GIB versus Bridge Baron

M. Ginsberg

GIB versus Bridge Baron – Reply

D. S. Nau and S. J. J. Smith

Multiagent systems

K. Sycara

AI growing up – The changes and opportunities

J. F. Allen

The DARPA high-performance knowledge bases project

P. Cohen, R. Schrag, E. Jones, A. Pense, A. Lin,

B. Starr, D. Gunning and M. Burke

The naive physics perplex

E. Davis

Building of a corporate memory for traffic-accident analysis

R. Dieng, A. Giboin, C. Amerge, O. Corby, S. Despres, L. Alpay, S. Labidi and S. Lapalut

A generic framework for constraint-directed search and scheduling

J. C. Beck and M. S. Fox

The 1998 Simon Newcomb Award

P. Hayes and K. Ford

Applied artificial intelligence

Vol. 13 Nos. 1–2

Special issue: Multiagent systems

Multiagent treatment of agenthood

M. N. Huhns and M. P. Singh

Role of obligations in multiagent coordination.

M. Barbuceanu, T. Gray and S. Mankovski

Agent-based approach for manufacturing integration:

The CIIMPLEX experience

Y. Peng, T. Finin, Y. Labrou, R. S. Cost, B. Chu, J. Long,

W. J. Tolone and A. Boughannam

Distributed scheduling to support a call center: A cooperative multiagent approach

F. M. T. Brazier, C. M. Jonker, F. J. Jungen and J. Treur

The Open Agent Architecture: A framework for building distributed software systems

D. L. Martin, A. J. Cheyer and D. B. Moran

ZEUS: A toolkit for building distributed multiagent systems

H. S. Nwana, D. T. Ndumu, L. C. Lee and J. C. Collis

Visualization and debugging of distributed multiagent systems.

D. T. Ndumu, H. S. Nwana, L. C. Lee and H. R. Haynes

Applied intelligence

Vol. 9 No. 3

Articles

Evolutionary learning of modular neural networks with genetic programming

S. B. Cho and K. Shimohara

A recency inference engine for connectionist knowledge bases

A. Z. Ghalwash

Incremental feature selection

H. A. Liu and R. Setiono

A fuzzy diagnostic model and its application in automotive engineering diagnosis

Y. Lu, T. Q. Chen and B. Hamilton

Expert system hardware for fault detection

M. R. Gomez, J. E. Ventosa and G. A. Aramendia

Artificial intelligence

Vol. 104 Nos. 1–2

Articles

Reaching agreements through argumentation – a logical model and implementation

S. Kraus, K. Sycara and A. Evenchik

Model-based diagnostics and probabilistic assumption-based reasoning

J. Kohlas, B. A. Anrig, R. Haenni and P. A. Monney

Formalizing narratives using nested circumscription

C. Baral, A. Gabaldon and A. Provetti

Combining Horn rules and description logics in Carin

A. Y. Levy and M. C. Rousset

Generating multiple new designs from a sketch

T. F. Stahovich, R. Davis and H. Shrobe

Why Godel's theorem cannot refute computationalism

G. Laforte, P. J. Hayes and K. M. Ford

A probabilistic framework for memory-based reasoning

S. Kasif, S. Salzberg, D. Waltz, J. Rachlin and D. W. Aha

The expressive power of circumscription

T. Costello

An algorithm for finding maps for belief networks through cost-based abduction

A. M. Abdelbar

Reasoning about actions – steady versus stabilizing state constraints

M. Thielscher

Vol. 105 Nos. 1–2**Articles**

Concurrency and knowledge-level communication in agent languages

M. Gaspari

Empirically-derived estimates of the complexity of labeling line-drawings of polyhedral scenes

P. Parodi, R. Lancewicki, A. Vijh and J. K. Tsotsos

Rough computational methods for information-systems

J. W. Guan and D. A. Bell

On first-order conditional logics

J. P. Delgrande

Detecting geometric infeasibility

A. Schweikard and F. Schwarzer

On the relations between intelligent backtracking and failure-driven explanation-based learning in constraint satisfaction and planning

Artificial intelligence review**Vol. 12 No. 6****Articles**

Operational concepts of nonmonotonic logics – Part 2:

Autepistemic logic

G. Antoniou and V. Sperschneider

Connectionist learning in behaviour-based mobile robots:

A survey

M. Rylatt, C. Czarnecki and T. Routen

Towards an intelligent tutoring system architecture that supports remedial tutoring

J. Siemer and M. C. Angelides

Computers and artificial intelligence**Vol. 17 No. 5****Special issue on parallel programming environments and tools**

Edpepps – an environment for optimal parallel software-design

T. Delaitre, M. J. Zemerly, G. R. Justo, J. Bourgeois and

S. C. Winter

Grade – a graphical programming environment for multicomputers

P. Kacsuk, G. Doza, T. Fadgyas and R. Lovas

Using DDBG to support testing and high-level debugging interfaces

J. C. Cunha, J. Lourenco and V. Duarte

Integrated static and dynamic analysis of PVM programs with steps

H. Krawczyk, B. Wiszniewski, P. Kuzora, M. Neyman and J. Proficz

Performance prediction of parallel systems by simulation

E. Luque, R. Suppi, T. Margalef, J. Sorribes,

P. Hernandez, E. Cesar, M. Serrano, C. Ortet, F. Cores and J. Falguera

Hybrid approach to task allocation in distributed systems

L. Hluchy, M. Dobrucky and J. Astalos

Mapping and dynamic load-balancing strategies for parallel programming

A. Ripoll, M. A. Senar, A. Cortes and E. Luque

Solving the task-scheduling problem using a parallel genetic algorithm implemented with GRADE

T. Kalinowski

Extending GRADE towards explicit process synchronization in parallel programs

M. Tudruj and P. Kacsuk

Vol. 17 No. 6**Articles**

Knowledge interpolation: A simple approach to rapid symbolic reasoning

N. Chatterjee and J. A. Campbell

PM-colonies

C. Martin Vide and G. Paun

A unified approach to fast computation of discrete sinusoidal transforms. I: DCT and DST transforms

V. Britanak

Computing the singular values of a complex matrix using one-sided Jacobi method on the Intel-Paragon machine

S. Robert

Engineering applications of artificial intelligence

Vol. 11 No. 4

Articles

Interaction between physical and design knowledge in design from physical principles

N. M. Sgouros

Combining objects and planning paradigms for human skeleton animation

A. Koukam and H. Fourar

An expert-system for troubleshooting in a picture archiving and communication system

M. Wiltgen

From a rule-based to a predictive qualitative model-based approach using automated model generation – application to the monitoring and diagnosis of biological processes

K. Bousson, J. Steyer, L. Travemassuyes and B. Dahhou

Learning control design for a class of nonlinear-systems

H. L. Du and S. S. Nair

Semi-mechanistic modeling of chemical processes with neural networks

H. A. B. T. Braake, H. J. L. Vancan and H. B. Verbruggen

Tuning of a neuro-fuzzy controller by genetic algorithms with an application to a coupled-tank liquid-level control-system

S. T. Lian, K. Marzuki and Y. Rubiyah

Color-blindness plate recognition using a neuro-fuzzy approach

Y. H. Kuo and J. P. Hsu

An architectural framework for the construction of hybrid intelligent forecasting systems – application for electricity demand prediction

N. Lertpalangsunti and C. W. Chan

Towards optimizing construction-method selection-strategies using genetic algorithms

O. O. Ugwu and J. H. M. Tah

Application of design parameters space search for belt conveyor design

S. S. Tsalidis and A. J. Dentsoras

Vol. 11 No. 5

Special issue: Computational intelligence applied to materials processing: Design, control and discovery

M. Gaudreault

Computational intelligence applied to materials processing: Design, control and discovery – Preface

S. R. LeClair and Y. H. Pao

Combined use of computational intelligence and materials data for on-line monitoring and control of MBE experiments

Z. Meng, Q. Yang, P. C. Yip, K. G. Eyink, W. T. Taferner and B. Igel'nik

Development of a neural network model for a cold rolling process

J. S. Gunasekera, Z. J. Jia, J. C. Malas and L. Rabelo

Processing of soft matter and composites: integration of material sensors with process models and intelligent control algorithms

J. F. Maguire, M. A. Miller and S. Venketesan

In-situ control of chemical vapor deposition for fiber coating

J. G. Jones, P. D. Jero and P. H. Garrett

Emission spectral-component monitoring and fuzzy-logic control of pulsed-laser deposition process

R. R. Biggers, J. G. Jones, I. Maartense, J. D. Busbee, D. Dempsey, D. Liptak, D. Lubbers, C. Varanasi and D. Mast

Towards in situ monitoring of YBCO T-c and J(c) via neural network mapping of Raman spectral peaks

J. D. Busbee, B. Igel'nik, D. Liptak, R. R. Biggers and I. Maartense

Growing multilayer gradient thin films via in situ neurocomputing

S. J. P. Laube, A. A. Voevodin, K. D. Keener and S. R. LeClair

Visualization and the understanding of multidimensional data

Y. H. Pao and Z. Meng

KDPAG expert system applied to materials design and manufacture

N. Y. Chen, C. H. Li and P. Qin

Computational intelligence methods for process discovery

R. Cass and J. DePietro

Vol. 11 No. 6

Articles

Neural networks for real-time industrial control applications – Preface

M. Q. H. Meng and M. Rao

Applying hybrid artificial intelligence techniques in wastewater treatment

C. H. Wen and C. A. Vassiliadis

Track-following control of a dual-stage hard disk drive using a neuro-control system

M. Sasaki, T. Suzuki, E. Ida, F. Fujisawa, M. Kobayashi and H. Hirai

On-line robust identification of tool-wear via multi-sensor neural-network fusion

Y. Quan, M. Zhou and Z. Luo

An artificial neural network for nonlinear estimation of the turbine flow-meter coefficient

J. T. Luxhoj

Neural network control for direct-drive robot mechanisms

R. Safaric, K. Jezernik and M. Pec

An on-line wastewater quality predication system based on a time-delay neural network

J. B. Zhu, J. Zurcher, M. Rao and M. Q. H. Meng

Intelligent on-line system identification using a blackboard system

J. C. Readle and R. M. Henry

Deriving a transient stability index by neural networks for power-system security assessment

S. K. Tso, X. P. Gu, Q. Y. Zeng and K. L. Lo

Fuzzy arithmetic-based interpolative reasoning for nonlinear dynamic fuzzy systems

M. Setnes, H. R. V. Lemke and U. Kaymak

Expert systems with applications

Vol. 15 Nos. 3–4

Special issue: The 4th World Congress on Expert Systems

Learning concepts from data

D. Michie

Virtual learning spaces in distance education: tools for the EVA project

A. Guzman and G. Nunez Esquer

Expert systems in the context of multi-brain systems

J. Negrete Martinez

Explicit schematic information in knowledge representation and acquisition

X. D. Wu

An intelligent system for problem analysis in organizations

J. Cardenosa, C. Juarez and G. Pastor

Knowledge acquisition and knowledge representation with class: the object-oriented paradigm

S. Walczak

- A refinement framework to support validation and maintenance of knowledge-based systems
N. P. Zlatareva
- QUE: explanation through exploration
D. P. Metzler and C. J. Martincic
- A multi-functional knowledge based system to learn, apply and consult procedures
P. R. deBuen, S. Vadera and E. F. Morales
- A tool-supported approach to inter-tabular verification
J. Vanthienen, C. Mues, G. Wets and K. Delaere
- A framework for the analysis of dynamic processes based on Bayesian networks and case-based reasoning
M. A. Barrientos and J. E. Vargas
- Coordination and communication issues in multi-agent expert system: concurrent configuration design advisor
A. S. Koulinitich and L. B. Sheremetov
- Development of medical decision support system for leukemia management
Y. M. Chae, Q. Park, K. S. Park and M. Young
- Probabilistic temporal reasoning and its application to fossil power plant operation
G. Arroyo Figueroa, L. E. Sucar and A. Villavicencio
- Interactive structural learning of Bayesian networks
L. E. Sucar and M. Martinez Arroyo
- Some issues on scalable feature selection
H. A. Liu and R. Setiono
- Structure abstractions in retrieval of analogical software models
B. Tessem
- An alternative model of genetic algorithms as learning machines
A. Kuri
- The revision of inductive learning theory within incomplete and imprecise observations
A. M. Martinez Enriquez and G. Eschalada Imaz
- Conceptual clustering on partitioned data: Tree-Weaver
S. Yoo and J. Yoo
- An initial comparison of a fuzzy neural classifier and a decision tree based classifier
J. Martens, G. Wets, J. Vanthienen and C. Mues
- Fuzzy expert system for real-time process condition monitoring and incident prevention
E. B. Feng, H. B. Yang and M. Rao
- Uncertainty in cellular fuzzy handover
C. Garcia Gaytan, D. Munoz Rodriguez and R. Soto
- Handwritten digit recognition by means of a holographic associative memory
O. Mayora Ibarra and F. Curatelli
- Ranking importance of input parameters of neural networks
A. H. Sung
- The VirBot: a virtual reality robot driven with multimodal commands
J. Savage Carmona, M. Billinghamurst and A. Holden
- Mobile robot path planning and tracking using simulated annealing and fuzzy logic control
H. Martinez Alfaro and S. Gomez Garcia

IEEE transactions on knowledge and data engineering

Vol. 10 No. 6

Articles

- Data and knowledge management in multimedia systems
P. B. Berra and A. Ghafoor
- Knowledge-based image retrieval with spatial and temporal constructs
W. W. Chu, C. C. Hsu, A. F. Cardenas and R. K. Taira
- Fast and effective retrieval of medical tumor shapes
P. F. Korn, N. Sidiropoulos, C. Faloutsos, E. Siegel and Z. Protopoulos
- Supporting ranked Boolean similarity queries in MARS
M. Ortega, Y. Rui, K. Chakrabarti, K. Porkaew, S. Mehrotra and T. S. Huang
- Data resource selection in distributed visual information systems
W. Chang, G. Sheikholeslami, J. Wang and A. Zhang
- WVTDB – A semantic content-based video database system on the World Wide Web
H. T. Jiang and A. K. Elmagarmid
- Automatic composition techniques for video production
G. Ahanger and T. D. C. Little
- Video content management in consumer devices
N. Dimitrova, T. McGee, H. Elenbaas and J. Martino
- A multistep approach for shape similarity search in image databases
M. Ankerst, H. P. Kriegel and T. Seidl
- Reducing the storage requirements of a perfect hash function
P. DiFelice and U. Madama
- Objective vs. subjective measures of error-proneness for rule-based programs
T. T. Moores

IEEE transactions on neural networks

Vol. 9 No. 6

Articles

- The truth will come to light – directions and challenges in extracting the knowledge embedded within trained artificial neural networks
A. B. Tickle, R. Andrews, M. Golea and J. Diederich
- On the approximation of stochastic-processes by approximate identity neural networks
C. Turchetti, M. Conti, P. Crippa and S. Orcioni
- On the closure of the set of functions that can be realized by a given multilayer perceptron
M. Gori, F. Scarselli and A. C. Tsoi
- TMLNN – triple-valued or multiple-valued logic neural-network
G. Y. Wang and H. B. Shi
- Periodic symmetrical functions, serial addition, and multiplication with neural networks
S. Cotofana and S. Vassiliadis
- Efficient algorithms for function approximation with piecewise-linear sigmoidal networks
D. R. Hush and B. Horne
- 2 efficient connectionist schemes for structure preserving dimensionality reduction
N. R. Pal and V. K. Eluri
- Shape-adaptive radial basis functions
A. R. Webb and S. Shannon
- A new approach to artificial neural networks
B. D. Baptista, E. L. L. Cabral and A. J. Soares
- CARVE – a constructive algorithm for real-valued examples
S. Young and T. Downs
- A tight bound on concept-learning
H. Takahashi and H. Z. Gu
- Rough fuzzy MLP – knowledge encoding and classification
M. Banerjee, S. Mitra and S. K. Pal
- Autonomous learning of sequential tasks – experiments and analyzes
R. Sun and T. Peterson

- Vector quantization of neural networks
W. C. Chu and N. K. Bose
- Asymptotic distributions associated to OJAS learning equation for neural networks
J. P. Delmas and J. F. Cardoso
- A class of competitive learning-models which avoids neuron underutilization problem
C. S. T. Choy and W. C. Siu
- Self-organizing feature maps with self-adjusting learning parameters
K. Haese
- Comparing neural networks – a benchmark on growing neural gas, growing cell structures, and fuzzy artmap
D. Heinke and F. H. Hamker
- Searching for optimal frame patterns in an integrated TDMA communication-system using mean-field annealing
G. S. Wang and N. Ansari
- Neural techniques for combinatorial optimization with applications
K. Smith, M. Palaniswami and M. Krishnamoorthy
- Optimal Hopfield network for combinatorial optimization with linear cost function
S. Matsuda
- A general methodology for designing globally convergent optimization neural networks
Y. S. Xia and J. Wang
- Convergence analysis of a discrete-time recurrent neural-network to perform quadratic real optimization with bound constraints
M. J. Perezilzarbe
- Competitive neural trees for pattern-classification
S. Behnke and N. B. Karayiannis
- A nonlinear discriminant algorithm for feature-extraction and data classification
C. S. Cruz and J. R. Dorronsoro
- Dynamic overload control for distributed call processors using the neural-network method
S. Wu and K. Y. M. Wong
- Neural approximations for infinite-horizon optimal-control of nonlinear stochastic-systems
T. Parisini and R. Zoppoli
- A neural approach for control of nonlinear-systems with feedback linearization
S. L. He, K. Reif and R. Unbehauen
- Neural-network-based control design – an LMI approach
S. Limanond and J. Si
- Modular recurrent neural networks for mandarin syllable recognition
S. H. Chen and Y. F. Liao
- Nonlinear blind equalization schemes using complex-valued multilayer feedforward neural networks
C. You and D. Hong
- Comparative-study of stock trend prediction using time-delay, recurrent and probabilistic neural networks
E. W. Saad, D. V. Prokhorov and D. C. Wunsch
- Scalenet – multiscale neural-network architecture for time-series prediction
A. B. Geva
- Analog VLSI circuits as physical structures for perception in early visual tasks
L. Raffo, S. P. Sabatini, G. M. Bo and G. M. Bisio
- A common neural-network model for unsupervised exploratory data-analysis and independent component analysis
M. Girolami, A. Cichocki and S. Amari
- Reinforcement learning to train a cooperative network with both discrete and continuous output neurons
S. Yamada, M. Nakashima and S. Shiono
- Generalizing CMAC architecture and training
F. J. Gonzalez-serrano, A. R. Figueirasvidal and A. Artesrodriguez
- Prediction limit estimation for neural-network models
R. B. Chinnam and J. Ding
- A gradual neural-network algorithm for jointly time-slot code assignment problems in packet radio networks
N. Funabiki and J. Kitamichi
- Comments on functional equivalence between radial basis function networks and fuzzy inference systems
H. C. Andersen, A. Lotfi and L. C. Westphal
- Comments on functional equivalence between radial basis function networks and fuzzy inference systems – reply
J. S. R. Jang
- Model transitions in descending FLVQ
A. Baraldi, P. Blonda, F. Parmiggiani, G. Pasquariello and G. Satalino
- Vol. 10 No. 1**
- Articles**
- Challenges and changes
J. M. Zurada
- Function approximation with spiked random networks
E. Gelenbe, Z. H. Mao and Y. D. Li
- Linear independence of internal representations in multilayer perceptrons
J. V. Shah and C. S. Poon
- The ensemble approach to neural-network learning and generalization
B. IgelNIK, Y. H. Pao, S. R. Le Clair and C. Y. Shen
- Representation and generalization properties of class-entropy networks
S. Ridella, S. Rovetta and R. Zunino
- Dynamic tunneling technique for efficient training of multilayer perceptrons
P. Roy Chowdhury, Y. P. Singh and R. A. Chansarkar
- Training data development with the D-optimality criterion
M. H. Choueiki and C. A. Mount Campbell
- Analysis for a class of winner-take-all model
J. P. F. Sum, C. S. Leung, P. K. S. Tam, G. H. Young, W. K. Kan and L. W. Chan
- Extended Hopfield models for combinatorial optimization
A. LeGall and V. Zissimopoulos
- A recurrent neural network for real-time semidefinite programming
D. C. Jiang and J. Wang
- A neural-network architecture for syntax analysis
C. H. Chen and V. Honavar
- Planning with a functional neural-network architecture
D. A. Panagiotopoulos, R. W. Newcomb and S. K. Singh
- Discrete-time CMAC NN control of feedback linearizable nonlinear systems under a persistence of excitation
S. Jagannathan
- A study of cloud classification with neural networks using spectral and textural features
B. Tian, M. A. Shaikh, M. R. Azimi Sadjadi, T. H. Vonderhaar and D. L. Reinke
- Structurally adaptive modular networks for nonstationary environments
V. Ramamurti and J. Ghosh
- On the Kalman filtering method in neural-network training and pruning
J. Sum, C. S. Leung, G. H. Young and W. K. Kan
- On-line stabilization of block-diagonal recurrent neural networks
S. C. Sivakumar, W. Robertson and W. J. Phillips
- Borrowing channel assignment strategies based on heuristic techniques for cellular systems
H. G. Sandalidis, P. P. Stavroulakis and J. Rodriguez Tellez
- Selective retrieval of memory and concept sequences through neuro-windows
H. Kakeya and Y. Okabe
- Degree of familiarity ART2 in knowledge-based landmine detection
A. Filippidis, L. C. Jain and P. Lozo
- Hierarchical overlapped SOM's for pattern classification
P. N. Suganthan

A 'mutual updatee' training algorithm for fuzzy adaptive logic control/decision network (FALCON)

S. Altug, H. J. Trussell M. Y. Chow

Automated labeling for unsupervised neural networks: A hierarchical approach

R. Tagliaferri, N. Capuano and G. Gargiulo

Density-based clustering with topographic maps

M. M. VanHulle

Against the convergence of the minor component analysis neurons

A. Taleb and G. Cirrincione

IEEE transactions on pattern analysis and machine intelligence

Vol. 20 No. 11

Articles

Are multilayer perceptrons adequate for pattern-recognition and verification

M. Gori and F. Scarselli

Bayesian approaches to Gaussian mixture modeling

S. J. Roberts, D. Husmeier, I. Rezek and W. Penny

Intensity-based and gradient-based stereo matching using hierarchical Gaussian-basis functions

G. Q. Wei, W. Brauer and G. Hirzinger

Primitive features by steering, quadrature, and scale

T. C. Folsom and R. B. Pinter

RIEVL – recursive induction learning in hand gesture recognition

M. Zhao, F. K. H. Quek and X. D. Wu

Shape evolution with structural and topological changes using blending

D. Decarlo and D. Metaxas

Inference of integrated surface, curve, and junction descriptions from sparse 3d data

C. K. Tang and G. Medioni

Modeling and classifying symmetries using a multiscale opponent-color representation

B. Thai and G. Healey

Graph matching with a dual-step EM algorithm

A. D. J. Cross and E. R. Hancock

A model of saliency-based visual-attention for rapid scene analysis

L. Itti, C. Koch and E. Niebur

Dynamic-programming generation of curves on brain surfaces

N. Khaneja, M. I. Miller and U. Grenander

Robust affine structure matching for 3d object recognition

T. A. Cass

Alternatives to variable duration HMM in handwriting recognition

A. Kundu, Y. He and M. Y. Chen

Vol. 20 No. 12

Articles

A variable window approach to early vision

Y. Boykov, O. Veksler and R. Zabih

Integrating faces and fingerprints for personal identification

L. Hong and A. Jain

Convex multiresolution analysis

P. L. Combettes and J. C. Pesquet

Bayesian function learning using MCMC methods

P. Magni, R. Bellazzi and G. Denicolao

Adaptive normalization of handwritten characters using global/local affine transformation

T. Wakahara and K. Odaka

Bayesian classification with Gaussian processes

C. K. I. Williams and D. Barber

Dynamic scale model construction from range imagery

A. Hoover, D. Goldgof and K. W. Bowyer

On the accuracy of Zernike moments for image-analysis

S. X. Liao and M. Pawlak

Modeling textured images using generalized long correlation models

J. Bennett and A. Khotanzad

Real-time American sign language recognition using desk and wearable computer-based video

T. Starner, J. Weaver and A. Pentland

Robust image corner detection through curvature scale-space

F. Mokhtarian and R. Suomela

A Bayesian framework for deformable pattern-recognition with application to handwritten character-recognition

K. W. Cheung, D. Y. Yeung and R. T. Chin

Parallelizing image feature-extraction on coarse-grain machines

Y. W. Chung and V. K. Prasanna

Vol. 21 No. 1

Articles

Sampling of images for efficient model-based vision

M. Akra, L. Bazzi and S. Mitter

Game theoretic integration for image segmentation

A. Chakraborty and J. S. Duncan

Fitting curves and surfaces with constrained implicit polynomials

D. Keren and C. Gotsman

Adaptive nonlocal filtering: A fast alternative to anisotropic diffusion for image enhancement

B. Fischl and E. L. Schwartz

Automated B-spline curve representation incorporating MDL and error-minimizing control point insertion strategies

T. J. Cham and R. Cipolla

A linear algorithm for motion from three weak perspective images using Euler angles

G. Xu and N. Sugimoto

Algebraic and geometric tools to compute projective and permutation invariants

G. Csürka and O. Faugeras

Active vision for complete scene reconstruction and exploration

E. Marchand and F. Chaumette

Online recognition of handwritten Hiragana characters based upon a complex autoregressive model

Y. Nakatani, D. Sasaki, Y. Iiguni and H. Maeda

Lexicon-driven handwritten word recognition using optimal linear combinations of order statistics

W. T. Chen, P. Gader and H. C. Shi

Feature extraction from wavelet coefficients for pattern recognition tasks

S. Pittner and S. V. Kamathi

A VLSI architecture for real-time edge linking

A. Hajjar and T. Chen

IEEE transactions on robotics and automation

Vol. 14 No. 6

Articles

On constraints in assembly planning

R. E. Jones, R. H. Wilson and T. L. Calton

Geometric algorithms for workpiece localization

Z. X. Li, J. B. Gou and Y. X. Chu

Genetic reinforcement learning approach to the heterogeneous machine scheduling problem

G. H. Kim and G. S. G. Lee

Adaptive motor control to aid mobile robot trajectory execution in the presence of changing system parameters

M. D. Adams

Minimum uncertainty explorations in the self-localization of mobile robots

G. Borghi and V. Caglioti

Optimal motion planning for multiple robots having independent goals

S. M. LaValle and S. A. Hutchinson

Behavior-based formation control for multirobot teams

T. Balch and R. C. Arkin

Adaptive augmented state feedback control for an experimental planar two-link flexible manipulator

M. L. Bai, D. H. Zhou and H. Schwarz

Planning for camera-guided robotic radiosurgery

A. Schweikard, M. Bodduluri and J. R. Adler

Experimental results from internal odometry error correction with the OmniMate mobile robot

J. Borenstein

Vision-based navigation by a mobile robot with obstacle avoidance using single-camera vision and ultrasonic sensing

A. Ohya, A. Kosaka and A. Kak

A phase management framework for event-driven dextrous manipulation

J. M. Hyde and M. R. Cutkosky

International journal of computer vision

Vol. 29 No. 3

Articles

A multibody factorization method for independently moving-objects

J. P. Costeira and T. Kanade

On the importance of being asymmetric in stereopsis – or why we should use skewed parallel cameras

A. Francisco and F. Bergholm

A level-set approach to 3d reconstruction from range data

R. T. Whitaker

Generalization to novel views – universal, class-based, and model-based processing

Y. Moses and S. Ullman

Vol. 30 No. 1

Articles

Reduced multilinear constraints: Theory and experiments

A. Heyden

The tractability of segmentation and scene analysis

M. C. Cooper

Global and local active contours for head boundary extraction

S. R. Gunn and M. S. Nixon

Improved diffuse reflection models for computer vision

L. B. Wolff, S. K. Nayar and M. Oren

Vol. 30 No. 2

Articles

Feature detection with automatic scale selection

T. Lindeberg

Edge detection and ridge detection with automatic scale selection

T. Lindeberg

Vol. 30 No. 3

Articles

Exploiting discontinuities in optical flow

W. B. Thompson

Performance analysis of maximum likelihood estimator for recovery of depth from defocused images and optimal selection of camera parameters

A. N. Rajagopalan and S. Chaudhuri

Three-dimensional human body model acquisition from multiple views

I. A. Kakadiaris and D. Metaxas

Relaxing the triangle inequality in pattern matching

R. Fagin and L. Stockmeyer

International journal of intelligent systems

Vol. 13 No. 12

Special issue: Multimedia computing systems

Collaborative multimedia documents – authoring and presentation

K. S. Candan, B. Prabhakaran and S. Subrahmanian

Optimization issues in multimedia systems

C. C. Aggarwal, J. L. Wolf and P. S. Yu

A parallel disk storage-system for real-time multimedia applications

R. Muntz, J. R. Santos and S. Berson

Operating system support for distributed multimedia

D. K. Y. Yau and S. S. Lam

Analysis of multipoint videoconferencing under reroutable route-configuration assignment

T. K. Chan and T. S. P. Yum

Vol. 14 No. 1

Special issue: Decision theory in a fuzzy environment

Recursive connective rules

V. Cutello and J. Montero

Solving a decision problem with graded rewards

J. A. Herencia and M. T. Lamata

Qualitative possibility theory and its applications to constraint satisfaction and decision under uncertainty

D. Dubois and H. Prade

Soft consensus and network dynamics in group decision making

M. Fedrizzi, M. Fedrizzi and R. A. M. Pereira

Involving objective and subjective aspects in multistage decision making and control under fuzziness: Dynamic programming and neural networks

J. Kacprzyk, R. A. Romero and F. A. C. Gomide

A decision making approach to relevance feedback in information retrieval: A model based on soft consensus dynamics

G. Pasi and R. A. M. Pereira

Vol. 14 No. 2

Articles

A generalized OWA operator

P. A. Schaefer and H. B. Mitchell

Pattern recognition with evidential knowledge

M. A. Vila and M. Delgado

A state space analysis of propose-and-revise

J. Angele and R. Studer

On the semantics of qualitative attributes in knowledge elicitation

A. Valls and V. Torra

A fuzzy Kth ordered statistic

P. A. Schaefer, H. B. Mitchell and D. D. Estrakh

International journal of software engineering and knowledge engineering

Vol. 8 No. 3

Workshop on object-oriented real-time dependable systems (WORDS-97)

A quality of service framework for object-oriented architectures

B. Selic

An approach for adaptive fault-tolerance in object-oriented open distributed systems

E. Shokri, H. Hecht, P. Crane, J. Dussault and K. H. Kim

Incremental verification of architecture specification language for real-time systems

J. J. P. Tsai, A. P. Sistla, A. Sahay and R. Paul

Sequence specification for concurrent object-oriented applications

Y. M. Wang, R. V. Vishnavajjala and W. T. Tsai

The role of nonmonotonic representations in requirements engineering

G. Antoniou

Matching single-sort algebraic specifications for software reuse

R. G. Crespo

Journal of intelligent & robotic systems

Vol. 23 Nos. 2-4

Special issue: Neural, fuzzy and genetic techniques in robotics and control

Robust backstepping control of robotic systems using neural networks

S. Jagannathan and F. L. Lewis

A reactive neuromorphic controller for local robot navigation

M. B. Zaremba and E. Porada

Velocity estimation for robot manipulators using neural network

S. P. Chan

Reinforcement learning and robust control for robot compliance tasks

C. P. Kuan and K. Y. Young

Multi-modal information integration for interactive multi-agent systems

T. Yamaguchi, M. Sato and T. Takagi

Sensor fusion system using Recurrent Fuzzy Inference

F. Kobayashi, F. Arai, T. Fukuda, K. Shimojima,

M. Onoda and N. Marui

Application of fuzzy logic for the solution of inverse kinematics and hierarchical controls of robotic manipulators

D. W. Howard and A. Zilouchian

Neuro-fuzzy model-based control

D. Matko, K. Kavsek Biasizzo and J. Kocijan

Adaptive neuro-fuzzy control system by RBF and GRNN neural networks

T. L. Seng, M. Khalid, R. Yusof and S. Omatu

Neural and neurofuzzy FELA adaptive robot control using feedforward and counterpropagation networks

S. G. Tzafestas and G. G. Rigatos

Contact friction compensation for robots using genetic learning algorithms

D. C. Liaw and J. T. Huang

Collision-free Cartesian trajectory generation using raster scanning and genetic algorithms

A. C. Nearchou and N. A. Aspragathos

Fuzzy-enhanced adaptive control for flexible drive system with friction using genetic algorithms

L. C. Lin and Y. J. Lin

Journal of intelligent manufacturing

Vol. 9 No. 4

Special issue – soft computing approaches to manufacturing

Control of tolerances in turning by predictive control with neural networks

G. Warnecke and R. Kluge

Computer-assisted manufacturing process optimization with neural networks

E. Westkamper and T. Schmidt

An approach to integrating intelligent diagnostics and supervision of machine-tools

J. Jedrzejewski and W. Kwasny

Modeling and optimization of grinding processes

E. Brinksmeier, H. K. Tonshoff, C. Czenkusch and

C. Heinzel

Wavelet networks for sensor signal classification in flank wear assessment

S. Pittner, S. V. Kamarthi and Q. L. Gao

Multistrategy learning approaches to generate and tune fuzzy control-structures and their application in manufacturing

C. Egresits, L. Monostori and J. Hornyak

Simulation-based on learning-methods

E. Westkamper, J. Pirron and T. Schmidt

The challenge of modeling supervisory systems using fuzzy cognitive maps

C. D. Stylios and P. P. Groumpos

Concurrent manufacturing of parts and tools for the sheet-metal industry

F. Backes, V. Franke and M. Geiger

Intelligent computation techniques for process planning of cold-forging

N. Alberti, R. Dilozenzo, F. Micari, R. Teti,

P. Buonadonna and A. Manzoni

Hybrid genetic algorithms for a multiple-objective scheduling problem

S. Cavaleri and P. Gaiardelli

Adaptive fuzzy control of mechanical-behavior for a 2-degree-of-freedom robotic manipulator

P. B. Petrovic and V. R. Milacic

Surface quality-control using biocomputational algorithms

J. Leopold

The development of an enterprise resources planning system using a hierarchical design pyramid

J. K. C. Ng, W. H. Ip and T. C. Lee

Vol. 9 No. 5

Articles

GEORG: VLSI circuit partitioner with a new genetic algorithm framework

B. R. Moon, Y. S. Lee and C. K. Kim

Machine planning for manufacturing: dynamic resource allocation and on-line supervisory control

B. Harris, F. Lewis and D. J. Cook

Management of imprecision and uncertainty for production activity control

B. Grabot and L. Geneste

Diagnosis of tool wear based on cutting forces and acoustic emission measures as inputs to a neural network

K. Jemielniak, L. Kwiatkowski and P. Wrzosek

A CORBA-based agent-driven design for distributed intelligent manufacturing systems

M. Lei, X. H. Yang, M. M. Tseng and S. Z. Yang

Computerized relational model for powder technology: powder and process selection

A. Radwan and M. H. Es Saheb

Dimension and tolerance modeling and transformations in feature based design and manufacturing

J. J. Shah, Y. Yan and B. C. Zhang

Vol. 9 No. 6

Special issue: Applications of AI to production engineering
AI paradigms

A. Caplinskas

An integrated intelligent process planning system (IIPPS) for machining

K. S. Wang

Production management as a constraint satisfaction problem

M. Syrjanen

Intelligent diagnosis and maintenance management

E. Lihovd, T. I. Johannssen, C. Steinebach and

M. Rasmussen

An expert system for engine fault diagnosis: development and application

H. L. Gelgele and K. S. Wang

Causal domain model driven knowledge acquisition for expert diagnosis system development

J. Grundspenkis

Formal specification and analysis of distributed systems

H. Pranavicius

Information modelling: foundation, abstraction mechanisms and approach

K. A. Jorgensen

Journal of logic programming

Vol. 38 No. 2

Articles

A general modal framework for the Event Calculus and its skeptical and credulous variants

I. Cervesato and A. Montanari

Automatic compile-time parallelization of logic programs for restricted, goal level, and independent parallelism

K. Muthukumar, F. Bueno, M. G. de la Banda and

M. Hermenegildo

External problems in logic programming and stable model computation

P. Cholewinski and M. Truszczynski

Termination of well-moded programs

S. Etalle, A. Bossi and N. Cocco

Vol. 38 No. 3

Articles

Steadfast logic programs.

K. K. Lau, M. Ornaghi and S. A. Tarnlund

Constructive negation under the well-founded semantics.

J. Y. Liu, L. Adams and W. D. Chen

LogiMOO: an extensible multi-user virtual world with natural language control

P. Tarau, K. De Bosschere, V. Dahl and S. Rochefort

Efficient goal directed bottom-up evaluation of logic programs

M. Codish

Sharing is optimal

A. Cortesi and G. File

Journal of symbolic computation

Vol. 26 No. 6

Special issue on symbolic numeric algebra for polynomials

On approximate GCDS of univariate polynomials

N. K. Karmarkar and Y. N. Lakshman

Nearest singular polynomials

L. H. Zhi and W. D. Wu

When are 2 numerical polynomials relatively prime

B. Beckermann and G. Labahn

A fast and numerically stable euclidean-like algorithm for detecting relatively prime numerical polynomials

B. Beckermann and G. Labahn

Computing the isolated roots by matrix-methods

B. Mourrain

A symbolic-numerical method for finding a real solution of an arbitrary system of nonlinear algebraic equations

Q. N. Tran

Remarks on automatic algorithm stabilization

K. Shirayanagi and M. Sweedler

Numerical Schubert calculus

B. Huber, F. Sottile and B. Sturmfels

Riemann surfaces, plane algebraic-curves and their period matrices

P. Gianni, M. Seppala, R. Silhol and B. Trager

Vol. 27 No. 1

Articles

Computing automatic coset systems and subgroup presentations

D. F. Holt and D. F. Hurt

A polynomial time algorithm for diophantine equations in one variable

F. Cucker, P. Koiran and S. Smale

SAGBI and SAGBI-Grobner bases over principal ideal domains

W. W. Adams, S. Hosten, P. Loustau and J. L. Miller

A unified approach to linear and nonlinear normal forms for Hamiltonian systems

R. C. Churchill and M. Kummer

Knowledge-based systems

Vol. 11 No. 1

Articles

Knowledge-based systems 10 years on – foreword

E. Edmonds

Special issue, intelligent user

P. Johnson, L. Terveen and J. Marks

Cyberdesk – a framework for providing self-integrating context-aware services

A. K. Dey, G. D. Abowd and A. Wood

Integrating user-interface agents with conventional applications

H. Lieberman

Webpersona – a lifelike presentation agent for the world-wide-web

E. Andre, T. Rist and J. Muller

Adaptive forms – an interaction technique for entering structured data

M. R. Frank and P. Szekely

Software architecture critics in the argo design environment

J. E. Robbins and D. F. Redmiles

Experimental evaluation of intelligent assistance for navigation

R. Stamant, T. Long and M. S. Dulberg

Vol. 11 No. 2**Special issue: Conceptual modeling – an essential pillar for quality software-development**

A rule-based process model for cooperative software projects – tailoring and testing a software process to be used on the web.

H. L. Hausen

A lightweight web-at-a-glance system for intelligent information-retrieval

T. Catarci, S. K. Chang, W. Liu and G. Santucci

Requirements for the knowledge-based support of software engineering measurement plans

C. Gresse and L. C. Briand

Common framework for the evaluation process of KBS and conventional software

N. Juristo and J. L. Morant

Vol. 11 Nos. 3–4**Articles**

Knowledge-based data generation

H. Dettmar, X. H. Liu, R. Johnson and A. Payne

Extending the superimposed codeword indexing scheme to handle incomplete information

M. H. Williams and K. F. Wong

Conflict group decision training: model and system

Z. G. Hai

An optimized and enhanced cognitive memory model for mechanical design problems

I. Zeid and C. G. Chinnappa

Integration of neural networks and expert systems for microscopic wear particle analysis

K. Xu, A. R. Luxmoore, L. M. Jones and F. Deravi

Embedding critics in decision-making environments to reduce human errors

T. Mezher, M. A. AbdulMalak and B. Maarouf

An incremental retrieval mechanism for case-based electronic fault diagnosis

P. Cunningham, B. Smyth and A. Bonzano

Rough set extension of TCL for data mining

G. Griffin and Z. Chen

Vol. 11 Nos. 5–6**Special issue: Expert Systems '97**

The omnipresence of case-based reasoning in science and application

D. W. Aha

Concept dispersion, feature interaction and their effect on particular sources of bias in machine learning

K. Nazar and M. A. Bramer

A hierarchical case representation using context guided retrieval
