Artificial Intelligence

Vol. 109 Nos. 1–2

Articles

Modal logics, description logics and arithmetic reasoning

H. J. Ohlbach and J. Koehler

iCTRL: Intensional conformal text representation language

G. Redey

A directly cautious theory of defeasible consequence for default logic via the notion of general extension

G. A. Antonelli

Using regression-match graphs to control search in planning

D. McDermott

Non-uniform time sharing in the concurrent execution of constraint solving

R. Krajcoviech and M. Kotocova

Representation of propositional expert systems as partial functions

R. M. Colomb

Learning by discovering concept hierarchies

B. Zupan, M. Bohanec, J. Demsar and I. Bratko

Constraint satisfaction over connected row-convex constraints

Y. Deville, O. Barette and P. VanHentenryck

Computational complexity of relating time points with intervals

P. Jonsson, T. Drakengren and C. Backstrom

Preferred answer sets for extended logic programs

G. Brewka and T. Eiter

Vol. 110 No. 1

Articles

Emergent cooperative goal-satisfaction in large-scale automated-agent systems

O. Shehory, S. Kraus and O. Yadgar

Computing intersections of Horn theories for reasoning with models

T. Eiter, T. Ibaraki and K. Makino

Statics and dynamics of induced systems

M. Freund

Diagnosis of large active systems

P. Baroni, G. Lamperti, P. Pogliano and M. Zanella

Artificial Intelligence Review

Vol. 13 No. 3

Articles

Training artificial neural networks using Taguchi methods

C. MacLeod, G. Dror and G. Maxwell

Many birds fly, some don't

L. M. M. Custodio and C. PintoFerreira

Using Abstrips abstractions – Where do we stand?

F. Giunchiglia

A glimpse of constraint satisfaction

E. Tsang

Computers and Artificial Intelligence

Vol. 18 No. 2

Articles

Execution models for a massively parallel PROLOG implementation. Part II

P. Kacsuk

$\beta(k)$ -complete problems and greediness

R. Szelepcsényi

Table rounding problem

J. Sima

Describing candidate keys by hypergraphs

J. Demetrovics and V. D. Thi

Random walks and Brownian motion

T. Castell

AGAPE: Parallel genetic algorithm programming environment developed for APE100/quadrics

A. Sternieri, P. Anelli, S. Stramaglia and U. Emiliani

Incremental view materialization in deductive databases

W. C. Wong and L. F. Bic

Improving performances of the genetic algorithm by caching

J. Kratica

A multimedia documentation environment supports well-engineered software development and maintenance

T. K. Shih, L. R. Chow, H. C. Keh and Y. C. Lin

Width-reduction for a linear time channel routing algorithm

M. A. Lengyel

Engineering Applications of Artificial Intelligence

Vol. 12 No. 3

Articles

Incorporating constraint propagation in genetic algorithm for university timetable planning

S. Deris, S. Omatu, H. Ohta and P. Saad

Viscometric flow interpretation using qualitative and quantitative techniques

S. M. F. D. S. Mustapha, T. N. Phillips, C. J. Price,

L. G. Moseley and T. E. R. Jones

Recognition of line segments with unevenness used in OCR and fingerprints

N. G. Bourbakis and D. Goldman

Data-scaling problems in neural-network training

P. Koprinkova and M. Petrova

Improving the global performance of a fuzzy gain-scheduler by supervision

R. Palm and D. Driankov

Identification of enhanced fuzzy models with special membership functions and fuzzy rule bases

M. Hanss

Asynchronous transfer mode traffic modelling and dimensioning using artificial neural networks

S. Naughton, P. Cunningham and F. Somers

Dynamic case-based reasoning for process operation support systems

Q. J. Xia and M. Rao

Time-critical problem-solving with cached knowledge: a case study in shortwave radio resource allocation

N. Chatterjee and J. A. Campbell

Knowledge acquisition assisted by CLIPS programming

Z. Chen

Mind and autonomy in engineered biosystems

O. G. Clark, R. Kok and R. Lacroix

Expert Systems with Applications

Vol. 16 No. 4

Articles

A generic information extraction architecture for financial applications

L. K. A. Wee, L. C. Tong and C. L. Tan

Expert system for predicting stock market timing using a candlestick chart

K. H. Lee and G. S. Jo

FAILSAFE: supporting product quality with knowledge-based systems

E. W. Stein and D. K. Miscikowski

Validating SPONGIA, an expert system for sponge identification

M. Domingo, M. MartinBaranera, F. Sanz, C. Sierra and M. J. Uriz

A comparison of machine learning techniques with a qualitative response model for auditor's going concern reporting

M. Anandarajan and A. Anandarajan

Vol. 17 No. 1

Articles

An approach to legal reasoning based on a hybrid decision-support system

K. Pal

Identifying significant model inputs with neural networks – Tax court determination of reasonable compensation

C. Bjornson and D. K. Barney

A Bayesian belief network-based advisory system for operational availability focused diagnosis of complex nuclear power systems

C. W. Kang and M. W. Golay

Neural-fuzzy modeling of plastic injection molding machine for intelligent control

H. C. W. Lau, T. T. Wong and K. F. Pun

Integrating Intelligent Systems using an SQL-database

R. M. Sonar

Neural networks in business: a survey of applications (1992–1998)

A. Vellido, P. J. G. Lisboa and J. Vaughan

IEEE Transactions on Knowledge and Data Engineering

Vol. 11 No. 3

Articles

Querying multimedia presentations based on content

T. Y. Lee, L. Sheng, T. Bozkaya, N. H. Balkir,

Z. M. Ozsoyoglu and G. Ozsoyoglu

Response time driven multimedia data objects allocation for browsing documents in distributed environments

S. K. So, I. Ahmad and K. Karlapalem

Design and evaluation of a generic software architecture for on-demand video servers

J. C. L. Liu, D. H. C. Du, S. S. Y. Shim, J. W. Hsieh and M. J. Lin

Database design principles for placement of delay-sensitive data on disks

S. Christodoulakis and F. A. Zioga

Symbolic interpretation of artificial neural networks

I. A. Taha and J. Ghosh

Temporal entity-relationship models – A survey

H. Gregersen and C. S. Jensen

Potential cases, methodologies, and strategies of synthesis of solutions in distributed expert systems

M. J. Zhang and C. Q. Zhang

IEEE Transactions on Neural Networks

Vol. 10 No. 4

Articles

Function approximation – A fast-convergence neural approach based on spectral analysis

C. Citterio, A. Pelagotti, V. Piuri and L. Rocca

Learning continuous trajectories in recurrent neural networks with time-dependent weights

M. Galicki, L. Leistritz and H. Witte

Generalization, discrimination, and multiple categorization using adaptive resonance theory

P. Lavoie, J. F. Crespo and Y. Savaria

An ordering algorithm for pattern presentation in fuzzy ARTMAP that tends to improve generalization performance

I. Dagher, M. Georgiopoulos, G. L. Heileman and G. Bebis

Discrete-time backpropagation for training synaptic delay-based artificial neural networks

R. J. Duro and J. S. Reyes

Predicting neutron diffusion eigenvalues with a query-based adaptive neural architecture

M. G. Lysenko, H. I. Wong and G. I. Maldonado

Unification of neural and wavelet networks and fuzzy systems

L. M. Reyneri

Design of fuzzy systems using neurofuzzy networks

M. Figueiredo and F. Gomide

A recurrent self-organizing neural fuzzy inference network

C. F. Juang and C. T. Lin

Controlling chaos by GA-based reinforcement learning neural network

C. T. Lin and C. P. Jou

A neurocomputational model of figure-ground discrimination and target tracking

H. J. Sun, L. Liu and A. K. Guo

FEM-based neural-network approach to nonlinear modeling with application to longitudinal vehicle dynamics control

J. Kalkkuhl, K. J. Hunt and H. Fritz

Direct adaptive control of wind energy conversion systems using Gaussian networks

M. A. Mayosky and G. I. E. Cancelo

Training multilayer perceptron classifiers based on a modified support vector method

J. A. K. Suykens and J. Vandewalle

Principal independent component analysis

J. Luo, B. Hu, X. T. Ling and R. W. Liu

Blind equalization of a noisy channel by linear neural network

Y. Fang and T. W. S. Chow

A geometrical representation of McCulloch-Pitts neural model and its applications

L. Zhang and B. Zhang

A fast U-D factorization-based learning algorithm with applications to nonlinear system modeling and identification

Y. M. Zhang and X. R. Li

Handwritten digit recognition by adaptive-subspace self-organizing map (ASSOM)

B. L. Zhang, M. Y. Fu, H. Yan and M. A. Jabri

Design of GBSB neural associative memories using semidefinite programming

J. Park, H. Cho and D. Park

Analog design of a new neural network for optical character recognition

I. P. Morns and S. S. Dlay

Solving graph algorithms with networks of spiking neurons

D. M. Sala and K. J. Cios

A complex valued radial basis function network for equalization of fast time varying channels

Q. Gan, P. Saratchandran, N. Sundararajan and

K. R. Subramanian

A new error function at hidden layers for fast training of multilayer perceptrons

S. H. Oh and S. Y. Lee

A formal selection and pruning algorithm for feedforward artificial neural network optimization

P. V. S. Ponnappalli, K. C. Ho and M. Thomson

A local minimum for the 2–3–1 XOR network

I. G. Sprinkhuizen Kuyper and E. J. W. Boers

Circular backpropagation networks embed vector quantization

S. Ridella, S. Rovetta and R. Zunino

New stability conditions for Hopfield networks in partial simultaneous update mode

D. L. Lee

A unified framework for chaotic neural-network approaches to combinatorial optimization

T. Kwok and K. A. Smith

IEEE Transactions on Pattern Analysis and Machine Intelligence

Vol. 21 No. 5

Articles

Hierarchical discriminant analysis for image retrieval

D. L. Swets and J. Y. Weng

Fingerprint classification by directional image partitioning

R. Cappelli, A. Lumini, D. Maio and D. Maltoni

Nonlinear modeling of scattered multivariate data and its application to shape change

B. Chalmond and S. C. Girard

Using spin images for efficient object recognition in cluttered 3D scenes

A. E. Johnson and M. Hebert

A robust competitive clustering algorithm with applications in computer vision

H. Frigui and R. Krishnapuram

Symmetry detection by generalized complex (GC) moments: A close-form solution

D. G. Shen, H. H. S. Ip, K. K. T. Cheung and E. K. Teoh

Direct least square fitting of ellipses

A. Fitzgibbon, M. Pilu and R. B. Fisher

Vol. 21 No. 6

Articles

A Markov pixon information approach for low-level image description

X. Descombes and F. Krugger

An omnifont open-vocabulary OCR system for English and Arabic

I. Bazzi, R. Schwartz and J. Makhoul

Geometric and illumination invariants for object recognition

R. Alferez and Y. F. Wang

Maximum likelihood estimation methods for multispectral random field image models

J. Bennett and A. Khotanzad

Adaptive image segmentation with distributed behavior-based agents

J. M. Liu and Y. Y. Tang

Design of multiparameter steerable functions using cascade basis reduction

P. C. Teo and Y. HelOr

Face detection from color images using a fuzzy pattern matching method

H. Y. Wu, Q. Chen and M. Yachida

Robust tracking of position and velocity with Kalman snakes

N. Peterfreund

A Kalman filter approach to direct depth estimation incorporating surface structure

Y. S. Hung and H. T. Ho

IEEE Transactions on Robotics and Automation

Vol. 15 No. 3

Special section on virtual reality in robotics and automation

A. K. Bejczy, K. Tani and P. Coiffet

Invited review: The synergy between virtual reality and robotics

G. C. Burdea

Projective virtual reality: Bridging the gap between virtual reality and robotics

E. Freund and J. Rossmann

Programming contact tasks using a reality-based virtual environment integrated with vision

J. E. Lloyd, J. S. Beis, D. K. Pai and D. G. Lowe

Interactive evaluation of assembly sequences using augmented reality

V. Raghavan, J. Molineros and R. Sharma

Computer vision assisted virtual reality calibration

W. S. Kim

Stable haptic interaction with virtual environments

R. J. Adams and B. Hannaford

An architecture for immersive evaluation of complex human tasks

T. Molet, R. Boulic, S. Rezzonico and D. Thalmann

Heuristics for a tool provisioning problem in a flexible manufacturing system with an automatic tool transporter

H. B. Jun, Y. D. Kim and H. W. Suh

Deadlock avoidance for production systems with flexible routing

M. A. Lawley

Conformational switching in self-assembling mechanical systems

K. Saitou

Vision guided navigation for a nonholonomic mobile robot

Y. Ma, J. Kosecka and S. S. Sastry

Runway obstacle detection by controlled spatiotemporal image flow disparity

S. Sull and B. Sridhar

Impact analysis and post-impact motion control issues of a free-floating space robot subject to a force impulse

D. N. Nenchev and K. Yoshida

Kinematic manipulability of general constrained rigid multibody systems

J. T. Y. Wen and L. S. Wilfinger

Assemblability based on maximum likelihood configuration of tolerances

A. C. Sanderson

A high integrity IMU GPS navigation loop for autonomous land vehicle applications

S. Sukkarieh, E. M. Nebot and H. F. Durrant Whyte

Sliding mode control for trajectory tracking of nonholonomic wheeled mobile robots

J. M. Yang and J. H. Kim

Path planning using hardware time delays

R. Moller

End-effector position-orientation measurement

J. Yuan and S. L. Yu

International Journal of Computer Vision

Vol. 31 Nos. 2–3

Articles

Computer vision research in Utrecht

M. A. Viergever

Coherence-enhancing diffusion filtering

J. Weickert

Bidirectional reflection distribution function of thoroughly pitted surfaces

J. J. Koenderink, A. J. Van Doorn, K. J. Dana and S. Nayar

Invertible apertured orientation filters in image analysis

S. N. Kalitzin, B. M. T. H. Romeny and M. A. Viergever

The structure of locally orderless images

J. J. Koenderink and A. J. VanDoorn

Texture histograms as a function of irradiation and viewing direction

B. Van Ginneken, J. J. Koenderink and K. J. Dana

Multiscale segmentation of three-dimensional MR brain images

W. J. Niessen, K. L. Vincken, J. Weickert, B. M. T. Romeny and M. A. Viergever

Reliable and efficient pattern matching using an affine invariant metric

M. Hagedoorn and R. C. Veltkamp

Image registration for digital subtraction angiography

E. H. W. Meijering, K. J. Zuiderveld and M. A. Viergever

Pseudo-linear scale-space theory

L. Florack, R. Maas and W. Niessen

International Journal of Intelligent Systems

Vol. 14 No. 6

Articles

Efficient computation of marginal probabilities in multivalued causal inverted multiway trees given incomplete information

D. E. Holmes, P. C. Rhodes and G. R. Garside

Fuzzy Dempster-Shafer reasoning for rule-based classifiers

E. Binaghi and P. Madella

A neuro-propositional model of language processing

P. Buchheit

A formal framework for image indexing with triples: Toward a concept-based image retrieval

J. D. Yang and H. J. Yang

Vol. 14 No. 7

Articles

A fuzzy Object-Oriented Data model for managing vague and uncertain information

G. Bordogna, G. Pasi and D. Lucarella

Intelligent synchronized robot conveyor system

G. Cohen

Constructing belief networks from realistic data

Y. Peng, Z. L. Zhou and S. Z. Cho

Network-based decision making via generalized fuzzy integral operators

J. H. Chiang

International Journal of Software Engineering and Knowledge Engineering

Vol. 9 No. 1

Special issue: Migration strategies for legacy systems

An incremental object-oriented migration strategy for RPG legacy systems.

G. Canfora, A. DeLucia and G. A. DiLucca

A framework for object-oriented reverse engineering of legacy information systems

U. Kolsch and J. Laschewski

Using the Web for software annotations

V. Rajlich and S. Varadarajan

An approach to automated building of software system configurations

M. Bielikova and P. Navrat

Protocol specification design using an object-based Petri net formalism

V. P. Sliva, T. Murata and S. M. Shatz

An automated tool (IDAF) to manipulate interaction diagrams and fragmentations for multi-agent systems

C. K. Low, R. Ronnquist and T. Y. Chen

Vol. 9 No. 2

Special issue: High assurance systems

Analytical partition of software components for evolvable and reliable MEMS design tools

C. L. Hoover and P. K. Khosla

A firewalling scheme for securing MPOA-based enterprise networks

J. Xu and M. Singhal

The design and implementation of a customizable fault tolerance framework

I. L. Yen, I. Ahmed, R. Jagannath and S. Kundu

An incremental verification algorithm for real-time systems

A. Sahay, J. J. P. Tsai and A. P. Sistla

Using classification trees for software quality models:
Lessons learned

T. M. Khoshgoftaar, E. B. Allen and A. Naik

Specifying and verifying temporal behavior of high
assurance systems using reachability tree logic

S. J. H. Yang, W. Chu and J. Lee

Real-time object-oriented distributed software
engineering and the TMO scheme

K. H. Kim

Journal of Intelligent & Robotic Systems

Vol. 25 No. 1

Articles

Sensing under uncertainty for mobile robots

T. M. Sobh, M. Dekhil and A. A. Efros

Iterative learning control using information database
(ILCID)

M. Arif, T. Ishihara and H. Inooka

Genetic tuning of PID controllers using a neural network
model: A seesaw example

C. J. Wu

Intelligent jig system to automate flexible manufacturing
system

G. Cohen

DC thruster controller implementation with integral anti-
wind up compensator for underwater ROV

J. N. Lygouras

Vol. 25 No. 2

Articles

Iterative learning control utilizing the error prediction
method

M. Arif, T. Ishihara and H. Inooka

Message-based evaluation in scheme for high-level robot
control

C. Lee and Y. S. Xu

Object recognition and selective handling by a robot

F. Declercq and R. DeKeyser

On the recognition and location of partially occluded
objects

Y. Zhu and L. D. Seneviratne

Fault prediction and compensation functions in a
diagnostic knowledge-based system for hydraulic systems

C. Angeli and A. Chatzinikolaou

Theoretical and experimental study of a smart hinge-beam
based on shape memory alloy wire actuators

D. Perreux and C. LExcellent

Vol. 25 No. 3

Articles

A fast approach for robot motion planning

F. Janabi Sharifi and W. J. Wilson

Neural control of the movements of a wheelchair

L. Boquete, R. Garcia, R. Barea and M. Mazo

On the robust nonlinear motion position and force control
of flexible joints robot manipulators

A. T. Massoud, H. A. El Maraghy and T. Lahdhiri

Hierarchical fuzzy control for C-axis of CNC turning
centers using genetic algorithms

L. C. Lin and G. Y. Lee

Journal of Intelligent Manufacturing

Vol. 10 No. 2

Special issue: Computational intelligence in intelligent manufacturing

Structured intelligence for self-organizing manufacturing
systems

N. Kubota and T. Fukuda

Intelligent agent characterization and uncertainty
management with fuzzy set theory: a tool to support early
supplier integration

P. Mccauley Bell

Parts loading scheduling in a flexible forging machine
using an advanced genetic algorithm

Y. Tsujimura and M. Gen

An autonomous decentralized scheduling algorithm for a
scheduling problem in a metal mould assembly process

H. Iima, R. Kudo, N. Sannomiya and Y. Kobayashi

Genetic algorithms in integrated process planning and
scheduling

N. Morad and A. Zalzala

Genetic production systems for intelligent problem
solving

T. P. Runarsson and M. T. Jonsson

A tool breakage detection system using an accelerometer
sensor

J. C. Chen and W. L. Chen

Grouping parts based on geometrical shapes and
manufacturing attributes using a neural network

S. Y. Lee and G. W. Fischer

A virtual plant modeller (VPMOD) for batch-chemical
processes

C. A. Roberts, M. M. Dessouky and Y. M. Dessouky

A methodology of developing product family architecture
for mass customization

J. X. Jiao and M. M. Tseng

The application of information systems for the design and
operation of flexible machining cells

S. Rahimifard and S. T. Newman

Introduction to assembly features: an illustrated synthesis
methodology

D. Deneux

A strategy to support application's dependent features
interpretation

A. Bouras, M. Belaziz, A. Tehari, G. Wahu and

J. M. Brun

A standard manufacturing information model to support
design for manufacturing in virtual enterprises

R. E. Giachetti

Information structuring for use and reuse of mechanical
analysis models in engineering design

N. Troussier, F. Pourroy, M. Tollenaere and B. Trebucq

Intelligent modelling and optimization of the gas tungsten
arc welding process

Y. S. Tarng, J. L. Wu, S. S. Yeh and S. C. Juang

Multi-agent approach and stochastic optimization:
random events in manufacturing systems

G. Fleury, J. Y. Goujon, M. Gourgand and P. Lacomme

A genetic algorithm approach to piping route path
planning

T. Ito

Journal of Logic Programming

Vol. 40 No. 1

Articles

Semantics of (disjunctive) logic programs based on partial evaluation

S. Brass and J. Dix

An approach to declarative programming based on a rewriting logic

J. C. Gonzalez Moreno, M. T. Hortal Gonzalez, F. J. Lopez Fraguas and M. Rodriguez-Artalejo

An algebraic framework for the definition of compositional semantics of normal logic programs

P. Lucio, F. Orejas and E. Pino

Vol. 40 Nos. 2–3

Special issue: Inductive logic programming

Generalization by absorption of definite clauses

K. Taylor

Induction of logic programs by example-guided unfolding

H. Bostro and P. Idestam Almqvist

Numerical reasoning with an ILP system capable of lazy evaluation and customised search

A. Srinivasan and R. Camacho

A study of relevance for learning in deductive databases

N. Lavrac, D. Gamberger and V. Jovanoski

Optimizing general chain programs

A. D. Rieger

The complexity of revising logic programs

R. Greiner

Knowledge-Based Systems

Vol. 12 Nos. 1–2

Special issue on verification and validation

Detecting redundancy among production rules using term rewrite

J. G. Schmolze and W. Snyder

Rule-based systems formalized within a software architectural style

R. F. Gamble, P. R. Stiger and R. T. Plant

Applications of rule-base coverage measures to expert system evaluation

V. Barr

Coverage: Verifying multiple-agent knowledge-based systems

A. Preece

Verifying ontological commitment in knowledge-based systems

A. Waterson and A. Preece

An alternative verification and validation technique for an alternative knowledge representation and acquisition technique

D. Richards and P. Compton

Kybernetes

Vol. 28 Nos. 2–3

Articles

Contemporary systems and cybernetics

B. H. Rudall

Internet commentary

A. M. Andrew

Praxeology – a cybernetic application

L. Skyttner

An approximation method for the optimization of continuous functions of n variables by densifying their domains

G. Mora and Y. Cherruault

The science of human and social processes: an introduction to vytvorology

J. Brozyna

Applying successive improvement transformations for intelligent problem solving

E. T. Lee and M. E. Lee

Adaptive prediction: a sequential approach to forecasting and estimation of nonstationary environmental systems

A. Papakyriazis and P. Papakyriazis

Web-based multimedia case studies: ahead of our time?

J. Liebowitz, G. Yaverbaum and L. Silvers

The “fuzzy computer-test” problem

K. M. Panchvidze

Application of the decomposition method to the understanding of HIV immune dynamics

B. Adedj

Bionics: psychocybernetics of the human memory – Part IV: modelling of the human long-term memory

S. J. Mrchev

Similarity-driven pictorial database design using entity-relationship approach

E. T. Lee and M. E. Lee

An incongruous imprecise reasoning model and its abstract reasoning algorithms based on pansystems methodology

W. Chen

Diversification in economic order quantities (EOQ) model

M. Parikh, N. N. Shah and Y. K. Shah

The twenty-first century: the advent of the non-biological civilization and the future of the human race

A. Bolonkin

Machine Learning

Vol. 35 No. 2

Articles

Learning to reason with a restricted view

R. Khardon and D. Roth

Exploration of multi-state environments: Local measures and back-propagation of uncertainty

N. Meuleau and P. Bourguine

Toward a model of intelligence as an economy of agents

E. B. Baum

Vol. 35 No. 3

Special Issue: Selected from papers presented at the 1997 Conference on Computational Learning Theory, COLT'97

Universal portfolios with and without transaction costs

A. Blum and A. Kalai

A dichotomy theorem for learning quantified boolean formulas

V. Dalmau

Estimation of time-varying parameters in statistical models: An optimization approach

D. Bertsimas, D. Gamarnik and J. N. Tsitsiklis

Derandomizing stochastic prediction strategies

V. Vovk

Vol. 36 Nos. 1–2

Articles

A principal components approach to combining regression estimates

C. J. Merz and M. J. Pazzani

Using correspondence analysis to combine classifiers

C. J. Merz

Linearly combining density estimators via stacking

P. Smyth and D. Wolpert

Pasting small votes for classification in large databases and on-line

L. Breiman

An empirical comparison of voting classification algorithms: Bagging, boosting, and variants

E. Bauer and R. Kohavi

New Generation Computing

Vol. 17 No. 3

Articles

Design and analysis of the Dual-Torus Network

S. H. Chae, J. Kim, S. J. Hong and S. Lee

Aggregation and negation-as-failure

M. Osorio and B. Jayaraman

On the complexity of or-parallelism

D. Ranjan, E. Pontelli and G. Gupta

Some analogues of partial and mixed computations in the logical programming approach

N. N. Nepeivoda
