

## From the journals. . . .

### AI applications

#### Vol. 12 Nos. 1–3

##### Articles

Knowledge acquisition using linguistic-based knowledge analysis

*D. L. Schmoldt*

Database mining of turfgrass cultivar performance

*T. B. Voigt, T. W. Fermanian and R. R. B. Rao*

Using fuzzy-systems, object-oriented programming, and GIS to evaluate wildlife habitat

*B. W. Rickel, B. Anderson and R. Pope*

An expert system for forest nursery management

*R. Sadiq, M. Stock, D. Wenny and R. Robberecht*

TI A formal representation of landscape spatial patterns to analyze satellite images

*F. Leber and L. Mangelinck*

Using a case-based reasoning approach to manage sahelian agroforestry projects

*N. Tourigny, O. Diallo and G. Simian*

An expert system for assessing soil tillage requirements for crop establishment

*S. G. Abbas, M. A. Choudhary and G. L. Wall*

Prediction of reservoir permeability using genetic algorithms

*Y. T. Huang, P. M. Wong and T. D. Gedeon*

Context reliability and internal validity of an expert system to assess landscape visual values

*G. J. Buhyoff and P. A. Miller*

Neuro-fuzzy systems – applications and potential in biology and agriculture

*S. Panigrahi*

### AI magazine

#### Vol. 19 No. 3

##### Articles

Robocup-97 small-robot world champion team

*M. Veloso, P. Stone and K. Han*

Robocup-97 middle-size league world co-champion

*M. Asada, S. Suzuki, Y. Takahashi, E. Uchibe, M. Nakamura, C. Mishima, H. Ishizuka and T. Kato*

Toward integrated soccer robots

*W. M. Shen, J. Adibi, R. Adobbati, B. Cho, A. Erdem, H. Moradi, B. Salemi and S. Tejada*

Belief-desire-intention deliberation in artificial soccer

*H. D. Burkhard, M. Hannebauer and J. Wendler*

Relationship between natural-language processing and AI – role of constrained formal-computational systems

*A. K. Joshi*

Enterprise modeling

*M. S. Fox and M. Gruninger*

### Applied artificial intelligence

#### Vol. 12 No. 6

##### Articles

Stochastic neural networks for transportation systems modeling

*D. Rosaci*

A decision support system for the stock market through integration of fuzzy neural networks and fuzzy Delphi

*R. J. Kuo*

A hybrid approach for program understanding based on graph parsing and expectation-driven analysis

*S. M. Kim and J. H. Kim*

Discovering rules to design newspapers – an inductive constraint logic programming approach

*M. Bernard and F. Jacquenet*

#### Vol. 12 Nos. 7–8

##### Articles

The art of designing socially intelligent agents – science, fiction, and the human in the loop

*K. Dautenhahn*

Innate sociability – self-biased conditioning

*C. Numaoka*

Personality traits and social attitudes in multiagent cooperation

*C. Castelfranchi, F. Derosis, R. Falcone and S. Pizzutilo*

Modeling socially intelligent agents

*B. Edmonds*

From perception-action loops to imitation processes – a bottom-up approach of learning by imitation

*P. Gaussier, S. Moga, M. Quoy and J. P. Banquet*

Toward socially intelligent service robots

*D. M. Wilkes, A. Alford, R. T. Pack, T. Rogers, R. A. Peters and K. Kawamura*

### Applied intelligence

#### Vol. 9 No. 2

##### Special issue on systems for uncertain reasoning

Practical handling of exception-tainted rules and independence information in possibilistic logic

*S. Benferhat, D. Dubois and H. Prade*

A fuzzy approach to accessing accident databases

*P. W. H. Chung and M. Jefferson*

The method of assigning incidences

*W. R. Liu, D. McBryan and A. Bundy*

Annotated logic applications for imperfect information

*D. V. Carbogim and F. S. C. Dasilva*

Computational properties of 2 exact algorithms for Bayesian networks

*N. L. Zhang*

## Artificial intelligence

### Vol. 102 No. 2

#### Articles

Value minimization in circumscription

*C. Baral, A. Gabaldon and A. Provetti*

From environments to representations – a mathematical-theory of artificial perceptions

*Z. Arzigonczarowski and D. Lehmann*

Adaptation-guided retrieval – questioning the similarity assumption in reasoning

*B. Smyth and M. T. Keane*

Growing methods for constructing recursive deterministic perceptron neural networks and knowledge extraction

*M. Tajine and D. Elizondo*

Some improvements to the Shenoy-Shafer and Hugin architectures for computing marginals

*T. Schmidt and P. P. Shenoy*

### Vol. 103 Nos. 1–2

#### Articles

Artificial-intelligence 40 years later

*D. G. Bobrow and J. M. Brady*

Remote agent – to boldly go where no AI system has gone before

*N. Muscettola, P. P. Nayak, B. Pell and B. C. Williams*

Vehicles capable of dynamic vision – a new breed of technical beings

*E. D. Dickmanns*

Object identification – a Bayesian-analysis with application to traffic surveillance

*T. Huang and S. Russell*

Generating multimedia briefings – coordinating language and illustration

*K. R. McKeown, S. K. Feiner, M. Dalal and S. F. Chang*

Role of constrained computational systems in natural-language processing

*A. K. Joshi*

The origins of syntax in visually grounded robotic agents

*L. Steels*

Modeling social-action for AI agents

*C. Castelfranchi*

Let's plan it deductively

*W. Bibel*

A gentle introduction to Numerica

*P. Vanhentenryck*

TI Inheritance comes of age – applying nonmonotonic techniques to problems in industry

*L. Morgenstern*

Applications of the situation calculus to formalizing control and strategic information – the Prolog cut operator

*F. Z. Lin*

Machine learning techniques to make computers easier to use

*H. Motoda and K. Yoshida*

Translingual information-retrieval – learning from bilingual corpora

*Y. M. Yang, J. G. Carbonell, R. D. Brown and*

*R. E. Frederking*

Creativity and artificial intelligence

*M. A. Boden*

### Vol. 104 Nos. 1–2

#### Articles

Reaching agreements through argumentation – a logical model and implementation.

*S. Kraus, K. Sycara and A. Evenchik*

Model-based diagnostics and probabilistic assumption-based reasoning

*J. Kohlas, B. Anrig, R. Haenni and P. A. Monney*

Formalizing narratives using nested circumscription

*C. Baral, A. Gabaldon and A. Provetti*

Combining Horn rules and description logics in Carin

*A. Y. Levy and M. C. Rousset*

Generating multiple new designs from a sketch

*T. F. Stahovich, R. Davis and H. Shrobe*

Why Godel theorem cannot refute computationalism

*G. Laforte, P. J. Hayes and K. M. Ford*

A probabilistic framework for memory-based reasoning

*S. Kasif, S. Salzberg, D. Waltz, J. Rachlin and D. W. Aha*

The expressive power of circumscription

*T. Costello*

An algorithm for finding maps for belief networks through cost-based abduction

*A. M. Abdelbar*

Reasoning about actions – steady versus stabilizing state constraints

*M. Thielscher*

## Artificial intelligence in engineering

### Vol. 13 No. 1

#### Articles

Representing user preference in engineering design domains using an enhanced weighted fuzzy-reasoning algorithm

*C. W. Chan and P. Lau*

A factorization model of robotic tasks

*S. Benbernou*

A toolset for construction of hybrid intelligent forecasting systems – application for water demand prediction

*N. Lertpalangsunti, C. W. Chan, R. Mason and*

*P. Tontiwachwuthikul*

A verification method for systolic arrays using induction-based theorem provers

*K. Takahashi and H. Fujita*

Review of neural networks in chemical process-control – simulation and online implementation

*M. A. Hussain*

Efficient planning for a miniature assembly-line

*I. Klein, P. Jonsson and C. Backstrom*

A new method for diagnostic problem-solving based on a fuzzy abductive inference model and the tabu search approach

*F. Wen and C. S. Chang*

The structure of a physical behavior description facility

*S. Chandra*

## Artificial intelligence review

### Vol. 12 No. 5

#### Articles

A review of statistical language processing techniques

*J. McMahon and F. J. Smith*

Understanding similarity – a joint project for psychology, case-based reasoning, and law

*U. Hahn and N. Chater*

## Computers and artificial intelligence

**Vol. 17 No. 4**

### Articles

Structured plans with sharing and replication

*M. Balaban and S. E. Shimony*

Optimal diagnostic examination for local diagnosis

*R. Trobec*

Nuts – a distributed object-oriented platform with high-level communication functions.

*V. Vlassov, M. Addipour and E. Tyugu*

Execution models for a massively-parallel prolog implementation Part i

*P. Kacsuk*

A workload characterization by clustering technique

*B. Paternoster and M. I. Sessa*

An efficient algorithm for testing propositional formulas

*M. Vlada*

## Expert systems with applications

**Vol. 15 No. 2**

### Articles

Business environment scanner for senior managers – towards active executive support with intelligent agents

*S. H. Liu*

Hybrid machine learning system for integrated yield management in semiconductor manufacturing

*B. S. Kang, J. H. Lee, C. K. Shin, S. J. Yu and S. C. Park*

A comparison of genetic algorithms with conventional techniques on a spectrum of power economic-dispatch problems

*F. Li*

Envisioning knowledge-based systems impacts – a groupware facilitated simulation approach

*P. Hendriks*

Integration of data, information and knowledge in intelligent patient monitoring

*V. Morethonillo, M. J. Cabrerocanosa and*

*E. M. Hernandezpereira*

Development of an intelligent task management-system in a manufacturing information network

*H. C. W. Lau, S. K. Tso and J. K. L. Ho*

A case-based expert system approach for quality design

*M. S. Suh, W. C. Jhee, Y. K. Ko and A. Lee*

## IEEE transactions on knowledge and data engineering

**Vol. 10 No. 4**

### Articles

Bottom-up construction of ontologies

*P. E. Vandervet and N. J. I. Mars*

The knowledge acquisition and representation language, KARL

*D. Fensel, J. Angele and R. Studer*

New approach to requirements trade-off analysis for complex systems

*J. Lee and J. Y. Kuo*

A framework for learning in search-based systems

*S. Sarkar, P. P. Chakrabarti and S. Ghose*

Consistency checking in complex object database schemata with integrity constraints

*D. Beneventano, S. Bergamaschi, S. Lodi and C. Sartori*

Efficient differential timeslice computation

*K. Torp, L. Mark and C. S. Jensen*

Temporal synchronization models for multimedia data

*E. Bertino and E. Ferrari*

Declustering and load-balancing methods for parallelizing geographic information systems

*S. Shekhar, S. Ravada, V. Kumar, D. Chubb and*

*G. Turner*

Navigational accesses in a temporal object model

*E. Bertino, E. Ferrari and G. Guerrini*

Knowledge representation using fuzzy Petri nets – revisited

*T. V. Manoj, J. Leena and R. B. Soney*

Generating broadcast programs that support range queries

*K. L. Tan and J. X. Yu*

**Vol. 10 No. 5**

The distributed constraint satisfaction problem – formalization and algorithms

*M. Yokoo, E. H. Durfee, T. Ishida and K. Kuwabara*

An extended algebra for constraint databases

*A. Belussi, E. Bertino and B. Catania*

Goal-directed reasoning with ACE-SSM

*M. Benaroch*

Efficient recursive aggregation and negation in deductive databases

*D. B. Kemp and K. Ramamohanarao*

A unified data model for representing multimedia, timeline, and simulation data

*J. D. N. Dionisio and A. F. Cardenas*

Incremental maintenance of materialized object-oriented views in multiview – strategies and performance evaluation

*H. A. Kuno and E. A. Rundensteiner*

Algebraic identities and query optimization in a parametric model for relational temporal databases

*S. K. Gadia and S. S. Nair*

Scaling access to heterogeneous data sources with Disco

*A. Tomasic, L. Raschid and P. Valduriez*

Adaptive prefetching and storage reorganization in a log-structured storage-system

*C. L. Chee, H. J. Lu, H. Tang and C. V. Ramamoorthy*

Database migration – a new architecture for transaction processing in broadband networks

*T. Hara, K. Harumoto, M. Tsukamoto and S. Nishio*

Database reorganization in parallel disk arrays with I/O service stealing

*P. Zabback, I. Onyuksel, P. Scheuermann and*

*G. Weikum*

Effects of update techniques on main memory database system performance

*L. Gruenwald, Y. W. Chen and J. Huang*

Current approaches to handling imperfect information in data and knowledge bases

*S. Parsons*

On satisfiability, equivalence, and implication problems involving conjunctive queries in database-systems

*S. Guo, W. Sun and M. A. Weiss*

## IEEE transactions on pattern analysis and machine intelligence

### Vol. 20 No. 8

#### Articles

Partial classification – the benefit of deferred decision

*Y. Baram*

Fingerprint image-enhancement – algorithm and performance evaluation

*L. Hong, Y. F. Wan and A. Jain*

Hilbert-Schmidt lower bounds for estimators on matrix lie-groups for ATR

*U. Grenander, M. I. Miller and A. Srivastava*

Unsupervised texture segmentation in a deterministic annealing framework

*T. Hofmann, J. Puzicha and J. M. Buhmann*

N-dimensional moment invariants and conceptual mathematical theory of recognition n-dimensional solids

*A. G. Mamistvalov*

The random subspace method for constructing decision forests

*T. K. Ho*

Breakpoint detection using covariance propagation

*Q. Ji and R. M. Haralick*

Identification of man-made regions in unmanned aerial vehicle imagery and videos

*J. L. Solka, D. J. Marchette, B. C. Wallet, V. L. Irwin and G. W. Rogers*

Representation of 3d surfaces by 2 variable Fourier descriptors

*M. F. Wu and H. T. Sheu*

Selecting the optimal focus measure for autofocusing and depth-from-focus

*M. Subbarao and J. K. Tyan*

Large-scale parallel data clustering

*D. Judd, P. K. McKinley and A. K. Jain*

Optical font recognition using typographical features

*A. Zramdini and R. Ingold*

Incremental learning with sample queries

*J. Ratsaby*

An algorithm for finding the largest approximately common substructures of 2 trees

*J. T. L. Wang, B. A. Shapiro, D. Shasha, K. Z. Zhang and K. M. Currey*

### Vol. 20 No. 9

Spatiotemporal segmentation based on region merging

*F. Moscheni, S. Bhattacharjee and M. Kunt*

Close-form solution and parameter selection for convex minimization-based edge-preserving smoothing

*S. Z. Li*

Reducing structure from motion – a general framework for dynamic vision part 1 – modeling

*S. Soatto and P. Perona*

Reducing structure from motion – a general framework for dynamic vision part 2 – implementation and experimental assessment

*S. Soatto and P. Perona*

Revised definition of optical-flow – integration of radiometric and geometric cues for dynamic scene analysis

*S. Negahdaripour*

Similarity and symmetry measures for convex shapes using Minkowski addition

*H. J. A. M. Heijmans and A. V. Tuzikov*

Unconstrained automatic image matching using multiresolutional critical-point filters

*Y. Shinagawa and T. L. Kunii*

Location-based and density-based hierarchical clustering using similarity analysis

*P. Bajcsy and N. Ahuja*

Off-line handwritten Chinese character recognition as a compound Bayes decision problem

*P. K. Wong and C. K. Chan*

### Vol. 20 No. 10

Efficient region tracking with parametric models of geometry and illumination

*G. D. Hager and P. N. Belhumeur*

Scale space derived from b-splines

*Y. P. Wang and S. L. Lee*

Sign of Gaussian curvature from curve orientation in photometric space

*E. Angelopoulou and L. B. Wolff*

Learning local languages and their application to DNA-sequence analysis

*T. Yokomori and S. Kobayashi*

The determination of implicit polynomial canonical curves

*W. A. Wolovich and M. Unel*

Automatic model construction and pose estimation from photographs using triangular splines

*S. Sullivan and J. Ponce*

Secure identification documents via pattern recognition and public-key cryptography

*L. Ogorman and I. Rabinovich*

Text-line extraction and character recognition of document headlines with graphical designs using complementary similarity measure

*M. Sawaki and N. Hagita*

Efficient error-correcting Viterbi parsing

*J. C. Amengual and E. Vidal*

Partial classification can be beneficial even for ideal separation

*Y. Baram*

### Vol. 20 No. 11

Are multilayer perceptrons adequate for pattern-recognition and verification

*M. Gori and F. Scarselli*

Bayesian approaches to Gaussian mixture modeling

*S. J. Roberts, D. Husmeier, I. Rezek and W. Penny*

Intensity-based and gradient-based stereo matching using hierarchical Gaussian basis functions

*G. Q. Wei, W. Brauer and G. Hirzinger*

Primitive features by steering, quadrature, and scale

*T. C. Folsom and R. B. Pinter*

RIEVL – recursive induction learning in hand gesture recognition

*M. Zhao, F. K. H. Quek and X. D. Wu*

Shape evolution with structural and topological changes using blending

*D. Decarlo and D. Metaxas*

Inference of integrated surface, curve, and junction descriptions from sparse 3d data

*C. K. Tang and G. Medioni*

Modeling and classifying symmetries using a multiscale opponent-color representation

*B. Thai and G. Healey*

Graph matching with a dual-step em algorithm

*A. D. J. Cross and E. R. Hancock*

A model of saliency-based visual-attention for rapid scene analysis

*L. Itti, C. Koch and E. Niebur*

Dynamic-programming generation of curves on brain surfaces

*N. Khaneja, M. I. Miller and U. Grenander*

Robust affine structure matching for 3d object recognition

*T. A. Cass*

Alternatives to variable duration HMM in handwriting recognition

*A. Kundu, Y. He and M. Y. Chen*

## IEEE transactions on robotics and automation

**Vol. 14 No. 5**

### Articles

Shortest distance paths for wheeled mobile robots

*J. C. Alexander, J. H. Maddocks and B. A. Michalowski*

Finding the optimal driving path of a car using the modified constrained distance transformation

*S. C. Pei and J. H. Horng*

Topological property for collision-free nonholonomic motion planning – the case of sinusoidal inputs for chained form systems

*S. Sekhavat and J. P. Laumond*

Nonholonomic control of a 3-dof planar underactuated manipulator

*H. Arai, K. Tanie and N. Shiroma*

Mobility of bodies in contact – Part I – a 2nd-order mobility index for multiple-finger grasps

*E. Rimon and J. W. Burdick*

Mobility of bodies in contact – Part II – how forces are generated by curvature effects

*E. Rimon and J. W. Burdick*

Synthesis of robot dynamic behavior for environmental interaction

*G. Prokop and F. Pfeiffer*

Modeling, identification, and control of a pneumatically actuated, force controllable robot

*J. E. Bobrow and B. W. McDonell*

Live constraint-based control for contact transitions

*N. Sarkar, X. P. Yun and R. Ellis*

Fovea – a foveated vergent active stereo vision system for dynamic 3-dimensional scene recovery

*W. N. Klarquist and A. C. Bovik*

Designing robots for optimal performance during repetitive motion

*S. K. Agrawal and T. Veeraklaew*

Potential-based modeling of 3-dimensional workspace for obstacle avoidance

*J. H. Chuang*

An improvement of the Lagrangean relaxation approach for job-shop scheduling – a dynamic programming method

*H. X. Chen, C. B. Chu and J. M. Proth*

A correct and scalable deadlock-avoidance policy for flexible manufacturing systems

*M. A. Lawley, S. A. Reveliotis and P. M. Ferreira*

Autonomous road vehicle guidance from autobahnen to narrow curves

*R. Behringer and N. Muller*

Territorial multirobot task division

*M. Schneiderfontan and M. J. Mataric*

Structural network modeling and control of rigid-body robots

*S. S. Ge and C. C. Hang*

Theory of 2-dimensional transformations

*Y. J. Kanayama and G. W. Krahn*

Quadratic normal forms of redundant robot kinematics with application to singularity avoidance

*K. Tchon*

Constrained optimal fitting of 3-dimensional vector patterns

*G. Calafiore and B. Bona*

## International journal of computer vision

**Vol. 28 No. 3**

### Articles

Rapid anisotropic diffusion using space-variant vision

*B. Fischl, M. A. Cohen and E. L. Schwartz*

Diffeomorphisms groups and pattern-matching in image-analysis

*A. Troune*

Epipolar geometry and linear subspace methods – a new approach to weak calibration

*J. Ponce and Y. Genc*

What is the set of images of an object under all possible illumination conditions

*P. N. Belhumeur and D. J. Kriegman*

Estimating the focus of expansion in analog VLSI

*I. S. McQuirk, B. K. P. Horn, H. S. Lee and J. L. Wyatt*

**Vol. 29 No. 1**

### Articles

Condensation – conditional density propagation for visual tracking

*M. Isard and A. Blake*

Detecting symmetry in grey level images – the global optimization approach

*N. Kiryati and Y. Gofman*

Transfer of fixation using affine structure – extending the analysis to stereo

*S. M. Fairley, I. D. Reid and D. W. Murray*

Robust optic flow computation

*A. Babadiashar and D. Suter*

Reliable and efficient computation of optical flow

*S. H. Lai and B. C. Vemuri*

**Vol. 29 No. 2**

### Articles

Multidimensional morphable models – a framework for representing and matching object classes.

*M. J. Jones and T. Poggio*

Multibody grouping from motion images

*C. W. Gear*

A multibody factorization method for independently moving-objects

*J. P. Costeira and T. Kanade*

**Vol. 29 No. 3**

### Articles

On the importance of being asymmetric in stereopsis – or why we should use skewed parallel cameras

*A. Francisco and F. Bergholm*

A level-set approach to 3d reconstruction from range data

*R. T. Whitaker*

Generalization to novel views – universal, class-based, and model-based processing

*Y. Moses and S. Ullman*

## International journal of intelligent systems

**Vol. 13 No. 9**

### Articles

Stratification for default logic variants

*G. Antoniou*

From ordered beliefs to numbers – how to elicit numbers without asking for them (doable but computationally difficult)

*B. Cloteaux, C. Eick, B. Bouchonmeunier and*

*V. Kreinovich*

Logical inference of clauses based on Petri-net models  
*C. Lin and S. T. Chanson*  
 Reasoning with incomplete information in a multivalued  
 multiway causal tree using the maximum-entropy  
 formalism  
*D. E. Holmes and P. C. Rhodes*  
 Some neural-net realizations of fuzzy-reasoning  
*K. Pal, N. R. Pal and J. Keller*  
**Vol. 13 No. 10**  
 Introduction – genetic fuzzy-systems  
*F. Herrera and L. Magdalena*  
 Genetic-based online learning for fuzzy process-control  
*J. R. Velasco*  
 Artificial evolution of fuzzy rule bases which represent  
 time – a temporal fuzzy classifier system  
*B. Carse, T. C. Fogarty and A. Munro*

Context adaptation in fuzzy processing and genetic  
 algorithms  
*R. Gudwin, F. Gomide and W. Pedrycz*  
 Learning fuzzy control by evolutionary and advantage  
 reinforcements  
*M. U. M. Chowdhury and Y. Li*  
 Fuzzy clustering with evolutionary algorithms  
*F. Klawonn and A. Keller*  
 Crossing unordered sets of rules in evolutionary fuzzy  
 controllers  
*L. Magdalena*  
 Multistage control of a stochastic-system in a fuzzy  
 environment using a genetic algorithm  
*J. Kacprzyk*  
 Genetic learning of fuzzy rule-based classification systems  
 cooperating with fuzzy-reasoning methods  
*O. Cordon, M. J. Deljesus and F. Herrera*

## International journal of software engineering and knowledge engineering

**Vol. 8 No. 3**  
**Workshop on object-oriented real-time dependable systems**  
**(words-97)**  
 A quality of service framework for object-oriented  
 architectures  
*B. Selic*  
 An approach for adaptive fault-tolerance in object-  
 oriented open distributed systems  
*E. Shokri, H. Hecht, P. Crane, J. Dussault and K. H.*  
*Kim*

Incremental verification of architecture specification  
 language for real-time systems  
*J. J. P. Tsai, A. P. Sistla A. Sahay and R. Paul*  
 Sequence specification for concurrent object-oriented  
 applications  
*Y. M. Wang, R. V. Vishnuvajjala and W. T. Tsai*  
 The role of nonmonotonic representations in requirements  
 engineering  
*G. Antoniou*  
 Matching single-sort algebraic specifications for software  
 reuse  
*R. G. Crespo*

## Journal of intelligent & robotic systems

**Vol. 23 No. 1**  
**Articles**  
 Using many-sorted logic in the object-oriented data model  
 for fast robot task planning  
*Y. P. Chien, A. Hudli and M. Palakal*  
 Autonomous intelligent cruise control with actuator  
 delays  
*S. Huang and W. Ren*  
 Robust hybrid control of constrained robot manipulators  
 via decomposed equations  
*J. S. Liu and S. L. Chen*  
 Dynamic effects in statically stable walking machines  
*P. G. Desantos, M. A. Jimenez and M. A. Armada*  
 Control of robots with elastic joints interacting with  
 dynamic environment  
*M. Vukobratovic, V. Matijevic and V. Potkonjak*  
**Vol. 22 Nos. 3–4**  
**Articles**  
 Integration strategies using a modular architecture for  
 mobile robots in the rehabilitation field  
*M. W. Nelisse*  
 Design issues of a semiautonomous robotic assistant for  
 the health-care environment  
*E. Ettelt, R. Furtwangler, U. D. Hanebeck and*  
*G. Schmidt*

Increasing intelligence in autonomous wheelchairs  
*E. Matia, R. Sanz and E. A. Puente*  
 Architectural concepts of a semiautonomous wheelchair  
*U. Borgolte, H. Hoyer, C. Buhler, H. Heck and*  
*R. Hoelper*  
 Self-localization in the senario autonomous wheelchair  
*P. D. Beattie and J. M. Bishop*  
 Man-machine cooperation for the control of an intelligent  
 powered wheelchair  
*G. Bourhis and Y. Agostini*  
 The approximate cell decomposition with local node  
 refinement global path planning method – path nodes  
 refinement and curve parametric interpolation  
*N. I. Katevas, S. G. Tzafestas and C. G. Pnevmatikatos*  
 Feedback-control of an omnidirectional autonomous  
 platform for mobile service robots  
*K. Watanabe, Y. Shiraishi, S. G. Tzafestas, J. Tang and*  
*T. Fukuda*  
 An application platform for the development and  
 experimental validation of mobile robots for health-care  
 purposes  
*O. Buckmann, M. Kromker and U. Berger*  
 A neural approach for the control of piezoelectric  
 micromanipulation robots  
*K. Santa, M. Mews and M. Riedmiller*

## Journal of intelligent manufacturing

**Vol. 9 No. 3**  
**Articles**  
 A review of neural networks for statistical process-control  
*F. Zorriassatine and J. D. T. Tannock*  
 Framework of a machining advisory system with  
 application to face milling processes  
*Y. C. Shin and A. J. Waters*

Integrated knowledge-based Petri-net intelligent flexible  
 assembly planning  
*X. F. Zha, S. Y. E. Lim and S. C. Fok*  
 Knowledge-intensive simulation and its application in the  
 hard-disk drive industry  
*R. Desouza and Z. Z. Ying*

A decision support system for material and manufacturing process selection.

*R. E. Giachetti*

**Vol. 9 No. 4**

Special issue – soft computing approaches to manufacturing

*L. Monostori*

Control of tolerances in turning by predictive control with neural networks

*G. Warnecke and R. Kluge*

Computer assisted manufacturing process optimization with neural networks

*E. Westkamper and T. Schmidt*

An approach to integrating intelligent diagnostics and supervision of machine-tools

*J. Jedrzejewski and W. Kwasny*

Modeling and optimization of grinding processes

*E. Brinksmeier, H. K. Tonshoff, C. Czenkusch and*

*C. Heinzel*

Wavelet networks for sensor signal classification in flank wear assessment

*S. Pittner, S. V. Kamarthi and Q. L. Gao*

Multistrategy learning approaches to generate and tune fuzzy control structures and their application in manufacturing

*C. Egresits, L. Monostori and J. Hornyak*

Simulation based on learning methods

*E. Westkamper, J. Pirron and T. Schmidt*

The challenge of modeling supervisory systems using fuzzy cognitive maps

*C. D. Stylios and P. P. Groumpos*

Concurrent manufacturing of parts and tools for the sheet metal industry

*F. Backes, V. Franke and M. Geiger*

Intelligent computation techniques for process planning of cold-forging

*N. Alberti, R. Dilozenzo, F. Micari, R. Teti,*

*P. Buonadonna and A. Manzoni*

Hybrid genetic algorithms for a multiple objective scheduling problem

*S. Cavalieri and P. Gaiardelli*

Adaptive fuzzy control of mechanical behavior for a 2-degree-of-freedom robotic manipulator

*P. B. Petrovic and V. R. Milacic*

Surface quality control using biocomputational algorithms

*J. Leopold*

## Journal of logic programming

**Vol. 37 Nos. 1–3**

**Special issue – constraint logic programming**

The semantics of constraint logic programs

*J. Jaffar, M. Maher, K. Marriott and P. Stuckey*

A framework to incorporate nonmonotonic reasoning into constraint logic programming

*J. Dix and F. Stolzenburg*

CLP<sub>Z</sub> for automatically proving program properties

*F. Mesnard, S. Hoarau and A. Maillard*

Theory and practice of constraint handling rules

*T. Frühwirth*

Design, implementation, and evaluation of the constraint language CC (FD)

*P. Vanhentenryck, V. Saraswat and Y. Deville*

Dynamic optimization of interval narrowing algorithms

*O. Lhomme, A. Gottlieb and M. Rueher*

Experiments in reactive constraint logic programming

*F. Fages, J. Fowler and T. Sola*

Automated reasoning with a constraint-based metainterpreter

*H. Christiansen*

Mechanizing shared configuration and diagnosis theories through constraint logic programming

*N. Sharma and R. Colomb*

**Vol 38. No. 1**

**Articles**

Return value placement and tail call optimization in high-level languages

*P. A. Bigot and S. Debray*

Efficient access mechanisms for tabled logic programs

*I. V. Ramakrishnan, P. Rao, K. Sagonas, T. Swift and*

*D. S. Warren*

Set constructors, finite sets, and logical semantics

*B. Jayaraman and D. Jana*

Stable inference as intuitionistic validity

*D. Pearce*

Reasoning on constraints in CLP(FD)

*E. Lamma, M. Milano and P. Mello*

## Journal of symbolic computation

**Vol. 26 No. 3**

**Articles**

A constructive description of sagbi bases for polynomial invariants of permutation-groups

*M. Gobel*

An algorithm for computing the integral closure

*T. Dejong*

Algorithms for trigonometric curves (simplification, implicitization, parameterization)

*H. Hong and J. Schicho*

Properties of Grobner bases and applications to doubly periodic arrays

*M. L. Liu and L. Hu*

Construction of linear-systems on hyperelliptic curves

*T. G. Berry*

Computing representations of a Lie Group via the universal enveloping algebra

*P. Feinsilver and R. Schott*

Composing power-series over a finite ring in essentially linear-time

*D. J. Bernstein*

Finding possible permutation characters

*T. Breuer and G. Pfeiffer*

Geometry and structure of lie pseudogroups from infinitesimal defining systems

*I. G. Lisle and G. J. Reid*

Computation of the maximal degree of the inverse of a cubic automorphism of the affine plane with Jacobian-1 via Grobner bases

*M. Fournie, J. P. Furter and D. Pinchon*

**Vol. 26 No. 4**

**Articles**

The Schur-Cohn algorithm revisited

*P. S. Picart*

Strategies for computing minimal free resolutions

*R. Lascaia and M. Stillman*

Reduced Grobner bases under composition

*J. Gutierrez and R. R. Sanmiguel*

An algorithm determining the difference Galois group of 2nd-order linear difference-equations

*P. A. Hendriks*

Factoring in skew-polynomial rings over finite-fields  
*M. Giesbrecht*  
 Classification of Hermitian-forms with the neighbor  
 method  
*A. Schiemann*  
 Efficient algorithms for computing the Jacobi symbol  
*S. M. Eikenberry and J. P. Sorenson*

**Vol. 26 No. 5****Articles**

Algorithmic properties of polynomial rings  
*M. Kalkbrener*  
 Factoring modular polynomials  
*J. Vonzurgathen and S. Hartlieb*  
 A normal form for function rings of piecewise functions  
*M. Vonnahrenschmidt*  
 Infinite convergent string-rewriting systems and cross-  
 sections for finitely presented monoids  
*F. Otto, M. Katsura and Y. Kobayashi*

**Machine learning****Vol. 31 Nos. 1–3****Joint special issue on learning in autonomous robots**

Rapid concept-learning for mobile robots  
*S. Mahadevan, G. Theodorou and N. Khaleeli*  
 A probabilistic approach to concurrent mapping and  
 localization for mobile robots  
*S. Thrun, W. Burgard and D. Fox*  
 Module-based reinforcement learning – experiments with  
 a real robot  
*Z. Kalmar, C. Szepesvari and A. Lorincz*  
 Hierarchical learning of navigational behaviors in an  
 autonomous robot using a predictive sparse distributed-  
 memory  
*R. P. N. Rao and O. Fuentes*  
 Learning from innate behaviors – a quantitative-  
 evaluation of neural-network controllers  
*N. E. Sharkey*  
 Learning from history for behavior-based mobile robots  
 in nonstationary conditions  
*F. Michaud and M. J. Mataric*  
 Self-calibration of the fixation movement of a stereo  
 camera head  
*M. Pagel, E. Mael and C. Vondermalsburg*  
 Emergence and categorization of coordinated visual  
 behavior through embodied interaction  
*L. Berthouze and Y. Kuniyoshi*  
 Training a vision-guided mobile robot  
*G. Wyeth*  
 Learning dexterous manipulation skills for multifingered  
 robot hands using the evolution strategy  
*O. Fuentes and R. C. Nelson*

Learning to recognize and grasp objects

*J. Pauli*

**Vol. 32 No. 1****Articles**

Analytical mean squared error curves for temporal  
 difference learning  
*S. Singh and P. Dayan*  
 The hierarchical hidden Markov model – analysis and  
 applications  
*S. Fine, Y. Singer and N. Tishby*  
 Technical note – using model trees for classification  
*E. Frank, Y. Wang, S. Inglis, G. Holmes and I. H. Witten*  
 Pharmacophore discovery using the inductive logic  
 programming system Progol  
*P. Finn*

**Vol. 32 No. 2****Special issue on context-sensitivity and concept drift**

Robust sensor fusion – analysis and application to audio-  
 visual speech recognition  
*J. R. Movellan and P. Mineiro*  
 Extracting hidden context  
*M. B. Harries, C. Sammut and K. Horn*  
 Tracking the best disjunction  
*P. Auer and M. K. Warmuth*  
 Tracking the best expert  
*M. Herbster and M. K. Warmuth*  
 Statistical-mechanics of online learning of drifting  
 concepts – a variational approach  
*R. Vicente, O. Kinouchi and N. Caticha*

**New generation computing****Vol. 16 No. 4****Articles**

A Lotos based tutorial on formal methods for object-  
 oriented distributed systems  
*H. Bowman*

Nondeterminism and weak constraints in datalog

*S. Greco*

How to realize LSE narrowing

*A. Werner, A. Bockmayr and S. Krischer*
