M. R. A. Eltantawi and P. Maresca

Application of design parameters space search for belt conveyor design

S. S. Tsolidis and A. J. Dentsoras

Application of knowledge-based systems for fault-diagnosis and supply restoration

C. Y. Teo and H. B. Gooi

A neural predictive model for characterizing impact cushioning curves

S. W. Lye and S. Chuchom

Telecommunications service development – a design methodology and its intelligent support

A. P. G. Erberlein and F. Halsall

Vol. 11 No. 1

Articles

Special section on intelligent electronic systems – preface

C. W. Desilva and L. C. Jain

Fuzzy logic-based reinforcement learning of admittance control for automated robotic manufacturing

S. M. Prabhu and D. P. Garg

An object-oriented approach to an information and decision-support system for railway traffic control

M. Missikoff

A comparison between single and combined backpropagation neural networks in the prediction of turnover

T. Tchaban, J. P. Griffin and M. J. Taylor

An intelligent dynamic reconstruction filter for audio signal reconstruction using neural networks

H. L. Najafi, D. W. Moses, C. H. Hustig and J. Kinne

Inverse kinematic neuro-control of robotic systems

N. A. Deshpande and M. M. Gupta

Dynamic embedding for genetic vlsi circuit partitioning

B. R. Moon and C. K. Kim

A security system based on human iris identification using wavelet transform

W. W. Boles

Aspects of controlling a multifingered gripper

T. Doersam and T. Fischer

Knowledge-based supervisory control-system of a fish processing workcell – Part I – System-development

C. W. Desilva and N. Wickramarachchi

Knowledge-based supervisory control-system of a fish processing workcell – Part II – Implementation and evaluation

C. W. Desilva and N. Wickramarachchi

A scheduling algorithm for time-constrained model-based diagnosis

M. Chantler and A. Aldea

An integrated approach to representing and accessing design rationale

P. W. H. Chung and R. Goodwin

Vol. 11 No. 2

Articles

Preface to the special section on machine vision for intelligent vehicles and autonomous robots

A. Broggi

Coordinating the eyes, head and arm of an autonomous robot

W. Y. Yau and H. Wang

An approach to the vision tasks involved in an autonomous crop protection vehicle

J. M. Sanchiz, F. Pla and J. A. Marchant

The effective-field of view paradigm – adding representation to a reactive system

F. Z. Brill, G. S. Wasson, G. J. Ferrer and W. N. Martin

Sensing the 3rd dimension in stereo vision systems – a cellular neural networks approach

A. Zanela and S. Taraglio

Real-time tracking of intersections in image sequences of a moving camera

F. Heimes and H. H. Nagel

A behavior-based approach to active stereo vision for mobile robots

E. Huber and D. Kortenkamp

Color machine vision for autonomous vehicles

S. D. Buluswar and B. A. Draper

Robust real-time detection of an underwater pipeline

P. Zingaretti and S. M. Zanoli

A qualitative approach to model-reference adaptive-control (QMRAC)

R. Leitch, U. Keller and D. Reay

An integrated model-based approach for real-time online diagnosis of complex-systems

F. D. McKenzie, A. J. Gonzalez and R. Morris

Monitoring the process of curing of epoxy/graphite fiber composites with a recurrent neural-network as a soft sensor

H. B. Su, L. T. Fan and J. R. Schlup

A real-time short-term peak and average load forecasting system using a self-organizing fuzzy neural-network

P. K. Dash, H. P. Satpathy and A. C. Liew

Vol. 11 No. 3

Articles

A memory-based technique for optimal structural design

J. A. Bland

Application of model-based reasoning to the development of intelligent cae systems

Q. Li and W. J. Zhang

Object-oriented knowledge-based automatic cell programming environment

K. Choi and A. Fahim

Generalized predictive control using genetic algorithms (GAGPC)

M. Martinez, J. S. Senent and X. Blasco

Solutions to systems of nonlinear equations via a genetic algorithm

C. L. Karr, B. Weck and L. M. Freeman

Aircraft conceptual design by genetic/gradient-guided optimization

A. H. W. Bos

Geno-fuzzy control in autonomous servicing of a space station

G. Ortega and J. M. Gironsierra

Real-time control of systems with unknown and varying time-delays, using neural networks

G. W. Ng and P. A. Cook

Helicopter station-keeping – comparing LQR, fuzzy logic and neural-net controllers

D. McLean and H. Matsuda

A method to speed-up the Bayes classifier

C. H. Leung and L. Sze

Expert-system for the detection of Apnea

P. M. MacEy, J. S. J. Li and R.P. K. Ford

Efficient validation of matching hypotheses using Mahalanobis distance

J. M. M. Montiel and L. Montano

Expert systems with applications

Vol. 14 No. 3

Articles

EECB – a knowledge elicitation tool based on repertory grid and city-block metric

J. R. Parama, M. R. Penabad, N. R. Brisaboa and A. Alonsobetanzos

A framework for developing an expert analysis and forecasting system for construction projects

H. Altabtabai

Expert-system for analysis of electron-atom scattering energy-loss spectra

V. Cvjetkovic, V. Bocvarski and B. Radenkovic

An object-oriented configuration-design method for paper feeding mechanisms

D. Y. Koo, S. H. Han and S. H. Lee

A process planning expert-system based on a flexible digit length coding scheme

B. Jiang, H. Lau and F. T. S. Chan

Elaborating the problem-solving model of a fault-diagnosis expert-system by knowledge level prototyping

P. Tchounikine, C. Choquet and Z. Istenes

A regenerative expert-system approach for the maintenance of expert-systems

J. K. Lee and J. S. Hong

Fuzzy-logic modeling for performance-appraisal systems – a framework for empirical evaluation

A. Shaout and M. Alshammari

An integrated knowledge-based system for alternative design and materials selection and cost estimating

A. Mohamed and T. Celik

Expert membrane system-design and selection for metal-finishing waste-water treatment

M. Heller, S. Garlapati and K. Aithala

Rule-based approach for real-time reactive power-control in interconnected power-systems

M. A. H. Elsayed

ILA – an inductive learning algorithm for rule extraction

M. R. Tolun and S. M. Abusoud

Knowledge-based process-control supervision and diagnosis – the aerolid approach

C. A. Gonzalez, G. Acosta, J. Mira and C. Deprada

Domain-specific design of a nondestructive health monitoring expert-system

S. J. Kang and S. I. Chien

Knowledge sharing and reuse for engineering design integration

K. M. Chao, P. Smith, W. Hills, B. Florida-james and P. Norman

Vol. 14 No. 4

Articles

Distributed Intelligent Architecture for Logistics (DIAL)

G. Satapathy, S. R. T. Kumara and L. M. Moore

Use of an expert-system in a personnel-selection process

R. S. Hooper, T. P. Galvin, R. A. Kilmer and J. Liebowitz

Knowledge-based expert-systems – critiquing versus conventional approaches

A. Shepherd

Intelligent technologies for nuclear-power systems – heuristic and neural tools

E. Nissan

Fuelgen – a genetic algorithm-based system for fuel loading pattern design in nuclear-power reactors

J. Zhao, B. Knight, E. Nissan and A. Soper

Application of an artificial neural-network to improve short-term road ice forecasts

J. Shao

A purely object-oriented approach for rule-based paradigms

Z. Boufricheboufaida

Vol. 15 No. 1

Articles

Application of data mining tools to hotel data mart on the intranet for database marketing

S. H. Ha and S. C. Park

Krol – a knowledge representation object language on top of Prolog

K. Shaalan, M. Rafea and A. Rafea

An adaptive knowledge-acquisition system using generic genetic programming

M. L. Wong

An expert fuzzy classification-system for supporting the grading of student writing samples

J. R. Nolan

Using case-based reasoning for problem-solving in a complex production process

M. K. Park, I. Lee and K. M. Shon

Rule-based constraints programming – application to crew assignment

S. G. Ftulis, M. Giordano and J. J. Pluss

A knowledge-based system for determination of value of constructed facility

H. S. Neap and T. Celik

An expert system-based design of Scara robot

P. Bhatia, J. Thirunarayanan and N. Dave

IEEE transactions on knowledge and data engineering

Vol. 10 No. 2

Articles

Efficient attribute-oriented generalization for knowledge discovery from large databases

C. L. Carter and H. J. Hamilton

Efficient data mining for path traversal patterns

M. S. Chen, J. S. Park and P. S. Yu

Discovering frequent event patterns with multiple granularities in time sequences

C. Bettini, X. S. Wang, S. Jajodia and J. L. Lin

Optimization of rule-based systems using state-space graphs

B. Supan and A. M. K. Cheng

Adome – an advanced object modeling environment

Q. Li and F. H. Lochovsky

Temporal semantic assumptions and their use in databases

C. Bettini, X. S. Wang and S. Jajodia

A decision-model for choosing the optimal level of storage in temporal databases

D. Dey, T. M. Barron and A. N. Saharia

Scalability analysis of declustering methods for multidimensional range queries

B. K. Moon and J. H. Saltz

Differential relational calculus for integrity maintenance

L. V. Orman

Principal interconnections in higher-order hebbian-type associative

J. W. Wang

A qualitative discriminant approach for generating quantitative belief functions

N. Bryson and A. Mobolurin

Vol. 10 No. 3

Articles

Compile-time and runtime analysis of active behaviors

E. Baralis, S. Ceri and S. Paraboschi

Path dictionary – a new access method for query-processing in object-oriented databases

W. C. Lee and D. L. Lee

Temporal association algebra – a mathematical foundation for processing object-oriented temporal databases

S. Y. W. Su, S. J. Hyun and H. H. M. Chen

Hierarchical encoded path views for path query-processing – an optimal-model and its performance evaluation

N. Jing, Y. W. Huang and E. A. Rundensteiner

Collaborative multimedia systems – synthesis of media objects

K. S. Candan, P. V. Rangan and V. S. Subrahmanian

Techniques for update handling in the enhanced client-server DBMS

A. Delis and N. Roussopoulos

Performance analysis of 3 text-join algorithms

W. Y. Meng, C. Yu, W. Wang and N. Rishe

Common subexpression processing in multiple-query processing

F. C. F. Chen and M. H. Dunham

Dependability and performance-measures for the database practitioner

T. J. Teorey and W. T. Ng

Theta-r-string – a geometry-based representation for efficient and effective retrieval of images by spatial similarity

V. N. Gudivada

IEEE transactions on neural networks

Vol. 9 No. 4

Articles

Robust neural-network control of rigid-link electrically driven robots

C. M. Kwan, F. L. Lewis and D. M. Dawson

Control of a nonholonomic mobile robot using neural networks

R. Fierro and F. L. Lewis

Conditional fuzzy clustering in the design of radial basis function neural networks

W. Pedrycz

Noise suppressing sensor encoding and neural signal orthonormalization

R. W. Brause and M. Rippl

Analog neural nonderivative optimizers

M. C. M. Teixeira and S. H. Zak

Averaging, maximum penalized likelihood and Bayesian-estimation for improving gaussian mixture probability density estimates

D. Ormoneit and V. Tresp

Existence, learning, and replication of periodic motions in recurrent neural networks

A. Ruiz, D. H. Owens and S. Townley

Simulated annealing and weight decay in adaptive learning – the Sarprop algorithm

N. K. Treadgold and T. D. Gedeon

A hybrid linear/nonlinear training algorithm for feedforward neural networks

S. McLoone, M. D. Brown, G. Irwin and G. Lightbody

Evaluation of convolutional neural networks for visual recognition

C. Neubauer

Effects of noise in-training patterns on the memory capacity of the fully connected binary Hopfield neural-network – mean-field theory and simulations

L. P. Wang

Bayesian retrieval in associative memories with storage errors

F. T. Sommer and P. Dayan

Comments on approximation capability in $c(r(\bar{n}))$ by multilayer feedforward networks and related problems

G. B. Huang and H. A. Babri

On chaotic simulated annealing

L. P. Wang and K. Smith

Comments on the effects of quantization on multilayer neural networks

O. J. Kwon and S. Y. Bang

Comments on the effects of quantization on multilayer neural networks – authors' reply

G. Dundar and K. Rose

IEEE transactions on robotics and automation

Vol. 14 No. 3

Articles

Predictable scheduling of a job-shop subject to breakdowns

S. V. Mehta and R. M. Uzsoy

Distributed tool sharing in flexible manufacturing systems

T. K. Tsukada and K. G. Shin

Sandros – a dynamic graph search algorithm for motion planning

P. C. Chen and Y. K. Hwang

Moving obstacle detection from a navigating robot

D. Nair and J. K. Aggarwal

Vision-based motion planning and exploration algorithms for mobile robots

C. J. Taylor and D. J. Kriegman

Multivalued distance maps for motion planning on surfaces with moving obstacles

R. Kimmel, N. Kiryati and A. M. Bruckstein

Stochastic similarity for validating human control strategy models

M. C. Nechyba and Y. S. Xu

Learning impedance control for robotic manipulators

C. C. Cheah and D. W. Wang

The bounds and realization of spatial stiffnesses achieved with simple springs connected in parallel

S. G. Huang and J. M. Schimmels

Error analysis and planning accuracy for dimensional measurement in active vision inspection

C. C. Yang, M. M. Marefat and F. W. Ciarallo

Synthesis of sequential controller in the presence of conflicts and free choices

G. Alpan and M. A. Jafari

Active self-calibration of hand-mounted laser range finders

G. Q. Wei and G. Hirzinger

When is an obstacle a perfect obstacle

A. Mukerjee, S. Sharma and R. B. Agrawal

Closed-form forward kinematics solution to a class of hexapod robots

J. Yang and Z. J. Geng

Comments on the kinematics of robot heads

S. Spiess and M. Vincze

Vol. 14 No. 4

Articles

Manufacturing flexibility measurement – a fuzzy-logic framework

N. C. Tsourveloudis and Y. A. Phillis

Visually guided object grasping

R. Horaud, F. Dornaika and B. Espiau

On the symmetrical localization problem

J. B. Gou, Y. X. Chu and Z. X. Li

Design and experimental validation of an odometric and goniometric localization system for outdoor robot vehicles

P. Bonnifait and G. Garcia

Practical pushing planning for rearrangement tasks

O. Benshahar and E. Rivlin

Fault-tolerance for kinematically redundant manipulators – anticipating free-swinging joint failures

J. D. English and A. A. Maciejewski

On the generation of smooth 3-dimensional rigid-body motions

M. Zefran, V. Kumar and C. B. Croke

Desingularization of nonredundant serial manipulator trajectories using puiseux series

J. E. Lloyd

An analytical and experimental investigation of a jet pipe controlled electropneumatic actuator

P. D. Henri, J. M. Hollerbach and A. Nahvi

Hand/eye calibration for electronic assembly robots

H. Q. Zhuang

Simultaneous robot-world and hand-eye calibration

F. Dornaika and R. Horaud

An evidential approach to map-building for autonomous vehicles

D. Pagac, E. M. Nebot and H. Durrantwhyte

Sliding and hopping gaits for the underactuated acrobot

M. D. Berkemeier and R. S. Fearing

Force reflecting telemanipulators with time-delay – stability analysis and control design

A. Eusebi and C. Melchiorri

Unified formulation of robotic systems with holonomic and nonholonomic constraints

X. P. Yun and N. Sarkar

Redesign of hybrid adaptive/robust motion control of rigid-link electrically-driven robot manipulators

C. Y. Su and Y. Stepanenko

IEEE transactions on pattern analysis and machine intelligence

Vol. 20 No. 4

Articles

Robust reweighted map motion estimation

D. G. Sim and R. H. Park

Error guided design of a 3d vision system

N. Georgis, M. Petrou and J. Kittler

Synchronous random-fields and image-restoration

L. Younes

Singularities and regularities on line pictures via symmetrical trapezoids

J. Rocha and R. Bernardino

The Hough transform versus the upwrite

R. A. McLaughlin and M. D. Alder

A pixel dissimilarity measure that is insensitive to image sampling

S. Birchfield and C. Tomasi

Fast chain coding of region boundaries

P. Zingaretti, M. Gasparroni and L. Vecchi

Ordinal measures for image correspondence

D. N. Bhat and S. K. Nayar

Incremental arc segmentation algorithm and its evaluation

W. Y. Liu and D. Dori

Detection of text regions from digital engineering drawings

Z. Y. Lu

Decision rule for pattern-classification by integrating interval feature values

T. Horiuchi

Vol. 20 No. 5

Articles

A volumetric/iconic frequency-domain representation for objects with application for pose invariant face recognition

J. Benarie and D. Nandy

The selection of natural scales in 2d images using adaptive gabor filtering

J. Fdezvaldivia, J. A. Garcia, J. Martinezbaena and X. R. Fdezvidal

Range imaging with adaptive color structured light

D. Caspi, N. Kiryati and J. Shamir

Segmenting images corrupted by correlated noise

T. C. M. Lee

A new algorithm for error-tolerant subgraph isomorphism detection

B. T. Messmer and H. Bunke

Veinerization – a new shape-description for flexible skeletonization

M. P. Deseilligny, G. Stamon and C. Y. Suen

Learning string-edit distance

R. S. Ristad and P. N. Yianilos

Bayesian-estimation for homogeneous and inhomogeneous gaussian random-fields

R. G. Aykroyd

Full volumetric descriptions from 3 intensity images

P. Havaldar and G. Medioni

Energy minimization of contours using boundary-conditions

S. Chandran and A. K. Potty

Nonlinear motion estimation using the supercoupling approach

M. Bober, M. Petrou and J. Kittler

Offline recognition of Chinese handwriting by multifeature and multilevel classification

Y. Y. Tang, L. T. Tu, J. M. Liu, S. W. Lee, W. W. Lin and I. S. Shyu

Fast design of reduced-complexity nearest-neighbor classifiers using triangular inequality

E. W. Lee and S. I. Chae

On the reduction of the nearest-neighbor variation for more accurate classification and error-estimates

A. Djouadi

Intrinsic dimensionality estimation with optimally topology preserving-maps

J. Bruske and G. Sommer

Vol. 20 No. 6

Articles

A unified approach to moving object detection in 2d and 3d scenes

M. Irani and P. Anandan

Degraded image-analysis – an invariant approach

J. Flusser and T. Suk

Pictorial recognition of objects employing affine invariance in the frequency-domain

J. Benarie and Z. Q. Wang

Stochastic relaxation on partitions with connected components and its application to image segmentation

J. P. Wang

Support vector machines for 3d object recognition

M. Pontil and A. Verri

Binary restoration of thin objects in multidimensional imagery

J. E. Boyd and J. Meloche

Recovering affine motion and defocus blur simultaneously

Z. Myles and N. D. Lobo

Risk-sensitive filters for recursive estimation of motion from images

M. Jayakumar and R. N. Banavar

Conundrum of combinatorial complexity

L. I. Perlovsky

Vol. 20 No. 7**Articles**

An analytic-to-holistic approach for face recognition based on a single frontal view

K. M. Lam and H. Yan

Junctions – detection, classification, and reconstruction

L. Parida, D. Geiger and R. Hummel

Local scale control for edge-detection and blur estimation

J. H. Elder and S. W. Zucker

On the optimization criteria used in 2-view motion analysis

Z. Y. Zhang

Informys – a flexible invoice-like form-reader system

F. Cesarini, M. Gori, S. Marinai and G. Soda

The vector-gradient hough transform

R. Cucchiara and F. Filicori

Rotation-invariant texture features and their use in automatic script identification

T. N. Tan

A list-processing approach to compute voronoi diagrams and the euclidean distance transform

W. G. Guan and S. D. Ma

Comments on geodesic saliency of watershed contours and hierarchical segmentation

C. Lemarechal, R. Fjortoft, P. Marthon and

E. Cuberocastan

Response to the comment on geodesic saliency of watershed contours and hierarchical segmentation

M. Schmitt

International journal of computer vision**Vol. 28 No. 1****Articles**

Adaptive road recognition and ego-state tracking in the presence of obstacles

W. Kasprzak and H. Niemann

Robust shape recovery from occluding contours using a linear smoother

R. Szeliski and R. Weiss

New visual invariants for terrain navigation without 3d reconstruction

G. S. Young, M. Herman, T. H. Hong, D. Jiang and

J. C. S. Yang

Polarization phase-based method for material classification in computer vision

H. Chen and L. B. Wolff

Continuous-time matching constraints for image streams

K. Astrom and A. Heyden

Vol. 28 No. 2**Articles**

Synthesis of novel views from a single face image

T. Vetter

Quasi-invariant parameterisations and matching of curves in images

J. Sato and R. Cipolla

Ambiguity in structure-from-motion – sphere versus plane

C. Fermuller and Y. Aloimonos

Stereo matching with nonlinear diffusion

D. Scharstein and R. Szeliski

Temporal analysis of motion in video sequences through predictive operators

P. Burlina and R. Chellappa

International journal of intelligent systems**Vol. 13 No. 6****Articles**

Introduction – hybrid intelligent adaptive systems

N. Kasabov and R. Kozma

Hybrid intelligent adaptive systems – a framework and a case-study on speech recognition

N. Kasabov and R. Kozma

A proposal of abductive inference with degrees of manifestations

Y. Miyata, T. Furuhashi and Y. Uchikawa

Evolutionary modular neural networks for intelligent systems

S. B. Cho

Error prediction for neural networks by fuzzification

T. Feuring and W. M. Lippe

Adaptive-intelligent control by neural-net systems

Y. Yamazaki, G. Kang and M. Ochiai

Integration of connectionist methods and chaotic time-series analysis for the prediction of process data

R. Kozma, N. K. Kasabov, J. S. Kim and A. Cohen

On the development of an intelligent control-system for recombinant cell-culture

K. Ye, S. Jin and K. Shimizu

Toward learning individual characteristics in a hybrid neuro-fuzzy wheelchair controller

D. Corbett and P. Martinez

A neuro-controller for synchronization of 2 motion axes

H. C. Lee and G. J. Jeon

Vol. 13 No. 7**Articles**

A rule-based approach to producing z-specification from Jackson system-development

J. Lee and J. I. Pan

Note on ranking fuzzy triangular numbers

G. Facchinetti, R. G. Ricci and S. Muzzioli

An approach to everyday language computing – an application to forecast of atmospheric-pressure distribution

I. Kobayashi and M. Sugeno

The integrity constraints for similarity-based fuzzy relational databases

A. Yazici and M. I. Sozat

New modes of OWA information fusion

R. R. Yager

Vol. 13 No. 8**Articles**

On the possibility of using complex values in fuzzy-logic for representing inconsistencies

H. T. Nguyen, V. Kreinovich and V. Shekhter

The role of assumptions in knowledge engineering

D. Fensel and V. R. Benjamins

Engineering of highly autonomous biosystems – review of the relevant literature

O. G. Clark and R. Kok

International journal of software engineering and knowledge engineering

Vol. 8 No. 1

Articles

Special issue – best papers from SEKE96 – guest editors introduction

J. E. Urban and D. E. Cooke

An evaluation of knowledge engineering approaches to the maintenance of evolutionary software

C. Chandra and C. V. Ramamoorthy

The design of an expert-system for domain knowledge engineering and decision-making – a case-study in the criminal-justice system

O. A. Agyapong and P. O. Bobbie

Reinas – a real-time system for managing environmental data

E. C. Rosen, T. R. Haining, D. D. E. Long, P. E. Mantey and C. M. Wittenbrink

Distributed systems management software-in-the-loop

B. J. Kramer and T. Koch

Scientific-data mining – a case-study

C. Y. Chang, J. T. L. Wang and R. K. Chang

A fast 3-d visualization methodology using characteristic views of objects

S. Hwang, S. Y. Cho, T. H. Wang and P. C. Y. Sheu

A large memory storage and retrieval neural-network for adaptive retrieval and diagnosis

D. Graupe and H. Kordylewski

An active multimedia information-system for information-retrieval, discovery and fusion

S. K. Chang, D. Graupe, K. Hasegawa and H. Kordylewski

Vol. 8 No. 2

Articles

Metrics for concept-oriented knowledge bases

T. C. Lethbridge

Deriving identity from extensionality

A. H. M. Terhofstede and T. P. Vanderweide

Task-analysis and design plans in formal specification design

P. Alexander

A formal definition of FRSM and applications

S. Y. Liu

A formal methodology for analyzing tradeoffs of imprecise requirements

J. Yen and W. A. Tiao

Journal of intelligent & robotic systems

Vol. 22 No. 2

Articles

Special issue – robot modeling, path planning and control – guest editorial

I. Troch and F. Breitenecker

Path planning and control of a cooperative 3-robot system manipulating large objects

C. S. Tzafestas, P. A. Prokopiou and S. G. Tzafestas

Path planning for robots by stochastic optimization methods

K. Marti and S. Qu

Multisensor fusion – an autonomous mobile robot

F. Matia and A. Jimenez

Singular perturbation model of robots with elastic joints and elastic links constrained by rigid environment

P. Rocco

Application of model-reference adaptive-control to industrial robot impedance control

R. Kamnik, D. Matko and T. Bajd

Modeling and model-fitting of flexible robots – a multibody system toolkit approach

W. Bernzen, B. Riege and S. Hartmann

Journal of logic programming

Vol. 35 No. 2

Articles

Data-parallel concurrent constraint programming

B. M. Tong and H. F. Leung

A logical foundation for logic programming I –

Biconsequence relations and nonmonotonic completion

A. Bochman

A logical foundation for logic programming II – semantics of general logic programs

A. Bochman

Vol. 35 No. 3

Articles

Expanding queries to incomplete databases by interpolating general logic programs

C. Baral, M. Gelfond and O. Kosheleva

Deductive query languages for recursively typed complex objects

R. Hull and J. W. Su

Datalog with integer periodicity constraints

D. Toman and J. Chomicki

Vol. 36 No. 1

Articles

Polymorphic type analysis in logic programs by abstract interpretation

L. J. Lu

Subsumption-stratified datalog

M. Meskes

Vol. 36 No. 2

Articles

Combining negation as failure and embedded implications in logic programs

L. Giordano and N. Olivetti

Creating specialized integrity checks through partial evaluation of meta-interpreters

M. Leuschel and D. Deschreye

Vol. 36 No. 3

Articles

Logicweb – enhancing the web with logic programming

S. W. Loke and A. Davison

The theoretical foundations of LPTP (a logic program theorem prover)

R. F. Stark

Relationlog – a typed extension to datalog with sets and tuples

M. C. Liu

Journal of symbolic computation

Vol. 25 No. 5

Articles

Bounds for absolute positiveness of multivariate polynomials

H. Hong

The search for the maximum of a polynomial

A. Y. Uteshev and T. M. Cherkasov

Systems of algebraic equations with bad reduction

R. Nauheim

Groebner basis under composition-i

H. Hong

Descriptions of groups of prime-power order

M. F. Newman, W. Nickel and A. C. Niemeyer

Vol. 25 No. 6

Articles

The theory of involutive divisions and an application to Hilbert function computations

J. Apel

Differential-equations and algebraic relations

E. Compoint

Generating a noetherian normalization of the invariant ring of a finite-group

W. Decker, A. E. Heydtmann and F. O. Schreyer

A deterministic lazy narrowing calculus

A. Middeldorp and S. Okui

Infinite string rewrite systems and complexity

J. C. Birget

Vol. 26 No. 1

Articles

Rational parametrization of surfaces

J. Schicho

Advances on the simplification of sine-cosine equations

J. Gutierrez and T. Recio

Modular arithmetic for linear algebra computations in the real field

I. Z. Emiris, V. Y. Pan and Y. Q. Yu

An algorithm for solving the factorization problem in permutation-groups

T. Minkwitz

Negation elimination in empty or permutative theories

M. Fernandez

Vol. 26 No. 2

Articles

Sparsification of rectangular matrices

S. Egner and T. Minkwitz

On 2-parametric quartic families of diophantine problems

A. Petho and R. F. Tichy

On a family of quintic thue equations

C. Heuberger

Noncommutative elimination in ore algebras proves multivariate identities

F. Chyzak and B. Salvy

A parallel implementation of Buchberger algorithm over $\mathbb{Z}(p)$ for $p \leq 31991$

A. A. Reeves

An algebraic computational approach to the identifiability of fourier models
