AI magazine

Vol. 20 No. 1

Articles

The Innovative Applications of Artificial Intelligence Conference

B. Buchanan and S. Uthurusamy

Knowledge-based avoidance of drug-resistant HIV mutants

R. H. Lathrop, N. R. Steffen, M. P. Raphael, S. Deeds Rubin, M. J. Pazzani, P. J. Cimoch, D. M. See and J. G. Tilles

Automated intelligent pilots for combat might simulation

R. M. Jones, J. E. Laird, P. E. Nielsen, K. J. Coulter, P. Kenny and F. V. Koss

A new technique enables dynamic replanning and rescheduling of aeromedical evacuation

A. Kott, V. Saksand A. Mercer

The NASD regulation advanced-detection system (ADS)

J. D. Kirkland, T. E. Senator, J. J. Hayden, T. Dybala, H. G. Goldberg and P. Shyr

Turbine engine diagnostics (TED) – An expert diagnostic system for the M1 Abrams turbine engine

R. Helfman, E. Baur, J. Dumer, T. Hanratty and H. Ingham

Automated deduction – Looking ahead

D. W. Loveland

Practically coordinating

E. H. Durfee

AI game-playing techniques: Are they useful for anything other than games? A synopsis of the panel discussion at IAAI-98

D. S. Nau

Applied artificial intelligence

Vol. 13 No. 3

Special issue: Socially intelligent agents, part II

Toward social robotics

K. Sekiyama and T. Fukuda

Goal-based personalities and social behaviors in believable agents

P. Rizzo, M. M. Veloso, M. Miceli and A. Cesta

Getting personal with computers: How to design personalities for agents

D. C. Dryer

Designing believable interaction by applying social conventions

G. Mark and B. Becker

Exploring the effects of agent trust and benevolence in a simulated organizational task

M. Prietula and K. M. Carley

Vol. 13 Nos. 4–5

Articles

Animated interface agents: Making them intelligent

E. Andre

Animated agents for procedural training in virtual reality: Perception, cognition, and motor control

J. Rickel and W. L. Johnson

Deictic believability: Coordinated gesture, locomotion, and speech in lifelike pedagogical agents

J. C. Lester, J. L. Voerman, S. G. Towns and C. B. Callaway

Employing AI methods to control the behavior of animated interface agents

E. Andre, T. Rist and J. Muller

A mind model for multimodal communicative creatures and humanoids

K. R. Thorisson

Animated interface agent applying ATMS-based multimodal input interpretation

Y. Kono, T. Yano, T. Ikeda, T. Chino, K. Suzuki and H. Kanazawa

The power of a nod and a glance: Envelope vs. emotional feedback in animated conversational agents

J. Cassell and K. R. Thorisson

Conferring human action recognition skills to life-like agents

L. Emering, R. Boulic and D. Thalmann

Applied intelligence

Vol. 10 No. 1

Articles

Solving electrical distribution problems using hybrid evolutionary data analysis techniques

O. Cordon and F. Herrera

Planar grasping characterization based on curvature-symmetry fusion

P. J. Sanz, J. M. Inesta and A. P. DelPobil

A model-based diagnosis system for identifying faulty components in digital circuits

B. Han, S. J. Lee and H. T. Yang

Real-time dynamic visual tracking using PSD sensors and extended trapezoidal motion planning

S. H. Nam and S. Y. Oh

A new symmetric probabilistic encryption scheme based on chaotic attractors of neural networks

D. H. Guo

Constructing information bases using associative structures

H. Maeda, K. Koujitani and T. Nishida

Artificial intelligence

Vol. 107 No. 1

Articles

Portability by automatic translation: A large-scale case study

Y. A. Feldman and D. A. Friedman

Dynamic generation, management and resolution of interactive plots

N. M. Sgouros

Reasoning about nondeterministic and concurrent actions: A process algebra approach

X. J. Chen and G. DeGiacomo

Fast Bayes and the dynamic junction forest

J. Q. Smith and K. N. Papamichail

Using constraint metaknowledge to reduce arc consistency computation

C. Bessiere, E. C. Freuder and J. C. Regin

Maintaining reversible DAC for Max-CSP

J. Larrosa, P. Meseguer and T. Schiex

Vol. 107 No. 2

Articles

The complexity of theory revision

R. Greiner

Logical analysis of binary data with missing bits

E. Boros, T. Ibaraki and K. Makino

Computing a representation of the local environment

W. K. Yeap and M. E. Jefferies

Expressiveness of concept expressions in first-order description logics

N. Kurtonina and M. deRijke

Principles of human-computer collaboration for knowledge discovery in science

R. E. Valdes Perez

Adaptive regularization parameter selection method for enhancing generalization capability of neural networks

C. T. Leung and T. W. S. Chow

Vol. 108 Nos. 1–2

Articles

Functional dependencies in Horn theories

T. Ibaraki, A. Kogan and K. Makino

Linear-time algorithms for testing the realisability of line drawings of curved objects

M. C. Cooper

On the complexity of qualitative spatial reasoning:

A maximal tractable fragment of the Region Connection Calculus

J. Renz and B. Nebel

Explanatory update theory: Applications of counterfactual reasoning to causation

C. L. Ortiz

Heterogeneous active agents, I: Semantics

T. Eiter, V. S. Subrahmanian and G. Pick

Heterogeneous active agents, II: Algorithms and complexity

T. Eiter and V. S. Subrahmanian

A foundational theory of belief and belief change

A. Bochman

Artificial intelligence in engineering

Vol. 13 No. 2

Articles

Training Elman and Jordan networks for system identification using genetic algorithms

D. T. Pham and D. Karaboga

Self-tuning fuzzy controller design using genetic optimisation and neural network modelling

D. T. Pham and D. Karaboga

An extended Kalman filter and neural network cascade fault diagnosis strategy for the glutamic acid fermentation process

W. Liu

Autonomous agent based on reinforcement learning and adaptive shadowed network

B. Jerbic, K. Grolinger and B. Vranjes

Adaptive navigation of autonomous vehicles using evolutionary algorithms

A. C. Nearchou

Model switching in intelligent control systems

M. Ravindranathan and R. Leitch

Artificial neural networks as applied to long-term demand forecasting

T. Al Saba and I. El Amin

Artificial intelligence review

Vol. 13 No. 1

Articles

Separate-and-conquer rule learning

J. Furnkranz

Developing knowledge-based intelligent multimedia tutoring systems using semantic content-based modelling

H. W. Agius and M. C. Angelides

A survey of automated timetabling

A. Schaerf

Genetic algorithms for the travelling salesman problem: A review of representations and operators

P. Larranaga, C. M. H. Kuijpers, R. H. Murga, I. Inza and S. Dizdarevic

Computers and artificial intelligence

Vol. 18 No. 1

Articles

On Yager's theory of bags and fuzzy bags

K. Chakrabarty, R. Biswas and S. Nanda

A unified approach to fast computation of discrete sinusoidal transforms II: DFT and DWT transforms

V. Britanak

Distributed tree processing devices

Z. Fulop

An event structure model for dataflow computing

I. B. Virbitskaite

Multiple-output multilevel logic circuits synthesis technique using multiplexers

M. Kolesar

Engineering applications of artificial intelligence

Vol. 12 No. 1

Articles

Real-time adaptive neural control of a class of nonlinear systems

I. Lizarraga and V. Etxebarria

Neural-network-based d-step-ahead predictors for nonlinear systems with time delay

Y. H. Tan and A. Van Cauwenberghe

Multiagent AI implementations an emerging software engineering trend

C. F. Nourani

A framework for developing an agent-based collaborative service-support system in a manufacturing information network

S. K. Tso, H. C. W. Lau, J. K. L. Ho and W. J. Zhang

Decomposition of interacting features using a Kohonen self-organizing feature map neural network

A. H. Zulkifli and S. Meeran

Fuzzy modeling of enzymatic penicillin-G conversion

R. Babuska, H. B. Verbruggen and H. J. L. van Can

On-line learning of fuzzy decision trees for global path planning

G. H. S. Hamzei and D. J. Mulvaney

Vol. 12 No. 2

Articles

A competitive continuous Hopfield neural network for vector quantization in image compression

J. S. Lin and S. H. Liu

PLA using RLSA and a neural network

C. Strouthopoulos, N. Papamarkos and C. Chamzas

Handwritten character recognition using low resolutions

N. G. Bourbakis, C. Koutsougeras and A. Jameel

Neural predictive control. Application to a highly nonlinear system

J. M. Zamarrero and P. Vega

A study of advanced learning algorithms for short-term load forecasting

V. S. Kodogiannis and E. M. Anagnostakis

Banknote recognition by means of optimized masks, neural networks and genetic algorithms

F. Takeda, T. Nishikage and S. Omatu

Genetic adaptive identification and control

W. K. Lennon and K. M. Passino

Genetic algorithm frequency-domain optimization of an anti-resonant electromechanical controller

D. A. Scott, C. L. Karr and D. E. Schinstock

A knowledge-based system to represent spatial reasoning for fire modelling

B. Knight, S. Taylor, M. Petridis, J. Ewer and E. R. Galea

Design knowledge representation in Prolog/Rex

S. Vranes and M. Stanojevic

Hybrid expert system for qualitative and quantitative analysis of truss structures

Z. Kulpa, A. Radomski, O. Gajl, M. Kleiber and I. Skalna

Expert systems with applications

Vol. 16 No. 1

Special issue: Artificial intelligence applications in China

ASSG – an expert system for sandy grasslands in North China

N. Liang and Q. Gao

Combining dynamic neural networks and image sequences in a dynamic model for complex industrial production processes

S. M. Zhou

An intelligent decision support system for fuzzy comprehensive evaluation of urban development

S. Feng and L. D. Xu

Knowledge-based problem solving: an approach to health assessment

L. L. X. Li

A fuzzy adaptive method for intelligent control

W. J. Wang and B. Y. Tang

Improving the accuracy of nonlinear combined forecasting using neural networks

S. M. Shi, L. D. Xu and B. Liu

An integrated intelligent system for ceramic kilns

Z. B. Chen, H. Zhang and Z. H. Zhu

Applying AI to railway freight loading

G. Y. Geng, B. Zhang, J. Zhu and C. H. Zhong

CMEOC – An expert system in the coal mining industry

H. Zhang and G. H. Zhao

Rule selections in fuzzy expert systems

V. C. Yen

Vol. 16 No. 2

Articles

Case-based reasoning supported by genetic algorithms for corporate bond rating

K. S. Shin and I. Han

An approach to case-based system for conceptual ship design assistant

D. Lee and K. H. Lee

DSTM: a framework to operationalise and refine a problem solving method modeled in terms of tasks and methods

F. Trichet and P. Tchounikine

A computational study on design and performance issues of multi-agent intelligent systems for dynamic scheduling environments

P. C. Pendharkar

A model-based expert control system for the leaching process in zinc hydrometallurgy

M. Wu, M. Nakano and J. H. She

Memory and neural network based expert system

C. K. Shin and S. C. Park

Intelligent diagnostic system for a solar heating system

C. K. Sun, C. W. Chan and P. Tontiwachwuthikul

Modeling knowledge-based anytime computation

A. I. Mouaddib

AHA: a knowledge based system for automatic hazard identification in chemical plant by multimodel approach

B. Kang, B. Lee, K. W. Kang, J. C. Suh and E. S. Yoon

Impacts of knowledge based systems: beyond anecdotes and checklists

B. van Wegen and R. de Hoog

Knowledge based planning of military engineering tasks

C. D. Butler, G. Boggess and S. Bridges

An embedded hybrid neural network and expert system in a computer-aided design system

V. L. Zakarian and M. J. Kaiser

A knowledge-based consulting system for process modeling in systems analysis

T. Lee and B. O. Kim

Knowledge-based expert systems: critiquing versus conventional approaches

A. Shepherd

Vol. 16 No. 3

Articles

Automatic acquisition of biographic knowledge from encyclopedic texts

R. Hull and F. Gomez

A model-based expert control strategy using neural networks for the coal blending process in an iron and steel plant

M. Wu, M. Nakano and J. H. She

Evaluating the efficiency of system integration projects using data envelopment analysis (DEA) and machine learning

H. K. Hong, S. H. Ha, C. K. Shin, S. C. Park and S. H. Kim

Multi-agent modeling of dispersed manufacturing networks

W. B. Lee and H. C. W. Lau

Building a rule-based machine-vision system for defect inspection on apple sorting and packing lines

Z. Q. Wen and Y. Tao

A case-based reasoning system for housing discrimination law

T. Anandanpillai and T. A. Barta

A new task for expert system analysis libraries: the decision task and the HM method

A. M. Riesco, R. M. Tomas and J. M. Mira

IEEE transactions on knowledge and data engineering

Vol. 11 No. 1

Special issue in honor of Professor C.V. (Ram)

Ramamoorthy

Professor Ramamoorthy: A personal introduction

R. T. Yeh

Concurrency control in database systems

B. Bhargava

The indispensability of dispensable indexes

E. Bertino and B. C. Ooi

State of the art in parallel search techniques for discrete optimization problems

A. Grama and V. Kumar

Temporal data management

C. S. Jensen and R. T. Snodgrass

Spatial databases – Accomplishments and research needs

S. Shekhar, S. Chawla, S. Ravada, A. Fetterer, X. Liu and C. T. Lu

Techniques and systems for image and video retrieval

Y. A. Aslandogan and C. T. Yu

Semantic modeling and knowledge representation in multimedia databases

W. Al Khatib, Y. F. Day, A. Ghafoor and P. B. Berra

A survey on content-based retrieval for multimedia databases

A. Yoshitaka and T. Ichikawa

Caching on the World Wide Web

C. Aggarwal, J. L. Wolf and P. S. Yu

Mobile computing and databases – A survey

D. Barbara

Warehouse creation – A potential roadblock to data warehousing

J. Srivastava and P. Y. Chen

Agents in a nutshell – A very brief introduction

C. C. Hayes

Cooperative multiagent systems: A personal view of the state of the art

V. R. Lesser

Nonmonotonic logic programming

V. S. Subrahmanian

Fuzzy logic – A modern perspective

J. Yen

Rule-induction and case-based reasoning: Hybrid architectures appear advantageous

N. Cercone, A. J. An and C. Chan

Generalization and generalizability measures

B. W. Wah

Knowledge-based software architectures: Acquisition, specification, and verification

J. J. P. Tsai, A. Liu, E. Juan and A. Sahay

Verification and validation of knowledge-based systems

W. T. Tsai, R. Vishnuvajjala and D. Zhang

Data management issues and trade-offs in CSCW systems

A. Prakash, H. S. Shim and J. H. Lee

Information survivability for evolvable and adaptable real-time command and control systems

B. M. Thuraisingham and J. A. Maurer

Dynamic configuration management in reliable distributed real-time information systems

K. H. Kim and C. Subbaraman

Software metrics knowledge and databases for project management

R. A. Paul, T. L. Kunii, Y. Shinagawa and M. F. Khan

Vol. 11 No. 2

Articles

Dynamic programming in Datalog with aggregates

S. Greco

Techniques for increasing the stream capacity of a high-performance multimedia server

D. Jadav, A. K. Choudhary and P. B. Berra

Resource scheduling in a high-performance multimedia server

H. W. Pang, B. Jose and M. S. Krishnan

Join index hierarchy: An indexing structure for efficient navigation in object-oriented databases

J. W. Han, Z. H. Xie and Y. J. Fu

A hybrid estimator for selectivity estimation

Y. B. Ling, W. Sun, N. D. Rishe and X. J. Xiang

Proof of the correctness of EMYCIN sequential propagation under conditional independence assumptions

X. D. Luo and C. Q. Zhang

IEEE transactions on neural networks

Vol. 10 No. 2

Articles

Estimations of error bounds for neural-network function approximators

N. W. Townsend and L. Tarassenko

Conditional probability density function estimation with sigmoidal neural networks

A. Sarajedini, R. Hecht Nielsen and P. M. Chau

Adding learning to cellular genetic algorithms for training recurrent neural networks

K. W. C. Ku, M. W. Mak and W. C. Siu

On-line learning algorithms for locally recurrent neural networks

P. Campolucci, A. Uncini, F. Piazza and B. D. Rao

Fixed-weight on-line learning

A. S. Younger, P. R. Conwell and N. E. Cotter

Extracting finite-state representations from recurrent neural networks trained on chaotic symbolic sequences

P. Tino and M. Koteles

Neural networks for identification of nonlinear systems under random piecewise polynomial disturbances

Y. Z. Tsyppkin, J. D. Mason, E. D. Avedyan, K. Warwick and I. K. Levin

Recurrent neuro-fuzzy networks for nonlinear process modeling

J. Zhang and A. J. Morris

Modeling of nonlinear nonstationary dynamic systems with a novel class of artificial neural networks

M. Iatrou, T. W. Berger and V. Z. Marmarelis

Dynamic neural controllers for induction motor

M. A. Brdys and G. J. Kulawski

- A topological and temporal correlator network for spatiotemporal pattern learning, recognition, and recall
N. Srinivasa and N. Ahuja
- Super-resolution of images based on local correlations
F. M. Candocia and J. C. Principe
- Image interpolation for progressive transmission by using radial basis function networks
T. Sigitani, Y. Iiguni and H. Maeda
- Improved training of neural networks for the nonlinear active control of sound and vibration
M. Bouchard, B. Paillard and C. T. LeDinh
- A comparison between neural-network forecasting techniques – Case study: River flow forecasting
A. F. Atiya, S. M. El Shoura, S. I. Shaheen and M. S. El Sherif
- Fast initialization for cascade-correlation learning
M. Lehtokangas
- Worst case analysis of weight inaccuracy effects in multilayer perceptrons
D. Anguita, S. Ridella and S. Rovetta
- Visualization of neural-network gaps based on error analysis
M. M. Kantardzic, A. A. Aly and A. S. Elmaghraby
- A method to determine the required number of neural-network training repetitions
M. S. Iyer and R. R. Rhinehart
- Identification of a specific limitation on local-feedback recurrent networks acting as Mealy-Moore machines
S. C. Kremer
- Face recognition using the nearest feature line method
S. Z. Li and J. W. Lu
- Hopfield network with constraint parameter adaptation for overlapped shape recognition
P. N. Suganthan, E. K. Teoh and D. P. Mital
- A practical radial basis function equalizer
J. Lee, C. Beach and N. Tepedelenlioglu
- Augmented Hopfield network for mixed-integer programming
M. P. Walsh, M. E. Flynn and M. J. O'Malley
- Vol. 10 No. 3**
- Overview of pulse coupled neural network (PCNN) special issue
J. L. Johnson, M. L. Padgett and O. Omidvar
- Neural mechanisms of scene segmentation: Recordings from the visual cortex suggest basic circuits for linking field models
R. Eckhorn
- PCNN models and applications
J. L. Johnson and M. L. Padgett
- Class 1 neural excitability, conventional synapses, weakly connected networks, and mathematical foundations of pulse-coupled models
E. M. Izhikevich
- Weakly pulse-coupled oscillators, FM interactions, synchronization, and oscillatory associative memory
E. M. Izhikevich
- An accelerator for neural networks with pulse-coded model neurons
G. Frank, G. Hartmann, A. Jahnke and M. Schafer
- Analog implementation of pulse-coupled neural networks
Y. Ota and B. M. Wilamowski
- Frequency-based multilayer neural network with on-chip learning and enhanced neuron characteristics
H. Hikawa
- Physiologically motivated image fusion for object detection using a pulse coupled neural network
R. P. Broussard, S. K. Rogers, M. E. Oxley and G. L. Tarr
- Range image segmentation using a relaxation oscillator network
X. W. Liu and D. L. L. Wang
- A retina with parallel input and pulsed output, extracting high-resolution information
M. J. Wilcox and D. C. Thelen
- Implementation of pulse-coupled neural networks in a CNAPS environment
J. M. Kinser and T. Lindblad
- Perfect image segmentation using pulse coupled neural networks
G. Kuntimad and H. S. Ranganath
- Smart adaptive optic systems using spatial light modulators
N. Clark, M. Banish and H. S. Ranganath
- Finding the shortest path in the shortest time using PCNNs
H. J. Caulfield and J. M. Kinser
- Inherent features of wavelets and pulse coupled networks
T. Lindblad and J. M. Kinser
- Object detection using pulse coupled neural networks
H. S. Ranganath and G. Kuntimad
- Foveation by a pulse-coupled neural network
J. M. Kinser
- Fast and robust fixed-point algorithms for independent component analysis
A. Hyvarinen
- Inhibitory synapses in neural networks with sigmoidal nonlinearities
F. Palmieri, C. Catello and G. Dorio
- Cost functions to estimate a posteriori probabilities in multiclass problems
J. CidSueiro, J. I. Arribas, S. Urban Munoz and A. R. Figueiras Vidal
- Reformulated radial basis neural networks trained by gradient descent
N. B. Karayiannis
- Multilayer feedforward networks with adaptive spline activation function
S. Guarnieri, F. Piazza and A. Uncini
- Separation of speech from interfering sounds based on oscillatory correlation
D. L. L. Wang and G. J. Brown
- Microcode optimization with neural networks
S. Bharitkar, K. Tsuchiya and Y. Takefuji
- Dynamics of selective recall in an associative memory model with one-to-many associations
M. Kawamura, M. Okada and Y. Hirai
- Direct adaptive control of partially known nonlinear systems
R. B. McLain, M. A. Henson and M. Pottmann
- A study of cloud classification with neural networks using spectral and textural features
B. Tian, M. A. Shaikh, M. R. Azimi Sadjadi, T. H. VonderHaar and D. L. Reinke

IEEE transactions on pattern analysis and machine intelligence

Vol. 21 No. 2

Articles

- Morphologically constrained GRFs: Applications to texture synthesis and analysis
K. Sivakumar and J. Goutsias
- Motion estimation in image sequences using the deformation of apparent contours
K. Astrom and F. Kahl

Borg: A knowledge-based system for automatic generation of image processing programs

- R. Clouard, A. Elmoataz, C. Porquet and M. Revenu*
- Feature analysis using line sweep thinning algorithm
F. Chang, Y. C. Lu and T. Pavlidis
- A deterministic annealing approach for parsimonious design of piecewise regression models
A. V. Ra, D. J. Miller, K. Rose and A. Gersho

Using evolutionary programming and minimum description length principle for data mining of Bayesian networks

M. L. Wong, W. Lam and K. S. Leung

An automatic closed-loop methodology for generating character groundtruth for scanned documents

T. Kanungo and R. M. Haralick

Selective feature-to-feature adhesion for recognition of cursive handprinted characters

C. Y. Liou and H. C. Yang

Vol. 21 No. 3

Articles

Designing optimal sequential experiments for a Bayesian Classifier

R. Davis and A. Prieditis

Sparse pixel vectorization: An algorithm and its performance evaluation

D. Dori and W. Y. Liu

On the estimation of Markov random field parameters

C. F. Borges

On the estimation of a convex set with corners

P. Hall and B. A. Turlach

True multi-image alignment and its application to mosaicing and lens distortion correction

H. S. Sawhney and R. Kumar

On degeneracy of linear reconstruction from three views:

Linear line complex and applications

G. P. Stein and A. Shashua

A geometric interpretation of weak-perspective motion

I. Shimshoni, R. Basri and E. Rivlin

A handwritten character recognition system using directional element feature and asymmetric mahalanobis distance

N. Kato, M. Suzuki, S. Omachi, H. Aso and Y. Nemoto

Integration of structural and statistical information for unconstrained handwritten numeral recognition

J. H. Cai and Z. Q. Liu

Axiomatic approach to feature subset selection based on relevance

H. Wang, D. Bell and F. Murtagh

Computing the medial axis transform in parallel with eight scan operations

A. Ferreira and S. Ubeda

Performance evaluation and analysis of vanishing point detection techniques

J. A. Shufelt

Vol. 21 No. 4

Articles

Introduction to the special section on empirical evaluation of computer vision algorithms

P. J. Phillips and K. W. Bowyer

Filtering for texture classification: A comparative study

T. Randen and J. H. Husoy

Performance evaluation and analysis of monocular building extraction from aerial imagery

J. A. Shufelt

Evaluation of methods for ridge and valley detection

A. M. Lopez, F. Lumberras, J. Serrat and J. J. Villanueva

Theoretical analysis and improved decision criteria for the n-tuple classifier

T. M. Jorgensen and C. Linneberg

A multichannel approach to fingerprint classification

A. K. Jain, S. Prabhakar and L. Hong

Automatic segmentation of acoustic musical signals using hidden Markov models

C. Raphael

Approximate geometric pattern matching under rigid motions

M. T. Goodrich, J. S. B. Mitchell and M. W. Orletsky

Data compression and local metrics for nearest neighbor classification

F. Ricci and P. Avesani

IEEE transactions on robotics and automation

Vol. 15 No. 1

Articles

Accommodating FMS operational contingencies through routing flexibility

S. A. Reveliotis

Optimal workload allocation between a job shop and an FMS

U. A. W. Tetzlaff and E. Pesch

On the variance of the production output of transfer lines

P. Ciprut, M. O. Hongler and Y. Salama

Ordinal comparison of heuristic algorithms using stochastic optimization

C. H. Chen, S. D. Wu and L. Y. Dai

Feature-based reverse engineering of mechanical parts

W. B. Thompson, J. C. Owen, H. J. D. St Germain,

S. R. Stark and T. C. Henderson

A VLSI sorting image sensor: Global massively parallel intensity-to-time processing for low-latency adaptive vision

V. Brajovic and T. Kanade

Fusing range and intensity images for mobile robot localization

J. Neira, J. D. Tardos, J. Horn and G. Schmidt

An experiment in autonomous navigation of an underground mining vehicle

S. Scheduling, G. Dissanayake, E. M. Nebot and

H. DurrantWhyte

Adaptation of orienting behavior: From the barn owl to a robotic system

M. Rucci, G. H. Edelman and J. Wray

Computing reduced equations for robotic systems with constraints and symmetries

J. P. Ostrowski

Modeling and controlling variation propagation in mechanical assemblies using state transition models

R. Mantripragada and D. E. Whitney

A single closed-loop kinematic chain approach for a hybrid control of two cooperating arms with a passive joint: An application to sawing task

H. J. Yeo, I. H. Suh, B. J. Yi and S. R. Oh

Development of a micro-manipulation system having a two-fingered micro-hand

T. Tanikawa and T. Arai

Qualitative test and force optimization of 3-D frictional form-closure grasps using linear programming

Y. H. Liu

A 3-D modular gripper design tool

R. G. Brown and R. C. Brost

A note on scheduling the two-machine flexible flowshop

T. C. E. Cheng and G. Q. Wang

A methodology for modeling and adaptive planning of disassembly processes

E. Zussman and M. C. Zhou

Vol. 15 No. 2

Articles

Motion planning for all-terrain vehicles: A physical modeling approach for coping with dynamic and contact interaction constraints

M. Cherif

Development and experimental validation of an adaptive extended Kalman filter for the localization of mobile robots

L. Jetto, S. Longhi and G. Venturini

High speed target pursuit and asymptotic stability in mobile robotics

M. D. Adams

- 2-1/2-D visual servoing
E. Malis, F. Chaumette and S. Boudet
- Three-dimensional odor compass
H. Ishida, A. Kobayashi, T. Nakamoto and T. Moriizumi
- Cooperation control of multiple manipulators with passive joints
Y. H. Liu, Y. S. Xu and M. Bergerman
- Almost smooth time-invariant control of planar space multibody systems
R. Mukherjee and M. Kamon
- Spatio-geometric impedance control of Gough-Stewart platforms
E. D. Fasse and C. M. Gosselin
- Six-DOF impedance control based on angle/axis representations
F. Caccavale, C. Natale, B. Siciliano and L. Villani
- Neural network output feedback control of robot manipulators
Y. H. Kim and F. L. Lewis
- Adaptive control of mixed rigid/flexible joint robot manipulators based on virtual decomposition
W. H. Zhu and J. DeSchutter
- Locally controllable manipulation by stable pushing
K. M. Lynch
- An effective approach for job-shop scheduling with uncertain processing requirements
P. B. Luh, D. Chen and L. S. Thakur
- Gross motion characteristics of articulated mobile robots with pure rolling capability on smooth uneven surfaces
B. J. Choi and S. V. Sreenivasan
- LANA: A lane extraction algorithm that uses frequency domain features
C. Kreucher and S. Lakshmanan
- On the use of linear camera-object interaction models in visual servoing
B. Allotta and C. Colombo
- On the trajectory planning of a planar elastic manipulator under gravity
P. K. Sarkar, M. Yamamoto and A. Mohri
- Identification of generalized friction for an experimental planar two-link flexible manipulator using strong tracking filter
M. L. Bai, D. H. Zhou and H. Schwarz
- Decoupled nonlinear three-term controllers for robot trajectory tracking
M. Tarokh
- Regulation of manipulators in generic task space: An energy shaping plus damping injection approach
R. Kelly
- Fault-tolerant robust supervisor for discrete event systems with model uncertainty and its application to a workcell
S. J. Park and J. T. Lim
- Comments on "Nonlinear adaptive control for flexible-link manipulators"
M. S. de Queiroz and H. Canbolat

International journal of computer vision

Vol. 31 No. 1

Articles

- Using specific displacements to analyze motion without calibration
T. Vieville and D. Lingrand
- Structure and motion estimation from dynamic silhouettes under perspective projection
T. Joshi, N. Ahuja and J. Ponce

Robust optical flow computation based on least-median-of-squares regression

E. P. Ong and M. Spann

The applicability of Green's theorem to computation of rate of approach

Z. Duric, A. Rosenfeld and J. Duncan

International journal of intelligent systems

Vol. 14 No. 3

Articles

- How to divide a territory? A new simple differential formalism for optimization of set functions
H. T. Nguyen and V. Kreinovich
- The important properties and applications of the adaptive weighted fuzzy mean filter
C. S. Lee and Y. H. Kuo
- Determining the incremental worth of members of an aggregate set through difference-based induction
A. J. Gonzalez, S. Daroszewski and H. J. Hamilton
- On antonym and negate in fuzzy logic
A. R. de Soto and E. Trillas
- A multiagent architecture for fuzzy modeling
M. Delgado, A. F. Gomez-Skarmeta, J. G. Marin-Blazquez and H. M. Barbera

Vol. 14 No. 4

Articles

- Fuzzy logic as a basis for reusing task-based specifications
L. F. Lai, J. Lee and S. J. Yang

Geographical data analysis via mountain function

G. Gallo, I. Perfilieva, M. Spagnuolo and S. Spinello

Querying fuzzy relational databases through fuzzy domain calculus

J. Galindo, J. M. Medina and M. C. Aranda

Invariance properties of ordinal OWA operators

S. Ovchinnikov

Granular computing in the development of fuzzy controllers

W. Pedrycz and G. Vukovich

Vol. 14 No. 5

Articles

- A theoretical framework for the conception of agency
F. Amigon, M. Somalvico and D. Zanisi
- Measuring information in possibilistic logic
R. R. Yager
- Modeling default behavior in the presence of information and its application to the route choice problem
T. Lotan and H. N. Koutsopoulos

International journal of software engineering and knowledge engineering

Vol. 8 No. 4

Best papers from SEKE97

- Enhancing case environments by using linguistics
J. F. M. Burg and R. P. VandeRiet

Results of the application of a linguistic approach to object-oriented analysis

A. M. Moreno

Organizing the software development process knowledge:
An approach based on patterns

F. M. de Vasconcelos and C. M. L. Werner

Software configuration management for a reusable
software library within a software maintenance
environment

O. C. Kwon, C. Boldyreff and M. Munro

ISF: A visual formalism for specifying interconnection
styles for software design

S. Mancoridis

An object-oriented design complexity metric based on
inheritance relationships

T. K. Shih, Y. C. Lin, W. C. Pai and C. C. Wang

Journal of intelligent & robotic systems

Vol. 24 No. 1

Articles

Position and force control of two constrained robotic
manipulators

M. Zribi, H. Loulin and C. S. Piu

A robust adaptive terminal sliding mode control for rigid
robotic manipulators

Z. H. Man, M. Oday and X. H. Yu

Learning complex tasks using a stepwise approach

E. Burdet and M. Nuttin

Active vibration control of flexible robots using virtual
spring-damper systems

W. Bernzen

Geometrical parameter estimation for industrial
manipulators using two-step estimation schemes

P. Maric and V. Potkonjak

Vol. 24 No. 2

Articles

Multi-layer hierarchical rule learning in reactive robot
control using incremental decision trees

G. H. S. Hamzei, D. J. Mulvaney and I. P. Sillitoe

Coordination and control of multi-fingered robot hands
with rolling and sliding contacts

M. Zribi, J. Chen and M. S. Mahmoud

A geometric calibration methodology for single-head
cone-beam X-ray systems

*K. J. Kyriakopoulos, P. Yiannakos, V. Kallipolites and
K. Dornales*

Mixture of automatically- and manually-controlled
vehicles in intelligent transport systems

S. N. Huang, S. C. Chan and W. Ren

Vol. 24 No. 3

Articles

Plan-N-Scan: A robotic system for collision-free
autonomous exploration and workspace mapping

*P. Renton, M. Greenspan, H. A. Elmaraghy and
H. Zghal*

Path planning in unknown environment with obstacles
using virtual window

M. A. Mansor and A. S. Morris

Neural network force control for industrial robots

S. T. Lin and S. J. Tzeng

On reducing numerical complexity of complex robot
dynamics

M. Rackovic, D. Surla and M. Vukobratovic

Q(2) symbolic reasoning about noisy dynamic systems

S. P. Linder, Z. Korona and M. M. Kokar

Vol. 24 No. 4

Articles

Implementation of a variable D-H parameter model for
robot calibration using an FCMAC learning algorithm

K. Y. Young and J. J. Chen

A shortest path based path planning algorithm for
nonholonomic mobile robots

K. C. Jiang, L. D. Seneviratne and S. W. E. Earles

A smooth path tracking algorithm for wheeled mobile
robots with dynamic constraints

K. C. Koh and H. S. Cho

Tolerance representation and analysis in industrial
inspection

T. M. Sobh, T. C. Henderson and F. Zana

Journal of logic programming

Vol. 39 Nos. 1–3

Special issue: synthesis, transformation and analysis of logic programs

Automated verification of Prolog programs

B. LeCharlier, C. Leclerc, S. Rossi and

A. Cortesi

Abstract diagnosis

M. Comini, G. Levi, M. C. Meo and G. Vitiello

Termination of logic programs with delay declarations

E. Marchiori and F. Teusink

Verification of logic programs

D. Pedreschi and S. Ruggieri

Opium: an extendable trace analyzer for Prolog

M. Ducasse

Layered modes

S. Etalle and M. Gabbrielli

Journal of symbolic computation

Vol. 27 No. 2

Articles

Monomial orderings, rewriting systems, and
Grobner bases for the commutator ideal of a free
algebra

*S. M. Hermiller, X. H. Kramer and
R. C. Laubenbacher*

Basic algorithms for rational function fields

J. Muller Quade and R. Steinwandt

An algorithm to calculate optimal homogeneous systems
of parameters

G. Kemper

Lazy linear combinatorial unification

M. Bellia and M. E. Occhiuto

The STO problem is NP-complete

P. Krysta and L. Pacholski

Computer algebra algorithms and routines for the
computation of conservation laws and fixing of gauge in
differential expressions

T. Wolf, A. Brand and M. Mohammadzadeh

Vol. 27 No. 3

Solving difference equations in finite terms

P. A. Hendriks and M. F. Singer

On polynomial decompositions

J. Kluners

A framework for operational equational specifications
with pre-defined structures

J. Avenhaus and K. Becker

A transducer approach to Coxeter groups

F. DuCloux

On shortest linear recurrences

G. H. Norton

Vol. 27 No. 4**Articles**

Computing toric ideals

A. M. Bigatti, R. Scala and L. Robbiano

Factors of iterated resultants and discriminants

S. McCallum

Construction of finite groups

H. U. Besche and B. Eick

The groups of order at most 1000 except 512 and 768

H. U. Besche and B. Eick

Computing subgroups invariant under a set of automorphisms

A. Hulpke

Sheaf cohomology is #P-hard

*E. Bach***Vol. 27 No. 5****Articles**

A categorical critical-pair completion algorithm

K. Stokkermans

A computational method for determining strong stabilizability of n-D systems

J. Q. Ying, L. Xu and Z. P. Lin

Integrating factors for second-order ODEs

*E. S. ChebTerrab and A. D. Roche***Kybernetes****Vol. 28 No. 1****Articles**

Contemporary systems and cybernetics

B. H. Rudall

Internet commentary

A. M. Andrew

Systemic thinking as the philosophical foundation for knowledge management and organizational learning

J. A. Johanessen, J. Olaisen and B. Olsen

On fuzzy recognizers

D. S. Malik and J. N. Mordeson

A look at why information systems fail

J. Liebowitz

The decomposition method applied to the Cauchy problem

K. Abbaoui and Y. Cherruault

The principles and laws of general systems and their applications

F. Y. Lin and T. C. E. Cheng

Predicting production based on genetic algorithms

W. Chen

The topology of the action potential

*B. James***Machine learning****Vol. 34 Nos. 1–3****Special issue: Machine learning and natural language**

Forgetting exceptions is harmful in language learning

W. Daelemans, A. Vanden Bosch and J. Zavrel

Similarity-based models of word cooccurrence probabilities

I. Dagan, L. Lee and F. C. N. Pereira

An efficient, probabilistically sound algorithm for segmentation and word discovery

M. R. Brent

A Winnow-based approach to context-sensitive spelling correction

A. R. Golding and D. Roth

Using decision trees to construct a practical parser

M. Haruno, S. Shirai and Y. Ooyama

Learning to parse natural language with maximum entropy models

A. Ratnaparkhi

Statistical models for text segmentation

D. Beeferman, A. Berger and J. Lafferty

An algorithm that learns what's in a name

D. M. Bikel, R. Schwartz and R. M. Weischedel

Learning information extraction rules for semi-structured and free text

*S. Soderland***Vol. 35 No. 1****Articles**

An experimental evaluation of integrating machine learning with knowledge acquisition

G. I. Webb, J. Wells and Z. J. Zheng

Concept learning and feature selection based on square-error clustering

B. Mirkin

An efficient method to estimate bagging's generalization error

D. H. Wolpert and W. G. Macready

Learning to take actions

*R. Khadon***New generation computing****Vol. 17 No. 2****Articles**

Perspectives on molecular computing

M. Hagiya

Calculating accumulations

Z. J. Hu, H. Iwasaki and M. Takeichi

Parallel directed graph algorithms on directional processor arrays with reconfigurable bus systems
